IDENTIFIERS	*Americans with Disabilities Act 1990

ABSTRACT

Documents pertaining to the legislative history of Public Law 101-336, the Americans with Disabilities Act, are compiled. The compilation begins with the text of the law (which is designed to prohibit discrimination on the basis of disability) including its five titles (employment, public services, public accommodations and services operated by private entities, telecommunications, and miscellaneous provisions). The compilation also includes: (1) House of Representatives Report 101-596, the Conference Committee report; (2) Senate Report 101-116 in which the Committee on Labor and Human Resources recommend passage of the bill as amended; (3) House of Representatives Report 101-485 (Parts 1-4) in which the Committee on Public Works and Transportation, Committee on Education and Labor, Committee on the Judiciary, and Committee on Energy and Commerce recommend passage of the bill as amended, together with dissenting views; (4) selected floor debate transcripts from the Congressional Record; (5) regulations, statutes, and court cases cited in the House and Senate reports; (6) rules and regulations concerning nondiscrimination on basis of disability in programs and activities receiving federal financial assistance, reprinted from the Federal Register (May 4, 1977); (7) effective dates of statutory provisions; and (8) disablity-related tax provisions related to businesses. Transcripts of six hearings pertaining to Public Law 101-336 are compiled in volume 2 dating from September 27-October 6, 1988. The hearings contain prepared statements and testimony from members of Congress; representatives of government agencies, voluntary agencies, higher education institutions, and businesses; and concerned citizens. Volume 3, is a compilation of seven hearings on Public Law 101-336 dating from August 3-September 26, 1989. The hearings contain: the text of the bill; opening statements and prepared statements from members of Congress; witnesses' testimony; and prepared statements and letters from government officials, representatives of voluntary agencies and businesses, lawyers, and others. EXPLANATORY STATEMENT

This Committee Print is a compilation of the documents pertaining to the legislative history of Public Law 101-336, the Americans With Disabilities Act. This major piece of civil rights legislation, passed overwhelmingly by the Congress, is designed finally to extend full rights to a significant segment of our population who have been denied equal access for too long. It is good for persons with disabilities and good for America.

In order to facilitate implementation of the Act, and an understanding of its many provisions and their interaction, the Committee on Education and Labor has compiled these documents. It is our hope that by distributing the reports and legislative history which accompanied this landmark legislation, we will be providing a service to all Americans.

Sincerely,

AUGUSTUS F. HAWKINS

PUBLIC LAW 101-336

Public Law 101-336
101st Congress

An Act

To establish a clear and comprehensive prohibition of discrimination on the basis of disability.

July 26, 1990
[S. 933]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Americans with Disabilities Act of 1990.

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

42 USC 12101 note.

(a) SHORT TITLE.—This Act may be cited as the "Americans with Disabilities Act of 1990".

(b) TABLE OF CONTENTS.—The table of contents is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Findings and purposes.
Sec. 3. Definitions.

TITLE I—EMPLOYMENT

Sec. 101. Definitions.
Sec. 102. Discrimination.
Sec. 103. Defenses.
Sec. 104. Illegal use of drugs and alcohol.
Sec. 105. Posting notices.
Sec. 106. Regulations.
Sec. 107. Enforcement.
Sec. 108. Effective date.

TITLE II—PUBLIC SERVICES

Subtitle A—Prohibition Against Discrimination and Other Generally Applicable Provisions

Sec. 201. Definition.
Sec. 202. Discrimination.
Sec. 203. Enforcement.
Sec. 204. Regulations.
Sec. 205. Effective date.

Subtitle B—Actions Applicable to Public Transportation Provided by Public Entities Considered Discriminatory

PART I—PUBLIC TRANSPORTATION OTHER THAN BY AIRCRAFT OR CERTAIN RAIL OPERATIONS

Sec. 221. Definitions.
Sec. 222. Public entities operating fixed route systems.
Sec. 223. Paratransit as a complement to fixed route service.
Sec. 224. Public entity operating a demand responsive system.
Sec. 225. Temporary relief where lifts are unavailable.
Sec. 226. New facilities.
Sec. 227. Alterations of existing facilities.
Sec. 228. Public transportation programs and activities in existing facilities and one car per train rule.
Sec. 229. Regulations.
Sec. 230. Interim accessibility requirements.
Sec. 231. Effective date.

PART II—PUBLIC TRANSPORTATION BY INTERCITY AND COMMUTER RAIL

Sec. 241. Definitions.
Sec. 242. Intercity and commuter rail actions considered discriminatory.
Sec. 243. Conformance of accessibility standards.

BEST COPY AVAILABLE

Sec. 244. Regulations.
Sec. 245. Interim accessibility requirements.
Sec. 246. Effective date.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

Sec. 301. Definitions.
Sec. 302. Prohibition of discrimination by public accommodations.
Sec. 303. New construction and alterations in public accommodations and commercial facilities.
Sec. 304. Prohibition of discrimination in specified public transportation services provided by private entities.
Sec. 305. Study.
Sec. 306. Regulations.
Sec. 307. Exemptions for private clubs and religious organizations.
Sec. 308. Enforcement.
Sec. 309. Examinations and courses.
Sec. 310. Effective date.

TITLE IV—TELECOMMUNICATIONS

Sec. 401. Telecommunications relay services for hearing-impaired and speech-impaired individuals.
Sec. 402. Closed-captioning of public service announcements.

TITLE V—MISCELLANEOUS PROVISIONS

Sec. 501. Construction.
Sec. 502. State immunity.
Sec. 503. Prohibition against retaliation and coercion.
Sec. 504. Regulations by the Architectural and Transportation Barriers Compliance Board.
Sec. 505. Attorney's fees.
Sec. 506. Technical assistance.
Sec. 507. Federal wilderness areas.
Sec. 508. Transvestites.
Sec. 509. Coverage of Congress and the agencies of the legislative branch.
Sec. 510. Illegal use of drugs.
Sec. 511. Definitions.
Sec. 512. Amendments to the Rehabilitation Act.
Sec. 513. Alternative means of dispute resolution.
Sec. 514. Severability.

42 USC 12101

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) some 43,000,000 Americans have one or more physical or mental disabilities, and this number is increasing as the population as a whole is growing older;

(2) historically, society has tended to isolate and segregate individuals with disabilities, and, despite some improvements, such forms of discrimination against individuals with disabilities continue to be a serious and pervasive social problem;

(3) discrimination against individuals with disabilities persists in such critical areas as employment, housing, public accommodations, education, transportation, communication, recreation, institutionalization, health services, voting, and access to public services;

(4) unlike individuals who have experienced discrimination on the basis of race, color, sex, national origin, religion, or age, individuals who have experienced discrimination on the basis of disability have often had no legal recourse to redress such discrimination;

(5) individuals with disabilities continually encounter various forms of discrimination, including outright intentional exclusion, the discriminatory effects of architectural, transportation, and communication barriers, overprotective rules and policies,

failure to make modifications to existing facilities and practices, exclusionary qualification standards and criteria, segregation, and relegation to lesser services, programs, activities, benefits, jobs, or other opportunities;

(6) census data, national polls, and other studies have documented that people with disabilities, as a group, occupy an inferior status in our society, and are severely disadvantaged socially, vocationally, economically, and educationally;

(7) individuals with disabilities are a discrete and insular minority who have been faced with restrictions and limitations, subjected to a history of purposeful unequal treatment, and relegated to a position of political powerlessness in our society, based on characteristics that are beyond the control of such individuals and resulting from stereotypic assumptions not truly indicative of the individual ability of such individuals to participate in, and contribute to, society;

(8) the Nation's proper goals regarding individuals with disabilities are to assure equality of opportunity, full participation, independent living, and economic self-sufficiency for such individuals; and

(9) the continuing existence of unfair and unnecessary discrimination and prejudice denies people with disabilities the opportunity to compete on an equal basis and to pursue those opportunities for which our free society is justifiably famous, and costs the United States billions of dollars in unnecessary expenses resulting from dependency and nonproductivity.

(b) PURPOSE.—It is the purpose of this Act—

(1) to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities;

(2) to provide clear, strong, consistent, enforceable standards addressing discrimination against individuals with disabilities;

(3) to ensure that the Federal Government plays a central role in enforcing the standards established in this Act on behalf of individuals with disabilities; and

(4) to invoke the sweep of congressional authority, including the power to enforce the fourteenth amendment and to regulate commerce, in order to address the major areas of discrimination faced day-to-day by people with disabilities.

SEC. 3. DEFINITIONS. 42 USC 12102

As used in this Act:

(1) AUXILIARY AIDS AND SERVICES.—The term "auxiliary aids and services" includes—

(A) qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments;

(B) qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments;

(C) acquisition or modification of equipment or devices; and

(D) other similar services and actions.

(2) DISABILITY.—The term "disability" means, with respect to an individual—

(A) a physical or mental impairment that substantially limits one or more of the major life activities of such individual;

(B) a record of such an impairment; or

(C) being regarded as having such an impairment.

(3) **State.**—The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

TITLE I—EMPLOYMENT

42 USC 12111.

SEC. 101. DEFINITIONS.

As used in this title:

(1) **Commission.**—The term "Commission" means the Equal Employment Opportunity Commission established by section 705 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-4).

(2) **Covered entity.**—The term "covered entity" means an employer, employment agency, labor organization, or joint labor-management committee.

(3) **Direct threat.**—The term "direct threat" means a significant risk to the health or safety of others that cannot be eliminated by reasonable accommodation.

(4) **Employee.**—The term "employee" means an individual employed by an employer.

(5) **Employer.**—

(A) **In general.**—The term "employer" means a person engaged in an industry affecting commerce who has 15 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding calendar year, and any agent of such person, except that, for two years following the effective date of this title, an employer means a person engaged in an industry affecting commerce who has 25 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding year, and any agent of such person.

(B) **Exceptions.**—The term "employer" does not include—

(i) the United States, a corporation wholly owned by the government of the United States, or an Indian tribe; or

(ii) a bona fide private membership club (other than a labor organization) that is exempt from taxation under section 501(c) of the Internal Revenue Code of 1986.

(6) **Illegal use of drugs.**—

(A) **In general.**—The term "illegal use of drugs" means the use of drugs, the possession or distribution of which is unlawful under the Controlled Substances Act (21 U.S.C. 812). Such term does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

(B) **Drugs.**—The term "drug" means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act.

(7) Person, etc.—The terms "person", "labor organization", "employment agency", "commerce", and "industry affecting commerce", shall have the same meaning given such terms in section 701 of the Civil Rights Act of 1964 (42 U.S.C. 2000e).

(8) Qualified individual with a disability.—The term "qualified individual with a disability" means an individual with a disability who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires. For the purposes of this title, consideration shall be given to the employer's judgment as to what functions of a job are essential, and if an employer has prepared a written description before advertising or interviewing applicants for the job, this description shall be considered evidence of the essential functions of the job.

(9) Reasonable accommodation.—The term "reasonable accommodation" may include—

(A) making existing facilities used by employees readily accessible to and usable by individuals with disabilities; and

(B) job restructuring, part-time or modified work schedules, reassignment to a vacant position, acquisition or modification of equipment or devices, appropriate adjustment or modifications of examinations, training materials or policies, the provision of qualified readers or interpreters, and other similar accommodations for individuals with disabilities.

(10) Undue hardship.—

(A) In general.—The term "undue hardship" means an action requiring significant difficulty or expense, when considered in light of the factors set forth in subparagraph (B).

(B) Factors to be considered.—In determining whether an accommodation would impose an undue hardship on a covered entity, factors to be considered include—

(i) the nature and cost of the accommodation needed under this Act;

(ii) the overall financial resources of the facility or facilities involved in the provision of the reasonable accommodation; the number of persons employed at such facility; the effect on expenses and resources, or the impact otherwise of such accommodation upon the operation of the facility;

(iii) the overall financial resources of the covered entity; the overall size of the business of a covered entity with respect to the number of its employees; the number, type, and location of its facilities; and

(iv) the type of operation or operations of the covered entity, including the composition, structure, and functions of the workforce of such entity; the geographic separateness, administrative, or fiscal relationship of the facility or facilities in question to the covered entity.

SEC. 102. DISCRIMINATION.

42 USC 12112.

(a) General Rule.—No covered entity shall discriminate against a qualified individual with a disability because of the disability of such individual in regard to job application procedures, the hiring, advancement, or discharge of employees, employee compensation, job training, and other terms, conditions, and privileges of employment.

(b) Construction.—As used in subsection (a), the term "discriminate" includes—

(1) limiting, segregating, or classifying a job applicant or employee in a way that adversely affects the opportunities or status of such applicant or employee because of the disability of such applicant or employee;

(2) participating in a contractual or other arrangement or relationship that has the effect of subjecting a covered entity's qualified applicant or employee with a disability to the discrimination prohibited by this title (such relationship includes a relationship with an employment or referral agency, labor union, an organization providing fringe benefits to an employee of the covered entity, or an organization providing training and apprenticeship programs);

(3) utilizing standards, criteria, or methods of administration—

(A) that have the effect of discrimination on the basis of disability; or

(B) that perpetuate the discrimination of others who are subject to common administrative control;

(4) excluding or otherwise denying equal jobs or benefits to a qualified individual because of the known disability of an individual with whom the qualified individual is known to have a relationship or association;

(5)(A) not making reasonable accommodations to the known physical or mental limitations of an otherwise qualified individual with a disability who is an applicant or employee, unless such covered entity can demonstrate that the accommodation would impose an undue hardship on the operation of the business of such covered entity; or

(B) denying employment opportunities to a job applicant or employee who is an otherwise qualified individual with a disability, if such denial is based on the need of such covered entity to make reasonable accommodation to the physical or mental impairments of the employee or applicant;

(6) using qualification standards, employment tests or other selection criteria that screen out or tend to screen out an individual with a disability or a class of individuals with disabilities unless the standard, test or other selection criteria, as used by the covered entity, is shown to be job-related for the position in question and is consistent with business necessity; and

(7) failing to select and administer tests concerning employment in the most effective manner to ensure that, when such test is administered to a job applicant or employee who has a disability that impairs sensory, manual, or speaking skills, such test results accurately reflect the skills, aptitude, or whatever other factor of such applicant or employee that such test purports to measure, rather than reflecting the impaired sensory, manual, or speaking skills of such employee or applicant (except where such skills are the factors that the test purports to measure).

(c) Medical Examinations and Inquiries.—

(1) In general.—The prohibition against discrimination as referred to in subsection (a) shall include medical examinations and inquiries.

(2) Preemployment.—

(A) Prohibited examination or inquiry.—Except as provided in paragraph (3), a covered entity shall not conduct a medical examination or make inquiries of a job applicant as to whether such applicant is an individual with a disability or as to the nature or severity of such disability.

(B) Acceptable inquiry.—A covered entity may make preemployment inquiries into the ability of an applicant to perform job-related functions.

(3) Employment entrance examination.—A covered entity may require a medical examination after an offer of employment has been made to a job applicant and prior to the commencement of the employment duties of such applicant, and may condition an offer of employment on the results of such examination, if—

(A) all entering employees are subjected to such an examination regardless of disability;

(B) information obtained regarding the medical condition or history of the applicant is collected and maintained on separate forms and in separate medical files and is treated as a confidential medical record, except that—

(i) supervisors and managers may be informed regarding necessary restrictions on the work or duties of the employee and necessary accommodations;

(ii) first aid and safety personnel may be informed, when appropriate, if the disability might require emergency treatment; and

(iii) government officials investigating compliance with this Act shall be provided relevant information on request; and

(C) the results of such examination are used only in accordance with this title.

(4) Examination and inquiry.—

(A) Prohibited examinations and inquiries.—A covered entity shall not require a medical examination and shall not make inquiries of an employee as to whether such employee is an individual with a disability or as to the nature or severity of the disability, unless such examination or inquiry is shown to be job-related and consistent with business necessity.

(B) Acceptable examinations and inquiries.—A covered entity may conduct voluntary medical examinations, including voluntary medical histories, which are part of an employee health program available to employees at that work site. A covered entity may make inquiries into the ability of an employee to perform job-related functions.

(C) Requirement.—Information obtained under subparagraph (B) regarding the medical condition or history of any employee are subject to the requirements of subparagraphs (B) and (C) of paragraph (3).

SEC. 103. DEFENSES.

42 USC 12113.

(a) In General.—It may be a defense to a charge of discrimination under this Act that an alleged application of qualification standards, tests, or selection criteria that screen out or tend to screen out or otherwise deny a job or benefit to an individual with a disability has been shown to be job-related and consistent with business necessity,

BEST COPY AVAILABLE

and such performance cannot be accomplished by reasonable accommodation, as required under this title.

(b) Qualification Standards.—The term "qualification standards" may include a requirement that an individual shall not pose a direct threat to the health or safety of other individuals in the workplace.

(c) Religious Entities.—

(1) In general.—This title shall not prohibit a religious corporation, association, educational institution, or society from giving preference in employment to individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its activities.

(2) Religious tenets requirement.—Under this title, a religious organization may require that all applicants and employees conform to the religious tenets of such organization.

(d) List of Infectious and Communicable Diseases.—

(1) In general.—The Secretary of Health and Human Services, not later than 6 months after the date of enactment of this Act, shall—

(A) review all infectious and communicable diseases which may be transmitted through handling the food supply;

(B) publish a list of infectious and communicable diseases which are transmitted through handling the food supply;

(C) publish the methods by which such diseases are transmitted; and

Public information.

(D) widely disseminate such information regarding the list of diseases and their modes of transmissability to the general public.

Such list shall be updated annually.

(2) Applications.—In any case in which an individual has an infectious or communicable disease that is transmitted to others through the handling of food, that is included on the list developed by the Secretary of Health and Human Services under paragraph (1), and which cannot be eliminated by reasonable accommodation, a covered entity may refuse to assign or continue to assign such individual to a job involving food handling.

(3) Construction.—Nothing in this Act shall be construed to preempt, modify, or amend any State, county, or local law, ordinance, or regulation applicable to food handling which is designed to protect the public health from individuals who pose a significant risk to the health or safety of others, which cannot be eliminated by reasonable accommodation, pursuant to the list of infectious or communicable diseases and the modes of transmissability published by the Secretary of Health and Human Services.

42 USC 12114.

SEC. 104. ILLEGAL USE OF DRUGS AND ALCOHOL.

(a) Qualified Individual With a Disability.—For purposes of this title, the term "qualified individual with a disability" shall not include any employee or applicant who is currently engaging in the illegal use of drugs, when the covered entity acts on the basis of such use.

(b) Rules of Construction.—Nothing in subsection (a) shall be construed to exclude as a qualified individual with a disability an individual who—

(1) has successfully completed a supervised drug rehabilitation program and is no longer engaging in the illegal use of drugs, or has otherwise been rehabilitated successfully and is no longer engaging in such use;

(2) is participating in a supervised rehabilitation program and is no longer engaging in such use; or

(3) is erroneously regarded as engaging in such use, but is not engaging in such use;

except that it shall not be a violation of this Act for a covered entity to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual described in paragraph (1) or (2) is no longer engaging in the illegal use of drugs.

(c) Authority of Covered Entity.—A covered entity—

(1) may prohibit the illegal use of drugs and the use of alcohol at the workplace by all employees;

(2) may require that employees shall not be under the influence of alcohol or be engaging in the illegal use of drugs at the workplace;

(3) may require that employees behave in conformance with the requirements established under the Drug-Free Workplace Act of 1988 (41 U.S.C. 701 et seq.);

(4) may hold an employee who engages in the illegal use of drugs or who is an alcoholic to the same qualification standards for employment or job performance and behavior that such entity holds other employees, even if any unsatisfactory performance or behavior is related to the drug use or alcoholism of such employee; and

(5) may, with respect to Federal regulations regarding alcohol and the illegal use of drugs, require that—

(A) employees comply with the standards established in such regulations of the Department of Defense, if the employees of the covered entity are employed in an industry subject to such regulations, including complying with regulations (if any) that apply to employment in sensitive positions in such an industry, in the case of employees of the covered entity who are employed in such positions (as defined in the regulations of the Department of Defense);

(B) employees comply with the standards established in such regulations of the Nuclear Regulatory Commission, if the employees of the covered entity are employed in an industry subject to such regulations, including complying with regulations (if any) that apply to employment in sensitive positions in such an industry, in the case of employees of the covered entity who are employed in such positions (as defined in the regulations of the Nuclear Regulatory Commission); and

(C) employees comply with the standards established in such regulations of the Department of Transportation, if the employees of the covered entity are employed in a transportation industry subject to such regulations, including complying with such regulations (if any) that apply to employment in sensitive positions in such an industry, in the case of employees of the covered entity who are employed in such positions (as defined in the regulations of the Department of Transportation).

(d) Drug Testing.—

(1) In general.—For purposes of this title, a test to determine the illegal use of drugs shall not be considered a medical examination.

(2) Construction.—Nothing in this title shall be construed to encourage, prohibit, or authorize the conducting of drug testing for the illegal use of drugs by job applicants or employees or making employment decisions based on such test results.

(e) Transportation Employees.—Nothing in this title shall be construed to encourage, prohibit, restrict, or authorize the otherwise lawful exercise by entities subject to the jurisdiction of the Department of Transportation of authority to—

(1) test employees of such entities in, and applicants for, positions involving safety-sensitive duties for the illegal use of drugs and for on-duty impairment by alcohol; and

(2) remove such persons who test positive for illegal use of drugs and on-duty impairment by alcohol pursuant to paragraph (1) from safety-sensitive duties in implementing subsection (c).

42 USC 12115

SEC. 105. POSTING NOTICES.

Every employer, employment agency, labor organization, or joint labor-management committee covered under this title shall post notices in an accessible format to applicants, employees, and members describing the applicable provisions of this Act, in the manner prescribed by section 711 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–10).

42 USC 12116.

SEC. 106. REGULATIONS.

Not later than 1 year after the date of enactment of this Act, the Commission shall issue regulations in an accessible format to carry out this title in accordance with subchapter II of chapter 5 of title 5, United States Code.

42 USC 12117

SEC. 107. ENFORCEMENT.

(a) Powers, Remedies, and Procedures.—The powers, remedies, and procedures set forth in sections 705, 706, 707, 709, and 710 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-4, 2000e-5, 2000e-6, 2000e-8, and 2000e-9) shall be the powers, remedies, and procedures this title provides to the Commission, to the Attorney General, or to any person alleging discrimination on the basis of disability in violation of any provision of this Act, or regulations promulgated under section 106, concerning employment.

(b) Coordination.—The agencies with enforcement authority for actions which allege employment discrimination under this title and under the Rehabilitation Act of 1973 shall develop procedures to ensure that administrative complaints filed under this title and under the Rehabilitation Act of 1973 are dealt with in a manner that avoids duplication of effort and prevents imposition of inconsistent or conflicting standards for the same requirements under this title and the Rehabilitation Act of 1973. The Commission, the Attorney General, and the Office of Federal Contract Compliance Programs shall establish such coordinating mechanisms (similar to provisions contained in the joint regulations promulgated by the Commission and the Attorney General at part 42 of title 28 and

Regulations.

part 1691 of title 29, Code of Federal Regulations, and the Memorandum of Understanding between the Commission and the Office of Federal Contract Compliance Programs dated January 16, 1981 (46 Fed. Reg. 7435, January 23, 1981)) in regulations implementing this title and Rehabilitation Act of 1973 not later than 18 months after the date of enactment of this Act.

SEC. 108. EFFECTIVE DATE. 42 USC 12111 note.

This title shall become effective 24 months after the date of enactment.

TITLE II—PUBLIC SERVICES

Subtitle A—Prohibition Against Discrimination and Other Generally Applicable Provisions

SEC. 201. DEFINITION. 42 USC 12131.

As used in this title:

(1) Public entity.—The term "public entity" means—

(A) any State or local government;

(B) any department, agency, special purpose district, or other instrumentality of a State or States or local government; and

(C) the National Railroad Passenger Corporation, and any commuter authority (as defined in section 103(8) of the Rail Passenger Service Act).

(2) Qualified individual with a disability.—The term "qualified individual with a disability" means an individual with a disability who, with or without reasonable modifications to rules, policies, or practices, the removal of architectural, communication, or transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a public entity.

SEC. 202. DISCRIMINATION. 42 USC 12132.

Subject to the provisions of this title, no qualified individual with a disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by any such entity.

SEC. 203. ENFORCEMENT. 42 USC 12133.

The remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be the remedies, procedures, and rights this title provides to any person alleging discrimination on the basis of disability in violation of section 202.

SEC. 204. REGULATIONS. 42 USC 12134.

(a) In General.—Not later than 1 year after the date of enactment of this Act, the Attorney General shall promulgate regulations in an accessible format that implement this subtitle. Such regulations shall not include any matter within the scope of the authority of the Secretary of Transportation under section 223, 229, or 244.

(b) **Relationship to Other Regulations.**—Except for "program accessibility, existing facilities", and "communications", regulations under subsection (a) shall be consistent with this Act and with the coordination regulations under part 41 of title 28, Code of Federal Regulations (as promulgated by the Department of Health, Education, and Welfare on January 13, 1978), applicable to recipients of Federal financial assistance under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794). With respect to "program accessibility, existing facilities", and "communications", such regulations shall be consistent with regulations and analysis as in part 39 of title 28 of the Code of Federal Regulations, applicable to federally conducted activities under such section 504.

(c) **Standards.**—Regulations under subsection (a) shall include standards applicable to facilities and vehicles covered by this subtitle, other than facilities, stations, rail passenger cars, and vehicles covered by subtitle B. Such standards shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504(a) of this Act.

42 USC 12131 note

SEC. 205. EFFECTIVE DATE.

(a) **General Rule.**—Except as provided in subsection (b), this subtitle shall become effective 18 months after the date of enactment of this Act.

(b) **Exception.**—Section 204 shall become effective on the date of enactment of this Act.

Subtitle B—Actions Applicable to Public Transportation Provided by Public Entities Considered Discriminatory

PART I—PUBLIC TRANSPORTATION OTHER THAN BY AIRCRAFT OR CERTAIN RAIL OPERATIONS

42 USC 12141

SEC. 221. DEFINITIONS.

As used in this part:

(1) **Demand responsive system.**—The term "demand responsive system" means any system of providing designated public transportation which is not a fixed route system.

(2) **Designated public transportation.**—The term "designated public transportation" means transportation (other than public school transportation) by bus, rail, or any other conveyance (other than transportation by aircraft or intercity or commuter rail transportation (as defined in section 241)) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

(3) **Fixed route system.**—The term "fixed route system" means a system of providing designated public transportation on which a vehicle is operated along a prescribed route according to a fixed schedule.

(4) **Operates.**—The term "operates", as used with respect to a fixed route system or demand responsive system, includes operation of such system by a person under a contractual or other arrangement or relationship with a public entity.

(5) Public school transportation.—The term "public school transportation" means transportation by schoolbus vehicles of schoolchildren, personnel, and equipment to and from a public elementary or secondary school and school-related activities.

(6) Secretary.—The term "Secretary" means the Secretary of Transportation.

SEC. 222. PUBLIC ENTITIES OPERATING FIXED ROUTE SYSTEMS.

42 USC 12142.

(a) Purchase and Lease of New Vehicles.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity which operates a fixed route system to purchase or lease a new bus, a new rapid rail vehicle, a new light rail vehicle, or any other new vehicle to be used on such system, if the solicitation for such purchase or lease is made after the 30th day following the effective date of this subsection and if such bus, rail vehicle, or other vehicle is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(b) Purchase and Lease of Used Vehicles.—Subject to subsection (c)(1), it shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity which operates a fixed route system to purchase or lease, after the 30th day following the effective date of this subsection, a used vehicle for use on such system unless such entity makes demonstrated good faith efforts to purchase or lease a used vehicle for use on such system that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(c) Remanufactured Vehicles.—

(1) General rule.—Except as provided in paragraph (2), it shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity which operates a fixed route system—

(A) to remanufacture a vehicle for use on such system so as to extend its usable life for 5 years or more, which remanufacture begins (or for which the solicitation is made) after the 30th day following the effective date of this subsection; or

(B) to purchase or lease for use on such system a remanufactured vehicle which has been remanufactured so as to extend its usable life for 5 years or more, which purchase or lease occurs after such 30th day and during the period in which the usable life is extended;

unless, after remanufacture, the vehicle is, to the maximum extent feasible, readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) Exception for historic vehicles.—

(A) General rule.—If a public entity operates a fixed route system any segment of which is included on the National Register of Historic Places and if making a vehicle of historic character to be used solely on such segment readily accessible to and usable by individuals with disabilities would significantly alter the historic character of such vehicle, the public entity only has to make (or to purchase or lease a remanufactured vehicle with) those modifications which are necessary to meet the requirements of paragraph

(1) and which do not significantly alter the historic character of such vehicle.

(B) VEHICLES OF HISTORIC CHARACTER DEFINED BY REGULATIONS.—For purposes of this paragraph and section 228(b), a vehicle of historic character shall be defined by the regulations issued by the Secretary to carry out this subsection.

42 USC 12143.

SEC. 223. PARATRANSIT AS A COMPLEMENT TO FIXED ROUTE SERVICE.

(a) GENERAL RULE.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity which operates a fixed route system (other than a system which provides solely commuter bus service) to fail to provide with respect to the operations of its fixed route system, in accordance with this section, paratransit and other special transportation services to individuals with disabilities, including individuals who use wheelchairs, that are sufficient to provide to such individuals a level of service (1) which is comparable to the level of designated public transportation services provided to individuals without disabilities using such system; or (2) in the case of response time, which is comparable, to the extent practicable, to the level of designated public transportation services provided to individuals without disabilities using such system.

(b) ISSUANCE OF REGULATIONS.—Not later than 1 year after the effective date of this subsection, the Secretary shall issue final regulations to carry out this section.

(c) REQUIRED CONTENTS OF REGULATIONS.—

(1) ELIGIBLE RECIPIENTS OF SERVICE.—The regulations issued under this section shall require each public entity which operates a fixed route system to provide the paratransit and other special transportation services required under this section—

(A)(i) to any individual with a disability who is unable, as a result of a physical or mental impairment (including a vision impairment) and without the assistance of another individual (except an operator of a wheelchair lift or other boarding assistance device), to board, ride, or disembark from any vehicle on the system which is readily accessible to and usable by individuals with disabilities;

(ii) to any individual with a disability who needs the assistance of a wheelchair lift or other boarding assistance device (and is able with such assistance) to board, ride, and disembark from any vehicle which is readily accessible to and usable by individuals with disabilities if the individual wants to travel on a route on the system during the hours of operation of the system at a time (or within a reasonable period of such time) when such a vehicle is not being used to provide designated public transportation on the route; and

(iii) to any individual with a disability who has a specific impairment-related condition which prevents such individual from traveling to a boarding location or from a disembarking location on such system;

(B) to one other individual accompanying the individual with the disability; and

(C) to other individuals, in addition to the one individual described in subparagraph (B), accompanying the individual with a disability provided that space for these additional individuals is available on the paratransit vehicle carrying

21

the individual with a disability and that the transportation of such additional individuals will not result in a denial of service to individuals with disabilities.

For purposes of clauses (i) and (ii) of subparagraph (A), boarding or disembarking from a vehicle does not include travel to the boarding location or from the disembarking location.

(2) SERVICE AREA.—The regulations issued under this section shall require the provision of paratransit and special transportation services required under this section in the service area of each public entity which operates a fixed route system, other than any portion of the service area in which the public entity solely provides commuter bus service.

(3) SERVICE CRITERIA.—Subject to paragraphs (1) and (2), the regulations issued under this section shall establish minimum service criteria for determining the level of services to be required under this section.

(4) UNDUE FINANCIAL BURDEN LIMITATION.—The regulations issued under this section shall provide that, if the public entity is able to demonstrate to the satisfaction of the Secretary that the provision of paratransit and other special transportation services otherwise required under this section would impose an undue financial burden on the public entity, the public entity, notwithstanding any other provision of this section (other than paragraph (5)), shall only be required to provide such services to the extent that providing such services would not impose such a burden.

(5) ADDITIONAL SERVICES.—The regulations issued under this section shall establish circumstances under which the Secretary may require a public entity to provide, notwithstanding paragraph (4), paratransit and other special transportation services under this section beyond the level of paratransit and other special transportation services which would otherwise be required under paragraph (4).

(6) PUBLIC PARTICIPATION.—The regulations issued under this section shall require that each public entity which operates a fixed route system hold a public hearing, provide an opportunity for public comment, and consult with individuals with disabilities in preparing its plan under paragraph (7).

(7) PLANS.—The regulations issued under this section shall require that each public entity which operates a fixed route system—

(A) within 18 months after the effective date of this subsection, submit to the Secretary, and commence implementation of, a plan for providing paratransit and other special transportation services which meets the requirements of this section; and

(B) on an annual basis thereafter, submit to the Secretary, and commence implementation of, a plan for providing such services.

(8) PROVISION OF SERVICES BY OTHERS.—The regulations issued under this section shall—

(A) require that a public entity submitting a plan to the Secretary under this section identify in the plan any person or other public entity which is providing a paratransit or other special transportation service for individuals with disabilities in the service area to which the plan applies; and

(B) provide that the public entity submitting the plan does not have to provide under the plan such service for individuals with disabilities.

(9) **Other provisions**.—The regulations issued under this section shall include such other provisions and requirements as the Secretary determines are necessary to carry out the objectives of this section.

(d) **Review of Plan**.—

(1) **General rule**.—The Secretary shall review a plan submitted under this section for the purpose of determining whether or not such plan meets the requirements of this section, including the regulations issued under this section.

(2) **Disapproval**.—If the Secretary determines that a plan reviewed under this subsection fails to meet the requirements of this section, the Secretary shall disapprove the plan and notify the public entity which submitted the plan of such disapproval and the reasons therefor.

(3) **Modification of disapproved plan**.—Not later than 90 days after the date of disapproval of a plan under this subsection, the public entity which submitted the plan shall modify the plan to meet the requirements of this section and shall submit to the Secretary, and commence implementation of, such modified plan.

(e) **Discrimination Defined**.—As used in subsection (a), the term "discrimination" includes—

(1) a failure of a public entity to which the regulations issued under this section apply to submit, or commence implementation of, a plan in accordance with subsections (c)(6) and (c)(7);

(2) a failure of such entity to submit, or commence implementation of, a modified plan in accordance with subsection (d)(3);

(3) submission to the Secretary of a modified plan under subsection (d)(3) which does not meet the requirements of this section; or

(4) a failure of such entity to provide paratransit or other special transportation services in accordance with the plan or modified plan the public entity submitted to the Secretary under this section.

(f) **Statutory Construction**.—Nothing in this section shall be construed as preventing a public entity—

(1) from providing paratransit or other special transportation services at a level which is greater than the level of such services which are required by this section,

(2) from providing paratransit or other special transportation services in addition to those paratransit and special transportation services required by this section, or

(3) from providing such services to individuals in addition to those individuals to whom such services are required to be provided by this section.

42 USC 12144

SEC. 224. PUBLIC ENTITY OPERATING A DEMAND RESPONSIVE SYSTEM.

If a public entity operates a demand responsive system, it shall be considered discrimination, for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such entity to purchase or lease a new vehicle for use on such system, for which a solicitation is made after the 30th day following the effective date of this section, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless such system, when viewed in its entirety, provides a level of service to such individuals equivalent to the level of service such system provides to individuals without disabilities.

SEC. 225. TEMPORARY RELIEF WHERE LIFTS ARE UNAVAILABLE.

42 USC 12145.

(a) GRANTING.—With respect to the purchase of new buses, a public entity may apply for, and the Secretary may temporarily relieve such public entity from the obligation under section 222(a) or 224 to purchase new buses that are readily accessible to and usable by individuals with disabilities if such public entity demonstrates to the satisfaction of the Secretary—

(1) that the initial solicitation for new buses made by the public entity specified that all new buses were to be lift-equipped and were to be otherwise accessible to and usable by individuals with disabilities;

(2) the unavailability from any qualified manufacturer of hydraulic, electromechanical, or other lifts for such new buses;

(3) that the public entity seeking temporary relief has made good faith efforts to locate a qualified manufacturer to supply the lifts to the manufacturer of such buses in sufficient time to comply with such solicitation; and

(4) that any further delay in purchasing new buses necessary to obtain such lifts would significantly impair transportation services in the community served by the public entity.

(b) DURATION AND NOTICE TO CONGRESS.—Any relief granted under subsection (a) shall be limited in duration by a specified date, and the appropriate committees of Congress shall be notified of any such relief granted.

(c) FRAUDULENT APPLICATION.—If, at any time, the Secretary has reasonable cause to believe that any relief granted under subsection (a) was fraudulently applied for, the Secretary shall—

(1) cancel such relief if such relief is still in effect; and

(2) take such other action as the Secretary considers appropriate.

SEC. 226. NEW FACILITIES.

42 USC 12146.

For purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to construct a new facility to be used in the provision of designated public transportation services unless such facility is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

SEC. 227. ALTERATIONS OF EXISTING FACILITIES.

42 USC 12147.

(a) GENERAL RULE.—With respect to alterations of an existing facility or part thereof used in the provision of designated public transportation services that affect or could affect the usability of the facility or part thereof, it shall be considered discrimination, for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public entity to fail to make such alterations (or to ensure that the alterations are made) in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon the completion of such alterations. Where the public entity is undertaking an alteration that affects or could affect usability of or access to an area of the facility containing a primary function, the entity shall also make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations, where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General).

(b) Special Rule for Stations.—

(1) General rule.—For purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity that provides designated public transportation to fail, in accordance with the provisions of this subsection, to make key stations (as determined under criteria established by the Secretary by regulation) in rapid rail and light rail systems readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) Rapid rail and light rail key stations.—

(A) Accessibility.—Except as otherwise provided in this paragraph, all key stations (as determined under criteria established by the Secretary by regulation) in rapid rail and light rail systems shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than the last day of the 3-year period beginning on the effective date of this paragraph.

(B) Extension for extraordinarily expensive structural changes.—The Secretary may extend the 3-year period under subparagraph (A) up to a 30-year period for key stations in a rapid rail or light rail system which stations need extraordinarily expensive structural changes to, or replacement of, existing facilities; except that by the last day of the 20th year following the date of the enactment of this Act at least ⅔ of such key stations must be readily accessible to and usable by individuals with disabilities.

(3) Plans and milestones.—The Secretary shall require the appropriate public entity to develop and submit to the Secretary a plan for compliance with this subsection—

(A) that reflects consultation with individuals with disabilities affected by such plan and the results of a public hearing and public comments on such plan, and

(B) that establishes milestones for achievement of the requirements of this subsection.

42 USC 12148.

SEC. 228. PUBLIC TRANSPORTATION PROGRAMS AND ACTIVITIES IN EXISTING FACILITIES AND ONE CAR PER TRAIN RULE.

(a) Public Transportation Programs and Activities in Existing Facilities.—

(1) In general.—With respect to existing facilities used in the provision of designated public transportation services, it shall be considered discrimination, for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C.

794), for a public entity to fail to operate a designated public transportation program or activity conducted in such facilities so that, when viewed in the entirety, the program or activity is readily accessible to and usable by individuals with disabilities.

(2) Exception.—Paragraph (1) shall not require a public entity to make structural changes to existing facilities in order to make such facilities accessible to individuals who use wheelchairs, unless and to the extent required by section 227(a) (relating to alterations) or section 227(b) (relating to key stations).

(3) Utilization.—Paragraph (1) shall not require a public entity to which paragraph (2) applies, to provide to individuals who use wheelchairs services made available to the general public at such facilities when such individuals could not utilize or benefit from such services provided at such facilities.

(b) One Car Per Train Rule.—

(1) General rule.—Subject to paragraph (2), with respect to 2 or more vehicles operated as a train by a light or rapid rail system, for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to have at least 1 vehicle per train that is accessible to individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than the last day of the 5-year period beginning on the effective date of this section.

(2) Historic trains.—In order to comply with paragraph (1) with respect to the remanufacture of a vehicle of historic character which is to be used on a segment of a light or rapid rail system which is included on the National Register of Historic Places, if making such vehicle readily accessible to and usable by individuals with disabilities would significantly alter the historic character of such vehicle, the public entity which operates such system only has to make (or to purchase or lease a remanufactured vehicle with) those modifications which are necessary to meet the requirements of section 222(c)(1) and which do not significantly alter the historic character of such vehicle.

SEC. 229. REGULATIONS. 42 USC 12149.

(a) In General.—Not later than 1 year after the date of enactment of this Act, the Secretary of Transportation shall issue regulations, in an accessible format, necessary for carrying out this part (other than section 223).

(b) Standards.—The regulations issued under this section and section 223 shall include standards applicable to facilities and vehicles covered by this subtitle. The standards shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504 of this Act.

SEC. 230. INTERIM ACCESSIBILITY REQUIREMENTS. 42 USC 12150.

If final regulations have not been issued pursuant to section 229, for new construction or alterations for which a valid and appropriate State or local building permit is obtained prior to the issuance of final regulations under such section, and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the Uniform Federal Accessibility Standards in effect at the time the building permit is issued shall suffice to satisfy the requirement that facilities be readily accessible to and usable by persons with disabilities as required under sections 226 and 227, except that, if such final regulations have not been issued one year after the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines required under section 504(a) of this Act, compliance with such supplemental minimum guidelines shall be necessary to satisfy the requirement that facilities be readily accessible to and usable by persons with disabilities prior to issuance of the final regulations.

42 USC 12141 note.

SEC. 231. EFFECTIVE DATE.

(a) General Rule.—Except as provided in subsection (b), this part shall become effective 18 months after the date of enactment of this Act.

(b) Exception.—Sections 222, 223 (other than subsection (a)), 224, 225, 227(b), 228(b), and 229 shall become effective on the date of enactment of this Act.

PART II—PUBLIC TRANSPORTATION BY INTERCITY AND COMMUTER RAIL

42 USC 12161.

SEC. 241. DEFINITIONS.

As used in this part:

(1) Commuter authority.—The term "commuter authority" has the meaning given such term in section 103(8) of the Rail Passenger Service Act (45 U.S.C. 502(8)).

(2) Commuter rail transportation.—The term "commuter rail transportation" has the meaning given the term "commuter service" in section 103(9) of the Rail Passenger Service Act (45 U.S.C. 502(9)).

(3) Intercity rail transportation.—The term "intercity rail transportation" means transportation provided by the National Railroad Passenger Corporation.

(4) Rail passenger car.—The term "rail passenger car" means, with respect to intercity rail transportation, single-level and bi-level coach cars, single-level and bi-level dining cars, single-level and bi-level sleeping cars, single-level and bi-level lounge cars, and food service cars.

(5) Responsible person.—The term "responsible person" means—

(A) in the case of a station more than 50 percent of which is owned by a public entity, such public entity;

(B) in the case of a station more than 50 percent of which is owned by a private party, the persons providing intercity or commuter rail transportation to such station, as allocated on an equitable basis by regulation by the Secretary of Transportation; and

(C) in a case where no party owns more than 50 percent of a station, the persons providing intercity or commuter rail transportation to such station and the owners of the station, other than private party owners, as allocated on an equitable basis by regulation by the Secretary of Transportation.

(6) STATION.—The term "station" means the portion of a property located appurtenant to a right-of-way on which intercity or commuter rail transportation is operated, where such portion is used by the general public and is related to the provision of such transportation, including passenger platforms, designated waiting areas, ticketing areas, restrooms, and, where a public entity providing rail transportation owns the property, concession areas, to the extent that such public entity exercises control over the selection, design, construction, or alteration of the property, but such term does not include flag stops.

SEC. 242. INTERCITY AND COMMUTER RAIL ACTIONS CONSIDERED DISCRIMINATORY.

42 USC 12162.

(a) INTERCITY RAIL TRANSPORTATION.—

(1) ONE CAR PER TRAIN RULE.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person who provides intercity rail transportation to fail to have at least one passenger car per train that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, in accordance with regulations issued under section 244, as soon as practicable, but in no event later than 5 years after the date of enactment of this Act.

(2) NEW INTERCITY CARS.—

(A) GENERAL RULE.—Except as otherwise provided in this subsection with respect to individuals who use wheelchairs, it shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to purchase or lease any new rail passenger cars for use in intercity rail transportation, and for which a solicitation is made later than 30 days after the effective date of this section, unless all such rail cars are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 244.

(B) SPECIAL RULE FOR SINGLE-LEVEL PASSENGER COACHES FOR INDIVIDUALS WHO USE WHEELCHAIRS.—Single-level passenger coaches shall be required to—

(i) be able to be entered by an individual who uses a wheelchair;

(ii) have space to park and secure a wheelchair;

(iii) have a seat to which a passenger in a wheelchair can transfer, and a space to fold and store such passenger's wheelchair; and

(iv) have a restroom usable by an individual who uses a wheelchair,

only to the extent provided in paragraph (3).

(C) SPECIAL RULE FOR SINGLE-LEVEL DINING CARS FOR INDIVIDUALS WHO USE WHEELCHAIRS.—Single-level dining cars shall not be required to—

(i) be able to be entered from the station platform by an individual who uses a wheelchair; or

(ii) have a restroom usable by an individual who uses a wheelchair if no restroom is provided in such car for any passenger.

(D) SPECIAL RULE FOR BI-LEVEL DINING CARS FOR INDIVIDUALS WHO USE WHEELCHAIRS.—Bi-level dining cars shall not be required to—

(i) be able to be entered by an individual who uses a wheelchair;

(ii) have space to park and secure a wheelchair;

(iii) have a seat to which a passenger in a wheelchair can transfer, or a space to fold and store such passenger's wheelchair; or

(iv) have a restroom usable by an individual who uses a wheelchair.

(3) ACCESSIBILITY OF SINGLE-LEVEL COACHES.—

(A) GENERAL RULE.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person who provides intercity rail transportation to fail to have on each train which includes one or more single-level rail passenger coaches—

(i) a number of spaces—

(I) to park and secure wheelchairs (to accommodate individuals who wish to remain in their wheelchairs) equal to not less than one-half of the number of single-level rail passenger coaches in such train; and

(II) to fold and store wheelchairs (to accommodate individuals who wish to transfer to coach seats) equal to not less than one-half of the number of single-level rail passenger coaches in such train,

as soon as practicable, but in no event later than 5 years after the date of enactment of this Act; and

(ii) a number of spaces—

(I) to park and secure wheelchairs (to accommodate individuals who wish to remain in their wheelchairs) equal to not less than the total number of single-level rail passenger coaches in such train; and

(II) to fold and store wheelchairs (to accommodate individuals who wish to transfer to coach seats) equal to not less than the total number of single-level rail passenger coaches in such train,

as soon as practicable, but in no event later than 10 years after the date of enactment of this Act.

(B) LOCATION.—Spaces required by subparagraph (A) shall be located in single-level rail passenger coaches or food service cars.

(C) LIMITATION.—Of the number of spaces required on a train by subparagraph (A), not more than two spaces to park and secure wheelchairs nor more than two spaces to fold and store wheelchairs shall be located in any one coach or food service car.

(D) OTHER ACCESSIBILITY FEATURES.—Single-level rail passenger coaches and food service cars on which the spaces required by subparagraph (A) are located shall have a restroom usable by an individual who uses a wheelchair and shall be able to be entered from the station platform by an individual who uses a wheelchair.

(4) FOOD SERVICE.—

(A) SINGLE-LEVEL DINING CARS.—On any train in which a single-level dining car is used to provide food service—

(i) if such single-level dining car was purchased after the date of enactment of this Act, table service in such car shall be provided to a passenger who uses a wheelchair if—

(I) the car adjacent to the end of the dining car through which a wheelchair may enter is itself accessible to a wheelchair;

(II) such passenger can exit to the platform from the car such passenger occupies, move down the platform, and enter the adjacent accessible car described in subclause (I) without the necessity of the train being moved within the station; and

(III) space to park and secure a wheelchair is available in the dining car at the time such passenger wishes to eat (if such passenger wishes to remain in a wheelchair), or space to store and fold a wheelchair is available in the dining car at the time such passenger wishes to eat (if such passenger wishes to transfer to a dining car seat); and

(ii) appropriate auxiliary aids and services, including a hard surface on which to eat, shall be provided to ensure that other equivalent food service is available to individuals with disabilities, including individuals who use wheelchairs, and to passengers traveling with such individuals.

Unless not practicable, a person providing intercity rail transportation shall place an accessible car adjacent to the end of a dining car described in clause (i) through which an individual who uses a wheelchair may enter.

(B) BI-LEVEL DINING CARS.—On any train in which a bi-level dining car is used to provide food service—

(i) if such train includes a bi-level lounge car purchased after the date of enactment of this Act, table service in such lounge car shall be provided to individuals who use wheelchairs and to other passengers; and

(ii) appropriate auxiliary aids and services, including a hard surface on which to eat, shall be provided to ensure that other equivalent food service is available to individuals with disabilities, including individuals who use wheelchairs, and to passengers traveling with such individuals.

(b) COMMUTER RAIL TRANSPORTATION.—

(1) ONE CAR PER TRAIN RULE.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person who provides commuter rail transportation to fail to have at least one passenger car per train that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, in accordance with regulations issued under section 244, as soon as practicable, but in no event later than 5 years after the date of enactment of this Act.

(2) NEW COMMUTER RAIL CARS.—

(A) GENERAL RULE.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to purchase or lease any new rail passenger cars for use in commuter rail transportation, and for which a solicitation is made later than 30 days after the effective date of this section, unless all such rail cars are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 244.

(B) ACCESSIBILITY.—For purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), a requirement that a rail passenger car used in commuter rail transportation be accessible to or readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, shall not be construed to require—

(i) a restroom usable by an individual who uses a wheelchair if no restroom is provided in such car for any passenger;

(ii) space to fold and store a wheelchair; or

(iii) a seat to which a passenger who uses a wheelchair can transfer.

(c) USED RAIL CARS.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to purchase or lease a used rail passenger car for use in intercity or commuter rail transportation, unless such person makes demonstrated good faith efforts to purchase or lease a used rail car that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 244.

(d) REMANUFACTURED RAIL CARS.—

(1) REMANUFACTURING.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to remanufacture a rail passenger car for use in intercity or commuter rail transportation so as to extend its usable life for 10 years or more, unless the rail car, to the maximum extent feasible, is made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 244.

(2) PURCHASE OR LEASE.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to purchase or lease a remanufactured rail passenger car for use in intercity or commuter rail transportation unless such car was remanufactured in accordance with paragraph (1).

(e) STATIONS.—

(1) NEW STATIONS.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to build a new station for use in intercity or commuter rail transportation that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 244.

(2) EXISTING STATIONS.—

(A) FAILURE TO MAKE READILY ACCESSIBLE.—

(i) GENERAL RULE.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a responsible person to fail to make existing stations in the intercity rail transportation system, and existing key stations in commuter rail transportation systems, readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 244.

(ii) PERIOD FOR COMPLIANCE.—

(I) INTERCITY RAIL.—All stations in the intercity rail transportation system shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable, but in no event later than 20 years after the date of enactment of this Act.

(II) COMMUTER RAIL.—Key stations in commuter rail transportation systems shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than 3 years after the date of enactment of this Act, except that the time limit may be extended by the Secretary of Transportation up to 20 years after the date of enactment of this Act in a case where the raising of the entire passenger platform is the only means available of attaining accessibility or where other extraordinarily expensive structural changes are necessary to attain accessibility.

(iii) DESIGNATION OF KEY STATIONS.—Each commuter authority shall designate the key stations in its commuter rail transportation system, in consultation with individuals with disabilities and organizations representing such individuals, taking into consideration such factors as high ridership and whether such station serves as a transfer or feeder station. Before the final designation of key stations under this clause, a commuter authority shall hold a public hearing.

(iv) PLANS AND MILESTONES.—The Secretary of Transportation shall require the appropriate person to develop a plan for carrying out this subparagraph that reflects consultation with individuals with disabilities affected by such plan and that establishes milestones for achievement of the requirements of this subparagraph.

(B) REQUIREMENT WHEN MAKING ALTERATIONS.—

(i) GENERAL RULE.—It shall be considered discrimination, for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), with respect to alterations of an existing station or part thereof in the intercity or commuter rail transportation systems that affect or could affect the usability of the station or part thereof, for the responsible person, owner, or person in control of the station to fail to make the alterations in such a manner that, to the maximum extent feasible, the altered portions of the station are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations.

(ii) ALTERATIONS TO A PRIMARY FUNCTION AREA.—It shall be considered discrimination, for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), with respect to alterations that affect or could affect the usability of or access to an area of the station containing a primary function, for the responsible person, owner, or person in control of the station to fail to make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations, where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General).

(C) REQUIRED COOPERATION.—It shall be considered discrimination for purposes of section 202 of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for an owner, or person in control, of a station governed by subparagraph (A) or (B) to fail to provide reasonable cooperation to a responsible person with respect to such station in that responsible person's efforts to comply with such subparagraph. An owner, or person in control, of a station shall be liable to a responsible person for any failure to provide reasonable cooperation as required by this subparagraph. Failure to receive reasonable cooperation required by this subparagraph shall not be a defense to a claim of discrimination under this Act.

42 USC 12163

SEC. 243. CONFORMANCE OF ACCESSIBILITY STANDARDS.

Accessibility standards included in regulations issued under this part shall be consistent with the minimum guidelines issued by the Architectural and Transportation Barriers Compliance Board under section 504(a) of this Act.

42 USC 12164

SEC. 244. REGULATIONS.

Not later than 1 year after the date of enactment of this Act, the Secretary of Transportation shall issue regulations, in an accessible format, necessary for carrying out this part.

42 USC 12165

SEC. 245. INTERIM ACCESSIBILITY REQUIREMENTS.

(a) STATIONS.—If final regulations have not been issued pursuant to section 244, for new construction or alterations for which a valid and appropriate State or local building permit is obtained prior to the issuance of final regulations under such section, and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the Uniform Federal Accessibility Standards in effect at the time the building permit is issued shall suffice to satisfy the requirement that stations be readily accessible to and usable by persons with disabilities as required under section 242(e), except that, if such final regulations have not been issued one year after the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines required under section 504(a) of this Act, compliance with such supplemental minimum guidelines shall be necessary to satisfy the requirement that stations be readily accessible to and usable by persons with disabilities prior to issuance of the final regulations.

(b) Rail Passenger Cars.—If final regulations have not been issued pursuant to section 244, a person shall be considered to have complied with the requirements of section 242 (a) through (d) that a rail passenger car be readily accessible to and usable by individuals with disabilities, if the design for such car complies with the laws and regulations (including the Minimum Guidelines and Requirements for Accessible Design and such supplemental minimum guidelines as are issued under section 504(a) of this Act) governing accessibility of such cars, to the extent that such laws and regulations are not inconsistent with this part and are in effect at the time such design is substantially completed.

SEC. 246. EFFECTIVE DATE.

42 USC 12161 note.

(a) General Rule.—Except as provided in subsection (b), this part shall become effective 18 months after the date of enactment of this Act.

(b) Exception.—Sections 242 and 244 shall become effective on the date of enactment of this Act.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

SEC. 301. DEFINITIONS.

42 USC 12181.

As used in this title:

(1) Commerce.—The term "commerce" means travel, trade, traffic, commerce, transportation, or communication—

(A) among the several States;

(B) between any foreign country or any territory or possession and any State; or

(C) between points in the same State but through another State or foreign country.

(2) Commercial facilities.—The term "commercial facilities" means facilities—

(A) that are intended for nonresidential use; and

(B) whose operations will affect commerce.

Such term shall not include railroad locomotives, railroad freight cars, railroad cabooses, railroad cars described in section 242 or covered under this title, railroad rights-of-way, or facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968 (42 U.S.C. 3601 et seq.).

(3) Demand responsive system.—The term "demand responsive system" means any system of providing transportation of individuals by a vehicle, other than a system which is a fixed route system.

(4) FIXED ROUTE SYSTEM.—The term "fixed route system" means a system of providing transportation of individuals (other than by aircraft) on which a vehicle is operated along a prescribed route according to a fixed schedule.

(5) OVER-THE-ROAD BUS.—The term "over-the-road bus" means a bus characterized by an elevated passenger deck located over a baggage compartment.

(6) PRIVATE ENTITY.—The term "private entity" means any entity other than a public entity (as defined in section 201(1)).

(7) PUBLIC ACCOMMODATION.—The following private entities are considered public accommodations for purposes of this title, if the operations of such entities affect commerce—

(A) an inn, hotel, motel, or other place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor;

(B) a restaurant, bar, or other establishment serving food or drink;

(C) a motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment;

(D) an auditorium, convention center, lecture hall, or other place of public gathering;

(E) a bakery, grocery store, clothing store, hardware store, shopping center, or other sales or rental establishment;

(F) a laundromat, dry-cleaner, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other service establishment;

(G) a terminal, depot, or other station used for specified public transportation;

(H) a museum, library, gallery, or other place of public display or collection;

(I) a park, zoo, amusement park, or other place of recreation;

(J) a nursery, elementary, secondary, undergraduate, or postgraduate private school, or other place of education;

(K) a day care center, senior citizen center, homeless shelter, food bank, adoption agency, or other social service center establishment; and

(L) a gymnasium, health spa, bowling alley, golf course, or other place of exercise or recreation.

(8) RAIL AND RAILROAD.—The terms "rail" and "railroad" have the meaning given the term "railroad" in section 202(e) of the Federal Railroad Safety Act of 1970 (45 U.S.C. 431(e)).

(9) READILY ACHIEVABLE.—The term "readily achievable" means easily accomplishable and able to be carried out without much difficulty or expense. In determining whether an action is readily achievable, factors to be considered include—

(A) the nature and cost of the action needed under this Act;

(B) the overall financial resources of the facility or facilities involved in the action; the number of persons employed at such facility; the effect on expenses and resources, or the impact otherwise of such action upon the operation of the facility;

(C) the overall financial resources of the covered entity; the overall size of the business of a covered entity with respect to the number of its employees; the number, type, and location of its facilities; and

(D) the type of operation or operations of the covered entity, including the composition, structure, and functions of the workforce of such entity; the geographic separateness, administrative or fiscal relationship of the facility or facilities in question to the covered entity.

(10) Specified public transportation.—The term "specified public transportation" means transportation by bus, rail, or any other conveyance (other than by aircraft) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

(11) Vehicle.—The term "vehicle" does not include a rail passenger car, railroad locomotive, railroad freight car, railroad caboose, or a railroad car described in section 242 or covered under this title.

SEC. 302. PROHIBITION OF DISCRIMINATION BY PUBLIC ACCOMMODATIONS.

42 USC 12182.

(a) General Rule.—No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation by any person who owns, leases (or leases to), or operates a place of public accommodation.

(b) Construction.—

(1) General prohibition.—

(A) Activities.—

(i) Denial of participation.—It shall be discriminatory to subject an individual or class of individuals on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements, to a denial of the opportunity of the individual or class to participate in or benefit from the goods, services, facilities, privileges, advantages, or accommodations of an entity.

(ii) Participation in unequal benefit.—It shall be discriminatory to afford an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements with the opportunity to participate in or benefit from a good, service, facility, privilege, advantage, or accommodation that is not equal to that afforded to other individuals.

(iii) Separate benefit.—It shall be discriminatory to provide an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements with a good, service, facility, privilege, advantage, or accommodation that is different or separate from that provided to other individuals, unless such action is necessary to provide the individual or class of individuals with a good, service, facility, privilege, advantage, or accommodation, or other opportunity that is as effective as that provided to others.

(iv) INDIVIDUAL OR CLASS OF INDIVIDUALS.—For purposes of clauses (i) through (iii) of this subparagraph, the term "individual or class of individuals" refers to the clients or customers of the covered public accommodation that enters into the contractual, licensing or other arrangement.

(B) INTEGRATED SETTINGS.—Goods, services, facilities, privileges, advantages, and accommodations shall be afforded to an individual with a disability in the most integrated setting appropriate to the needs of the individual.

(C) OPPORTUNITY TO PARTICIPATE.—Notwithstanding the existence of separate or different programs or activities provided in accordance with this section, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different.

(D) ADMINISTRATIVE METHODS.—An individual or entity shall not, directly or through contractual or other arrangements, utilize standards or criteria or methods of administration—

(i) that have the effect of discriminating on the basis of disability; or

(ii) that perpetuate the discrimination of others who are subject to common administrative control.

(E) ASSOCIATION.—It shall be discriminatory to exclude or otherwise deny equal goods, services, facilities, privileges, advantages, accommodations, or other opportunities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association.

(2) SPECIFIC PROHIBITIONS.—

(A) DISCRIMINATION.—For purposes of subsection (a), discrimination includes—

(i) the imposition or application of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any goods, services, facilities, privileges, advantages, or accommodations, unless such criteria can be shown to be necessary for the provision of the goods, services, facilities, privileges, advantages, or accommodations being offered;

(ii) a failure to make reasonable modifications in policies, practices, or procedures, when such modifications are necessary to afford such goods, services, facilities, privileges, advantages, or accommodations to individuals with disabilities, unless the entity can demonstrate that making such modifications would fundamentally alter the nature of such goods, services, facilities, privileges, advantages, or accommodations;

(iii) a failure to take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the entity can demonstrate that taking such steps would fundamentally alter the nature of the good, service, facility, privilege, advantage, or accommodation being offered or would result in an undue burden;

(iv) a failure to remove architectural barriers, and communication barriers that are structural in nature, in existing facilities, and transportation barriers in existing vehicles and rail passenger cars used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles or rail passenger cars by the installation of a hydraulic or other lift), where such removal is readily achievable; and

(v) where an entity can demonstrate that the removal of a barrier under clause (iv) is not readily achievable, a failure to make such goods, services, facilities, privileges, advantages, or accommodations available through alternative methods if such methods are readily achievable.

(B) FIXED ROUTE SYSTEM.—

(i) ACCESSIBILITY.—It shall be considered discrimination for a private entity which operates a fixed route system and which is not subject to section 304 to purchase or lease a vehicle with a seating capacity in excess of 16 passengers (including the driver) for use on such system, for which a solicitation is made after the 30th day following the effective date of this subparagraph, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(ii) EQUIVALENT SERVICE.—If a private entity which operates a fixed route system and which is not subject to section 304 purchases or leases a vehicle with a seating capacity of 16 passengers or less (including the driver) for use on such system after the effective date of this subparagraph that is not readily accessible to or usable by individuals with disabilities, it shall be considered discrimination for such entity to fail to operate such system so that, when viewed in its entirety, such system ensures a level of service to individuals with disabilities, including individuals who use wheelchairs, equivalent to the level of service provided to individuals without disabilities.

(C) DEMAND RESPONSIVE SYSTEM.—For purposes of subsection (a), discrimination includes—

(i) a failure of a private entity which operates a demand responsive system and which is not subject to section 304 to operate such system so that, when viewed in its entirety, such system ensures a level of service to individuals with disabilities, including individuals who use wheelchairs, equivalent to the level of service provided to individuals without disabilities; and

(ii) the purchase or lease by such entity for use on such system of a vehicle with a seating capacity in excess of 16 passengers (including the driver), for which solicitations are made after the 30th day following the effective date of this subparagraph, that is not readily

BEST COPY AVAILABLE

accessible to and usable by individuals with disabilities (including individuals who use wheelchairs) unless such entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to that provided to individuals without disabilities.

(D) OVER-THE-ROAD BUSES.—

(i) LIMITATION ON APPLICABILITY.—Subparagraphs (B) and (C) do not apply to over-the-road buses.

(ii) ACCESSIBILITY REQUIREMENTS.—For purposes of subsection (a), discrimination includes (I) the purchase or lease of an over-the-road bus which does not comply with the regulations issued under section 306(a)(2) by a private entity which provides transportation of individuals and which is not primarily engaged in the business of transporting people, and (II) any other failure of such entity to comply with such regulations.

(3) SPECIFIC CONSTRUCTION.—Nothing in this title shall require an entity to permit an individual to participate in or benefit from the goods, services, facilities, privileges, advantages and accommodations of such entity where such individual poses a direct threat to the health or safety of others. The term "direct threat" means a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures or by the provision of auxiliary aids or services.

42 USC 12183

SEC. 303. NEW CONSTRUCTION AND ALTERATIONS IN PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES.

(a) APPLICATION OF TERM.—Except as provided in subsection (b), as applied to public accommodations and commercial facilities, discrimination for purposes of section 302(a) includes—

(1) a failure to design and construct facilities for first occupancy later than 30 months after the date of enactment of this Act that are readily accessible to and usable by individuals with disabilities, except where an entity can demonstrate that it is structurally impracticable to meet the requirements of such subsection in accordance with standards set forth or incorporated by reference in regulations issued under this title; and

(2) with respect to a facility or part thereof that is altered by, on behalf of, or for the use of an establishment in a manner that affects or could affect the usability of the facility or part thereof, a failure to make alterations in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. Where the entity is undertaking an alteration that affects or could affect usability of or access to an area of the facility containing a primary function, the entity shall also make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and

scope (as determined under criteria established by the Attorney General).

(b) ELEVATOR.—Subsection (a) shall not be construed to require the installation of an elevator for facilities that are less than three stories or have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

SEC. 304. PROHIBITION OF DISCRIMINATION IN SPECIFIED PUBLIC TRANSPORTATION SERVICES PROVIDED BY PRIVATE ENTITIES. 42 USC 12184.

(a) GENERAL RULE.—No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of specified public transportation services provided by a private entity that is primarily engaged in the business of transporting people and whose operations affect commerce.

(b) CONSTRUCTION.—For purposes of subsection (a), discrimination includes—

(1) the imposition or application by a entity described in subsection (a) of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully enjoying the specified public transportation services provided by the entity, unless such criteria can be shown to be necessary for the provision of the services being offered;

(2) the failure of such entity to—

(A) make reasonable modifications consistent with those required under section 302(b)(2)(A)(ii);

(B) provide auxiliary aids and services consistent with the requirements of section 302(b)(2)(A)(iii); and

(C) remove barriers consistent with the requirements of section 302(b)(2)(A) and with the requirements of section 303(a)(2);

(3) the purchase or lease by such entity of a new vehicle (other than an automobile, a van with a seating capacity of less than 8 passengers, including the driver, or an over-the-road bus) which is to be used to provide specified public transportation and for which a solicitation is made after the 30th day following the effective date of this section, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs; except that the new vehicle need not be readily accessible to and usable by such individuals if the new vehicle is to be used solely in a demand responsive system and if the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to such individuals equivalent to the level of service provided to the general public;

(4)(A) the purchase or lease by such entity of an over-the-road bus which does not comply with the regulations issued under section 306(a)(2); and

(B) any other failure of such entity to comply with such regulations; and

(5) the purchase or lease by such entity of a new van with a seating capacity of less than 8 passengers, including the driver, which is to be used to provide specified public transportation and for which a solicitation is made after the 30th day following

the effective date of this section that is not readily accessible to or usable by individuals with disabilities, including individuals who use wheelchairs; except that the new van need not be readily accessible to and usable by such individuals if the entity can demonstrate that the system for which the van is being purchased or leased, when viewed in its entirety, provides a level of service to such individuals equivalent to the level of service provided to the general public;

(6) the purchase or lease by such entity of a new rail passenger car that is to be used to provide specified public transportation, and for which a solicitation is made later than 30 days after the effective date of this paragraph, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs; and

(7) the remanufacture by such entity of a rail passenger car that is to be used to provide specified public transportation so as to extend its usable life for 10 years or more, or the purchase or lease by such entity of such a rail car, unless the rail car, to the maximum extent feasible, is made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(c) Historical or Antiquated Cars.—

(1) Exception.—To the extent that compliance with subsection (b)(2)(C) or (b)(7) would significantly alter the historic or antiquated character of a historical or antiquated rail passenger car, or a rail station served exclusively by such cars, or would result in violation of any rule, regulation, standard, or order issued by the Secretary of Transportation under the Federal Railroad Safety Act of 1970, such compliance shall not be required.

(2) Definition.—As used in this subsection, the term "historical or antiquated rail passenger car" means a rail passenger car—

(A) which is not less than 30 years old at the time of its use for transporting individuals;

(B) the manufacturer of which is no longer in the business of manufacturing rail passenger cars; and

(C) which—

(i) has a consequential association with events or persons significant to the past; or

(ii) embodies, or is being restored to embody, the distinctive characteristics of a type of rail passenger car used in the past, or to represent a time period which has passed.

42 USC 12185

SEC. 305. STUDY.

(a) Purposes.—The Office of Technology Assessment shall undertake a study to determine—

(1) the access needs of individuals with disabilities to over-the-road buses and over-the-road bus service; and

(2) the most cost-effective methods for providing access to over-the-road buses and over-the-road bus service to individuals with disabilities, particularly individuals who use wheelchairs, through all forms of boarding options.

(b) Contents.—The study shall include, at a minimum, an analysis of the following:

(1) The anticipated demand by individuals with disabilities for accessible over-the-road buses and over-the-road bus service.

(2) The degree to which such buses and service, including any service required under sections 304(b)(4) and 306(a)(2), are readily accessible to and usable by individuals with disabilities.

(3) The effectiveness of various methods of providing accessibility to such buses and service to individuals with disabilities.

(4) The cost of providing accessible over-the-road buses and bus service to individuals with disabilities, including consideration of recent technological and cost saving developments in equipment and devices.

(5) Possible design changes in over-the-road buses that could enhance accessibility, including the installation of accessible restrooms which do not result in a loss of seating capacity.

(6) The impact of accessibility requirements on the continuation of over-the-road bus service, with particular consideration of the impact of such requirements on such service to rural communities.

(c) ADVISORY COMMITTEE.—In conducting the study required by subsection (a), the Office of Technology Assessment shall establish an advisory committee, which shall consist of—

(1) members selected from among private operators and manufacturers of over-the-road buses;

(2) members selected from among individuals with disabilities, particularly individuals who use wheelchairs, who are potential riders of such buses; and

(3) members selected for their technical expertise on issues included in the study, including manufacturers of boarding assistance equipment and devices.

The number of members selected under each of paragraphs (1) and (2) shall be equal, and the total number of members selected under paragraphs (1) and (2) shall exceed the number of members selected under paragraph (3).

(d) DEADLINE.—The study required by subsection (a), along with recommendations by the Office of Technology Assessment, including any policy options for legislative action, shall be submitted to the President and Congress within 36 months after the date of the enactment of this Act. If the President determines that compliance with the regulations issued pursuant to section 306(a)(2)(B) on or before the applicable deadlines specified in section 306(a)(2)(B) will result in a significant reduction in intercity over-the-road bus service, the President shall extend each such deadline by 1 year.

President of U S

(e) REVIEW.—In developing the study required by subsection (a), the Office of Technology Assessment shall provide a preliminary draft of such study to the Architectural and Transportation Barriers Compliance Board established under section 502 of the Rehabilitation Act of 1973 (29 U.S.C. 792). The Board shall have an opportunity to comment on such draft study, and any such comments by the Board made in writing within 120 days after the Board's receipt of the draft study shall be incorporated as part of the final study required to be submitted under subsection (d).

SEC. 306. REGULATIONS.

42 USC 12186.

(a) TRANSPORTATION PROVISIONS.—

(1) GENERAL RULE.—Not later than 1 year after the date of the enactment of this Act, the Secretary of Transportation shall issue regulations in an accessible format to carry out sections

302(b)(2) (B) and (C) and to carry out section 304 (other than subsection (b)(4)).

(2) SPECIAL RULES FOR PROVIDING ACCESS TO OVER-THE-ROAD BUSES.—

(A) INTERIM REQUIREMENTS.—

(i) ISSUANCE.—Not later than 1 year after the date of the enactment of this Act, the Secretary of Transportation shall issue regulations in an accessible format to carry out sections 304(b)(4) and 302(b)(2)(D)(ii) that require each private entity which uses an over-the-road bus to provide transportation of individuals to provide accessibility to such bus; except that such regulations shall not require any structural changes in over-the-road buses in order to provide access to individuals who use wheelchairs during the effective period of such regulations and shall not require the purchase of boarding assistance devices to provide access to such individuals.

(ii) EFFECTIVE PERIOD.—The regulations issued pursuant to this subparagraph shall be effective until the effective date of the regulations issued under subparagraph (B).

(B) FINAL REQUIREMENT.—

(i) REVIEW OF STUDY AND INTERIM REQUIREMENTS.—The Secretary shall review the study submitted under section 305 and the regulations issued pursuant to subparagraph (A).

(ii) ISSUANCE.—Not later than 1 year after the date of the submission of the study under section 305, the Secretary shall issue in an accessible format new regulations to carry out sections 304(b)(4) and 302(b)(2)(D)(ii) that require, taking into account the purposes of the study under section 305 and any recommendations resulting from such study, each private entity which uses an over-the-road bus to provide transportation to individuals to provide accessibility to such bus to individuals with disabilities, including individuals who use wheelchairs.

(iii) EFFECTIVE PERIOD.—Subject to section 305(d), the regulations issued pursuant to this subparagraph shall take effect—

(I) with respect to small providers of transportation (as defined by the Secretary), 7 years after the date of the enactment of this Act; and

(II) with respect to other providers of transportation, 6 years after such date of enactment.

(C) LIMITATION ON REQUIRING INSTALLATION OF ACCESSIBLE RESTROOMS.—The regulations issued pursuant to this paragraph shall not require the installation of accessible restrooms in over-the-road buses if such installation would result in a loss of seating capacity.

(3) STANDARDS.—The regulations issued pursuant to this subsection shall include standards applicable to facilities and vehicles covered by sections 302(b)(2) and 304.

(b) OTHER PROVISIONS.—Not later than 1 year after the date of the enactment of this Act, the Attorney General shall issue regulations in an accessible format to carry out the provisions of this title not referred to in subsection (a) that include standards applicable to facilities and vehicles covered under section 302.

(c) Consistency With ATBCB Guidelines.—Standards included in regulations issued under subsections (a) and (b) shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504 of this Act.

(d) Interim Accessibility Standards.—

(1) Facilities.—If final regulations have not been issued pursuant to this section, for new construction or alterations for which a valid and appropriate State or local building permit is obtained prior to the issuance of final regulations under this section, and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the Uniform Federal Accessibility Standards in effect at the time the building permit is issued shall suffice to satisfy the requirement that facilities be readily accessible to and usable by persons with disabilities as required under section 303, except that, if such final regulations have not been issued one year after the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines required under section 504(a) of this Act, compliance with such supplemental minimum guidelines shall be necessary to satisfy the requirement that facilities be readily accessible to and usable by persons with disabilities prior to issuance of the final regulations.

(2) Vehicles and rail passenger cars.—If final regulations have not been issued pursuant to this section, a private entity shall be considered to have complied with the requirements of this title, if any, that a vehicle or rail passenger car be readily accessible to and usable by individuals with disabilities, if the design for such vehicle or car complies with the laws and regulations (including the Minimum Guidelines and Requirements for Accessible Design and such supplemental minimum guidelines as are issued under section 504(a) of this Act) governing accessibility of such vehicles or cars, to the extent that such laws and regulations are not inconsistent with this title and are in effect at the time such design is substantially completed.

SEC. 307. EXEMPTIONS FOR PRIVATE CLUBS AND RELIGIOUS ORGANIZATIONS.

42 USC 12187

The provisions of this title shall not apply to private clubs or establishments exempted from coverage under title II of the Civil Rights Act of 1964 (42 U.S.C. 2000-a(e)) or to religious organizations or entities controlled by religious organizations, including places of worship.

SEC. 308. ENFORCEMENT.

42 USC 12188

(a) In General.—

(1) Availability of remedies and procedures.—The remedies and procedures set forth in section 204(a) of the Civil Rights Act of 1964 (42 U.S.C. 2000a-3(a)) are the remedies and procedures this title provides to any person who is being subjected to discrimination on the basis of disability in violation of this title or who has reasonable grounds for believing that such person is about to be subjected to discrimination in violation of

section 303. Nothing in this section shall require a person with a disability to engage in a futile gesture if such person has actual notice that a person or organization covered by this title does not intend to comply with its provisions.

(2) INJUNCTIVE RELIEF.—In the case of violations of sections 302(b)(2)(A)(iv) and section 303(a), injunctive relief shall include an order to alter facilities to make such facilities readily accessible to and usable by individuals with disabilities to the extent required by this title. Where appropriate, injunctive relief shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by this title.

(b) ENFORCEMENT BY THE ATTORNEY GENERAL.—

(1) DENIAL OF RIGHTS.—

(A) DUTY TO INVESTIGATE.—

(i) IN GENERAL.—The Attorney General shall investigate alleged violations of this title, and shall undertake periodic reviews of compliance of covered entities under this title.

(ii) ATTORNEY GENERAL CERTIFICATION.—On the application of a State or local government, the Attorney General may, in consultation with the Architectural and Transportation Barriers Compliance Board, and after prior notice and a public hearing at which persons, including individuals with disabilities, are provided an opportunity to testify against such certification, certify that a State law or local building code or similar ordinance that establishes accessibility requirements meets or exceeds the minimum requirements of this Act for the accessibility and usability of covered facilities under this title. At any enforcement proceeding under this section, such certification by the Attorney General shall be rebuttable evidence that such State law or local ordinance does meet or exceed the minimum requirements of this Act.

(B) POTENTIAL VIOLATION.—If the Attorney General has reasonable cause to believe that—

(i) any person or group of persons is engaged in a pattern or practice of discrimination under this title, or

(ii) any person or group of persons has been discriminated against under this title and such discrimination raises an issue of general public importance,

the Attorney General may commence a civil action in any appropriate United States district court.

(2) AUTHORITY OF COURT.—In a civil action under paragraph (1)(B), the court—

(A) may grant any equitable relief that such court considers to be appropriate, including, to the extent required by this title—

(i) granting temporary, preliminary, or permanent relief;

(ii) providing an auxiliary aid or service, modification of policy, practice, or procedure, or alternative method; and

(iii) making facilities readily accessible to and usable by individuals with disabilities;

(B) may award such other relief as the court considers to be appropriate, including monetary damages to persons aggrieved when requested by the Attorney General; and

(C) may, to vindicate the public interest, assess a civil penalty against the entity in an amount—

(i) not exceeding $50,000 for a first violation; and

(ii) not exceeding $100,000 for any subsequent violation.

(3) Single violation.—For purposes of paragraph (2)(C), in determining whether a first or subsequent violation has occurred, a determination in a single action, by judgment or settlement, that the covered entity has engaged in more than one discriminatory act shall be counted as a single violation.

(4) Punitive damages.—For purposes of subsection (b)(2)(B), the term "monetary damages" and "such other relief" does not include punitive damages.

(5) Judicial consideration.—In a civil action under paragraph (1)(B), the court, when considering what amount of civil penalty, if any, is appropriate, shall give consideration to any good faith effort or attempt to comply with this Act by the entity. In evaluating good faith, the court shall consider, among other factors it deems relevant, whether the entity could have reasonably anticipated the need for an appropriate type of auxiliary aid needed to accommodate the unique needs of a particular individual with a disability.

SEC. 309. EXAMINATIONS AND COURSES.

42 USC 12189

Any person that offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes shall offer such examinations or courses in a place and manner accessible to persons with disabilities or offer alternative accessible arrangements for such individuals.

SEC. 310. EFFECTIVE DATE.

42 USC 12181 note

(a) General Rule.—Except as provided in subsections (b) and (c), this title shall become effective 18 months after the date of the enactment of this Act.

(b) Civil Actions.—Except for any civil action brought for a violation of section 303, no civil action shall be brought for any act or omission described in section 302 which occurs—

(1) during the first 6 months after the effective date, against businesses that employ 25 or fewer employees and have gross receipts of $1,000,000 or less; and

(2) during the first year after the effective date, against businesses that employ 10 or fewer employees and have gross receipts of $500,000 or less.

(c) Exception.—Sections 302(a) for purposes of section 302(b)(2) (B) and (C) only, 304(a) for purposes of section 304(b)(3) only, 304(b)(3), 305, and 306 shall take effect on the date of the enactment of this Act.

TITLE IV—TELECOMMUNICATIONS

SEC. 401. TELECOMMUNICATIONS RELAY SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

(a) Telecommunications.—Title II of the Communications Act of 1934 (47 U.S.C. 201 et seq.) is amended by adding at the end thereof the following new section:

State and local governments.
47 USC 225.

"SEC. 225. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

"(a) Definitions.—As used in this section—

"(1) Common carrier or carrier.—The term 'common carrier' or 'carrier' includes any common carrier engaged in interstate communication by wire or radio as defined in section 3(h) and any common carrier engaged in intrastate communication by wire or radio, notwithstanding sections 2(b) and 221(b).

"(2) TDD.—The term 'TDD' means a Telecommunications Device for the Deaf, which is a machine that employs graphic communication in the transmission of coded signals through a wire or radio communication system.

"(3) Telecommunications relay services.—The term 'telecommunications relay services' means telephone transmission services that provide the ability for an individual who has a hearing impairment or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses a TDD or other nonvoice terminal device and an individual who does not use such a device.

"(b) Availability of Telecommunications Relay Services.—

"(1) In general.—In order to carry out the purposes established under section 1, to make available to all individuals in the United States a rapid, efficient nationwide communication service, and to increase the utility of the telephone system of the Nation, the Commission shall ensure that interstate and intrastate telecommunications relay services are available, to the extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals in the United States.

"(2) Use of General Authority and Remedies.—For the purposes of administering and enforcing the provisions of this section and the regulations prescribed thereunder, the Commission shall have the same authority, power, and functions with respect to common carriers engaged in intrastate communication as the Commission has in administering and enforcing the provisions of this title with respect to any common carrier engaged in interstate communication. Any violation of this section by any common carrier engaged in intrastate communication shall be subject to the same remedies, penalties, and procedures as are applicable to a violation of this Act by a common carrier engaged in interstate communication.

"(c) Provision of Services.—Each common carrier providing telephone voice transmission services shall, not later than 3 years after the date of enactment of this section, provide in compliance with the regulations prescribed under this section, throughout the area in which it offers service, telecommunications relay services, individually, through designees, through a competitively selected vendor, or in concert with other carriers. A common carrier shall be considered to be in compliance with such regulations—

"(1) with respect to intrastate telecommunications relay services in any State that does not have a certified program under subsection (f) and with respect to interstate telecommunications relay services, if such common carrier (or other entity through which the carrier is providing such relay services) is in compliance with the Commission's regulations under subsection (d); or

"(2) with respect to intrastate telecommunications relay services in any State that has a certified program under subsection (f) for such State, if such common carrier (or other entity through which the carrier is providing such relay services) is in compliance with the program certified under subsection (f) for such State.

"(d) REGULATIONS.—

"(1) IN GENERAL.—The Commission shall, not later than 1 year after the date of enactment of this section, prescribe regulations to implement this section, including regulations that—

"(A) establish functional requirements, guidelines, and operations procedures for telecommunications relay services;

"(B) establish minimum standards that shall be met in carrying out subsection (c);

"(C) require that telecommunications relay services operate every day for 24 hours per day;

"(D) require that users of telecommunications relay services pay rates no greater than the rates paid for functionally equivalent voice communication services with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination;

"(E) prohibit relay operators from failing to fulfill the obligations of common carriers by refusing calls or limiting the length of calls that use telecommunications relay services;

"(F) prohibit relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of the call; and

"(G) prohibit relay operators from intentionally altering a relayed conversation.

"(2) TECHNOLOGY.—The Commission shall ensure that regulations prescribed to implement this section encourage, consistent with section 7(a) of this Act, the use of existing technology and do not discourage or impair the development of improved technology.

"(3) JURISDICTIONAL SEPARATION OF COSTS.—

"(A) IN GENERAL.—Consistent with the provisions of section 410 of this Act, the Commission shall prescribe regulations governing the jurisdictional separation of costs for the services provided pursuant to this section.

"(B) RECOVERING COSTS.—Such regulations shall generally provide that costs caused by interstate telecommunications relay services shall be recovered from all subscribers for every interstate service and costs caused by intrastate telecommunications relay services shall be recovered from the intrastate jurisdiction. In a State that has a certified program under subsection (f), a State commission shall permit a common carrier to recover the costs incurred in providing intrastate telecommunications relay services by a method consistent with the requirements of this section.

"(e) Enforcement.—

"(1) In general.—Subject to subsections (f) and (g), the Commission shall enforce this section.

"(2) Complaint.—The Commission shall resolve, by final order, a complaint alleging a violation of this section within 180 days after the date such complaint is filed.

"(f) Certification.—

"(1) State documentation.—Any State desiring to establish a State program under this section shall submit documentation to the Commission that describes the program of such State for implementing intrastate telecommunications relay services and the procedures and remedies available for enforcing any requirements imposed by the State program.

"(2) Requirements for certification.—After review of such documentation, the Commission shall certify the State program if the Commission determines that—

"(A) the program makes available to hearing-impaired and speech-impaired individuals, either directly, through designees, through a competitively selected vendor, or through regulation of intrastate common carriers, intrastate telecommunications relay services in such State in a manner that meets or exceeds the requirements of regulations prescribed by the Commission under subsection (d); and

"(B) the program makes available adequate procedures and remedies for enforcing the requirements of the State program.

"(3) Method of funding.—Except as provided in subsection (d), the Commission shall not refuse to certify a State program based solely on the method such State will implement for funding intrastate telecommunication relay services.

"(4) Suspension or revocation of certification.—The Commission may suspend or revoke such certification if, after notice and opportunity for hearing, the Commission determines that such certification is no longer warranted. In a State whose program has been suspended or revoked, the Commission shall take such steps as may be necessary, consistent with this section, to ensure continuity of telecommunications relay services.

"(g) Complaint.—

"(1) Referral of complaint.—If a complaint to the Commission alleges a violation of this section with respect to intrastate telecommunications relay services within a State and certification of the program of such State under subsection (f) is in effect, the Commission shall refer such complaint to such State.

"(2) Jurisdiction of commission.—After referring a complaint to a State under paragraph (1), the Commission shall exercise jurisdiction over such complaint only if—

"(A) final action under such State program has not been taken on such complaint by such State—

"(i) within 180 days after the complaint is filed with such State; or

"(ii) within a shorter period as prescribed by the regulations of such State; or

"(B) the Commission determines that such State program is no longer qualified for certification under subsection (f).".

(b) CONFORMING AMENDMENTS.—The Communications Act of 1934 (47 U.S.C. 151 et seq.) is amended—

(1) in section 2(b) (47 U.S.C. 152(b)), by striking "section 224" and inserting "sections 224 and 225"; and

(2) in section 221(b) (47 U.S.C. 221(b)), by striking "section 301" and inserting "sections 225 and 301".

SEC. 402. CLOSED-CAPTIONING OF PUBLIC SERVICE ANNOUNCEMENTS.

Section 711 of the Communications Act of 1934 is amended to read as follows: 47 USC 611

"SEC. 711. CLOSED-CAPTIONING OF PUBLIC SERVICE ANNOUNCEMENTS.

"Any television public service announcement that is produced or funded in whole or in part by any agency or instrumentality of Federal Government shall include closed captioning of the verbal content of such announcement. A television broadcast station licensee—

"(1) shall not be required to supply closed captioning for any such announcement that fails to include it; and

"(2) shall not be liable for broadcasting any such announcement without transmitting a closed caption unless the licensee intentionally fails to transmit the closed caption that was included with the announcement.".

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. CONSTRUCTION.

42 USC 12201

(a) IN GENERAL.—Except as otherwise provided in this Act, nothing in this Act shall be construed to apply a lesser standard than the standards applied under title V of the Rehabilitation Act of 1973 (29 U.S.C. 790 et seq.) or the regulations issued by Federal agencies pursuant to such title.

(b) RELATIONSHIP TO OTHER LAWS.—Nothing in this Act shall be construed to invalidate or limit the remedies, rights, and procedures of any Federal law or law of any State or political subdivision of any State or jurisdiction that provides greater or equal protection for the rights of individuals with disabilities than are afforded by this Act. Nothing in this Act shall be construed to preclude the prohibition of, or the imposition of restrictions on, smoking in places of employment covered by title I, in transportation covered by title II or III, or in places of public accommodation covered by title III.

(c) INSURANCE.—Titles I through IV of this Act shall not be construed to prohibit or restrict—

(1) an insurer, hospital or medical service company, health maintenance organization, or any agent, or entity that administers benefit plans, or similar organizations from underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

(2) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms

of a bona fide benefit plan that are based on underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

(3) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that is not subject to State laws that regulate insurance.

Paragraphs (1), (2), and (3) shall not be used as a subterfuge to evade the purposes of title I and III.

(d) Accommodations and Services.—Nothing in this Act shall be construed to require an individual with a disability to accept an accommodation, aid, service, opportunity, or benefit which such individual chooses not to accept.

42 USC 12202

SEC. 502. STATE IMMUNITY.

A State shall not be immune under the eleventh amendment to the Constitution of the United States from an action in Federal or State court of competent jurisdiction for a violation of this Act. In any action against a State for a violation of the requirements of this Act, remedies (including remedies both at law and in equity) are available for such a violation to the same extent as such remedies are available for such a violation in an action against any public or private entity other than a State.

42 USC 12203

SEC. 503. PROHIBITION AGAINST RETALIATION AND COERCION.

(a) Retaliation.—No person shall discriminate against any individual because such individual has opposed any act or practice made unlawful by this Act or because such individual made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this Act.

(b) Interference, Coercion, or Intimidation.—It shall be unlawful to coerce, intimidate, threaten, or interfere with any individual in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other individual in the exercise or enjoyment of, any right granted or protected by this Act.

(c) Remedies and Procedures.—The remedies and procedures available under sections 107, 203, and 308 of this Act shall be available to aggrieved persons for violations of subsections (a) and (b), with respect to title I, title II and title III, respectively.

42 USC 12204

SEC. 504. REGULATIONS BY THE ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD.

(a) Issuance of Guidelines.—Not later than 9 months after the date of enactment of this Act, the Architectural and Transportation Barriers Compliance Board shall issue minimum guidelines that shall supplement the existing Minimum Guidelines and Requirements for Accessible Design for purposes of titles II and III of this Act.

(b) Contents of Guidelines.—The supplemental guidelines issued under subsection (a) shall establish additional requirements, consistent with this Act, to ensure that buildings, facilities, rail passenger cars, and vehicles are accessible, in terms of architecture and design, transportation, and communication, to individuals with disabilities.

(c) Qualified Historic Properties.—

(1) In general.—The supplemental guidelines issued under subsection (a) shall include procedures and requirements for

alterations that will threaten or destroy the historic significance of qualified historic buildings and facilities as defined in 4.1.7(1)(a) of the Uniform Federal Accessibility Standards.

(2) SITES ELIGIBLE FOR LISTING IN NATIONAL REGISTER.—With respect to alterations of buildings or facilities that are eligible for listing in the National Register of Historic Places under the National Historic Preservation Act (16 U.S.C. 470 et seq.), the guidelines described in paragraph (1) shall, at a minimum, maintain the procedures and requirements established in 4.1.7 (1) and (2) of the Uniform Federal Accessibility Standards.

(3) OTHER SITES.—With respect to alterations of buildings or facilities designated as historic under State or local law, the guidelines described in paragraph (1) shall establish procedures equivalent to those established by 4.1.7(1) (b) and (c) of the Uniform Federal Accessibility Standards, and shall require, at a minimum, compliance with the requirements established in 4.1.7(2) of such standards.

SEC. 505. ATTORNEY'S FEES.

42 USC 12205.

In any action or administrative proceeding commenced pursuant to this Act, the court or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

SEC. 506. TECHNICAL ASSISTANCE.

42 USC 12206.

(a) PLAN FOR ASSISTANCE.—

(1) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Attorney General, in consultation with the Chair of the Equal Employment Opportunity Commission, the Secretary of Transportation, the Chair of the Architectural and Transportation Barriers Compliance Board, and the Chairman of the Federal Communications Commission, shall develop a plan to assist entities covered under this Act, and other Federal agencies, in understanding the responsibility of such entities and agencies under this Act.

(2) PUBLICATION OF PLAN.—The Attorney General shall publish the plan referred to in paragraph (1) for public comment in accordance with subchapter II of chapter 5 of title 5, United States Code (commonly known as the Administrative Procedure Act).

(b) AGENCY AND PUBLIC ASSISTANCE.—The Attorney General may obtain the assistance of other Federal agencies in carrying out subsection (a), including the National Council on Disability, the President's Committee on Employment of People with Disabilities, the Small Business Administration, and the Department of Commerce.

(c) IMPLEMENTATION.—

(1) RENDERING ASSISTANCE.—Each Federal agency that has responsibility under paragraph (2) for implementing this Act may render technical assistance to individuals and institutions that have rights or duties under the respective title or titles for which such agency has responsibility.

(2) IMPLEMENTATION OF TITLES.—

(A) TITLE I.—The Equal Employment Opportunity Commission and the Attorney General shall implement the plan for assistance developed under subsection (a), for title I.

(B) TITLE II.—

(i) SUBTITLE A.—The Attorney General shall implement such plan for assistance for subtitle A of title II.

(ii) SUBTITLE B.—The Secretary of Transportation shall implement such plan for assistance for subtitle B of title II.

(C) TITLE III.—The Attorney General, in coordination with the Secretary of Transportation and the Chair of the Architectural Transportation Barriers Compliance Board, shall implement such plan for assistance for title III, except for section 304, the plan for assistance for which shall be implemented by the Secretary of Transportation.

(D) TITLE IV.—The Chairman of the Federal Communications Commission, in coordination with the Attorney General, shall implement such plan for assistance for title IV.

(3) TECHNICAL ASSISTANCE MANUALS.—Each Federal agency that has responsibility under paragraph (2) for implementing this Act shall, as part of its implementation responsibilities, ensure the availability and provision of appropriate technical assistance manuals to individuals or entities with rights or duties under this Act no later than six months after applicable final regulations are published under titles I, II, III, and IV.

(d) GRANTS AND CONTRACTS.—

(1) IN GENERAL.—Each Federal agency that has responsibility under subsection (c)(2) for implementing this Act may make grants or award contracts to effectuate the purposes of this section, subject to the availability of appropriations. Such grants and contracts may be awarded to individuals, institutions not organized for profit and no part of the net earnings of which inures to the benefit of any private shareholder or individual (including educational institutions), and associations representing individuals who have rights or duties under this Act. Contracts may be awarded to entities organized for profit, but such entities may not be the recipients or grants described in this paragraph.

(2) DISSEMINATION OF INFORMATION.—Such grants and contracts, among other uses, may be designed to ensure wide dissemination of information about the rights and duties established by this Act and to provide information and technical assistance about techniques for effective compliance with this Act.

(e) FAILURE TO RECEIVE ASSISTANCE.—An employer, public accommodation, or other entity covered under this Act shall not be excused from compliance with the requirements of this Act because of any failure to receive technical assistance under this section, including any failure in the development or dissemination of any technical assistance manual authorized by this section.

42 USC 12207.

SEC. 507. FEDERAL WILDERNESS AREAS.

(a) STUDY.—The National Council on Disability shall conduct a study and report on the effect that wilderness designations and wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System as established under the Wilderness Act (16 U.S.C. 1131 et seq.).

(b) SUBMISSION OF REPORT.—Not later than 1 year after the enactment of this Act, the National Council on Disability shall submit the report required under subsection (a) to Congress.

(c) SPECIFIC WILDERNESS ACCESS.—

(1) IN GENERAL.—Congress reaffirms that nothing in the Wilderness Act is to be construed as prohibiting the use of a wheelchair in a wilderness area by an individual whose disability requires use of a wheelchair, and consistent with the Wilderness Act no agency is required to provide any form of special treatment or accommodation, or to construct any facilities or modify any conditions of lands within a wilderness area in order to facilitate such use.

(2) DEFINITION.—For purposes of paragraph (1), the term "wheelchair" means a device designed solely for use by a mobility-impaired person for locomotion, that is suitable for use in an indoor pedestrian area.

SEC. 508. TRANSVESTITES. 42 USC 12208.

For the purposes of this Act, the term "disabled" or "disability" shall not apply to an individual solely because that individual is a transvestite.

SEC. 509. COVERAGE OF CONGRESS AND THE AGENCIES OF THE LEGISLATIVE BRANCH. 42 USC 12209.

(a) COVERAGE OF THE SENATE.—

(1) COMMITMENT TO RULE XLII.—The Senate reaffirms its commitment to Rule XLII of the Standing Rules of the Senate which provides as follows:

"No member, officer, or employee of the Senate shall, with respect to employment by the Senate or any office thereof—

"(a) fail or refuse to hire an individual;

"(b) discharge an individual; or

"(c) otherwise discriminate against an individual with respect to promotion, compensation, or terms, conditions, or privileges of employment

on the basis of such individual's race, color, religion, sex, national origin, age, or state of physical handicap.".

(2) APPLICATION TO SENATE EMPLOYMENT.—The rights and protections provided pursuant to this Act, the Civil Rights Act of 1990 (S. 2104, 101st Congress), the Civil Rights Act of 1964, the Age Discrimination in Employment Act of 1967, and the Rehabilitation Act of 1973 shall apply with respect to employment by the United States Senate.

(3) INVESTIGATION AND ADJUDICATION OF CLAIMS.—All claims raised by any individual with respect to Senate employment, pursuant to the Acts referred to in paragraph (2), shall be investigated and adjudicated by the Select Committee on Ethics, pursuant to S. Res. 338, 88th Congress, as amended, or such other entity as the Senate may designate.

(4) RIGHTS OF EMPLOYEES.—The Committee on Rules and Administration shall ensure that Senate employees are informed of their rights under the Acts referred to in paragraph (2).

(5) APPLICABLE REMEDIES.—When assigning remedies to individuals found to have a valid claim under the Acts referred to in paragraph (2), the Select Committee on Ethics, or such other entity as the Senate may designate, should to the extent

practicable apply the same remedies applicable to all other employees covered by the Acts referred to in paragraph (2). Such remedies shall apply exclusively.

(6) Matters Other Than Employment.—

(A) In General.—The rights and protections under this Act shall, subject to subparagraph (B), apply with respect to the conduct of the Senate regarding matters other than employment.

(B) Remedies.—The Architect of the Capitol shall establish remedies and procedures to be utilized with respect to the rights and protections provided pursuant to subparagraph (A). Such remedies and procedures shall apply exclusively, after approval in accordance with subparagraph (C).

(C) Proposed remedies and procedures.—For purposes of subparagraph (B), the Architect of the Capitol shall submit proposed remedies and procedures to the Senate Committee on Rules and Administration. The remedies and procedures shall be effective upon the approval of the Committee on Rules and Administration.

(7) Exercise of rulemaking power.—Notwithstanding any other provision of law, enforcement and adjudication of the rights and protections referred to in paragraph (2) and (6)(A) shall be within the exclusive jurisdiction of the United States Senate. The provisions of paragraph (1), (3), (4), (5), (6)(B), and (6)(C) are enacted by the Senate as an exercise of the rulemaking power of the Senate, with full recognition of the right of the Senate to change its rules, in the same manner, and to the same extent, as in the case of any other rule of the Senate.

(b) Coverage of the House of Representatives.—

(1) In general.—Notwithstanding any other provision of this Act or of law, the purposes of this Act shall, subject to paragraphs (2) and (3), apply in their entirety to the House of Representatives.

(2) Employment in the house.—

(A) Application.—The rights and protections under this Act shall, subject to subparagraph (B), apply with respect to any employee in an employment position in the House of Representatives and any employing authority of the House of Representatives.

(B) Administration.—

(i) In general.—In the administration of this paragraph, the remedies and procedures made applicable pursuant to the resolution described in clause (ii) shall apply exclusively.

(ii) Resolution.—The resolution referred to in clause (i) is House Resolution 15 of the One Hundred First Congress, as agreed to January 3, 1989, or any other provision that continues in effect the provisions of, or is a successor to, the Fair Employment Practices Resolution (House Resolution 558 of the One Hundredth Congress, as agreed to October 4, 1988).

(C) Exercise of rulemaking power.—The provisions of subparagraph (B) are enacted by the House of Representatives as an exercise of the rulemaking power of the House of Representatives, with full recognition of the right of the House to change its rules, in the same manner, and to the same extent as in the case of any other rule of the House.

(3) Matters other than employment.—

(A) In general.—The rights and protections under this Act shall, subject to subparagraph (B), apply with respect to the conduct of the House of Representatives regarding matters other than employment.

(B) Remedies.—The Architect of the Capitol shall establish remedies and procedures to be utilized with respect to the rights and protections provided pursuant to subparagraph (A). Such remedies and procedures shall apply exclusively, after approval in accordance with subparagraph (C).

(C) Approval.—For purposes of subparagraph (B), the Architect of the Capitol shall submit proposed remedies and procedures to the Speaker of the House of Representatives. The remedies and procedures shall be effective upon the approval of the Speaker, after consultation with the House Office Building Commission.

(c) Instrumentalities of Congress.—

(1) In general.—The rights and protections under this Act shall, subject to paragraph (2), apply with respect to the conduct of each instrumentality of the Congress.

(2) Establishment of remedies and procedures by instrumentalities.—The chief official of each instrumentality of the Congress shall establish remedies and procedures to be utilized with respect to the rights and protections provided pursuant to paragraph (1). Such remedies and procedures shall apply exclusively.

(3) Report to congress.—The chief official of each instrumentality of the Congress shall, after establishing remedies and procedures for purposes of paragraph (2), submit to the Congress a report describing the remedies and procedures.

(4) Definition of instrumentalities.—For purposes of this section, instrumentalities of the Congress include the following: the Architect of the Capitol, the Congressional Budget Office, the General Accounting Office, the Government Printing Office, the Library of Congress, the Office of Technology Assessment, and the United States Botanic Garden.

(5) Construction.—Nothing in this section shall alter the enforcement procedures for individuals with disabilities provided in the General Accounting Office Personnel Act of 1980 and regulations promulgated pursuant to that Act.

SEC. 510. ILLEGAL USE OF DRUGS. 42 USC 12210.

(a) In General.—For purposes of this Act, the term "individual with a disability" does not include an individual who is currently engaging in the illegal use of drugs, when the covered entity acts on the basis of such use.

(b) Rules of Construction.—Nothing in subsection (a) shall be construed to exclude as an individual with a disability an individual who—

(1) has successfully completed a supervised drug rehabilitation program and is no longer engaging in the illegal use of drugs, or has otherwise been rehabilitated successfully and is no longer engaging in such use;

(2) is participating in a supervised rehabilitation program and is no longer engaging in such use; or

(3) is erroneously regarded as engaging in such use, but is not engaging in such use;

except that it shall not be a violation of this Act for a covered entity to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual described in paragraph (1) or (2) is no longer engaging in the illegal use of drugs; however, nothing in this section shall be construed to encourage, prohibit, restrict, or authorize the conducting of testing for the illegal use of drugs.

(c) Health and Other Services.—Notwithstanding subsection (a) and section 511(b)(3), an individual shall not be denied health services, or services provided in connection with drug rehabilitation, on the basis of the current illegal use of drugs if the individual is otherwise entitled to such services.

(d) Definition of Illegal use of drugs.—

(1) In general.—The term "illegal use of drugs" means the use of drugs, the possession or distribution of which is unlawful under the Controlled Substances Act (21 U.S.C. 812). Such term does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

(2) Drugs.—The term "drug" means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act.

42 USC 12211

SEC. 511. DEFINITIONS.

(a) Homosexuality and Bisexuality.—For purposes of the definition of "disability" in section 3(2), homosexuality and bisexuality are not impairments and as such are not disabilities under this Act.

(b) Certain Conditions.—Under this Act, the term "disability" shall not include—

(1) transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders;

(2) compulsive gambling, kleptomania, or pyromania; or

(3) psychoactive substance use disorders resulting from current illegal use of drugs.

SEC. 512. AMENDMENTS TO THE REHABILITATION ACT.

(a) Definition of Handicapped Individual.—Section 7(8) of the Rehabilitation Act of 1973 (29 U.S.C. 706(8)) is amended by redesignating subparagraph (C) as subparagraph (D), and by inserting after subparagraph (B) the following subparagraph:

"(C)(i) For purposes of title V, the term 'individual with handicaps' does not include an individual who is currently engaging in the illegal use of drugs, when a covered entity acts on the basis of such use.

"(ii) Nothing in clause (i) shall be construed to exclude as an individual with handicaps an individual who—

"(I) has successfully completed a supervised drug rehabilitation program and is no longer engaging in the illegal use of drugs, or has otherwise been rehabilitated successfully and is no longer engaging in such use;

"(II) is participating in a supervised rehabilitation program and is no longer engaging in such use; or

"(III) is erroneously regarded as engaging in such use, but is not engaging in such use;

except that it shall not be a violation of this Act for a covered entity to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual described in subclause (I) or (II) is no longer engaging in the illegal use of drugs.

"(iii) Notwithstanding clause (i), for purposes of programs and activities providing health services and services provided under titles I, II and III, an individual shall not be excluded from the benefits of such programs or activities on the basis of his or her current illegal use of drugs if he or she is otherwise entitled to such services.

"(iv) For purposes of programs and activities providing educational services, local educational agencies may take disciplinary action pertaining to the use or possession of illegal drugs or alcohol against any handicapped student who currently is engaging in the illegal use of drugs or in the use of alcohol to the same extent that such disciplinary action is taken against nonhandicapped students. Furthermore, the due process procedures at 34 CFR 104.36 shall not apply to such disciplinary actions.

"(v) For purposes of sections 503 and 504 as such sections relate to employment, the term 'individual with handicaps' does not include any individual who is an alcoholic whose current use of alcohol prevents such individual from performing the duties of the job in question or whose employment, by reason of such current alcohol abuse, would constitute a direct threat to property or the safety of others.".

(b) DEFINITION OF ILLEGAL DRUGS.—Section 7 of the Rehabilitation Act of 1973 (29 U.S.C. 706) is amended by adding at the end the following new paragraph:

"(22)(A) The term 'drug' means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812).

"(B) The term 'illegal use of drugs' means the use of drugs, the possession or distribution of which is unlawful under the Controlled Substances Act. Such term does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.".

(c) CONFORMING AMENDMENTS.—Section 7(8)(B) of the Rehabilitation Act of 1973 (29 U.S.C. 706(8)(B)) is amended—

(1) in the first sentence, by striking "Subject to the second sentence of this subparagraph," and inserting "Subject to subparagraphs (C) and (D),"; and

(2) by striking the second sentence.

SEC. 513. ALTERNATIVE MEANS OF DISPUTE RESOLUTION.

42 USC 12212.

Where appropriate and to the extent authorized by law, the use of alternative means of dispute resolution, including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials,

BEST COPY AVAILABLE

and arbitration, is encouraged to resolve disputes arising under this Act.

42 USC 12213

SEC. 514. SEVERABILITY.

Should any provision in this Act be found to be unconstitutional by a court of law, such provision shall be severed from the remainder of the Act, and such action shall not affect the enforceability of the remaining provisions of the Act.

Approved July 26, 1990.

LEGISLATIVE HISTORY—S. 933 (H.R. 2273):

HOUSE REPORTS: No. 101-485, Pt. 1 (Comm. on Public Works and Transportation), Pt. 2 (Comm. on Education and Labor), Pt. 3 (Comm. on the Judiciary), and Pt. 4 (Comm. on Energy and Commerce) all accompanying H.R. 2273; and No. 101-558 and No. 101-569 both from (Comm. of Conference).

HOUSE CONFERENCE REPORT 101-596

101st Congress
2d Session
HOUSE OF REPRESENTATIVES
Report
101-596

AMERICANS WITH DISABILITIES ACT OF 1990

July 12, 1990.—Ordered to be printed

Mr. Hawkins, from the committee of conference,
submitted the following

CONFERENCE REPORT

[To accompany S. 933]

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 933), to establish a clear and comprehensive prohibition of discrimination on the basis of disability, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment, insert the following:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) Short Title.—*This Act may be cited as the "Americans with Disabilities Act of 1990".*

(b) Table of Contents.—*The table of contents is as follows:*

Sec. 1. Short title; table of contents.
Sec. 2. Findings and purposes.
Sec. 3. Definitions.

TITLE I—EMPLOYMENT

Sec. 101. Definitions.
Sec. 102. Discrimination.
Sec. 103. Defenses.
Sec. 104. Illegal use of drugs and alcohol.
Sec. 105. Posting notices.
Sec. 106. Regulations.
Sec. 107. Enforcement.
Sec. 108. Effective date.

From the Committee on Education and Labor, for consideration of the Senate bill, and the House amendment, and modifications committed to conference:

Augustus F. Hawkins,
Major R. Owens,
Matthew G. Martinez,
Steve Bartlett,
H.W. Fawell,

From the Committee on Energy and Commerce, for consideration of the Senate bill, and the House amendment, and modifications committed to conference, except that for consideration of title IV of the Senate bill, and title IV of the House amendment, and modifications committed to conference, Mr. Rinaldo is appointed in lieu of Mr. Whittaker:

John D. Dingell,
Edward J. Markey,
Tom Luken,
Norman F. Lent,
Bob Whittaker,

For consideration of title IV of the Senate bill, and title IV of the House amendment, and modifications committed to conference, in lieu of Mr. Whittaker:

Matthew Rinaldo,

From the Committee on Public Works and Transportation, for consideration of the Senate bill, and the House amendment, and modifications committed to conference:

Glenn M. Anderson,
Robert A. Roe,
Norman Y. Mineta,
John Paul Hammerschmidt,

From the Committee on the Judiciary, for consideration of the Senate bill, and the House amendment, and modifications committed to conference:

Jack Brooks,
Don Edwards,
Robert W. Kastenmeier,
Hamilton Fish, Jr.,
F. James Sensenbrenner, Jr. (except for amendment to sec. 103(d)),

As an additional conferee, for consideration of the Senate bill, and the House amendment, and modifications committed to conference:

Steny H. Hoyer,
Managers on the Part of the House.

Edward M. Kennedy,
Tom Harkin,
Howard M. Metzenbaum,
Paul Simon,
Orrin G. Hatch,
Dave Durenberger,
James M. Jeffords,

From the Committee on Commerce, Science, and Transportation, solely for the consideration of issues within that Committee's jurisdiction (telecommunications, commuter transit, and drug testing of transportation employees):

ERNEST F. HOLLINGS,
DANIEL K. INOUYE,
JOHN C. DANFORTH,
Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 933) to establish a clear and comprehensive prohibition of discrimination on the basis of disability and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

1. Short title

The Senate bill titles the Act the Americans with Disabilities Act of 1989. The House amendment changes the date to 1990.

The Senate recedes.

1A. Findings and purposes

The House amendment, but not the Senate bill, includes the term "color" in its list of factors which have been the basis of discrimination for which there is legal recourse to redress such discrimination.

The Senate recedes.

TITLE I OF THE ADA (EMPLOYMENT)

2. Definition of the term "direct threat"

The House amendment, but not the Senate bill, defines the term "direct threat" to mean a significant risk to the health or safety of others that cannot be eliminated by reasonable accommodation.

The Senate recedes.

3. Definitions of terms "illegal use of drugs" and "drugs"

The Senate bill uses the phrase "illegal drug" and explains that the term means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act, the possession or distribution of which is unlawful under such Act and does not mean the use of a controlled substance pursuant to a valid prescription or other uses authorized by the Controlled Substances Act.

The House amendment uses the phrase "illegal use of drugs" and defines the term to mean the use of drugs, the possession or distribution of which is unlawful under the Controlled Substances Act and does not mean the use of controlled substances taken under supervision by a licensed health care professional or other uses authorized by the Controlled Substances Act or other provisions of Federal law. The House amendment defines the term "drugs" to mean a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act.

The Senate recedes.

4. *Essential functions of the job*

The Senate bill defines a qualified individual with a disability as a person who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires.

The House amendment adds that consideration shall be given to the employer's judgment as to what functions of a job are essential and if an employer has prepared a written description before advertising or interviewing applicants for the job, this description shall be considered evidence of the essential functions of the job.

The Senate recedes.

5. *Definition of the term "undue hardship"*

(a) The Senate bill defines an "undue hardship" to mean an action requiring significant difficulty or expense and then list the factors that must be considered in determining whether an accommodation would impose an undue hardship.

The House amendment specifies that the term "undue hardship" means an action requiring significant difficulty or expense, when considered in light of the factors listed in the statute.

The Senate recedes.

(b) In determining whether accommodating a qualified applicant or employee with a disability imposes an "undue hardship," the Senate bill requires that the following factors be considered: (1) the overall size of the covered entity with respect to the number of employees, number and type of facilities, and size of the budget; (2) the type of operation of the covered entity, including the composition and structure of the entity; and (3) the nature and cost of the action needed.

The House amendment includes the following factors: (1) the nature and cost of the accommodation needed under the ADA; (2) the overall financial resources of the facility or facilities involved in the provision of the reasonable accommodation, the number of persons employed at such facility, the effect on expenses and resources, or the impact otherwise of such accommodation upon the operation of the facility; (3) the overall financial resources of the covered entity, the overall size of the business of a covered entity with respect to the number of its employees, the number, type, and location of its facilities; and (4) the type of operation or operations of the covered entity, including the composition, structure, and functions of the workforce of such entity, the geographic separateness, administrative, or fiscal relationship of the facility or facilities in question to the covered entity.

The Senate recedes.

6. Discrimination

The Senate bill and the House amendment use the same terms but in a different order.

The Senate recedes.

7. Contract liability

The Senate bill specifies that covered entities cannot discriminate directly or indirectly through contracts with other parties.

The House amendment clarifies that a covered entity is only liable in contractual arrangements for discrimination against its own applicants or employees.

The Senate recedes.

8. Reasonable accommodation

The Senate bill specifies that it is discriminatory for a covered entity to deny an employment opportunity to a qualified job applicant or employee with a disability if such denial is based on the need of the covered entity to make reasonable accommodations. In a separate section, the Senate bill specifies that reasonable accommodations need not be provided if they would result in an undue hardship.

The House amendment clarifies the relationship between the obligation not to deny a job to an individual with a disability who needs a reasonable accommodation and the undue hardship limitation governing the covered entity's obligation to provide the reasonable accommodation by including these provisions under the same paragraph.

The Senate recedes.

9. Employment tests

The House amendment adds the term "qualification standards" to the phrase "employment tests or other selection criteria."

The Senate recedes.

10. Preemployment inquiries

The House amendment deletes the word "employee" from the preemployment inquiry provision.

The Senate recedes. The conferees note that in certain industries, such as air transportation, applicants for security and safety related positions are normally chosen on the basis of many competitive factors, some of which are identified as a result of post-offer pre-employment medical examinations. Thus, after the employer receives the results of the post-offer medical examination for applicants for safety or security sensitive positions, only those applicants who meet the employer's criteria for the job must receive confirmed offers of employment, so long as the employer does not use those results of the exam to screen out qualified individuals with disabilities on the basis of disability. The conferees do not intend for this Act to override any legitimate medical standards or requirements established by Federal, state or local law, or by employers for applicants for safety or security sensitive positions, if the medical standards are consistent with this Act.

11. Postemployment medical examinations

The Senate bill specifies that an employer shall not conduct or require a medical examination of an employer unless such examination or inquiry is shown to be job-related and consistent with business necessity.

The House amendment deletes the term "conduct" and adds that a covered entity may conduct voluntary medical examinations, including voluntary medical histories, which are part of an employee health program available to employees at that work site so long as the information obtained regarding the medical condition or history of any employee are kept confidential and are not used to discriminate against qualified individuals with disabilities.

The Senate recedes.

12. Defenses, in general

The Senate amendment includes a reference to "reasonable accommodations." The House adds the following phrase "as required under this title."

The Senate recedes.

13. Health and safety

The Senate bill includes as a defense that a covered entity may fire or refuse to hire a person with a contagious disease if the individual poses a direct threat to the health and safety of other individuals in the workplace.

The House amendment makes this specific defense applicable to all applicants and employees, not just to those with contagious diseases.

The Senate recedes. The conferees intend that the term "qualification standard" as uses in section 103(b) permits a requirement that an individual with a disability not pose a direct threat to the health or safety of other individuals in the workplace if reasonable accommodation will not eliminate the direct threat. In addition, the conferees concur with the House provision that defines "direct threat" to mean "significant risk" (section 101(3). The qualification standard in section 103(b) and the definition in section 101(3) clearly spell out the right of the employer to take action to protect the rights of its employees and other individuals in the workplace. Such employer action would include not assigning an individual to a job if such an assignment would pose a direct threat to individuals in the workplace and such a threat could not be eliminated by reasonable accommodation. The conferees incorporate by reference the explanations of the term "direct threat" set out in Senate Report No. 101-116. Consistent with this explanation, in determining what constitutes a significant risk, the conferees intend that the employer may take into consideration such factors as the magnitude, severity, or likelihood of risk to other individuals in the workplace and that the burden would be on the employer to show the relevance of such factors in relying on the qualification standard.

14. Religious tenet exemption

The Senate bill specifies that a religious organization may require, as a qualification standard to employment, that all applicants and employees conform to the religious tenets of such organization.

The House amendment deletes the phrase "as a qualification standard to employment."

The Senate recedes.

15. Food handlers

The House amendment, but not the Senate bill, specifies that it shall not be a violation of this Act for an employer to refuse to assign or continue to assign any employee with an infectious or communicable disease of public health significance to a job involving food handling, provided that the employer shall make reasonable accommodation that would offer an alternative employment opportunity for which the employee is qualified and for which the employee would sustain no economic damage.

The House recedes to the Senate with an amendment. The amendment states:

"(d) LIST OF INFECTIOUS AND COMMUNICABLE DISEASES.—

"(1) IN GENERAL.—The Secretary of Health and Human Services, not later than 6 months after enactment of this Act, shall—

"(A) review all infectious and communicable diseases which may be transmitted through handling food supply;

"(B) publish a list of infectious and communicable diseases which are transmitted through handling the food supply;

"(C) publish the methods by which such diseases are transmitted; and

"(D) widely disseminate such information regarding the list of diseases and their modes of transmissability to the general public. Such list shall be updated annually.

"(2) APPLICATIONS.—In any case in which an individual has an infectious or communicable disease that is transmitted to others through the handling of food that is included on the list developed by the Secretary of Health and Human Services under (a) and which cannot be eliminated by reasonable accommodation, a covered entity may refuse to assign or continue to assign such individual to a job involving food handling.

"(3) CONSTRUCTION.—Nothing in this Act shall be construed to preempt, modify, or amend any state, county, or local law, ordinance, or regulation applicable to food handling which is designed to protect the public health from individuals who pose a significant risk to the health or safety of others, which cannot be eliminated by reasonable accommodation, pursuant to the list of infectious or communicable diseases and the modes of transmissibility published by the Secretary of Health and Human Services.".

The basic underlying goal of this provision is to ensure that accurate information is conveyed to the general public regarding those infections and communicable diseases which are transmitted through the handling of food.

The purpose of this provision is to assure the American public that the Secretary of Health and Human Services through the Public Health Service will review all infections and communicable diseases that may be transmitted through the handling of food and will then determine, based on valid scientific and medical analysis and using accepted public health methodologies and statistical practices regarding risk of transmission, whether such diseases are transmitted through the handling of food. This will reassure the American public that the Secretary has carefully analyzed this issue and has published a list of infectious and communicable diseases that are transmitted through the handling of food.

The list required under this provision must be updated annually by the Secretary. This requirement is included to reassure the American public that, on an annual basis, the Secretary will review the relevant scientific and medical evidence regarding the transmissibility of all diseases and will determine, based on that evidence, whether any of these diseases are transmitted through the handling of food.

The amendment further provides that the Secretary shall widely disseminate information regarding the list of diseases that are transmissible through food handling and the modes by which such diseases are transmitted through the handling of food. This is a critical component of the amendment. The conferees believe that the lack of awareness of the American public regarding which diseases are and are not transmitted through the handling of food has contributed to false perceptions in this area. Instead of allowing false perceptions to determine whether individuals may remain in food handling jobs, this provision requires the Secretary to use valid scientific evidence to determine which diseases are transmitted through the handling of food and then to ensure that the American public is well-educated regarding these facts in order to allay any unnecessary fears.

The amendment further provides that, in any case in which an individual has an infectious or communicable disease that can be transmitted to others through the handling of food, which disease is included on the list developed by the Secretary, and in which the risk of the disease being transmitted in the particular job cannot be eliminated by reasonable accommodation, a covered entity under this title may refuse to assign or continue to assign such individual to a job involving food handling.

This provision is consistent with the underlying requirements of the ADA. If an individual has an infectious or communicable disease which is transmitted through the handling of food, then an employer or other covered entity under this title has the right under the ADA to, for example, reassign that employee to a job involving food handling. The underlying requirement of the ADA is simply that a reasonable accommodation must be made if such accommodation will eliminate the risk of the disease being transmitted in the particular job. For example, if an individual has an infectious disease that can be eliminated by taking medication for a specified period of time, the employer must offer the employee the reasonable accommodation of allowing the individual time off to take such medication. Of course, this accommodation would be subject to the same "undue hardship" limitation which applies to all accommodations under this title.

In addition, the placement of a disease on the list developed by the Secretary does not, of itself, define the disease as a disability for purposes of the requirements of this Act. Rather, whether a person is an "individual with a disability" is determined pursuant to section 3(2).

Finally, this amendment includes an anti-preemption provision. This provision is an explanation of the general anti-preemption provision of section 501(b) of the Act, but is designed specifically with regard to laws regarding food handling. The point of this provision is to clarify that legitimate state and local public health laws and regulations regarding food handling are not preempted by the ADA. State and local public health departments are, many times, at the front lines of protecting the public health. Such legitimate laws and regulations designed to protect the public health, therefore, are not preempted by the ADA.

This provision, however, in amplifying Section 501(b) more clearly defines certain types of existing and prospective state and local public health laws that are not preempted by the ADA. First, the laws must be designed to protect the public health from individuals who pose a significant risk to the health or safety of others, which risk cannot be eliminated by reasonable accommodation. This is consistent with the definition of "direct threat" under this title. Second, because this provision is designed to apply specifically to laws regarding food handling, such laws must pertain to the list of infectious and communicable diseases published by the Secretary as transmitted through food handling and be consistent with the determinations made by the Secretary regarding the modes of transmissability. This provision ensures that such legitimate state and local laws, ordinances, and regulations, which deal with disease transmission through food handling, as defined by the Secretary, are not preempted by the ADA.

This amendment appropriately carries out both the letter and the spirit of the underlying requirements of the ADA. Instead of allowing false perceptions to determine whether an employee may remain in a particular job, this provision ensures that valid public health guidelines, rather than false perceptions, will determine the protections afforded under this title. In addition, and of critical importance, this provision should reassure the American public by requiring the Secretary to evaluate this area carefully by reviewing all communicable diseases and by publishing a list of diseases that are transmitted through food handling and by ensuring that the American public will be educated regarding those diseases which are transmitted through the handling of food.

16. Illegal use of drugs and use of alcohol

(a) The Senate bill specifies that the term "qualified individual with a disability" does not include employees or applicants who are current users of illegal drugs, except that an individual who is otherwise handicapped shall not be excluded from the protections of the Act if such individual also uses or is addicted to drugs.

The House amendment specifies that "qualified person with a disability" does not include any applicant or employee who is currently engaging in the illegal use of drugs when the covered entity acts on the basis of such use.

The Senate recedes. The provision excluding an individual who engages in the illegal use of drugs from protection is intended to ensure that employers may discharge or deny employment to persons who illegally use drugs on that basis, without fear of being held liable for discrimination. The provision is not intended to be limited to persons who use drugs on the day of, or within a matter of days or weeks before, the employment action in question. Rather, the provision is intended to apply to a person whose illegal use of drugs occurred recently enough to justify a reasonable belief that a person's drug use is current.

(b) The House amendment specifies that the following individuals are not excluded from the definition of the term "qualified individual with a disability": (1) an individual who has successfully completed a supervised rehabilitation program and is no longer engaging in the illegal use of drugs or has otherwise been rehabilitated successfully and is no longer engaging in such use; (2) an individual who is participating in a supervised rehabilitation program and is no longer engaging in such use; or (3) an individual who is erroneously regarded as engaging in such use but is not engaging in such use.

The Senate recedes. Section 104(b)(2) provides that a person cannot be excluded as a qualified individual with a disability if that individual is participating in a supervised rehabilitation program and is no longer engaging in the illegal use of drugs. This provision does not permit persons to invoke the Act's protection simply by showing that they are participating in a drug treatment program. Rather, refraining from illegal use of drugs also is essential. Employers are entitled to seek reasonable assurances that no illegal use of drugs is occurring or has occurred recently enough so that continuing use is a real and ongoing problem. On the other hand, this provision recognizes that many people continue to participate in drug treatment programs long after they have stopped using drugs illegally, and that such persons should be protected under the Act. The conferees intend that the phrase "otherwise been rehabilitated successfully" be interpreted to refer to both inpatient and outpatient programs, as well as appropriate employee assistance programs that provide professional (not necessarily medical) assistance and counseling.

(c) The House amendment, but not the Senate bill, specifies that it is not a violation of title I of the Act for a covered entity to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual involved in rehabilitation programs is no longer engaging in the illegal use of drugs.

The Senate recedes. Conferees note that, for purposes of this title, an individual covered by the regulations described in section 104(c)(5) who tests positive on an employment related drug test conducted and verified in conformity with applicable federal regulations or guidelines is deemed to be "currently engaging in the illegal use of drugs" and may not invoke the Act's protection, except as provided in section 104(b)(3). The conferees do not intend to prevent individuals covered by section 104(c)(5) or any other individual covered by the employment provisions of the Act from challenging a positive drug test result by invoking the protection of section 104(b)(3). The ADA itself does not provide any standard by which the accuracy or validity of a drug test result is to be determined. Conferees also recognize that current Department of Transportation regulations allow or require, depending on the circumstances, employers to remove individuals in safety sensitive positions who are undergoing drug rehabilitation from such positions. With respect to individuals illegally using drugs or impaired by alcohol, nothing in this Act is intended to affect federal laws or Department of Transportation regulations to protect public safety.

(d) The Senate bill specifies that the covered entity may require that employees behave in conformance with the requirements of the Drug-Free Workplace Act of 1988 and that transportation employees meet requirements established by the Secretary of Transportation with respect to drugs and alcohol.

The House amendment also includes reference to positions defined by the Department of Defense and the Nuclear Regulatory Commission.

The Senate recedes.

(e) The House amendment adds that nothing in this title shall be construed to encourage, prohibit, restrict, or authorize the otherwise lawful exercise by railroads of authority to: (1) test railroad employees in, and applicants for, positions involving safety-sensitive duties, as determined by the Secretary of Transportation, for the illegal use of drugs and for on-duty impairment by alcohol; and (2) remove such persons who test positive from safety-sensitive duties.

The Senate recedes with an amendment. The amendment substitutes the phrase "entities subject to the jurisdiction of the Department of Transportation" for the word "railroad" in the House amendment; substitutes the phrase "employees of such entities" for the term "railroad employees" in the House amendment; deletes the phrase "as determined by the Secretary of Transportation" in subsection (e)(1) of the House amendment; and adds the phrase "for illegal use of drugs and on duty impairment by alcohol" after the word "positive" in subsection (e)(2) of the House amendment. The conferees agree that, separate and apart from Department of Transportation regulations, nothing in this title shall be construed to encourage, prohibit, restrict, or authorize the otherwise lawful exercise (e.g., as a result of collective bargaining agreements) by entities subject to the jurisdiction of DOT of authority to test employees of such entities in, and applicants for, positions involving safety sensitive duties for the illegal use of drugs and for on duty impairment by alcohol, and to remove such persons who test positive from safety sensitive duties. The conferees intend that the authority for transportation entities to remove persons who test positive includes authority for dismissal or disqualification, consistent with the provisions of this title. The conferees do not intent to prevent individuals covered by section 104(c)(5) or any other individual covered by the employment provisions of the Act, from challenging a positive drug test by invoking the protection of section 104(b)(3). The ADA itself, does not provide any standard by which the accuracy or validity of a drug test result is to be determined.

The conferees note that there was a typographical error in part 2 (Education and Labor Committee) of the House Report No. 101-485. The language in the last paragraph on page 81 should have appeared as follows: "The Act is not intended to disturb the legitimate and reasonable disciplinary rules and procedures established and enforced by professional sports leagues; nor is it intended to disturb collectively bargained policies that have been entered into between league management and its players association that are not inconsistent with this Act."

17. Enforcement

(a) The House amendment adds "powers" to the phrase "remedies and procedures" to conform the ADA to title VII.

The Senate recedes.

(b) The House amendment adds to the enforcement section a reference to section 705 of title VII of the Civil Rights Act of 1964 (authority of the Equal Employment Opportunity Commission).

The Senate recedes.

(c) The House amendment adds a reference to "the Attorney General."

The Senate recedes.

(d) The House amendment substitutes the term "person," which is used and defined in title VII of the Civil Rights Act of 1964 for the term "individual" included in the Senate bill.

The Senate recedes.

(e) The Senate bill includes the phrase any individual "who believes he or she is being subjected to discrimination." The House amendment substitutes "any person alleging discrimination."

The Senate recedes.

18. Relationship with the Rehabilitation Act of 1973

The House amendment, but not the Senate bill, directs administrative agencies to develop procedures and coordinating mechanisms to ensure that ADA and Rehabilitation Act of 1973 administrative complaints are handled without duplication or inconsistent, conflicting standards. Further, agencies must establish the coordinating mechanisms in their regulations.

The Senate recedes with an amendment. The amendment specifies that "The Commission, the Attorney General, and the Office of Federal Contract Compliance Programs shall establish such coordinating mechanisms (similar to provisions contained in the joint regulations promulgated by the Commission and the Attorney General at part 42 of title 28 and part 1691 of title 29, Code of Federal Regulations, and the Memorandum of Understanding between the Commission and the Office of Federal Contract Compliance Programs dated January 16, 1981 (46 Fed. Reg. 7435, January 23, 1981)) in regulations implementing this title and the Rehabilitation Act of 1973 not later than 18 months after the date of enactment of this Act."

TITLE II OF THE ADA (PUBLIC SERVICES)

19. Structure of title II

The Senate bill includes one set of standards applicable to all public entities providing public services, including entities providing public transportation.

The House amendment includes subtitle A—Prohibition Against Discrimination and Other Generally Applicable Provisions and subtitle B—Actions Applicable to Public Transportation Provided by Public Entities Considered Discriminatory. Two parts are included under subtitle B: part I covers public transportation other than by aircraft or certain rail operations (intercity and commuter rail) and part II covers public transportation by intercity and commuter rail.

The Senate recedes.

SUBTITLE A—PROHIBITION AGAINST DISCRIMINATION AND OTHER GENERALLY APPLICABLE PROVISIONS

20. Definition of public entities

The Senate bill specifics that the public entities subject to the provisions of title II include: any state or local government or any department, agency, special purpose district, or other instrumentality of a State or local government. The accompanying report makes it clear that AMTRAK and commuter authorites are considered public entities.

The House amendment defines the term "public entity" to mean any state or local government or any department, agency, special purpose district, or other instrumentality of a state or states or local government; a commuter authority (as defined in section 103(8) of the Rail Passenger Service Act); and the National Railroad Passenger Corporation (AMTRAK).

The Senate recedes.

21. Qualified individual with a disability

The House amendment uses the term "public entity" in lieu of the list of entities covered by subtitle A.

The Senate recedes.

22. Discrimination, in general

The Senate bill specifies the general and specific prohibitions against discrimination by public entities.

The House amendment retains the general prohibition and clarifies that this general prohibition is subject to the other more specific provisions in title II. The House amendment also includes grammatical changes.

The Senate recedes. Questions have been raised regarding the obligations under this legislation of local and state governments to make 911 telephone emergency services available to hearing impaired and speech impaired persons. It is the intent of the conferees that the telephone emergency services operated by local and state governments be accessible to such individuals. This means that such telephone emergency systems must be equipped with technology that gives these individuals direct access to emergency services. For the present, this would require that local emergency systems provide a direct telephone line for individuals who rely on telecommunications devices for the deaf (the Baudot format) and computer modems (the ASCII format) to make telephone calls. In the future, new technology, such as speech-to-text services, may require other forms of direct access for such individuals. With this title II mandate, individuals with hearing and speech impairments will finally join the rest of us in having immediate access to assistance from police, fire, and ambulance services.

23. Enforcement

The Senate bill specifies that the remedies, procedures, and rights set out in section 505 of the Rehabilitation Act of 1973 shall be available with respect to any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of this Act, or regulations promulgated under section 204 concerning public services.

The House amendment provides that the remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 shall be the remedies, procedures, and rights this title provides to any person alleging discrimination on the basis of disability in violation of section 202.

The Senate recedes.

24. Regulations and standards

The Senate bill specifies that the Attorney General shall issue regulations implementing title II with the exception of section 203 pertaining to public transportation provided by public entities.

The House amendment, consistent with the revised structure used by the House, specifies that the Attorney General shall promulgate regulations that implement subtitle A. Such regulations shall not include any matter within the scope of the authority of the Secretary of Transportation under section 223 (paratransit), section 229 (regulations relating to part I of subtitle B), and section 244 (regulations relating to part II of subtitle B).

The House amendment also specifies that regulations shall include standards applicable to facilities and vehicles covered by subtitle A, other than facilities stations, rail passenger cars, and vehicles covered by subtitle B.

The Senate recedes.

SUBTITLE B—ACTIONS APPLICABLE TO PUBLIC TRANSPORTATION PROVIDED BY PUBLIC ENTITIES CONSIDERED DISCRIMINATORY

PART I—PUBLIC TRANSPORTATION OTHER THAN BY AIRCRAFT OR CERTAIN RAIL OPERATIONS

25. Definitions

The Senate bill uses the following phrases: "demand responsive system," "fixed route system," "operates," and "public transportation."

The House amendment adds definitions for the terms "demand responsive system," "fixed route system" and "operates." The House amendment also substitutes the phrase "designated public transportation" for the phrase "public transportation" and includes the following definition: transportation (other than public school transportation) by bus, rail, or by other conveyance (other than transportation by aircraft, or intercity or commuter rail) that provides the general public with general or special service (including charter service) on a regular and continuing basis. The House amendment also includes a definition for the term "public school transportation.

The Senate recedes.

26. Purchase or lease of new and used fixed route vehicles

With slightly different wording, the Senate bill and the House amendment required that all new vehicles purchased or leased by a public entity which operates a fixed route system be accessible and required such public entity to make demonstrated good faith efforts to purchase or lease used vehicles that are accessible.

The Senate recedes.

27. Remanufactured and historic vehicles

The Senate bill specifies that if a public entity remanufactures a vehicle or purchases or leases a remanufactured vehicle so as to extend its usable life for 5 years or more, the vehicle must, to the maximum extent feasible, be readily accessible to and usable by individuals with disabilities.

With slightly different phrasing, the House amendment includes the policy in the Senate version applicable to remanufactured vehicles and adds a specific provision in the legislation for historic vehicles. Under the provision, if making a vehicle of historic character (which is used solely on any segment of a fixed route system that is included on the National Register of Historic Places) readily accessible to and usable by individuals with disabilities would significantly alter the historic character of such vehicle, the public entity only has to make (or purchase or lease a remanufactured vehicle with) those modifications which do not significantly alter the historic character of such vehicle.

The Senate recedes.

28. Paratransit

The Senate bill specifies that if a public entity operates a fixed route system, it is discrimination for public transit authority to fail to provide paratransit or other special transportation services sufficient to provide a comparable level of services as is provided to individuals using the fixed route transportation to individuals with disabilities who cannot otherwise use fixed route transportation and individuals associated with such individuals with disabilities unless the public transit authority can demonstrate that the provision of paratransit or other transportation services would impose an undue financial burden on the public transit entity. If the provision of comparable paratransit services would impose an undue financial burden on the public entity, such entity must provide such service to the extent that provision of such services would not impose an undue funancial burden on such entity. The Senate version specifies that the definition of undue financial burden may include reference to a flexible numerical formula that incorporates appropriate local characteristics such as population.

The House amendment includes the following changes:

(a) The House amendment clarifies that a public entity that only provides commuter bus service need not provide paratransit.

The Senate recedes.

(b) The House amendment specifies that comparable level of service must be provided but in the case of response time, it must be comparable, to the extent practicable.

The Senate recedes.

(c) Under the House amendment, paratransit and other special transportation services must be provided to three categories of individuals with disabilities:

> To any individual with a disability who is unable as a result of a physical or mental impairment (including a vision impairment) without the assistance of another individual (except an operator of a wheelchair lift or other boarding assistance device) to board, ride, or disembark from any vehicle on the system which is accessible;
>
> To any individual with a disability who needs the assistance of a wheelchair lift or other boarding assistance device (and is able with such assistance) to board, ride, and disembark from any vehicle which is accessible if the individual wants to travel on a route on the system during the hours of operation of the system at a time (or within a reasonable period of such time) when such an accessible vehicle is not being used to provide designated public transportation on the route; and
>
> To any individual with a disability who has a specific impairment-related condition which prevents such individual from traveling to a boarding location or from a disembarking location on such system.

For purposes of the first two categories of individuals with disabilities, boarding or disembarking from a vehicle does not include travel to the boarding location or from the disembarking location.

The Senate recedes.

(d) The House amendment clarifies that paratransit and special transportation services need only be provided in the service area of each public entity that operates a fixed route system and not in any portion of the service area in which the public entity solely provides commuter bus service.

The Senate recedes.

(e) The House amendment deletes the permissive reference to flexible numerical formula.

The Senate recedes.

(f) The House amendment requires that paratransit be available to one other person accompanying the individual with a disability.

The House recedes with an amendment. The amendment provides that in addition to the one individual specified in the House amendment, paratransit services must be available to other indivduals accompanying the individual with a disability provided that space for these additional individuals is available on the paratransit vehicle carrying the individual with a disability and that the transportation of such additional individual will not result in a denial of service to individuals with disabilities. Throughout this section, the conferees intend that individuals accompanying the individual with a disability travel between the same boarding and disembarking locations as the individual with a disability.

(g) The House amendment specifies that each public entity must submit plans for operating paratransit services to the Secretary. The plan must include, among other things, the identity of any other public entity or person providing paratransit service and provide that the public entity does not have to provide directly under the plan the identified paratransit services being provided to others.

The Senate recedes.

(h) The House amendment includes a statutory construction provision that makes it clear that nothing in the ADA should be construed as preventing a public entity from providing paratransit services at a level which is greater than the level required by the ADA, from providing paratransit services in addition to those services required by the ADA, or from providing such services to individuals in addition to those individuals to whom such services are required to be provided by the ADA.

The Senate recedes.

29. Demand responsive systems operated by a public entity

With slightly different wording, the Senate bill and the House amendment specify rules for public entities operating demand responsive systems.

The Senate recedes.

30. New facilities

The House amendment substitutes the phrase "designated public transportation services" for the phrase "public transportation services" used in the Senate bill.

The Senate recedes.

31. Alterations to existing facilities

(a) The House amendment adds a reference to "designated public transportation."

The Senate recedes.

(b) The Senate bill requires that when major structural alterations are made, the alterations as well as the path of travel must be accessible to individuals with disabilities to the maximum extent feasible.

The House amendment substitutes the phrase "an alteration that affects or could affect usability or access to an area of the facility containing a primary function" for the Senate language "major structural alteration" and adds that the alterations to the path of travel and facilities serving the altered area should "not be disproportionate" to the overall alterations in terms of the cost and scope of the overall alterations as determined under criteria established by the Attorney General.

The Senate recedes.

32. Key stations in rapid and light rail systems

(a) The Senate bill provides an extension of up to 20 years for making key stations in rapid rail or light rail systems accessible where extraordinary expensive structural changes are required.

The House amendment permits 30 years where extraordinary expensive structural changes are required except that by the last day of the 20th year at least two-thirds of such key stations must be readily accessible.

The Senate recedes.

(b) With slightly different wording, both the Senate bill and the House amendment require the development of plans and milestones.

The Senate recedes.

33. Access to non-key stations

With slightly different phrasing, the Senate bill and the House amendment specify rules governing non-key existing stations.

The Senate recedes with an amendment. In section 228(a), strike out paragraph (2) and insert in lieu thereof the following new paragraphs:

"(2) EXCEPTION.—Paragraph (1) shall not require a public entity to make structural changes to existing facilities in order to make such facilities accessible to individuals who use wheelchairs, unless and to the extent required by section 227(a) (relating to alterations) and section 227(b) (relating to key stations).

"(3) UTILIZATION.—Paragraph (1) shall not require a public entity to which paragraph (2) applies, to provide to individuals who use wheelchairs services made available to the general public at such facilities when such individuals could not utilize or benefit from such services provided at such facilities.".

34. One car per train rule applicable to rapid rail and light rail systems

The Senate bill provides that as soon as practicable, but in any event in no less than 5 years, rail systems must have at least one car per train that is accessible to individuals with disabilities.

The House amendment specifies that the one car per train rule only applies with respect to trains that have two or more vehicles and includes a special provision applicable to historic trains.

The Senate recedes.

35. Interim accessibility

The House amendment, but not the Senate bill, specifies that for new construction and alterations for which a valid and appropriate state or local building permit is obtained prior to the issuance of final regulations and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the Uniform Federal Accessibility Standards in effect at the time the building permit is issued shall suffice to satisfy the accessibility requirement except that if such final regulations have not been issued one year after the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines, compliance with such supplemental guidelines shall be necessary.

The Senate recedes.

36. *Effective date*

The Senate bill specifies that the section in title II pertaining to new fixed route vehicles shall become effective on the date of enactment.

The House amendment specifies that sections concerning fixed route vehicles, demand responsive, stations, one car per train and regulations become effective on the date of enactment.

The Senate recedes.

PART II—PUBLIC TRANSPORTATION BY INTERCITY AND COMMUTER RAIL

37. *Definitions*

The House amendment but not the Senate bill includes definitions of the following terms: "commuter authority," "commuter rail transportation," "intercity rail transportation," "rail passenger car," "responsible persons," and "station."

The Senate recedes.

38. *One car per train rule for intercity rail transportation*

With slightly different wording, the Senate bill and the House amendment specify a one car per train rule for intercity rail transportation.

The Senate recedes.

39. *New intercity cars*

The Senate bill provides that all new intercity vehicles must be readily accessible to and unable by individuals with disabilities, including individuals who use wheelchairs.

The House amendment includes a general obligation to make new intercity cars accessible that is identical to the provision in the Senate bill but includes special rules of accessibility applicable to people who use wheelchairs for specific categories of passenger car.

The Senate recedes.

40. *One car per train rule and new commuter rail cars*

(a) With slightly different wording, the Senate bill and the House amendment specify the one car per train rule for persons providing commuter rail transportation.

The Senate recedes.

(b) The Senate bill provides that all new commuter rail cars must be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The House amendment adopts the same standard and specifies that the term "readily accessible to and usable by" shall not be construed to require: a restroom usable by an individual who uses a wheelchair if no restroom is provided in such car for any passenger; space to store and fold a wheelchair; or a seat to which a passenger who uses a wheelchair can transfer.

The Senate recedes.

41. *Used and remanufactured rail cars*

The Senate bill includes special rules for the purchase of all types of used and remanufactured vehicles.

The House amendment includes special provisions applicable to the purchase of used rail cars and remanufactured rail cars similar to the provisions included in the Senate bill applicable to all vehicles (the time period for remanufacture is 10 years for rail cars instead of 5 years for other vehicles).

The Senate recedes.

42. New and existing stations

(a) With respect to commuter rail, the Senate bill specifies that existing key stations must be made accessible as soon as practicable but in no event later than 3 years after the effective date, except that the time limit may be extended to 20 years after the date of enactment in a case where extraordinarily expensive structural changes are necessary to attain accessibility.

The House amendment provides that the extension to 20 years applies where the raising of the entire passenger platform is the only means available of attaining accessibility or where other extraordinarily expensive structural changes are necessary to attain accessibility.

The Senate recedes.

(b) The Senate report explains the criteria used to determine which stations are considered "key." The House amendment places these criteria in the legislation. The factors that must be taken into consideration, after consultation with individuals with disabilities and organizations representing such individuals include: high ridership and whether such station serves as a transfer or feeder station.

The Senate recedes.

43. Alterations of existing facilities

(a) The Senate bill specifies that a facility or any part thereof that is used for public transportation and that is altered by, on behalf of, or for the use of a public entity in a manner that affects or could affect the usability of the facility must be altered in such a way that it is readily accessible to and usable by individuals with disabilities.

The House amendment adopts the same standard but substitutes for the phrase "public entity" the phrase "responsible person, owner, or person in control of the station."

The Senate recedes.

(b) The Senate bill requires that when major structural alterations are made, the alterations as well as the path of travel must be accessible to individuals with disabilities to the maximum extent feasible.

The House amendment substitutes the phrase "an alteration that affects or could affect usability or access to an area of the facility containing a primary function" for the Senate language "major structural alteration" and adds that the alterations to the path of travel and facilities serving the altered area should "not be disproportionate" to the overall alterations in terms of the cost and scope of the overall alterations.

The Senate recedes.

(c) The House amendment also specifies that it is considered discrimination for an owner or person in control of a station to fail to provide reasonable cooperation to a responsible person with respect to such station in the responsible person's efforts to provide accessibility. An owner, or person in control of a station is liable to a responsible person for any failure to provide reasonable cooperation. The House amendment also makes it clear, however, that failure to receive reasonable cooperation shall not be a defense to a claim of discrimination by an individual with a disability.

The Senate recedes.

44. Interim accessibility standards

The House amendment, but not the Senate bill, specifies the standards that would apply to stations and rail passenger cars during an interim period between the effective date and the date regulations are issued in final form.

The Senate recedes.

TITLE III OF THE ADA

45. Definitions

(a) The Senate bill includes the term "potential places of employment" to describe facilities subject to the new construction requirements.

The House amendment substitutes the term "commercial facilities" for the phrase "potential places of employment." The House amendment also specifies that the term does not include railroad locomotives, railroad freight cars, railroad cabooses, railroad cars described in section 222 or covered under title III, or railroad rights-of-way.

The Senate recedes.

(b) The House amendment, but not the Senate bill, includes definitions for the following terms: "demand responsive system," "fixed route system," and "over-the-road bus."

The Senate recedes.

(c) The House amendment, but not the Senate bill, defines the term "private entity" to mean any entity other than a public entity, as defined in title II.

The Senate recedes.

(d) The Senate bill lists a number of specific types of entities that are considered public accommodations and then includes the following catch-all phrase "and other similar places."

The House amendment deletes the term "similar." In addition, the House amendment makes several technical changes to the categories.

The Senate recedes.

(e) The House amendment, but not the Senate bill, defines the term "rail" and "railroad."

The Senate recedes.

(f) In determining whether making changes to existing facilities are "readily achievable," the Senate bill requires that the followng factors be considered: (1) the overall size of the covered entity with respect to the number of employees, number and type of facilities, and size of the budget; (2) the type of operation of the covered entity, including the composition and structure of the entity; and (3) the nature and cost of the action needed.

The House amendment includes the following factors: (1) the nature and cost of the action needed under the ADA; (2) the overall financial resources of the facility or facilities involved in the action, the number of persons employed at such facility, the effect on expenses and resources, or the impact otherwise of such action upon the operation of the facility; (3) the overall financial resources of the covered entity, the overall size of the business of a covered entity with respect to the number of its employees, the number, type, and location of its facilities; and (4) the type of operation or operations of the covered entity, including the compositiion, structure, and functions of the workforce of such entity, the geographic separateness, administrative or fiscal relationship of the facility or facilities in question to the covered entity.

The Senate recedes.

(g) The House amendment substitutes the term "specified public transportation" for the term "public transportation" with no change in the definition.

The Senate recedes.

(h) The House amendment, but not the Senate bill, defines the term "vehicle" as not including a rail passenger car, railroad locomotive, railroad freight car, railroad caboose, or a railroad car described in section 242 or covered under title III.

The Senate recedes.

46. Entities subject to the prohibitions against discrimination

The Senate bill specifies that no individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation.

The House amendment clarifies that this prohibition applies to any person who owns, leases (or leases to), or operates a place of public accommodation.

The Senate recedes.

47. Contract liability

The Senate bill specifies that covered entities cannot engage in discrimination indirectly through contracts with other parties.

The House amendment specifies that covered entities are only liable in contractual arrangements for discrimination against the entity's own customers and clients and not the contractor's customers and clients.

The Senate recedes.

48. Readily achievable changes to existing barriers

The House amendment adds rail passenger cars used by an establishment for transporting individuals to the list of vehicles from which barriers must be removed.

The Senate recedes.

49. Fixed route and demand responsive systems

With slightly different wording, the Senate bill and the House amendment specify standards for fixed route and demand responsive systems operated by private entities.

The Senate recedes.

50. Health and safety

The House amendment, but not the Senate bill, specifies that nothing in title III requires an entity to permit an individual to participate in or benefit from the goods, services, facilities, privileges, advantages and accommodations of such entity where such individual poses a direct threat to the health or safety of others. The term "direct threat" means a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures or by the provision of auxiliary aids and services.

The Senate recedes.

51. New construction and alterations to existing facilities

(a) The Senate bill includes in separate sections the requirements that alterations and new construction be readily accessible to and usable by individuals with disabilities.

The House amendment places these two requirements in the same section.

The Senate recedes. Section 3030(b) of the Act provides that discrimination as set forth in section 303(a) concerning new construction and alterations in public accommodations and commercial facilities shall not be construed to require the installation of an elevator for facilities that are less than three stories or have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities. The exception does not affect the requirement that every newly constructed facility subject to the Act shall have at least one ground story that is readily accessible to and usable by individuals with disabilities. Accessibility requirements shall not be evaded by constructing facilities in such a way that no story constitutes a "ground floor", for example, by constructing a building whose main entrance leads only to stairways or escalators that connect with upper or lower floors; at least one accessible ground story must be provided.

(b) The Senate bill specifies that when major structural alterations are made to public accommodations operated by private entities, the alterations as well as the path of travel and facilities must be accessible to individuals with disabilities to the maximum extent feasible.

The House amendment substitutes the phrase "an alteration that affects or could affect usability or access to an area of the facility containing a primary function," for the Senate language, "major structural alteration," and adds that the alterations to the path of travel and facilities serving the altered area should "not be disproportionate" to the overall alterations in terms of the cost and scope of the overall alterations.

The Senate recedes. The conferees note that in part 2 (Education and Labor Committee) of the House Report No. 101-485, language following the word "alteration" at the end of the third line of the second full paragraph on page 113 was inadvertently omitted. This language specifies that the parameters of the concept of disproportionality of section 303(a)(2) of the bill will be set forth in the minimum guidelines issued by the Architectural and Transportation Barriers Compliance Board and in the regulations promulgated by the Attorney General. The conferees wish to indicate their understanding that the requirement of an accessible path of travel, accessible restrooms, drinking fountains, and telephones serving the altered area would be disproportionate if the inclusion of such features would be so large an undertaking, in expense or scope of work, as to be disproportionate to the remainder of the contemplated alteration project.

52. Discrimination and construction

With slightly different wording, the Senate bill and the House amendment specify the general prohibition of discrimination and specific constructions of such discrimination.

The Senate recedes.

53. New vehicles other than new rail passenger cars

The Senate bill specifies that new vehicles other than automobiles purchased by a private entity in the principal business of transporting people must be readily accessible to and usable by individuals with disabilities.

The House amendment includes a special rule for vans with a seating capacity of less than 8 passengers. Such vans need not be accessible if the van is to be used solely in a demand responsive system and if the private entity can demonstrate that the system for which the van is being purchased or leased, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the level of service provided to the general public.

The Senate recedes.

54. New rail passenger cars

The Senate bill specifies that all new vehicles purchased by a private entity in the principal business of transporting people must be readily accessible.

The House amendment includes a separate provision applicable to new rail passenger cars purchased by such entities and includes the same standard set out in the Senate bill.

The senate recedes.

55. Remanufactured rail passenger cars

The House amendment, but not the Senate bill, specifies that the remanufacture of a rail passenger car so as to extend its usable life for 10 years or more must be remanufactured in a manner to make it readily accessible "to the maximum extent feasible."

The Senate recedes.

56. Historical or antiquated rail passenger cars and stations serving such cars

The House amendment, but not the Senate bill, specifies that historical or antiquated vehicles that are currently in use or are remanufactured by private entities need not be made accessible to the extent that compliance would significantly alter the historic or antiquated character of such a car or rail station served exclusively by such cars or would result in violation of safety rules issued by the Secretary of Transportation.

The Senate recedes.

57. Over-the-road buses

The Senate bill specifies that over-the-road buses must be readily accessible to and usable by individuals with disabilities within 7 years for small providers and 6 years for other providers. Further, the Senate bill specifies that the Office of Technology Assessment must conduct a study to determine the access needs of individuals with disabilities and the most cost effective methods of making such buses readily accessible to and usable by individuals with disabilities.

The House amendment deletes the specific obligation to make each bus "readily accessible to and usable by" individuals with disabilities at the end of the 6 or 7 year period, whichever is applicable. Instead, the House amendment specifies that the purchase of new over-the-road buses must be made in accordance with regulations issued by the Secretary of Transportation. In issuing final regulations, the Secretary must take into account the purposes of the study and any recommendations resulting from the study. The obligations set out in the final regulations go into effect in 7 years for small providers and 6 years for others. The final regulations may not require the installation of accessible restrooms in over-the-road buses if such installation would result in a loss of seating capacity.

In the interim, regulations issued by the Secretary may not require any structural changes to over-the-road buses in order to provide access to individuals who use wheelchairs and may not require the purchase of boarding assistance devices to provide access.

With respect to the study, the purpose of the study is revised to include a determination of the access needs of individuals with disabilities to over-the-road buses and over-the-road bus service and the most cost effective methods for providing access to over-the-road buses and over-the-road bus service to individuals with disabilities, particularly individuals who use wheelchairs, through all forms of boarding options. The study must analyze, among other things, the effectiveness of various methods of providing accessibility to such buses and service to individuals with disabilities.

The Senate recedes.

58. Interim accessibility

The House amendment, but not the Senate bill, specifies that for new construction and alterations for which a valid and appropriate state or local building permit is obtained prior to the issuance of final regulations and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the Uniform Federal Accessibility Standards in effect at the time the building permit is issued shall suffice to satisfy the accessibility requirement except that if such final regulations have not been issued one year after the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines, compliance with such supplemental guidelines shall be necessary. The House amendment also includes interim policies applicable to vehicles and rail passenger cars.

The Senate recedes.

59. Enforcement in general

(a) The Senate bill makes reference to the remedies available to an "individual" under title II of the Civil Rights Act of 1964.

The House amendment substitutes the term "person" for the term "individual" since "person" is used in title II.

The Senate recedes.

(b) The Senate bill specifies that remedies and procedures of the 1964 Civil Rights Act will be available to any individual who is or is about to be subjected to discrimination on the basis of disability.

The House amendment specifies that the remedies and procedures of title II of the 1964 Civil Rights Act shall be the powers, remedies, and procedures title III provides to any person who is being subject to discrimination on the basis of disability in violation of title III or any person who has "reasonable grounds" for believing that he or she is about to be subjected to discrimination with respect to the construction of new or the alteration of existing facilities in an inaccessible manner.

The Senate recedes.

(c) The House amendment, but not the Senate bill, includes in the legislation the following policy set out in the Senate report: nothing in the enforcement section shall require an individual with a disability to engage in a futile gesture if such person has actual notice that a person or organization covered by this title does not intend to comply with its provisions.

The Senate recedes.

(d) The House amendment, but not the Senate bill, specifies that state and local governments can apply to the Attorney General to certify that state or local building codes meet or exceed the minimum accessibility requirements of the ADA. In ruling on such applications from state or local governments, the Attorney General will consult with the Architectural and Transportation Barriers Compliance Board and consider the testimony of individuals with disabilities at public hearings about the state or local building code application.

The Senate recedes.

(e) The Senate bill specifies that the courts may assess civil penalties against an entity not to exceed $50,000 for the first violation and $100,000 for any subsequent public accommodation discrimination violation.

The House amendment specifies that when there are multiple violations that make up a pattern or practice suit brought by the Attorney General, all violations count as a first violation for the purpose of assessing the maximum civil penalty of $50,000. The maximum penalty of $100,000 for a subsequent violation can be applied only in a subsequent case.

The Senate recedes.

(f) The Senate bill specifies that the Attorney General may seek "monetary damages" on behalf of an aggrieved party in Title III public accommodation civil actions.

The House amendment clarifies that "monetary damages" and other relief available to aggrieved persons under Title III public accommodation suits brought by the Attorney General do not include punitive damages.

The Senate recedes.

(g) The Senate bill specifies that the courts may give consideration to an entity's "good faith" efforts to comply with the ADA in considering the amount of civil penalty.

The House version elaborates on the issue of good faith by requiring that the court consider whether an entity could have reasonably anticipated the need for an appropriate type of auxiliary aid needed to accommodate the particular needs of an individual with a disability.

The Senate recedes.

60. Examinations and courses

The House amendment, but not the Senate bill, specifies that any person that offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes shall offer such examinations or courses in a place and manner accessible to persons with disabilities or offer alternative accessible arrangements for such individuals.

The Senate recedes.

61. Effective date

(a) The House amendment, but not the Senate bill, precludes suits against small businesses for 6 months or 12 months (depending on the size of the business and its gross receipts) after the effective date of title III of the Act (18 months after date of enactment) for all violations except those relating to new construction and alterations.

The Senate recedes with an amendment. The amendment deletes the introductory phrase in section 310(b) and substitutes in lieu thereof the following: "Except for any civil action brought for a violation of section 303, no civil action shall be brought for any act or omission described in section 302 which occurs—". The purpose of the amendment is to make it clear that in order for an individual with a disability to bring a civil action against a small business meeting the criteria set out in the provision, the discriminatory act must occur after the applicable period has expired. The conferees note that this section gives small businesses additional time to learn the requirements of the ADA and to come into compliance with the Act before they will be subject to a civil action. The conferees fully expect that businesses will, however, make good faith efforts to comply with the Act during this additional phase-in period.

(b) With slightly different wording, the Senate bill and the House amendment provide that certain provisions of title III go into effect on the date of enactment.

The Senate recedes.

TITLE IV OF THE ADA (TELECOMMUNICATION RELAY SERVICES)

62. Definition of "Common Carrier" or "Carrier"

The House amendment deletes the phrase "and any common carrier engaged in both interstate and intrastate communication."

The Senate recedes.

63. General authority and remedies

The Senate bill specifies that the same remedies, procedures, rights, and obligations applicable to common carriers engaged in interstate communication by wire or radio are also applicable to common carriers engaged in intrastate communication.

The House amendment clarifies, without changing the meaning or intent of the Senate language.

The Senate recedes.

64. Provision of telecommunication services

The Senate bill specifies that each common carrier providing telephone voice transmission services shall provide telecommunication relay services individually, through designees, or in concert with other carriers not later than 3 years after the date of enactment.

The House amendment makes several clarifying changes.

(a) The House amendment specifies that a common carrier must only provide relay services "within the area in which it offers service" to ensure that a common carrier on one side of the country is not held responsible to provide services for consumers in a state on the other side of the country.

The Senate recedes with an amendment. The amendment deletes the word "within" and substitutes in lieu thereof the term "throughout."

(b) The House amendment specifies that common carriers may provide relay services "through a competitively selected vendor" in addition to providing such services through designees or in concert with other carriers.

The Senate recedes.

(c) The House amendment specifies that a common carrier is considered in compliance with FCC regulations if the common carrier is either in direct compliance itself with those regulations, or if the "entity through which [it] is providing such relay services" is in compliance with the Commission's regulations. Further, the common carrier is considered in compliance with the FCC's regulations with respect to intrastate relay services when they or their designees are in compliance with a state certified program.

The Senate recedes.

65. Regulations

The Senate bill directs the FCC to issue regulations covering, among other things, minimum standards for the relay systems, conduct by relay operators, separation of costs, and delay in the implementation date.

The House amendment includes two clarifying changes.

(a) The Senate bill requires the FCC to establish minimum standards that would be met "by common carriers" in providing relay services. The House amendment deletes the language in quotes.

The Senate recedes.

(b) With respect to the conduct of relay operators, the House amendment specifies that a relay operator is subject to the same standards of conduct that other operators are subject to under the Communications Act of 1934.

The Senate recedes.

66. Technology

The House amendment adds a reference to section 7(a) of the Communications Act of 1934.

The Senate recedes.

67. Recovery of costs

The House amendment includes the following changes applicable to recovery of costs.

(a) The House amendment specifies that costs caused by interstate relay services will be recovered from all subscribers for every interstate service, thereby ensuring that even those businesses that have private telecommunications systems will contribute to the cost of providing interstate relay services.

The Senate recedes.

(b) The House amendment authorizes State commissions to permit recovery by common carriers of costs incurred in providing intrastate relay services in states that are certified.

The Senate recedes.

(c) The Senate bill prohibits the imposition of a fixed monthly charge on residential customers to recover the costs of providing interstate relay services.

The House amendment deletes this provision.

The Senate recedes.

(d) The Senate bill extends the implementation period to three years for all common carriers and includes authority to extend it one additional year if a common carrier can demonstrate undue burden. The House amendment deletes the undue burden provision.

The Senate recedes.

68. Requirements for state certification

The Senate bill specifies that each State may submit documentation to the FCC that describes the program of such state for implementing intrastate relay services.

The House amendment specifies that such documentation must also include the procedures and remedies available for enforcing any requirements imposed by the State program. The House amendment also provides that in certifying the program the FCC must determine that the program makes available adequate procedures and remedies for enforcing the requirements of the State program. The House amendment also specifies that in a State whose program has been suspended or revoked, the Commission must take such steps as may be necessary to ensure continuity of telecommunications relay services.

The Senate recedes.

69. Closed-captioning of public service announcements

The House amendment, but not the Senate bill, adds a provision requiring the closed-captioning of all television public service announcements produced or funded by the Federal government.

The Senate recedes.

TITLE V OF THE ADA (MISCELLANEOUS PROVISIONS)

70. Construction

(a) The House amendment adds the phrase "except as otherwise provided in this Act" as a qualification to the provision construing the interpretation of the ADA.

The Senate recedes.

(b) With slightly different wording, the Senate bill and the House amendment specify the relationship between the ADA and other Federal laws (including the Rehabilitation Act) and state laws. The House amendment also specifies that nothing in the ADA shall be construed to preclude the prohibition of, or the imposition of restrictions on, smoking in places of employment, in transportation provided by public and private entities, and places of public accommodations.

The Senate recedes. In light of the concerns raised by some conferees with regard to individuals with contagious diseases of public health significance who work in food handling jobs, the conferees note certain points with regard to this section. First, if a state or locality has a disease control law, or any other public health law, which places certain requirements on certain employees, employers or businesses, but which does not discriminate against people with disabilities, such laws would not be affected by or preempted in any way by the ADA. For example, if a state disease control law requires certain hygienic procedures to be followed by all employees in certain job categories, that law would not be affected in any way by the ADA. In addition, if a state or locality has a disease control law or any other public health law, which applies to certain people with disabilities (for example, if a state has a law which required people with certain contagious diseases, such as tuberculosis, to take certain precautions), that law would also not be preempted by the ADA as long as the requirements of that state or local law were designed to protect against individuals who pose a direct threat to the health or safety of others. Because the ADA itself allows adverse actions to be taken against employees who pose a direct threat to the health or safety of others in the workplace, and against clients and customers who pose a direct threat to others in a public accommodation (as "direct threat" is defined in the statute), a state public health law that similarly guarded against such threats would be a law providing protection equal to that provided by the ADA and hence would not be preempted by the ADA.

(c) The section in the Senate bill concerning insurance includes the proviso "Provided, That paragraphs (1), (2), and (3) are not used as a subterfuge to evade the purposes of title I and III." The House amendment includes the following phrase "Paragraphs (1), (2), and

(3) shall not be used as a subterfuge to evade the purposes of titles I and III."

The Senate recedes.

(d) The House amendment, but not the Senate bill, specifies that nothing in the Act shall be construed to require an individual with a disability to accept an accommodation, aid, service, opportunity, or benefit which such individual chooses not to accept.

The Senate recedes.

71. State immunity

The House amendment adds states courts of competent jurisdiction to the reference to federal courts included in the Senate bill.

The Senate recedes.

72. Prohibition against retaliation and coercion

With slightly different wording, the Senate bill and the House amendment include prohibitions against retaliation and coercion.

The Senate recedes.

73. Guidelines by the ATBCB

The Senate bill provides 6 months for the issuance of guidelines. The House amendment provides 9 months.

74. Historic buildings

The House amendment, but not the Senate bill, includes specific provisions applicable to historic buildings.

The Senate recedes.

75. Technical assistance manuals

(a) The Senate bill, but not the House amendment, includes, among others, the National Council on Disability, as an agency responsible for the development of a technical assistance plan.

The Senate recedes. The conferees intend to recognize the National Council on Disability as the impetus, force, and originator of the initial legislation for the Americans with Disabilities Act, reflected in the Council's report, "Towards Independence," published in February, 1986. Therefore, the conferees agree that the National Council on Disability should be one of the federal agencies with which the Attorney General consults in developing a plan to assist entities covered under this Act. The experience, expertise, and commitment of the Council will ensure that the technical assistance activities mandated under section 506 will be comprehensive, focused, and timely.

(b) With slightly different wording, the Senate bill and the House amendment provide for the implementation of the technical assistance plan.

The Senate recedes.

(c) With slightly different wording, the Senate bill and the House amendment authorize the entering into of grants and contracts.

The Senate recedes.

(d) The Senate bill includes a section requiring agencies to provide technical assistance to covered individuals and entities.

The House amendment makes several technical and conforming changes and adds a requirement that appropriate departments and agencies develop and disseminate technical assistance manuals to those who have rights and responsibilities under the ADA no later than six months after ADA regulations are published. However, a covered entity is not excused from complying with the ADA because of any failure to receive technical assistance, including any failure in the development or dissemination of a technical assistance manual.

The Senate recedes.

76. Wilderness areas

The Senate bill specifies that the National Council on Disability shall conduct a study regarding the effect of wilderness designations on access for people with disabilities.

The House amendment adds that the Wilderness Act is not to be construed as prohibiting use of a wheelchair in a wilderness area by an individual whose disability requires the use of a wheelchair but no modifications of land are required.

The Senate recedes with an amendment. The new subsection reads:

> "(1) IN GENERAL.—Congress reaffirms that nothing in the Wilderness Act shall be construed as prohibiting the use of a wheelchair in a wilderness area by an individual whose disability requires use of a wheelchair, and consistent with the Wilderness Act, no agency shall be required to provide any form of special treatment or accommodation, or to construct any facilities or modify any conditions of lands within a wilderness area to facilitate such use.
>
> "(2) DEFINITION.—For purposes of paragraph (1), the term 'wheelchair' means a device designed solely for use by a mobility-impaired person for locomotion, that is suitable for use in an indoor pedestrian area.".

Consistent with this section and the Wilderness Act of 1964, the conferees intend that, where appropriate and consistent with the management objectives and maintenance of the wilderness character of the area, the land management agencies charged with the management responsibilities for wilderness areas designated under the authority of the Wilderness Act of 1964 should, when constructing or reconstructuring a trail, bridge or facility, comply with the intent of this Act. In cases where the Agencies have delegated or subcontracted their responsibilities, the intent of this section shall apply to the designee or contractor.

77. Congressional coverage

The Senate bill makes the provisions of the legislation applicable to Congress and the instrumentalities of Congress.

The House amendment also covers Congress and the instrumentalities of Congress but delegates to the House and the instrumentalities of Congress the responsibility to develop applicable remedies and procedures.

The House recedes to the Senate on coverage of the Senate with an amendment. The Senate recedes to the House on coverage of the House. The Senate recedes to the House on coverage of instrumentalities of the Congress. The conferees add the following construction clause: "Nothing in this section shall alter the enforcement procedures for individuals with disabilities provided in the General Accounting Office Personnel Act of 1980 and regulations promulgated pursuant to that Act."

78. Illegal use of drugs

The Senate bill specifies that an individual with a disability does not include any individual who uses illegal drugs, but may include an individual who has successfully completed a supervised drug rehabilitation program, or has otherwise been rehabilitated successfully, and no longer uses illegal drugs. The Senate bill also makes it clear that an individual who uses illegal drugs may not be denied the benefits of medical services on the basis of his or her use of illegal drugs, if he or she is otherwise entitled to such services.

The House amendment includes clarifying and conforming changes to make this provision consistent with other provisions in the legislation concerning the treatment of users of illegal drugs:

(a) The House amendment specifies that an individual with a disability does not include an individual who is currently engaging in the illegal use of drugs when the covered entity acts on the basis of such use.

The Senate recedes. The provision excluding an individual who engages in the illegal use of drugs from protection (other than an individual described in section 510(c) is intended to ensure that covered entities may deny services to or take other actions against persons who illegally use drugs on that basis, without fear of being held liable for discrimination. The provision is not intended to be limited to persons who use drugs on the day of, or within a matter of days or weeks before, the action in question. Rather, the provision is intended to apply to a person whose illegal use of drugs occurred recently enough to justify a reasonable belief that a person's drug use is current.

(b) The House amendment specifies that the following individuals are not excluded from the term "individual with a disability"—an individual who has successfully completed a supervised drug rehabilitation program and is no longer engaging in the illegal use of drugs or has otherwise been rehabilitated successfully and is no longer engaging in such use; an individual who is participating in a supervised rehabilitation program and is no longer engaged in such use; or a person who is erroneously regarded as engaging in such use, but is not engaging in such use.

The Senate recedes. Section 510(b)(2) provides that a person cannot be excluded as a qualified individual with a disability if that individual is participating in a supervised rehabilitation program and is no longer engaging in the illegal use of drugs. This provision does not permit persons to invoke the Act's protection simply by showing that they are participating in a drug treatment program. Rather, refraining from illegal use of drugs also is essential. Covered entities are entitled to seek reasonable assurances that no illegal use of drugs is occurring or has occurred recently enough so that continuing use is a real and ongoing problem. On the other hand, this provision recognizes that many people continue to participate in drug treatment programs long after they have stopped using drugs illegally, and that such persons should be protected under the Act. The conferees intend that the phrase "otherwise been rehabilitated successfully" be interpreted to refer to both in-patient and outpatient programs that provide professional (not necessarily medical) assistance and counseling.

(c) The House amendment specifies that it shall not be a violation for a covered entity to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual is no longer illegally using drugs; however nothing in this section shall be construed to encourage, prohibit, restrict, or authorize the conducting of testing for the illegal use of drugs.

The Senate recedes.

(d) The House amendment specifies that an individual shall not be denied health services or other services provided in connection with drug rehabilitation, on the basis of the current illegal use of drugs if the individual is otherwise entitled to such services.

The Senate recedes.

(e) The House amendment includes the same definition of "illegal use of drugs" and "drugs" set out in title I of the Act.

The Senate recedes.

79. Exclusions from the term "disability"

The Senate bill restates current policy under section 504 of the Rehabilitation Act of 1973 that the term "disability" does not include homosexuality and bisexuality. The Senate bill also excludes from the term "disability" the following mental impairments: transvestism, pedophilia, transsexualism, exhibitionism, voyeurism, compulsive gambling, kleptomania, or pyromania, gender identity disorders, current psychoactive substance-induced organic mental disorders (as defined by DSM-III-R which are not the result of medical treatment), or other sexual behavior disorders.

The House amendment lists the various exclusions by category. The first category specifies that homosexuality and bisexuality are not impairments and as such are not disabilities under the ADA. The second category includes transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders. The third category includes compulsive gambling, kleptomania, or pyromania. The final category includes psychoactive substance use disorders resulting from current use of illegal drugs.

The Senate recedes.

80. Amendments to the definition of the term "handicapped individual" under the Rehabilitation Act of 1973

(a) The Senate bill includes amendments to the definition of the term "handicapped individual" used in the Rehabilitation Act of 1973 to exclude current users of illegal drugs which are consistent with the changes made to the definition of the term "individual with a disability" used in the ADA. The Senate bill also specifies that the exclusion does not apply to medical services for which the individual is otherwise entitled. The Senate bill also states that the term "illegal drugs" does not mean the use of a controlled substance pursuant to a valid prescription or other uses authorized by the controlled Substances Act or other provisions of Federal law.

The House amendment includes the same type of conforming changes to the Rehabilitation Act which are made to the ADA (see above). However, with respect to the provision that specifies that an individual shall not be excluded from medical services on the basis of his or her current illegal use of drugs if he or she is otherwise entitled to such services, the category is limited to health services and services provided under titles I, II, and III of the Rehabilitation Act of 1973.

The Senate recedes. The conferees incorporate by reference the statement of intent set out in item 16. Conferees note that, for purposes of this title, an individual covered by Executive Order 12564 who tests positive on an employment related drug test conducted and verified in conformity with applicable federal regulations or guidelines is deemed to be "currently engaging in the illegal use of drugs" and may not invoke the Act's protection, except as provided in section 7(8)(C)(ii)(III) of the Rehabilitation Act. The conferees do not intend to prevent individuals covered by Executive Order 12564 or any other individuals covered by the employment provisions of the Act from challenging a positive drug test result by invoking the protection of section 7(8)(C)(ii)(III). The Rehabilitation Act itself does not provide any standard by which the accuracy or validity of a drug test result is to be determined. Conferees also recognize that current Department of Transportation regulations allow or require, depending on the circumstances, employers to remove individuals in safety sensitive positions who are undergoing drug rehabilitation from such positions. With respect to individuals illegally using drugs or impaired by alcohol, nothing in this Act is intended to affect federal laws or Department of Transportation regulations to protect public safety.

(b) The House amendment specifies that the term "drugs" and the phrase "current illegal use of drugs" have the same meanings as such terms have under the ADA.

The Senate recedes.

81. Alternative means of dispute resolutions

The House amendment, but not the Senate bill, provides that where appropriate and to the extent authorized by law, the use of alternative means of dispute resolution, including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, and arbitration, is encouraged to resolve disputes arising under the ADA.

The Senate recedes. It is the intent of the conferees that the use of these alternative dispute resolution procedures is completely voluntary. Under no condition would an arbitration clause in a collective bargaining agreement or employment contract prevent an individual from pursuing their rights under the ADA. The conferees adopt by reference the statement of the House Judiciary Report regarding this provision.

From the Committee on Education and Labor, for consideration of the Senate bill, and the House amendment, and modifications committed to conference:

Augustus F. Hawkins,
Major R. Owens,
Matthew G. Martinez,
Steve Bartlett,
H.W. Fawell,

From the Committee on Energy and Commerce, for consideration of the Senate bill, and the House amendment, and modifications committed to conference, except that for consideration of title IV of the Senate bill, and title IV of the House amendment, and modifications commtted to conference, Mr. Rinaldo is appointed in lieu of Mr. Whittaker:

John D. Dingell,
Edward J. Markey,
Tom Luken,
Norman F. Lent,
Bob Whittaker,

For consideration of title IV of the Senate bill, and title IV of the House amendment, and modifications committed to conference, in lieu of Mr. Whittaker:

Matthew Rinaldo,

From the Committee on Public Works and Transportation, for consideration of the Senate bill, and the House amendment, and modifications committed to conference:

Glenn M. Anderson,
Robert A. Roe,
Norman Y. Mineta,
John Paul Hammerschmidt,

From the Committee on the Judiciary, for consideration of the Senate bill, and the House amendment, and modifications committed to conference:

Jack Brooks,
Don Edwards,
Robert W. Kastenmeier,
Hamilton Fish, Jr.,
F. James Sensenbrenner, Jr.
(except for amendment to sec. 103(d)),

As an additional conferee, for consideration of the Senate bill, and the House amendment, and modifications committed to conference:

Steny H. Hoyer,
Managers on the Part of the House.

Edward M. Kennedy,
Tom Harkin,
Howard M. Metzenbaum,
Paul Simon,
Orrin G. Hatch,
Dave Durenberger,
James M. Jeffords,

From the Committee on Commerce, Science, and Transportation, solely for the consideration of issues within that Committee's jurisdiction (telecommunications, commuter transit, and drug testing of transportation employees):

Ernest F. Hollings,
Daniel K. Inouye,
John C. Danforth,
Managers on the Part of the Senate.

THE AMERICANS WITH DISABILITIES ACT OF 1989

August 30, 1989.—Ordered to be printed

Filed under authority of the order of the Senate of August 2 (legislative day, January 3), 1989

Mr. Kennedy, from the Committee on Labor and Human Resources, submitted the following

REPORT

together with

ADDITIONAL VIEWS

[To accompany S. 933]

The Committee on Labor and Human Resources, to which was referred the bill (S. 933) to establish a clear and comprehensive prohibition of discrimination on the basis of disability, having considered the same, reports favorably thereon with an amendment and recommends that the bill as amended do pass.

I. Introduction

On August 2, 1989, the Committee on Labor and Human Resources, by a vote of 16–0, ordered favorably reported S. 933, the

39-109

Americans with Disabilities Act of 1989 (the ADA), with an amendment in the nature of a substitute.

The bill is sponsored by Senator Tom Harkin, chairman of the Subcommittee on the Handicapped, and cosponsored by Senators Kennedy, Durenberger, Simon, Jeffords, Cranston, McCain, Mitchell, Chafee, Leahy, Stevens, Inouye, Cohen, Gore, Packwood, Riegle, Boschwitz, Graham, Pell, Dodd, Adams, Mikulski, Metzenbaum, Matsunaga, Wirth, Bingaman, Conrad, Burdick, Levin, Lieberman, Moynihan, Kerry, Sarbanes, Heinz, Glenn, Shelby, Pressler, Hollings, Sanford, Wilson, Sasser, Dixon, Kerrey, Robb, Fowler, Rockefeller, Biden, Bentsen, Specter, DeConcini, Kohl, Lautenberg, D'Amato, Dole, Hatch, Warner, Pryor, and Bradley.

II. SUMMARY OF THE LEGISLATION

The purpose of the ADA is to provide a clear and comprehensive national mandate to end discrimination against individuals with disabilities and to bring persons with disabilities into the economic and social mainstream of American life; to provide enforceable standards addressing discrimination against individuals with disabilities, and to ensure that the Federal government plays a central role in enforcing these standards on behalf of individuals with disabilities.

The ADA defines "disability" to mean, with respect to an individual: a physical or mental impairment that substantially limits one or more of the major life activities of such individual, a record of such an impairment, or being regarded as having such an impairment.

Title I of the ADA specifies that an employer, employment agency, labor organization, or joint labor-management committee may not discriminate against any qualified individual with a disability in regard to any term, condition or privilege of employment. The ADA incorporates many of the standards of discrimination set out in regulations implementing section 504 of the Rehabilitation Act of 1973, including the obligation to provide reasonable accommodations unless it would result in an undue hardship on the operation of the business.

The ADA incorporates by reference the enforcement provisions under title VII of the Civil Rights Act of 1964 (including injunctive relief and back pay). Title I goes into effect two years after the date of enactment. For the first two years after the effective date, employers with 25 or more employees are covered. Thereafter, employers with 15 or more employees are covered.

Title II of the ADA specifies that no qualified individual with a disability may be discriminated against by a department, agency, special purpose district, or other instrumentality of a State or a local government. In addition to a general prohibition against discrimination, title II includes specific requirements applicable to public transportation provided by public transit authorities. Finally, title II incorporates by reference the enforcement provisions in section 505 of the Rehabilitation Act of 1973.

With respect to public transportation, all new fixed route buses must be made accessible unless a transit authority can demonstrate that no lifts are available from qualified manufacturers. A pubilc transit authority must also provide paratransit for those individuals who cannot use mainline accessible transportation up to the point where the provision of such supplementary services would pose an undue financial burden on a transit authority.

Title II takes effect 18 months after the date of enactment, with the exception of the obligation to ensure that new public buses are accessible, which takes effect for solicitations made 30 days after the date of enactment.

Title III of the ADA specifies that no individual shall be discriminated against in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation operated by a private entity on the basis of a disability. Public accommodations include: restaurants, hotels, doctor's offices, pharmacies, grocery stores, shopping centers, and other similar establishments.

Existing facilities must be made accessible if the changes are "readily achievable" i.e., easily accomplishable without much difficulty or expense. Auxiliary aids and services must be provided unless such provision would fundamentally alter the nature of the program or cause an undue burden. New construction and major renovations must be designed and constructed to be readily accessible to and usable by people with disabilities. Elevators need not be installed if the building has less than three stories or has less than 3,000 square feet per floor except if the building is a shopping center, shopping mall, or offices for health care providers or if the Attorney General decides that other categories of buildings require the installation of elevators.

Title III also includes specific prohibitions on discrimination in public transportation services provided by private entities, including the failure to make new over-the-road buses accessible five years from the date of enactment for large providers and six years for small providers.

The provisions of title III becomes effective 18 months after the date of enactment. Title III incorporates enforcement provisions in private actions comparable to the applicable enforcement provisions in title II of the Civil Rights Act of 1964 (injunctive relief) and provides for pattern and practice cases by the Attorney General, including authority to seek monetary damages and civil penalties.

Title IV of the ADA specifies that telephone services offered to the general public must include interstate and intrastate telecommunication relay services so that such services provide individuals who use nonvoice terminal devices because of disabilities (such as deaf persons) with opportunities for communications that are equivalent to those provided to individuals able to use voice telephone services.

Title V of the ADA includes miscellaneous provisions, including a construction clause explaining the relationship between the provisions in the ADA and the provisions in other Federal and State laws; a construction clause explaining that the ADA does not disrupt the current nature of insurance underwriting; a prohibition against retaliation; a clear statement that States are not immune from actions in Federal court for a violation of the ADA; a directive to the Architectural and Transportation Barriers Compliance Board to issue guidelines; and authority to award attorney's fees.

III. Hearings

Hearings were held before the Labor and Human Resources Committee and the Labor and Human Resources' Subcommittee on the Handicapped on legislation to establish a clear and comprehensive prohibition of discrimination on the basis of disability on September 27, 1988, May 9, May 10, May 16 and June 22, 1989.

On September 27, 1988, a joint hearing was held before the Subcommittee on the Handicapped and the House of Representatives' Subcommittee on Select Education on S. 2345, the Americans with Disabilities Act of 1988. Among the witnesses testifying were: Sandra Parrino, Chairperson, National Council on the Handicapped; Admiral James Watkins, Chairperson, President's Commission on the Human Immunodeficiency Virus Epidemic; Mary Linden of Morton Grove, Illinois who lived in an institution; Dan Piper, an 18-year old with Down Syndrome and Sylvia Piper of Ankeny, Iowa; Jade Calegory, a 12-year old movie actor with Spina Bifida from Corona Del Mar, California; and Lakisha Griffin from Talladega, Alabama, who attends the Alabama School for the Blind.

Also testifying were: Judith Heumann, World Institute on Disability, Berkeley, California; Gregory Hlibok, student-body president of Gallaudet University, Washington, DC; Belinda Mason from Tobinsport, Indiana who has AIDS; and W. Mitchell from Denver, Colorado, who uses a wheelchair and who was severely burned.

David Saks, on behalf of the Organization for Use of the Telephone, Baltimore, Maryland, also provided testimony.

On May 9, 1989, the Committee on Labor and Human Resources held a hearing on S. 933, the Americans with Disabilities Act of 1989. Among the witnesses were: Tony Coelho, the Majority Whip of the House of Representatives; I. King Jordan, President of Gallaudet University, Washington, DC; Justin Dart, chairperson, the Task Force on the Rights and Empowerment of Americans with Disabilities, Washington, DC.

Also testifying were: Ms. Mary DeSapio, a cancer survivor; Joseph Danowsky, an attorney who is blind; Amy Dimsdale, a college graduate who is quadriplegic and who after 5 years of looking for work remains unemployed; Harold Russell, chairman, President's Committee on Employment of People with Disabilities, Washington, DC; Zachery Fasman, U.S. Chamber of Commerce, Washington, DC; Lawrence Lorber, American Society of Personnel Administrators, Washington, DC; and Arlene Mayerson, Disability Rights Education and Defense Fund, Berkeley, California.

Others providing testimony were: Barbara Hoffman, Vice President of the National Coalition for Cancer Survivorship; Robert McGlotten, Director, Department of Legislation, AFL-CIO; the Associated General Contractors of America; and the National Organizations Responding to AIDS.

On May 10, the Subcommittee on the Handicapped heard testimony from Senator Bob Dole, Senator from Kansas and Senate Minority Leader; Perry Tillman, Paralyzed Veterans of America, New Orleans, Louisiana; Ken Tice, Advocating Change Together, Minneapolis, Minnesota; Lisa Carl who has cerebral palsy and her mother, Vickie Franke, Tacoma, Washington.

Also testifying were: the Honorable Neil Hartigan, Attorney General of the State of Illinois; Ron Mace, Barrier Free Environments, Raleigh, North Carolina; William Ball, Association of Christian Schools International, Harrisburg, Pennsylvania; Sally Douglas, National Federation of Independent Business, Washington, D.C.; Malcolm Green, National Association of Theater Owners, Boston Massachusetts; and Robert Burgdorf Jr., National Easter Seal Society, Washington, D.C.; Betty and Emory Corey, Baltimore, Maryland; and Ilene Foster, Baltimore, Maryland.

In addition, the Subcommittee heard testimony from Paul Taylor, National Technical Institute for the Deaf, Rochester, New York; Robert Yaeger, Minnesota Relay Service, Minneapolis, Minnesota; and Gerald Hines, AT&T, Basking Ridge, New Jersey.

Others providing testimony included: Chai Feldblum, Tony Califa, Nan Hunter, and Morton Halperin of the American Civil Liberties Union; Peter Bradford, chairman of the State of New York Public Service Commission; and Paul Rodgers and Caroline Chambers on behalf of the National Association of Regulatory Utility Commissioners.

On May 16, the Subcommittee on the Handicapped heard testimony from: Michael McIntyre, Queens Independent Living Center, Jamaica, New York; Mark Johnson, ADAPT, Alpharetta, Georgia; Laura Oftedahl, Columbia Lighthouse for the Blind, Washington, D.C.; and Dr. Mary Lynn Fletcher, Director, Disability Services, Loudon County, Tennessee.

Also testifying were: J. Roderick Burfield, Virginia Association of Public Transit Officials; Harold Jenkins, Cambria County Transit Authority, Johnstown, Pennsylvania; Dennis Louwerse, American Public Transit Association, Reading, Pennsylvania; Charles Webb, American Bus Association, Washington, D.C.; James Weisman, Eastern Paralyzed Veterans of America, New York, New York, and Tim Cook, National Disability Action Center, Washington, D.C.

Others providing testimony were: the Virginia Council for Independent Living; Wayne Smith, Executive Director of the United Bus Owners of America; and Theodore Knappen, Senior Vice President of Greyhound Lines, Inc.

On June 22, the Labor and Human Resources Committee heard testimony from Richard L. Thornburgh, Attorney General of the United States, and Senator Lowell P. Weicker, Jr., chief sponsor of the Americans with Disabilities Act of 1988.

IV. Need for the Legislation

The Committee, after extensive review and analysis over a number of Congresses, concludes that there exists a compelling need to establish a clear and comprehensive Federal prohibition of discrimination on the basis of disability in the areas of employment in the private sector, public accommodations, public services, transportation, and telecommunications.

NATURE AND EXTENT OF DISCRIMINATION ON THE BASIS OF DISABILITY

In general

Testimony presented to the Committee and the Subcommittee, two recent reports by the National Council on Disability ("Toward Independence" (1986) and "On the Threshold of Independence" (1988)), a report by the Civil Rights Commission ("Accommodating the Spectrum of Individual Abilities" (1983)), polls taken by Louis Harris and Associates ("The ICD Survey of Disabled Americans: Bringing Disabled Americans into the Mainstream" (March, 1986)) and "The ICD Survey II: Employing Disabled Americans" (1987)), a report of the Presidential Commission on the Human Immunodeficiency Virus Epidemic (1988)), and the report by the Task Force on the Rights and Empowerment of Americans with Disabilities all reach the same fundamental conclusions:

(1) Historically, individuals with disabilities have been isolated and subjected to discrimination and such isolation and discrimination is still pervasive in our society;

(2) Discrimination still persists in such critical areas as employment in the private sector, public accommodations, public services, transportation, and telecommunications;

(3) Current Federal and State laws are inadequate to address the discrimination faced by people with disabilities in these critical areas;

(4) People with disabilities as a group occupy an inferior status socially, economically, vocationally, and educationally; and

(5) Discrimination denies people with disabilities the opportunity to compete on an equal basis and costs the United States, State and local governments, and the private sector billions of dollars in unnecessary expenses resulting from dependency and nonproductivity.

One of the most debilitating forms of discrimination is segregation imposed by others. Timothy Cook of the National Disability Action Center testified:

> As Rosa Parks taught us, and as the Supreme Court ruled thirty-five years ago in *Brown* v. *Board of Education*, segregation "affects one's heart and mind in ways that may never be undone. Separate but equal is inherently unequal."

Discrimination also includes exclusion, or denial of benefits, services, or other opportunities that are as effective and meaningful as those provided to others.

Discrimination results from actions or inactions that discriminate by effect as well as by intent or design. Discrimination also includes harms resulting from the construction of transportation, architectural, and communication barriers and the adoption or application of standards and criteria and practices and procedures based on thoughtlessness or indifference—of benign neglect.

The testimony presented by Judith Heumann, World Institute on Disability, illustrates several of these forms of discrimination:

> When I was 5 my mother proudly pushed my wheelchair to our local public school, where I was promptly refused admission because the principal ruled that I was a fire hazard. I was forced to go into home instruction, receiving one hour of education trice a week for 3½ years. My entrance into mainstream society was blocked by discrimination and segregation. Segregation was not only on an institutional level but also acted as an obstruction to social integration. As a teenager, I could not travel with my friends on the bus because it was not accessible. At my graduation from high school, the principal attempted to prevent me from accepting an award in a ceremony on stage simply because I was in a wheelchair.
>
> When I was 19, the house mother of my college dormitory refused me admission into the form because I was in a wheelchair and needed assistance. When I was 21 years old, I was denied an elementary school teaching credential because of "paralysis of both lower extremities sequelae of poliomyelitis." At the time, I did not know what sequelae meant. I went to the dictionary and looked it up and found out that it was "because of." So it was obviously because of my disability that I was discriminated against.
>
> At the age of 25, I was told to leave a plane on my return trip to my job here in the U.S. Senate because I was flying without an attendant. In 1981, an attempt was made to forceably remove me and another disabled friend from an auction house because we were "disgusting to look at." In 1983, a manager at a movie theater attempted to keep my disabled friend and myself out of his theater because we could not transfer out of our wheelchairs.

Discrimination also includes harms affecting individuals with a history of disability, and those regarded by others as having a disability as well as persons associated with such individuals that are based on false presumptions, generalizations, misperceptions, patronizing attitudes, ignorance, irrational fears, and pernicious mythologies.

Discrimination also includes the effects a person's disability may have on others. For example, in March, 1988 the Washington Post reported the story of a New Jersey zoo keeper who refused to admit children with Downs Syndrome because he feared they would upset the chimpanzees. The Supreme Court in *Alexander* v. *Choate*, 469 U.S. 287 (1985) cited as an example of improper discrimination on the basis of handicap a case in which "a court ruled that a cerebral palsied child, who was not a physical threat and was academically competitive, should be excluded from public school, because his teacher claimed his physical appearance 'produced a nauseating effect' on his classmates." 117 Cong Rec. 45974 (1971).

The Supreme Court in *School Board of Nassau County* v. *Arline*, 107 S. Ct. 1123 (1987) cited remarks of Senator Mondale describing a case in which a woman "crippled by arthritis" was denied a job *not* because she could not do the work but because "college trustees [thought] 'normal students shouldn't see her.'" 118 Cong Rec. 36761 (1972).

The Committee heard testimony about a woman from Kentucky who was fired from the job she had held for a number of years because the employer found out that her son, who had become ill with AIDS, had moved into her house so she could care for him. The Committee also heard testimony about former cancer victims, persons with epilepsy, a person with cerebral palsy, and others who had been subjected to similar types of discrimination.

With respect to the pervasiveness of discrimination in our Nation, the National Council explained:

> A major obstacle to achieving the societal goals of equal opportunity and full participation of individuals with disabilities is the problem of discrimination * * * The severity and pervasiveness of discrimination against people with disabilities is well documented.

The U.S. Commission on Civil Rights recently concluded that:

> Despite some improvements * * * [discrimination] persists in such critical areas as education, employment, institutionalization, medical treatment, involuntary sterilization, architectural barriers, and transportation.

The Commission further observed that "discriminatory treatment of handicapped persons can occur in almost every aspect of their lives."

The Lou Harris polls found that:

> By almost any definition, Americans with disabilities are uniquely underprivileged and disadvantaged. They are much poorer, much less well educated and have much less social life, have fewer amenities and have a lower level of self-satisfaction than other Americans.

Admiral James Watkins, former chairperson of the President's Commission on the Human Immunodeficiency Virus Epidemic, testified that after 45 days of public hearings and site visits, the Commission concluded that discrimination against individuals with HIV infection is widespread and has serious repercussions for both the individual who experiences it and for this Nation's efforts to control the epidemic. The Report concludes:

> as long as discrimination occurs, and no strong national policy with rapid and effective remedies against discrimination is established, individuals who are infected with HIV will be reluctant to come forward for testing, counseling, and care. This fear of potential discrimination * * * will undermine our efforts to contain the HIV epidemic and will leave HIV-infected individuals isolated and alone.

Justin Dart, the chairperson of the Task Force on the Rights and Empowerment of Americans with Disabilities, testified that after 63 public forums held in every state, there is overwhelming evidence that:

> Although America has recorded great progress in the area of disability during the past few decades, our society is still infected by the ancient, now almost subconscious assumption that people with disabilities are less than fully

> human and therefore are not fully eligible for the opportunities, services, and support systems which are available to other people as a matter of right. The result is massive, society-wide discrimination.

The U.S. Attorney General, Dick Thornburgh, on behalf of President Bush, testified that:

> Despite the best efforts of all levels of government and the private sector and the tireless efforts of concerned citizens and advocates everywhere, many persons with disabilities in this Nation still lead their lives in an intolerable state of isolation and dependence.

Employment

Individuals with disabilities experience staggering levels of unemployment and poverty. According to a recent Lou Harris poll not working is perhaps the truest definition of what it means to be disabled in America. Two-thirds of all disabled Americans between the age of 16 and 64 are not working at all; yet, a large majority of those not working say that they want to work. Sixty-six percent of working-age disabled persons, who are not working, say that they would like to have a job. Translated into absolute terms, this means that about 8.2 million people with disabilities want to work but cannot find a job.

Forty percent of all adults with disabilities did not finish high school—three times more than non-disabled individuals. In 1984, fifty percent of all adults with disabilities had household incomes of $15,000 or less. Among non-disabled persons, only twenty-five percent had household incomes in this wage bracket.

President Bush has stated: "The statistics consistently demonstrate that disabled people are the poorest, least educated and largest minority in America."

According to the Lou Harris poll, the majority of those individuals with disabilities not working and out of the labor force, must depend on insurance payments or government benefits for support. Eighty-two percent of people with disabilities said they would give up their government benefits in favor of a full-time job.

Lou Harris' poll also found that large majorities of top managers (72 percent), equal opportunity officers (76 percent), and department heads/line managers (80 percent) believe that individuals with disabilities often encounter job discrimination from employers and that discrimination by employers remains an inexcusable barrier to increased employment of disabled people.

According to testimony presented to the Committee by Arlene Mayerson of the Disabilities Rights Education and Defense Fund, the major categories of job discrimination faced by people with disabilties include: use of standards and criteria that have the effect of denying opportunities; failure to provide or make available reasonable accommodations; refusal to hire based on presumptions, stereotypes and myths about job performance, safety, insurance costs, absenteeism, and acceptance by co-workers; placement into dead-end jobs; under-employment and lack of promotion opportunities; and use of application forms and other pre-employment inquiries that inquire about the existence of a disability rather than about the ability to perform the essential functions of a job.

Several witnesses also explained that title I of the ADA (employment discrimination) is modeled after regulations implementing the Rehabilitation Act of 1973, which prohibits discrimination by recipients of Federal assistance and requires affirmative action by Federal contractors and that compliance with these laws has been "no big deal."

Harold Russell, the chairperson of the President's Committee on Employment of People With Disabilities, testified that for a majority of employees, for example, no reasonable accommodation is required; for many others the costs can be less than $50. According to the President's Committee which operates the Job Accommodation Network, typical accommodations provided for under $50 include:

> A timer costing $26.95 with an indicator light allowed a medical technician who was deaf to perform the laboratory tests required for her job;
>
> A receptionist who was visually impaired was provided with a light probe, costing $45, which allowed her to determine which lines on a telephone were ringing, on hold, or in use of her company;
>
> Obtaining a headset for a phone costing $49.95 allowed an insurance salesperson with cerebral palsy to write while talking.

Witnesses also explained that there will also be a need for more expensive accommodations, including readers for blind persons and interpreters for deaf persons. But even costs for these accommodations are frequently exaggerated. Dr. I. King Jordan, President of Gallaudet University, explained to the Committee:

> Often, interpreters can be hired to do other things as well as interpret—administrative secretaries or professional staff, even, who interpret on an only-as-needed basis. Most of the time, people who are hired who are deaf function without an interpreter except when they are in a meeting or except when they are attending a workshop or except when there is a very essential need for one-to-one communication. But, I think it needs to be made clear to people that the accommodations are not nearly as large as some people would lead us to believe.

In sum, testimony indicates that the provision of all types of reasonable accommodations is essential to accomplishing the critical goal of this legislation—to allow individuals with disabilities to be part of the economic mainstream of our society.

Public accommodations

Based on testimony presented at the hearings and recent national surveys and reports, it is clear that an overwhelming majority of individuals with disabilities lead isolated lives and do not frequent places of public accommodation.

The National Council on Disability summarized the findings of a recent Lou Harris poll:

> The survey results dealing with social life and leisure experiences paint a sobering picture of an isolated and secluded population of individuals with disabilities. The large majority of people with disabilities do not go to movies, do not go to the theater, do not go to see musical performances, and do not go to sports events. A substantial minority of persons with disabilities never go to a restaurant, never go to a grocery store, and never go to a church or synagogue * * * The extent of non-participation of individuals with disabilities in social and recreational activities in alarming.

Several witnesses addressed the obvious question "Why don't people with disabilities frequent places of public accommodations and stores as often as other Americans?" Three major reasons were given by witnesses. The first reason is that people with disabilities do not feel that they are welcome and can participate safely in such places. The second reason is fear and self-consciousness about their disability stemming from degrading experiences they or their friends with disabilities have experienced. The third reason is architectural, communication, and transportation barriers.

Former Senator Weicker testified that people with disabilities spend a lifetime "overcoming not what God wrought but what man imposed by custom and law."

Witnesses also testified about the need to define places of public accommodations to include all places open to the public, not simply restaurants, hotels, and places of entertainment (which are the types of establishments covered by title II of the Civil Rights Act of 1964) because discrimination against people with disabilities is not limited to specific categories of public accommodations. The Attorney General stated that we must bring Americans with disabilities into the mainstream of society "in other words, full participation in and access to all aspects of society."

Robert Burgdorf, Jr., currently a Professor of Law at the District of Columbia School of Law, testifying on behalf of the National Easter Seal Society, stated:

> * * * it makes no sense to bar discrimination against people with disabilities in theaters, restaurants, or places of entertainment but not in regard to such important things as doctors' offices. It makes no sense for a law to say that people with disabilities cannot be discriminated against if they want to buy a pastrami sandwich at the local deli but that they can be discriminated against next door at the pharmacy where they need to fill a prescription. There is no sense to that distinction.

Witnesses identified the major areas of discrimination that need to be addressed. The first is lack of physical access to facilities. Witnesses recognized that it is probably not feasible to require that existing facilities be completely retrofitted to be made accessible. However, it is appropriate to require modest changes. Ron Mace, an architect, described numerous inexpensive changes that could be made to make a facility accessible, including installing a permanent or portable ramp over an entrance step; installing offset hinges to widen a doorway; relocating a vending machine to clear an accessible path; and installing signage to indicate accessible routes and features within facilities.

Several witnesses also recognized that when renovations are made that affect or could affect usability, the renovations should enhance accessibility and that newly constructed buildings should be fully accessible because the additional costs for making new facilities accessible are often "negligible." According to Ron Mace, there is absolutely no reason why new buildings constructed in America cannot be barrier-free since additional cost is not the factor. He testified that the problem is that "there is right now no training provided for designers in our country on how to design for children, older people and disabled people."

Additional areas of discrimination that witnesses identified include: the imposition or application of standards or criteria that limit or exclude people with disabilities; the failure to make reasonable modifications in policies to allow participation, and a failure to provide auxiliary aids and services.

For example, Greg Hlibok and Frank Bowe testified about the need for places of public accommodations to take steps to enhance safety for persons with hearing impairments. Laura Oftedahl testified about the lack of access and unnecessary dangers visually impaired people face because of lack of simple, inexpensive auxiliary aids.

Public services

Currently, Federal law prohibits recipients of Federal assistance from discriminating against individuals with disabilities. Many agencies of State and local government receive Federal aid and thus are currently prohibited from engaging in discrimination on the basis of disability. Witnesses testified about the inequity of limiting protection based on the receipt of Federal funding. For example, Neil Hartigan, the Attorney General from Illinois, testified that:

> Under the current Federal law, the Rehabilitation Act's nondiscrimination requirements are tied to the receipt of Federal financial assistance. Unfortunately, what this translates to is total confusion for the disabled community and the inability to expect consistent treatment. Where there is no state law prohibiting discriminatory practices, two programs that are exactly alike, except for funding sources, can treat people with disabilities completely differently than others who don't have disabilities.

Mr. Hartigan also focused on the need to ensure access to polling places: "You cannot exercise one of your most basic rights as an American if the polling places are not accessible." The Committee heard about people with disabilities who were forced to vote by absentee ballot before key debates by the candidates were held.

Dr. Mary Lynn Fletcher testified that access to all public services is particularly critical in rural areas, because State and local government activities are frequently the major activities in such small towns. Since Federal aid frequently does not reach small rural towns, current law thus does not protect people with disabilities in such areas from discrimination.

Transportation

Transportation is the linchpin which enables people with disabilities to be integrated and mainstreamed into society. Timothy Cook testified that "access to transportation is the key to opening up education, employment, recreation; and other provisions of the [ADA] are meaningless unless we put together an accessible public transportation system in this country." The National Council on Disability has declared that "accessible transportation is a critical component of a national policy that promotes the self-reliance and self-sufficiency of people with disabilities."

Harold Russell, testifying for the President's Committee on Employment of People with Disabilities made the same point when he stated:

> To have less than adequate accessible public transportation services for an individual who is protected from discrimination in employment, or who has received other numerous federally funded services, is analogous to throwing an 11-foot rope to a drowning man 20 feet offshore and then proclaiming you are going more than halfway.

Witnesses also testified about the need to pursue a multi-modal approach to ensuring access for people with disabilities which provides that all new buses used for fixed routes are accessible and paratransit is made available for those who cannot use the fixed route accessible buses.

For some people with disabilities who lead or would like to lead spontaneous, independent lives integrated into the community, paratransit is often inadequate or inappropriate for the following reasons, among others: the need to make reservations in advance often conflicts with one's work schedule or interests in going out to restaurants and the like; the cost of rides when used frequently is often exorbitant; limitations on time of day and the number of days that the paratransit operates; waiting time; restrictions on use by guests and nondisabled companions who are excluded from accompanying the person with a disability; the expense to the public agency; and restrictions on eligibility placed on use by social service agencies.

However, witnesses also stressed that there are some people with disabilities who are so severely disabled that they cannot use accessible mainline transit and thus there is a need to have a paratransit system for these people.

Witnesses also addressed common myths about making mainline buses accessible. Harold Jenkins, the General Manager of the Cambria County Transit Authority in Johnstown, Pennsylvania, testified that his system is 100% accessible and operates without problem, notwithstanding hilly terrain and inclement weather, including snow, flooding, and significant extremes in temperature.

He also explained that when the decision was initially made to make the fleet 100% accessible there was fear and reluctance on the part of the disability community, the drivers, and the general public. That fear and reluctance has now disappeared. Jenkins concluded that mainline access works in his community because of the commitment by everyone to make it work. Thus, there is a need to train and educate top management, drivers, and the general public as well as the disability community.

The Committee also heard and received written testimony that the new generation of lifts are not having the maintenance problems experienced in the past and they can operate in inclement weather. The Architectural Transportation Barriers Compliance Board has reported that currently most problems with lift operation are the direct result of driver error and that lift maintenance is but one facet of a good maintenance program. Thus, transit authorities reporting problems with lifts are generally those that also report problems with general maintenance.

With respect to intercity transportation, the Committee learned about reasonably priced lifts that can be installed on buses which will enable people using wheelchairs to have access to these buses. This is particularly critical in rural areas where these buses are often the only mode of transportation that is available.

Telecommunications

Dr. I. King Jordan, President of Gallaudet University, noted to the Committee that more than 100 years ago Alexander Graham Bell invented the telephone in the hope that he could close the communication gap between deaf and hearing people. According to Dr. Jordan: "Not only did the telephone not help close the gap, but in many ways it widened it and has become one more barrier in the lives of deaf people."

Several witnesses testified about the critical need to establish relay systems which will enable hearing impaired and communication impaired persons who use telecommunication devices for the deaf (TDDs) to make calls to and receive calls from individuals using voice telephones. Dr. Jordan explained:

> The simplest task often becomes a major burden when we do not have access to the telephone: the person who wants to call a doctor for an appointment or the person who has to call his boss and tell him he cannot show up for work that day, someone at home who needs to call a plumber to fix a leak, or maybe a theatergoer who wants to make reservations or go to dinner.

Robert Yeager, who operates the Minnesota Relay Service, explained the importance of the relay this way:

> As a former relay operator myself, I have seen the difference these services can make in people's lives * * * A woman calls an ambulance when her husband has a heart attack; someone sets up a job interview and gets a job; a teenager gets their first date * * *

Dr. Jordan summed up the need for a national relay system by stating:

> The phone is a necessity, and it is a necessity for all of us, not just people who can hear * * * By requiring nationwide telephone relay service for everyone, it will help deaf people achieve a level of independence in employment

and public accommodations that is sought by other parts of the ADA.

Enforcement

Several witnesses emphasized that the rights guaranteed by the ADA are meaningless without effective enforcement provisions. Illinois Attorney General Neil Hartigan explained that:

> The whole trick is to make it more expensive to break the law than it is to keep the law. The vast majority of businesspeople want to keep the law. They just have got a bottom line they have got to meet. They can't have somebody else having an unfair competitive advantage by getting away with a discriminatory practice. That is why we need teeth in the law. That is why we put the penalties in the law and the damages in the law.

Mr. Hartigan explained that the inclusion of penalties and damages in the driving force that facilitates voluntary compliance:

> When you don't have the penalties, there is no enforcement possibilities. Right now * * * we can have traditional as well as punitive damages. We can have injunctive activity. We have got a range of weapons we can use if we have to use them. But, the fact that you've got it, the fact they know you are serious about it, keeps you from having to use it. We have 3,000 cases where we haven't had to go to court.

Summary

In sum, the unfortunate truth is that individuals with disabilities are a discrete and insular minority who have been faced with restrictions and limitations, subjected to a history of purposeful unequal treatment, and relegated to a position of political powerlessness in our society, based on characteristics that are beyond the control of such individuals and resulting from stereotypic assumptions not truly indicative of the ability of such individuals to participate in and contribute to society.

THE EFFECTS OF DISCRIMINATION ON INDIVIDUALS WITH DISABILITIES

Discrimination has many different effects on individuals with disabilities. Arlene Mayerson of the Disabilities Rights Education and Defense Fund testified about the nature of discrimination against people with disabilities:

> The discriminatory nature of policies and practices that exclude and segregate disabled people has been obscured by the unchallenged equation of disability with incapacity and by the gloss of "good intentions." The innate biological and physical "inferiority" of disabled people is considered self-evident. This "self-evident" proposition has served to justify the exclusion and segregation of disabled people from all aspects of life. The social consequences that have attached to being disabled often bear no relationship to the physical or mental limitations imposed by the disability. For example, being paralyzed has meant far more than

> being unable to walk—it has meant being excluded from public schools, being denied employment opportunities and being deemed an "unfit parent." These injustices co-exist with an atmosphere of charity and concern for disabled people.

Dr. I. King Jordan, the President of Gallaudet University, explained that:

> Discrimination occurs in every facet of our lives. There is not a disabled American alive today who has not experienced some form of discrimination. Of course, this has very serious consequences. It destroys healthy self-concepts and slowly erodes the human spirit. Discrimination does not belong in the lives of disabled people.

Judith Heumann explained that:

> In the past, disability has been a cause of shame. This forced acceptance of second-class citizenship has stripped us as disabled people of pride and dignity * * * This stigma scars for life.

Discrimination produces fear and reluctance to participate. Robert Burgdorf and Harold Jenkins testifed that fear of mistreatment and discrimination and the existence of architectural, transportation, and communication barriers are critical reasons why individuals with disabilities don't participate to the same extent as nondisabled people in public accommodations and transportation.

Dr. Mary Lynn Fletcher testifed about the factors that isolate people with disabilities and then explained that when one adds the rural factor on top of everthing else it "obliterates the person."

Discrimination results in social isolation and in some cases suicide.

Justin Dart testifed before the Committee about how several of his brothers had committed suicide because of their disabilities and about a California woman, a mother, a TV director before becoming disabled who said to him:

> We can go just so long constantly reaching dead ends. I am broke, degraded, and angry, have attempted suicide three times. I know hundreds. Most of us try, but which way and where can we go? What and who can we be? If I were understood, I would have something to live for.

THE EFFECTS OF DISCRIMINATION ON SOCIETY

The Committee also heard testimony and reviewed reports concluding that discrimination results in dependency on social welfare programs that cost the taxpayers unnecessary billions of dollars each year. Sandy Parrino, the chairperson of the National Council on Disability, testified that discrimination places people with disabilities in chains that:

> * * * bind many of the 36 million people into a bondage of unjust, unwanted dependency on families, charity, and social welfare. Dependency that is a major and totally unnecessary contributor to public deficits and private expenditures.

She added that:

> * * * it is contrary to sound principles of fiscal responsibility to spend billions of Federal tax dollars to relegate people with disabilities to positions of dependency upon public support.

President Bush has stated:

> On the cost side, the National Council on the Handicapped states that current spending on disability benefits and programs exceeds $60 billion annually. Excluding the millions of disabled who want to work from the employment ranks costs society literally billions of dollars annually in support payments and lost income tax revenues.

Attorney General Thornburgh added that:

> We must recognize that passing comprehensive civil rights legislation protecting persons with disabilities will have direct and tangible benefits for our country * * * Certainly, the elimination of employment discrimination and the mainstreaming of persons with disabilities will result in more persons with disabilities working, in increased earnings, in less dependence on the Social Security system for financial support, in increased spending on consumer goods, and increased tax revenues.

Justin Dart testified that it is discrimination and segregation that are preventing persons with disabilities from becoming self-reliant:

> * * * and that are driving us inevitably towards an economic and moral disaster of giant, paternalistic welfare bureaucracy. We are already paying unaffordable and rapidly escalating billions in public and private funds to maintain ever-increasing millions of potentially productive Americans in unjust, unwanted dependency.

Thus, discrimination makes people with disabilities dependent on social welfare programs rather than allowing them to be taxpayers and consumers.

Discrimination also deprives our Nation of a valuable source of labor in a period of labor shortages in certain jobs.

President Bush has stated:

> The United States is now beginning to face labor shortages as the baby boomers move through the work force. The disabled offer a pool of talented workers whom we simply cannot afford to ignore, especially in connection with the high tech growth industries of the future.

Jay Rochlin, the executive director of the President's Committee on Employment of People with Disabilities, has stated:

> The demographics have given us an unprecedented 20 year window of opportunity. Employers will be desperate to find qualified employees. Of necessity, they will have to look beyond their traditional sources of personnel and work to attract minorities, women, and others for a new

workforce. Our challenge is to insure that the largest minority, people with disabilities, is included.

Discrimination also negates the billions of dollars we invest each year to educate our children and youth with disabilities and train and rehabilitate adults with disabilities. Dr. I. King Jordan testified that:

> We must stop sending disabled youth conflicting signals. America makes substantial investments in the education and development of these young people, then we deny them the opportunity to succeed and to graduate into a world that treats them with dignity and respect.

Sylvia Piper, a parent of a child with developmental disabilities testified that:

> We have invested in Dan's future. And the Ankeny Public School District has made an investment in Dan's future. * * * Are we going to allow this investment of time, energy, and dollars, not to mention Dan's ability and quality of life, to cease when he reaches 21?

Attorney General Thornburgh made the same point in his testimony:

> The continued maintenance of these barriers imposes staggering economic and social costs and inhibits our sincere and substantial Federal commitment to the education, rehabilitation, and employment of persons with disabilities. The elimination of these barriers will enable society to benefit from the skills and talents of persons with disabilities and will enable persons with disabilities to lead more productive lives.

CURRENT FEDERAL AND STATE LAWS ARE INADEQUATE; NEED FOR COMPREHENSIVE FEDERAL LEGISLATION

State laws are inadequate to address the pervasive problems of discrimination that people with disabilities are facing. As Neil Hartigan, testified,

> This is a crucial area where the Federal Government can act to establish uniform minimum requirements for accessibility.

Admiral Watkins, testified that:

> My predecessor [Sandy Parrino] here this morning said enough time has, in my opinion, been given to the States to legislate what is right. Too many States, for whatever reason, still perpetuate confusion. It is time for Federal action.

According to Harold Russell:

> The fifty State Governors' Committees, with whom the President's Committee works, report that existing State laws do not adequately counter such acts of discrimination.

Current Federal law is also inadequate. Currently, Federal antidiscrimination laws only address discrimination by Federal agencies and recipients of Federal financial assistance. Last year, Congress amended the Fair Housing Act to prohibit discrimination against people with disabilities. However, there are still no protections against discrimination by employers in the private sector, by places of public accommodation, by State and local government agencies that do not receive Federal aid, and with respect to the provision of telecommunication services. With respect to the provision of accessible transportation services, there are still misinterpretations by executive agencies and some courts regarding transportation by public entities and lack of protection against private transportation companies.

The need to enact omnibus civil rights legislation for individuals with disabilities was one of the major recommendations of the National Council on Disability in its two most recent reports to Congress. In fact S. 2345, the Americans With Disabilities Act of 1988, introduced during the 100th Congress, was developed by the Council.

The need for omnibus civil rights legislation was also one of the major recommendations of the Presidential Commission on the HIV Epidemic:

> Comprehensive Federal anti-discrimination legislation, which prohibits discrimination against persons with disabilities in the public and private sectors, including employment, housing, public accommodations and participation in government programs should be enacted. All persons with symptomatic or asymptomatic HIV infection should be clearly included as persons with disabilities who are covered by the anti-discrimination protections of this legislation.

Attorney General Thornburgh, on behalf of President Bush, also testified about the importance of enacting comprehensive civil rights legislation for people with disabilities:

> The Committee is to be commended for its efforts in drafting S. 933. One of its most impressive strengths is its comprehensive character. Over the last 20 years, civil rights laws protecting disabled persons have been enacted in piecemeal fashion. Thus, existing Federal laws are like a patchwork quilt in need of repair. There are holes in the fabric, serious gaps in coverage that leave persons with disabilities without adequate civil rights protections.

VISION FOR THE FUTURE

Many of the witnesses described the vision of the Americans With Disabilities Act.

Sandy Parrino testified that:

> Martin Luther King had a dream. We have a vision. Dr. King dreamed of an America "where a person is judged not by the color of his skin, but by the content of his character." ADA's vision is of an America where persons are judged by their abilities and not on the basis of their disabilities.

Tony Coelho shared the following observation with the Committee:

> While the charity model once represented a step forward in the treatment of persons with handicaps, in today's society it is irrelevant, inappropriate and a great disservice. Our model must change. Disabled people are sometimes impatient, and sometimes angry, but for good reason—they are fed up with discrimination and exclusion, tired of denial, and are eager to seize the challenges and opportunities as quickly as the rest of us.

Dr. Jordan testified that the ADA is necessary to demonstrate that disabled people:

> Can have the same aspirations and dreams as other American citizens. Disabled people know that their dreams can be fulfilled.

Dr. Jordan also testified that passage of ADA:

> Will tell disabled Americans that they are indeed equal to other Americans and that discrimination toward disabled persons will no longer be tolerated in our country. It will also make a powerful statement to the world that America is true to its ideals. That is the full measure of the American dream.

Perry Tillman, a Vietnam veteran, testified that:

> I did my job when I was called on by my country. Now it is your job and the job of everyone in Congress to make sure that when I lost the use of my legs I didn't lose my ability to achieve my dreams. Myself and other veterans before me fought for freedom for all Americans. But when I came home and found out that what I fought for applied to everyone but me and other handicapped people, I couldn't stop fighting. I have fought since my injury in Vietnam to regain my rightful place in society. I ask that you now join me in ending this fight and give quick and favorable consideration to the ADA in order to allow all Americans, disabled or not, to take part equally in American life.

CONCLUSION

In conclusion, there is a compelling need to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities and for the integration of persons with disabillities into the economic and social mainstream of American life. Further, there is a need to provide clear, strong, consistent, enforceable standards addressing discrimination against individuals with disabilities. Finally, there is a need to ensure that the Federal Government plays a central role in enforcing these standards on behalf of individuals with disabilities.

The difficult task before the Committee and, indeed, the Congress, is to establish standards that fulfill this mandate in a clear, balanced, and reasonable manner. The Committee believes that this legislation has done that. This report explains in detail how that balance has been struck.

V. SUMMARY OF COMMITTEE ACTION

S. 933 was brought for markup at the Committee on Labor and Human Resources executive session on August 2, 1989. At that time, the Committee discussed three amendments, of which two were adopted. Senator Harkin offered an amendment in the nature of a substitute, which included amendment No. 541, proposed by Senator McCain concerning amending the substitute by adding a provision concerning technical assistance, which was adopted by voice vote. Senator Hatch offered and then withdrew an amendment that would have extended the scope of coverage to include the Congress.

The Committee voted to adopt and report S. 933, as amended, as an amendment in the nature of a complete substitute, by a roll call vote of 16-0.

VI. EXPLANATION OF THE LEGISLATION

DEFINITION OF THE TERM "DISABILITY"

Section 3(2) of the legislation defines the term "disability" for purposes of this legislation. The definition of the term "disability" included in the bill is comparable to the definition of the term "individual with handicaps" in section 7(8)(B) of the Rehabilitation Act of 1973 and section 802(h) of the Fair Housing Act.

It is the Committee's intent that the analysis of the term "individual with handicaps" by the Department of Health, Education, and Welfare of the regulations implementing section 504 (42 Fed. Reg. 22685 et. seq. (May 4, 1977)) and the analysis by the Department of Housing and Urban Development of the regulations implementing the Fair Housing Amendments Act of 1988 apply to the definition of the term "disability" included in this legislation.

The use of the term "disability" instead of "handicap" and the term "individual with a disability" instead of "individual with handicaps" represents an effort by the Committee to make use of up-to-date, currently accepted terminology. In regard to this legislation, as well as in other contexts, the Congress has been apprised of the fact that to many individuals with disabilities the terminology applied to them is a very significant and sensitive issue.

As with racial and ethnic epithets, the choice of terms to apply to a person with a disability is overlaid with stereotypes, patronizing attitudes, and other emotional connotations. Many individuals with disabilities and organizations representing them object to the use of such terms as "handicapped person" or "the handicapped." In recent legislation, Congress has begun to recognize this shift of terminology, e.g., by changing the name of the National Council on the Handicapped to the National Council on Disability.

The Committee concluded that it was important for the current legislation to use terminology most in line with the sensibilities of most Americans with disabilities. No change in definition or substance is intended nor should be attributed to this change in phraseology.

The term "disability" means, with respect to an individual—

(1) A physical or mental impairment that substantially limits one or more of the major life activities of such individual;

(2) A record of such impairment; or

(3) Being regarded as having such an impairment.

The first prong of the definition includes any individual who has a "physical or mental impairment." A physical or mental impairment means—(1) any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive, digestive; genito-urinary; hemic and lymphatic; skin; and endocrine; or (2) any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

It is not possible to include in the legislation a list of all the specific conditions, diseases, or infections that would constitute physical or mental impairments because of the difficulty of ensuring the comprehensiveness of such a list, particularly in light of the fact that new disorders may develop in the future. The term includes, however, such conditions, diseases and infections as: orthopedic, visual, speech, and hearing impairments, cerebral palsy, epilepsy, muscular distrophy, multiple sclerosis, infection with the Human Immunodeficiency Virus, cancer, heart disease, diabetes, mental retardation, emotional illness, specific learning disabilities, drug addiction, and alcoholism.

The term "physical or mental impairment" does not include simple physical characteristics, such as blue eyes or black hair. Further, because only physical or mental impairments are included, environmental, cultural, and economic disadvantages are not in themselves covered. For example, having a prison record does not constitute having a disability. Age is not a disability, nor is homosexuality. Of course, if a person who has any of these characteristics also has a physical or mental impairment, such as epilepsy, the person may be considered as having a disability or purposes of this legislation.

A physical or mental impairment does not constitute a disability under the first prong of the definition for purposes of the ADA unless its severity is such that it results in a "substantial limitation of one or more major life activities." A "major life activity" means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, and working.

For example, a person who is paraplegic will have a substantial difficulty in the major life activity of walking; a deaf person will have a substantial difficulty in hearing aural communications; and a person with lung disease will have a substantial limitation in the major life activity of breathing. As noted by the U.S. Department of Justice, "Application of Section 504 of the Rehabilitation Act to HIV-Infected Individuals," September 27, 1988, at 9-11, a person infected with the Human Immunodeficiency Virus is covered under the first prong of the definition of the term "disability."

Persons with minor, trivial impairments, such as a simple infected finger are not impaired in a major life activity. A person is considered an individual with a disability for purposes of the first prong of the definition when the individual's important life activities are restricted as to the conditions, manner, or duration under which they can be performed in comparison to most people. A person who can walk for 10 miles continuously is not substantially limited in walking merely because on the eleventh mile, he or she begins to experience pain because most people would not be able to walk eleven miles without experiencing some discomfort. Moreover, whether a person has a disability should be assessed without regard to the availability of mitigating measures, such as reasonable accommodations or auxiliary aids.

The second prong of the definition of the term "disability" includes an individual who has a record of such an impairment, i.e., an individual who has a history of, or has been misclassified as having, a mental or physical impairment that substantially limtis one or more major life activities.

This provision is included in the definition in part to protect individuals who have recovered from a physical or mental impairment which previously substantially limited them, in a major life activity. Discrimination on the basis of such a past impairment would be prohibited under this legislation. Frequently occurring examples of the first group (i.e., those who have a history of an impairment) are persons with histories of mental or emotional illness, heart disease, or cancer; examples of the second group (i.e., those who have been misclassified as having an impairment) are persons who have been misclassified as mentally retarded.

The third prong of the definition includes an individual who is regarded as having a covered impairment. This third prong includes an individual who has a physical or mental impairment that does not substantially limit major life activities, but that is treated by a covered entity as constituting such a limitation. The third prong also includes an individual who has a physical or mental impairment that substantially limits major activities only as a result of the attitudes of others toward such impairment or has no physical or mental impairment but is treated by a covered entity as having such an impairment.

The rationale for this third prong was clearly articulated by the U.S. Supreme Court in *School Board of Nassau County* v. *Arline*, 480 U.S. 273 (1987). The Court noted that Congress included this third prong because it was as concerned about the effect of an impairment on others as it was about its effect on the individual. As the Court noted, the third prong of the definition is designed to protect individuals who have impairments that do not in fact substantially limit their functioning. The Court explained:

> Such an impairment might not diminish a person's physical or mental capabilities, but could nevertheless substantially limit that person's ability to work as a result of the negative reactions of others to the impairment. 480 U.S. at 283.

The Court went on to conclude that:

> By amending the definition of "handicapped individual" to include not only those who are actually physically impaired but also those who are regarded as impaired and who, as a result, are substantially limited in a major life activity, Congress acknowledged that society's accumulated myths and fears about disability and diseases are as handicapping as are the physical limitations that flow from actual impairment.

This third prong is particularly important for individuals with stigmatic conditions that are viewed as physical impairments but do not in fact result in a substantial limitation of a major life activity. For example, severe burn victims often face discrimination.

Another important goal of the third prong of the definition is to ensure that persons with medical conditions that are under control, and that therefore do not currently limit major life activities, are not discriminated against on the basis of their medical conditions. For example, individuals with controlled diabetes or epilepsy are often denied jobs for which they are qualified. Such denials are the result of negative attitudes and misinformation.

Other examples of individuals who fall within the "regarded as" prong of the definition include people who are rejected for a particular job for which they apply because of findings of a back abnormality on an x-ray, notwithstanding the absence of any symptoms, or people who are rejected for a particular job solely because they wear hearing aids, even though such people may compensate substantially for their hearing impairments by using their aids, speechreading, and a variety of other strategies.

A person who is excluded from any activity covered under this Act or is otherwise discriminated against because of a covered entity's negative attitudes towards disability is being treated as having a disability which affects a major life activity. For example, if a public accommodation, such as a restaurant, refused entry to a person with cerebral palsy because of that person's physical appearance, that person would be covered under the third prong of the definition. Similarly, if an employer refuses to hire someone because of a fear of the "negative reactions" of others to the individual, or because of the employer's perception that the applicant had a disability which prevented that person from working, that person would be covered under the third prong. See, e.g., *Arline,* 480 U.S. at 284; *Doe* v. *Centinela Hospital,* 57 U.S.L.W. 2034, No. CV-87-2514-PAR (C.D.Cal., June 30, 1988), *Thornhill* v. *Marsh,* 49 FEP Cases 6 (Feb. 2, 1989) (9th Cir. 1989).

TITLE I—EMPLOYMENT

Title I of the legislation sets forth prohibitions against discrimination on the basis of disability by employers, employment agencies, labor organizations, or joint labor-management committees (hereinafter referred to as "covered entities") with respect to hiring and all terms, conditions, and privileges of employment.

Scope of coverage

The bill covers employers (including governments, governmental agencies, and political subdivisions) who are engaged in an industry affecting commerce and who have 15 or more employees for each working day in each of 20 or more calender weeks in the current or preceding calendar year and any agent of such a person; except, for the two years following the effective date of title I, only entities with 25 or more employees are covered. Additional entities covered by title I of the legislation are employment agencies, labor organizations, or joint labor-management committees.

Consistent with title VII of the Civil Rights Act of 1964, the term "employer" under this legislation does not include (i) the United States, a corporation wholly owned by the government of the United States, or an Indian tribe; or (ii) a bona fide private membership club (other than a labor organization) that is exempt from taxation under section 501(c) of the Internal Revenue Code of 1986.

Definitions

Several of the definitions set out in title VII of the Civil Rights Act of 1964 are adopted or incorporated by reference in this legislation (Commission, employer, person, labor organization, employment agency, commerce, and industry affecting commerce). The term "employee" means an individual employed by an employer. The exception set out in title VII of the Civil Rights Act of 1964 for elected officials and their employees and appointees has been deleted.

Actions covered by this legislation

Section 102(a) of the legislation specifies that no covered entity shall discriminate against any qualified individual with a disability because of such individual's disability in regard to job application procedures, the hiring or discharge of employees, employee compensation, advancement, job training, and other terms, conditions, and privileges of employment.

The phrasing of this section is consistent with regulations implementing section 504 of the Rehabilitation Act of 1973. Consistent with these regulations, the phrase "other terms, conditions, and privileges of employment" includes: (1) recruitment, advertising, and the processing of applications for employment; (2) hiring, upgrading, promotion, award of tenure, demotion, transfer, layoff, termination, right of return from layoff, and rehiring; (3) rates of pay or any other form of compensation and changes in compensation; (4) job assignment, job classification, organizational structures, position descriptions, lines of progression, and seniority lists; (5) leaves of absence, sick leave, or any other leave; (6) fringe benefits available by virtue of employment, whether or not adminsitered by the covered entity; (7) selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, and selection for leaves of absence to pursue training; and (8) employer-sponsored activities, including social or recreational programs.

Qualified individual with a disability

The term "qualified individual with a disability" is defined in section 101(7) of the bill to mean an individual with a disability who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires.

This definition is comparable to the definition used in regulations implementing section 501 and section 504 of the Rehabilitation Act of 1973. The phrase "essential functions" means job tasks that are fundamental and not marginal. The point of including this phrase within the definition of a "qualified individual with a disability" is to ensure that employers can continue to require that all applicants and employees, including those with disabilities, are able to perform the essential, i.e., non-marginal functions of the job in question.

As the 1977 regulations issued by the Department of Health, Education, and Welfare pointed out "inclusion of this phrase is useful in emphasizing that handicapped persons should not be disqualified simply because they may have difficulty in performing tasks that bear only a marginal relationship to a particular job." 42 Fed. Reg. 22686 (1977). In determining what constitutes the essential functions of the job, consideration should be given to the employer's judgment regarding what functions are essential as a matter of business necessity.

The basic concept is that an employer may require that every employee be qualified to perform the essential functions of a job. The term "qualified" refers to whether the individual is qualified at the time of the job action in question; the mere possibility of future incapacity does not by itself render the person not qualified.

By including the phrase "qualified individual with a disability," the Committee intends to reaffirm that this legislation does not undermine an employer's ability to choose and maintain qualified workers. This legislation simply provides that employment decisions must not have the purpose of effect of subjecting a qualified individual with a disability to discrimination on the basis of his or her disability.

Thus, under this legislation an employer is still free to select the most qualified applicant available and to make decisions based on reasons unrelated to the existence or consequence of a disability. For example, suppose an employer has an opening for a typist and two persons apply for the job, one being an individual with a disability who types 50 words per minute and the other being an individual without a disability who types 75 words per minute, the employer is permitted to choose the applicant with the higher typing speed.

On the other hand, if the two applicants are an individual with a hearing impairment who requires a telephone headset with an amplifier and an individual without a disability, both of whom have the same typing speed, the employer is not permitted to choose the individual without a disability because of the need to provide the needed reasonable accommodation.

In the above example, the employer would be permitted to reject the applicant with a disability and choose the other applicant for reasons not related to the disability or the accommodation or otherwise prohibited by this legislation. In other words, the employer's obligation is to consider applicants and make decisions without regard to an individual's disability, or the individual's need for reasonable accommodation. But, the employer has no obligation under this legislation to prefer applicants with disabilities over other applicants on the basis of disability.

Under this legislation an employer may still devise physical and other job criteria and tests for a job so long as the criteria or tests are job-related and consistent with business necessity. Thus, for example, an employer can adopt a physical criterion that an applicant be able to lift fifty pounds, if that ability is necessary to an individual's ability to perform the essential functions of the job in question.

Moreover, even if the criterion is legitimate, the employer must determine whether a reasonable accommodation would enable the person with the disability to perform the essential functions of the job without imposing an undue hardship on the business.

Finally, this legislation prohibits use of a blanket rule excluding people with certain disabilities except in the very limited situation where in all cases physical condition by its very nature would prevent the person with a disability from performing the essential functions of the job, even with reasonable accommodations.

It is also acceptable to deny employment to an applicant or to fire an employee with a disability on the basis that the individual poses a direct threat to the health or safety of others or poses a direct threat to property. The determination that an individual with a disability will pose a safety threat to others must be made on a case-by-case basis and not be based on generalizations, misperceptions, ignorance, irrational fears, patronizing attitudes, or pernicious mythologies.

The employer must identify the specific risk that the individual with a disability would pose. The standard to be used in determining whether there is a direct threat is whether the person poses a significant risk to the safety of others or to property, not a speculative or remote risk, and that no reasonable accommodation is available that can remove the risk. (See section 102(b) of the legislation). See also *School Board of Nassau County* v. *Arline*, 480 U.S. 273 (1987). For people with mental disabilities, the employer must identify the specific behavior on the part of the individual that would pose the anticipated direct threat.

Making such a determination requires a fact-specific individualized inquiry resulting in a "well-informed judgment grounded in a careful and open-minded weighing of the risks and alternatives." *Hall* v. *U.S. Postal Service*, 857 F.2d 1073, 1079 (6th Cir. 1988), quoting *Arline*. See also *Mantolete* v. *Bolger*, 757 F.2d 1416 (9th Cir. 1985) and *Strathie* v. *Dept. of Transportation*, 716 F.2d 227 (3d Cir. 1983).

With respect to covered entities subject to rules promulgated by the Department of Transportation regarding physical qualifications for drivers of certain classifications of motor vehicles, it is the Committee's intent that a person with a disability applying for or currently holding a job subject to these standards must be able to satisfy these physical qualification standards in order to be considered a qualified individual with a disability under title I of this legislation.

In light of this legislation, the Committee expects that within two years from the date of enactment (the effective date of title I of this legislation), the Secretary of Transportation will undertake a thorough review of these regulations to ascertain whether the standards conform with current knowledge about the capabilties of persons with disabilities and currently available technological aids and devices and in light of section 504 of the Rehabilitation Act of 1973 and make any necessary changes within the two year period.

Specific forms of discrimination prohibited

As explained above, section 1029a) of the bill includes a general prohibition against discrimination on the basis of disability against a qualified individual with a disability. Section 102(b) of the bill specifies specific forms of discrimination that are prohibited by section 102(a).

Section 102(b)(1) of the legislation specifies that the term "discrimination" includes limiting, segregating, or classifying a job applicant or employee in a way that adversely affects the opportunities or status of such applicant or employee because of the disability of such applicant or employee.

Thus, covered entities are required to make employment decisions based on facts applicable to individual applicants or employees, and not on the basis of presumptions as to what a class of individuals with disabilities can or cannot do.

For example, it would be a violation of this legislation if an employer were to limit the duties of an individual with a disability based on a presumption of what was best for such individual or based on a presumption about the ability of that individual to perform certain tasks. Similarly, it would be a violation for an employer to adopt separate lines of progression for employees with disabilities based on a presumption that no individual with a disability would be interested in moving into a particular job.

It would also be a violation to deny employment to an applicant based on generalized fears about the safety of the applicant or higher rates of absenteeism. By definition, such fears are based on averages and group-based predictions. This legislation requires individualized assessments which are incompatible with such an approach. Moreover, even group-based fears may be erroneous. In 1973, a study examined the job performance, safety record and attendance of 1,452 physically impaired employees of the E.I. du Pont de Nemours and Company (Wolfe, "Disability is No Hardship for du Pont").

The study was intended, in part, to determine the validity of several concerns expressed by employers with regard to hiring veterans with disabilities: (1) insurance rates will skyrocket; (2) considerable expense will be involved in making the necessary adjustments at the place of work; (3) safety records will be jeopardized; (4) special privileges will have to be granted; and (5) other employees may not accept workers with disabilities.

A du Pont executive said:

> Every one of these reasons for not considering the handicapped veteran is not only a myth—but has been proven through experience to hold no semblance of fact whatsoever.

Regarding insurance, the executive added

> Du Pont has had no increase in compensation costs as a result of hiring the handicapped and no lost-time injuries of the handicapped have been experienced.

With regard to the other concerns, the study showed that the disabled worker performed as well as or better than their non-disabled co-workers. The fears of safety and absenteeism were unfounded.

Some specific findings of the study were as follows:

> Ninety-one percent of Du Pont's disabled workers rated average or better in performance.
>
> Only four percent of the workers with disabilities were below average in safety records; more than half were above average.
>
> Ninety-three percent of the workers with disabilities rated average or better with regard to job stability (turnover rate).
>
> Seventy-nine percent of the workers with disabilities rated average or better in attendance.
>
> Fellow employees did not resent necessary accommodations made for employees with disabilities.

In addition, employers may not deny health insurance coverage completely to an individual based on the person's diagnosis or disability. For example, while it is permissible for an employer to offer insurance policies that limit coverage for certain procedures or treatments, e.g., only a specified amount per year for mental health coverage, a person who has a mental health condition may not be denied coverage for other conditions such as for a broken leg or for heart surgery because of the existence of the mental health condition. A limitation may be placed on reimbursements for a procedure or the types of drugs or procedures covered e.g., a limit on the number of x-rays or non-coverage of experimental drugs or procedures; but, that limitation must apply to persons with or without disabilities. All people with disabilities must have equal access to the health insurance coverage that is provided by the employer to all employees.

The ADA does not, however, affect pre-existing condition clauses included in insurance policies offered by employers. Thus, employers may continue to offer policies that contain pre-existing condition exclusions, even though such exclusions adversely affect people with disabilities, so long as such clauses are not used as a subterfuge to evade the purposes of this legislation.

For additional explanations of the treatment of insurance under this legislation, see the discussion in the report on insurance under title V of the legislation.

Section 102(b)(2) of the legislation specifies that "discrimination" includes participating in a contractual or other arrangement or relationship that has the effect of subjecting a qualified applicant or employee with a disability to the discrimination prohibited by this title. Such relationships include a relationship with an employment or referral agency, labor union, an organization providing fringe benefits to an employee of the covered entity, or an organization providing training and apprenticeship programs.

Section 102(b)(3) of the legislation specified that "discrimination" includes utilizing standards, criteria, or methods of administration that have the effect of discrimination on the basis of disability or that perpetuate the discrimination of others who are subject to common administrative control.

Paragraphs (2) and (3) of the legislation are derived from provisions set out in the title I of the ADA, as originally introduced (which has been deleted by the Substitute) and general forms of discrimination set out in regulations implementing section 504 of the Rehabilitation Act of 1973 (see e.g., 45 CFR Part 84). Thus, the Substitute should not be construed as departing in any way from the concepts included in the original "general prohibitions" title of the ADA and these concepts are subsumed within the provision of the subsequent titles of the legislation. Further, this legislation in no way is intended to diminish the continued viability of sheltered workshops and programs implementing the Javits-Wagner O'Day Act.

Subparagraphs (B) and (C) incorporate a disparate impact standard to ensure that the legislative mandate to end discrimination does not ring hollow. This standard is consistent with the interpretation of section 504 by the U.S. Supreme Court in *Alexander* v. *Choate*, 469 U.S. 287 (1985). The Court explained that members of Congress made numerous statements during passage of section 504 regarding eliminating architectural barriers, providing access to transportation, and eliminating discriminatory effects of job qualification procedures. The Court then noted:

> These statements would ring hollow if the resulting legislation could not rectify the harms resulting from action that discriminated by effect as well as by design.

The Court also noted, however, that section 504 was not intended to require that a "Handicapped Impact Statement" be prepared by a covered entity before any action was taken that might conceivably affect people with disabilities. Thus, the Court rejected "the boundless notion that all disparate-impact showings constitute prima facie cases under section 504."

Section 101(b)(4) of the legislation specifies that "discrimination" includes excluding or otherwise denying equal jobs or benefits to a qualified individual because of the known disability of an individual with whom the qualified individual is known to have a relationship or association.

Thus, assume for example that an applicant applies for a job and discloses to the employer that his or her spouse has a disability. The employer believes the applicant is the most qualified person for the job. The employer, however, assuming without foundation that the applicant will have to miss work or frequently leave work early or both, in order to care for his or her spouse, declines to hire the individual for such reasons. Such a refusal is prohibited by this subparagraph.

In contrast, assume that the employer hires the applicant. If he or she violates a neutral employer policy concerning the attendance or tardiness, he or she may be dismissed even if the reason for the absence or tardiness is to care for the spouse. The employer need not provide any accommodation to the nondisabled employee.

Section 102(b)(5) of the legislation specifies that discrimination includes the failure by a covered entity to make reasonable accommodations to the known physicial or mental limitations of a qualified individual with a disability who is an applicant or employee, unless such entity can demonstrate that the accommodation would impose an undue hardship on the operation of its business.

The duty to make reasonable accommodations applies to all employment decisions, not simply to hiring and promotion decisions. This duty has been included as a form of non-discrimination on the basis of disability for almost fifteen years under section 501 and section 504 of the Rehabilitation Act of 1973 and under the nondiscrimination section of the regulations implementing section 503 of that Act.

The term "reasonable accommodation" is defined in section 101(8) of the legislation. The definition includes illustrations of accommodations that may be required in appropriate circumstances. The list is not meant to be exhaustive; rather, it is intended to provide general guidance about the nature of the obligation. Furthermore, the list is not meant to suggest that employers must follow all of the actions listed in each particular case. Rather, the decision as to what reasonable accommodation is appropriate is one which must be determined based on the particular facts of the individual case. This fact-specific case-by-case approach to providing reasonable accommodations is generally consistent with interpretations of this phrase under sections 501, 503, and 504 of the Rehabilitation Act of 1973.

The first illustration of a reasonable accommodation included in the legislation is making existing facilities used by employees in general, readily accessible to and usable by individuals with disabilities.

The legislation also specifies, as examples of reasonable accommodation, job restructuring, part-time or modified work schedules and reassignment to a vacant position.

Job restructuring means modifying a job so that a person with a disability can perform the essential functions of the position. Barriers to performance may be eliminated by eliminating nonessential elements; redelegating assignments; exchanging assignments with another employee; and redesigning procedures for task accomplishment.

Part-time or modified work schedules can be a no-cost way of accommodation. Some people with disabilities are denied employment opportunities because they cannot work a standard schedule. For example, persons who need medical treatment may benefit from flexible or adjusted work schedules. A person with epilepsy may require constant shifts rather than rotation from day to night shifts. Other persons who may require modified work schedules are persons with mobility impairments who depend on a public transportation system that is not currently fully accessible. Allowing constant shifts or modified work schedules are examples of means to accommodate the individual with a disability to allow him or her to do the same job as a nondisabled person. This legislation does not entitle the individual with a disability to more paid leave time than non-disabled employees.

Reasonable accommodation may also include reassignment to a vacant position. If an employee, because of disability, can no longer perform the essential functions of the job that she or he has held, a transfer to another vacant job for which the person is qualified may prevent the employee from being out of work and the employer from losing a valuable worker.

Reassignment as a reasonable accommodation is not available to applicants for employment. The Committee believes that efforts should be made to accommodate an employee in the position that he or she was hired to fill before reassignment should be considered. The Committee also wishes to make clear that reassignment need only be to a vacant position—"bumping" another employee out of a position to create a vacancy is not required.

The section 504 regulations provide that "a recipient's obligation to comply with this subpart [employment] is not affected by any inconsistent term of any collective bargaining agreement to which it is a party." 45 CFR 84.11(c). This policy also applies to the ADA. An employer cannot use a collective bargaining agreement to accomplish what it otherwise would be prohibited from doing under this legislation. For example, a collective bargaining agreement that contained physical criteria which caused a disparate impact on individuals with disabilities and were not job-related and consistent with business necessity could be challenged under this legislation.

The collective bargaining agreement could be relevant, however, in determining whether a given accommodation is reasonable. For example, if a collective bargaining agreement reserves certain jobs for employees with a given amount of seniority, it may be considered as a factor in determining whether it is a reasonable accommodation to assign an employee with a disability without seniority to that job.

In other situations, the relevant question would be whether the collective bargaining agreement articulates legitimate business criteria. For example, if the collective bargaining agreement includes job duties, it may be taken into account as a factor in determining whether a given task is an essential function of the job.

Conflicts between provisions of a collective bargaining agreement and an employer's duty to provide reasonable accommodations may be avoided by ensuring that agreements negotiated after the effective date of this title contain a provision permitting the employer to take all actions necessary to comply with this legislation.

Additional forms of reasonable accommodation included in the legislation are acquisition or modification of equipment or devices. The Job Accommodation Network operated by the President's Committee on Employment of People with Disabilities reports that it is possible to accommodate many employees with relatively simple and inexpensive assistive technology.

For blind and visually-impaired persons, this may include adaptive hardware and software for computers, electronic visual aids, braille devices, talking calculators, magnifiers, audio recordings and brailled material.

For persons with hearing impairments, this may include telephone handset amplifiers, telephones compatible with hearing aids, and telecommunication devices for deaf persons. For persons with limited physical dexterity, this may include goose neck telephone headsets, mechanical page turners, and raised or lowered furniture.

The Committee wishes to make it clear that non job-related personal use items such as hearing aids and eyeglasses are not included in this provision.

The legislation also lists appropriate adjustment or modifications of examinations, training materials or policies. For example, many employers have a policy that in order to qualify for a job an employee must have a driver's license—even though the jobs do not involve driving. The employer may believe that someone who drives will be on time for work or may be able to do an occasional errand. This requirement, however, would be marginal and should not be used to exclude persons with disabilities who can do the essential functions of the job that admittedly do not include driving.

The Committee wishes to emphasize again that this legislation does not require an employer to make any modification, adjustment, or change in a job description or policy that an employer can demonstrate would fundamentally alter the essential functions of the job in question.

The legislation also explicitly includes provision of qualified readers of interpreters as examples of reasonable accommodations. As with readers and interpreters, the provision of an attendant to assist a person with a disability during parts of the workday may be a reasonable accommodation depending on the circumstances of the individual case. Attendants may, for example, be required for traveling and other job-related functions. This issue must be dealt with on a case-by-case basis to determine whether an undue hardship is created by providing attendants.

The Committee wishes to clarify the employer's obligation to notify the applicant and the employee of its obligation to provide a reasonable accommodation, who is entitled to an accommodation, when the duty to provide a reasonable accommodation is triggered, and the process of determining the appropriate accommodation.

First, pursuant to section 104 of the legislation, the employer must notify applicants and employees of its obligation under this legislation to make reasonable accommodations.

Second, section 102(b)(5) of the legislation requires that reasonable accommodation be made for "a qualified individual who is an applicant or employee * * *" The term "qualified" as used in this section does not refer to the definition of "qualified individual with a disability" set forth in section 101(7) because such an interpretation would be circular and meaningless. Rather, as in section 504 regulations, the term "qualified" in section 102(b)(5) means "otherwise qualified" (See 45 CFR 84.12(a)), i.e., a person with a disability who meets all of an employer's job-related selection criteria except such criteria he or she cannot meet because of a disability.

For example, if a law firm requires that all incoming lawyers have graduated from an accredited law school and have passed the bar examination, the law firm need not provide an accommodation to an individual with a disability who has not met these selection criteria. That individual is not yet eligible for a reasonable accommodation because he or she is not otherwise qualified for the position.

On the other hand, if the individual graduated from an accredited law school and passed a bar examination (assuming that these are the only selection criteria) the person is "otherwise qualified" and the law firm would be required to provide a reasonable accommodation to the employee's visual impairment, such as a reader, that would enable the employee to perform the essential functions of the job as an attorney unless the necessary accommodation would impose an undue hardship.

If, to continue the example, a part-time reader can be provided as a reasonable accommodation that permits the individual to perform the essential functions of the attorney position without imposing an undue hardship, the person is a "qualified individual with a disability" as defined in section 101(7) of the legislation and it would be unlawful not to hire the individual because of his or her visual impairment.

Third, the legislation clearly states that employers are obligated to make reasonable accommodations only to the "known" physical or mental limitations of a qualified individual with a disability. Thus, the duty to accommodate is generally triggered by a request from an employee or applicant for employment. Of course, if a person with a known disability is having difficulty performing his or her job, it would be permissible for the employer to discuss the possibility of a reasonable accommodation with an employee.

In the absence of a request, it would be inappropriate to provide an accommodation, especially where it could impact adversely on the individual. For example, it would be unlawful to transfer unilaterally a person with HIV infection from a job as a teacher to a job where such person has no contact with people. See, e.g., *Chalk* v. *United States District Court,* 840 F.2nd 701 (9th Cir. 1988).

The Committee believes that the reasonable accommodation requirement is best understood as a process in which barriers to a particular individual's equal employment opportunity are removed. The accommodation process focuses on the needs of a particular individual in relation to problems in performance of a particular job because of a physical or mental impairment. A problem-solving approach should be used to identify the particular tasks or aspects of the work environment that limit performance and to identify possible accommodations that will result in a meaningful equal opportunity for the individual with a disability.

The Committee suggests that, after a request for an accommodation has been made, employers first will consult with and involve the individual with a disability in deciding on the appropriate accommodation. The Committee recognizes that people with disabilities may have a lifetime of experience identifying ways to accomplish tasks differently in many different circumstances. Frequently, therefore, the person with a disability will know exactly what accommodation he or she will need to perform successfully in a particular job. And, just as frequently, the employee or applicant's suggested accommodation is simpler and less expensive than the accommodation the employer might have devised, resulting in the employer and the employee mutually benefiting from the consultation.

The Committee also recognizes that there are times when the appropriate accommodation is not obvious to the employer or applicant because such individual is not familiar in detail with the manner in which the job in question is performed and the employer is not familiar enough with the individual's disability to identify the appropriate accommodation. In such circumstances, the Committee believes the employer should consider four informal steps to identify and provide an appropriate accommodation.

The first informal step is to identify barriers to equal opportunity. This includes identifying and distinguishing between essential and nonessential job tasks and aspects of the work environment of the relevant position(s). With the cooperation of the person with a disability, the employer must also identify the abilities and limitations of the individual with a disability for whom the accommodation is being provided. The employer then should identify job tasks or work environment that limit the individual's effectiveness or prevent performance.

Having identified the barriers to job performance caused by the disability, the second informal step is to identify possible accommodations. As noted above, the search for possible accommodations must begin with consulting the individual with a disability. Other resources to consult include the appropriate State Vocational Rehabilitation Services agency, the Job Accommodation Network operated by the President's Committee on Employment of People With Disabilities, or other employers.

Having identified one or more possible accommodations, the third informal step is to assess the reasonableness of each in terms of effectiveness and equal opportunity. A reasonable accommodation should be effective for the employee. Factors to be considered include the reliability of the accommodation and whether it can be provided in a timely manner.

The Committee believes strongly that a reasonable accommodation should provide a meaningful equal employment opportunity. Meaningful equal employment opportunity means an opportunity to attain the same level of performance as is available to non-disabled employees having similar skills and abilities.

The final informal step is to implement the accommodation that is most appropriate for the employee and the employer and that does not impose an undue hardship on the employer's operation or to permit the employee to provide his or her own accommodation if it does impose an undue hardship. In situations where there are two effective accommodations, the employer may choose the accommodation that is less expensive or easier for the employer to implement as long as the selected accommodation provides meaningful equal employment opportunity.

The expressed choice of the applicant or employee shall be given primary consideration unless another effective accommodation exists that would provide a meaningful equal employment opportunity or that the accommodation requested would pose an undue hardship.

The Committee wishes to note that many individuals with disabilities do not require any reasonable accommodation whatsoever. The only change that needs to be made for such individuals is a change in attitude regarding employment of people with disabilities.

The term "undue hardship" is defined in section 101(9) to mean an action requiring significant difficulty or expense i.e., an action that is unduly costly, extensive, substantial, disruptive, or that will fundamentally alter the nature of the program. In determining whether a particular accommodation would impose an undue hardship on the operation of the covered entity's business i.e., require significant difficulty or expense, factors to be considered include: (1) the overall size of the business of the covered entity with respect to number of employees, number and type of facilities and size of the budget; (2) the type of operation maintained by the covered entity, including the composition and structure of the entity's workforce; and (3) the nature and cost of the accommodation needed.

This provision is derived from and should be applied consistently with interpretations by Federal agencies applying the term set forth in regulations implementing sections 501 and 504 of the Rehabilitation Act of 1973.

The weight given to each factor in making the determination as to whether a reasonable accommodation nonetheless constitutes an "undue hardship" will vary depending on the facts of a particular situation and turns on both the nature and cost of the accommodation in relation to the employer's resources and operations. In explaining the "undue hardship" provision, the Department of Health, Education, and Welfare explained in the appendix accompanying the section 504 regulations (42 Fed. Reg. 22676 et. seq, May 4, 1977):

> Thus, a small day-care center might not be required to expend more than a nominal sum, such as that necessary to equip a telephone for use by a secretary with impaired hearing, but a large school district might be required to make available a teacher's aide to a blind applicant for a teaching job. Further, it might be considered reasonable to require a State welfare agency to accommodate a deaf employee by providing an interpreter, while it would constitute an undue hardship to impose that requirement on a provider of foster home care services.

The mere fact that an employer is a large entity for the purposes of factor (1), should not be construed to negate the importance of factors (2) and (3) in determining the existence of undue hardship.

The Committee wishes to make it clear that the principles enunciated by the Supreme Court in *TWA* v. *Hardison*, 432 U.S. 63 (1977) are not applicable to this legislation. In *Hardison*, the Supreme Court concluded that under title VII of the Civil Rights Act of 1964 an employer need not accommodate persons with religious beliefs if the accommodation would require more than a de minimus cost for the employer.

Finally, the Committee wishes to make it clear that even if there is a determination that a particular reasonable accommodation will result in undue hardship, the employer must pay for the portion of the accommodation that would not cause an undue hardship if, for example, the State Vocational Rehabilitation Agency, other similar agency, or the employee or applicant pays for the remainder of the cost of the accommodation.

Section 102(b)(6) of the legislation specifies that discrimination includes the denial of employment opportunities by a covered entity to an applicant or employee who is a qualified individual with a disability if the basis for such denial is because of the need of the individual for reasonable accommodation.

Thus, for example, where an applicant with a disability is otherwise equally qualified as an applicant without a disability, an employer cannot reject the applicant with a disability who requires a reasonable accommodation in favor of one who does not if the reason for the rejection is the reasonable accommodation requirement. Even where an employer is not required under this law to pay for a reasonable accommodation, because it would impose an undue hardship on the employer, the employer cannot refuse to hire an applicant where the applicant is willing to make his or her own arrangements for the provision of such an accommodation, if the reason for the rejection is the reasonable accommodation requirement.

Section 102(b)(7) of the legislation specifies that discrimination includes using employment tests or other selection criteria that screen out or tend to screen out an individual with a disability or a class of individuals with disabilities unless the test or other selection criteria, as used by the covered entity, is shown to be job-related for the position in question and is consistent with business necessity.

As in Section 504, the ADA adopts a framework for employment selection procedures which is designed to assure that persons with disabilities are not excluded from job opportunities unless they are actually unable to do the job. The requirement that job criteria actually measure ability required by the job is a critical protection against discrimination based on disability. As was made strikingly clear at the hearings on the ADA, stereotypes and misconceptions about the abilities, or more correctly the inabilities, of persons with disabilities are still pervasive today. Every government and private study on the issue has shown that employers disfavor hiring persons with disabilities because of stereotypes, discomfort, misconceptions, and unfounded fears about increased costs and decreased productivity.

The three pivotal provisions to assure a fit between job criteria and an applicant's actual ability to do the job are:

(1) The requirement that persons with disabilities not be disqualified because of the inability to perform non-essential or marginal functions of the job;

(2) The requirement that any selection criteria that screen out or tend to screen out be job-related and consistent with business necessity; and

(3) The requirement to provide resonable accommodation to assist persons with disabilties to meet legitimate criteria.

These three legal requirements, which are incorporated in sections 102(b)(5) and (7) of the legislation, work together to provide a high degree of protection to eliminate the current pervasive bias against employing persons with disabilities in the selection process.

The interrelationship of these requirements in the selection procedure is as follows. If a person with a disability applies for a job and meets all selection criteria except one that he or she cannot meet because of a disability, the criteria must concern an essential, non-marginal aspect of the job, and be carefully tailored to measure the person's actual ability to do an essential function of the job. If the criteria meets this test, it is nondiscriminatory on its face and it is otherwise lawful under the legislation. However, the criteria may not be used to exclude an applicant with a disability if the criteria can be satisfied by the applicant with a reasonable accommodation. A reasonable accommodation may entail adopting an alternative, less discriminatory criterion.

For example, in *Stutts* v. *Freeman*, 694 F2d 666 (11th Cir. 1983), Mr. Stutts, who was dyslexic, was denied the job of heavy equipment operator because he could not pass a written test used by the employer for entering the training program, which was a prerequisite for the job. The written test had a disparate impact on persons with dyslexia. The questions, therefore, were whether both the written test for admission to the training program and the reading requirements of the training program itself, were necessary criteria for the heavy equipment operator job. If the answers to both those questions were yes, the question then became whether a reasonable accommodation could enable the person with a disability to meet the employment criteria at issue.

In *Stutts*, the record reflected that Mr. Stutts could perform the job of heavy equipment operator. As stated by the court,

> Indeed, everyone involved in this case seems to concede that Mr. Stutts would have no problems doing the job but rather may experience difficulty with the outside reading requirements of the training program. If selected, this obstacle may be overcome by Mr. Stutts obtaining the assistance of someone to act as a "reader" * * * [T]o eliminate Mr. Stutts without implementing an alternative test (oral) administered by outside professionals of TVA's staff or by failing to adjust the entry requirements to accommodate his dyslexia, TVA has failed to comply with the statute.

Hence, the requirement that job selection procedures be "job-related and consistent with business necessity" underscores the need to examine all selection criteria to assure that they not only provide an accurate measure of an applicant's actual ability to perform the job, but that even if they do provide such a measure, a disabled applicant is offered a "reasonable accommodation" to meet the criteria that relate to the essential functions of the job at issue. It is critical that paternalistic concerns for the disabled person's own safety not be used to disqualify an otherwise qualified applicant. As noted, these requirements are incorporated in the legislation in sections 102(b)(1)(5) and (7).

The Committee intends that the burden of proof under each of the aforementioned sections be construed in the same manner in which parallel agency provisions are construed under Section 504 of the Rehabilitation Act as of June 4, 1989. See, e.g., 45 C.F.R. 84.13 (Department of Health and Human Services); 29 C.F.R. 1613.705 (Equal Employment Opportunity Commission); 28 C.F.R. 42.512 (Department of Justice); 29 C.F.R. 32.14 (Department of Labor).

Section 102(b)(8) of the legislation specifies that discrimination includes failing to select and administer tests so as best to ensure that, when the test is administered to an applicant or employee with a disability that impairs sensory, manual, or speaking skills, the tests results accurately reflect the individual's job skills, aptitude, or whatever other factor the test purports to measure, rather than reflecting the individual's impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure).

Section 102(c) of the legislation specifies that the prohibition against discrimination in section 101(a) applies to medical examinations and inquiries. Historically, employment application forms and employment interviews requested information concerning an applicant's physical or mental condition. This information was often used to exclude applicants with disabilities—particularly those with so-called hidden disabilities such as epilepsy, diabetes, emotional illness, heart disease and cancer—before their ability to perform the job was even evaluated.

In order to assure that misconceptions do not bias the employment selection process, the legislation sets forth a process which begins with the prohibition to pre-offer medical examinations or inquiries. The process established by the legislation parallels the regulations issued under section 504 of the Rehabilitation Act of 1973.

The legislation prohibits any identification of a disability by inquiry or examination at the pre-offer stage. Employers may ask questions which relate to the ability to perform job-related functions, but may not ask questions in terms of disability. For example, an employer may ask whether the applicant has a driver's license, if driving is an essential job function, but may not ask whether the applicant has a visual disability. This prohibition against inquiries regarding disability is critical to assure that bias does not enter the selection process.

The only exception to making medical inquiries that are not strictly job-related is narrow. The legislation allows covered entities to require post-offer medical examinations so long as they are given to all entering employees in a particular category, the results of the examinations are kept confidential, and the results are not used to discriminate against individuals with disabilities unless such results makes the individual not qualified for the job. For example, an entity can test all police officers rather than all city employees or all construction workers rather than all construction company employees. This exception to the general rule meets the employer's need to discover possible disabilities that do limit the person's ability to do the job, i.e., those that are job-related.

Once an employee is on the job, the actual performance on the job is, of course, the best measure of ability to do the job. When a need arises to question the continued ability of a person to do the job, the employer may make disability inquiries, including medical exams, which are job-related and consistent with business necessity. The concept of "job-related and consistent with business necessity" has been outlined elsewhere in the report under the discussion of section 102(b)(7) of the legislation.

An inquiry or medical examination that is not job-related serves no legitimate employer purpose, but simply serves to stigmatize the person with a disability. For example, if an employee starts to lose a significant amount of hair, the employer should not be able to require the person to be tested for cancer unless such testing is job-related. Testimony before the Committee indicated there still exists widespread irrational prejudice against persons with cancer. While the employer might argue that it does not intend to penalize the individual, the individual with cancer may object merely to being identified, independent of the consequences. As was abundantly clear before the Committee, being identified as disabled often carries both blatant and subtle stigma. An employer's legitimate needs will be met by allowing the medical inquiries and examinations which are job-related.

Consistent with the section in the legisalation pertaining to preemployment inquiries, it is the Committee's intent that a covered entity may invite applicants for employment to indicate whether and to what extent they have a disability under the following circumstances only: (1) when a covered entity is taking remedial action to correct the effects of past discrimination, (2) when a recipient is taking voluntary action to overcome the effects of conditions that resulted in iimited employment opportunities, or (3) when a recipient is taking affirmative action pursuant to section 503 of the Rehabilitation Act of 1973, provided that:

> (a) The covered entity states clearly on any written questionnaire used for this purpose or makes clear orally (if no written questionnaire is used) that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary or affirmative action efforts, and
>
> (b) The covered entity states clearly that the information is being requested on a voluntary basis, that it will be kept confidential, that refusal to provide it will not subject the applicant or employee to any adverse treatment, and that it will be used only in accordance with this title of the Act.

Defenses

Section 103(a) of the legislation specifies that in general, it may be a defense to a charge of discrimination that an alleged application of qualification standards, tests, or selection criteria that screen out or tend to screen out or otherwise deny a job or benefit to an individual with a disability has been shown to be job-related and consistent with business necessity, and such performance cannot be accomplished by reasonable accommodation.

With respect to contagious diseases or infections, section 103(b) of the legislation specifies that the term "qualification standards" may include a requirement that an individual with a currently contagious disease or infection shall not pose a direct threat to the health or safety of other individuals in the workplace. Under this qualification standard, for a person with a currently contagious disease or infection to constitute a direct threat to the health or safety of others, the person must pose a significant risk of transmitting the infection to others in the workplace which cannot be eliminated by reasonable accommodation. See *School Board of Nassau County* v. *Arline*, 480 U.S. 273, 287, note 16.

With respect to drug addicts and alcoholics, section 103(c)(1) of the legislation specifies that, notwithstanding any other provision of this legislation, a covered entity:

> (1) May prohibit the use of alcohol or illegal drugs at the workplace by all employees;

(2) May require that employees not be under the influence of alcohol or illegal drugs at the workplace;

(3) May require that employees conform their behavior to requirements established pursuant to the Drug-Free Workplace Act of 1988, and that transportation employees meet requirements established by the Department of Transportation with respect to drugs and alcohol; and

(4) May hold a drug user or alcoholic to the same qualification standards for employment or job performance and behavior to which it holds other individuals, even if any unsatisfactory performance or behavior is related to the drug use or alcoholism of such individual.

Further, section 103(c)(2) of the legislation specifies that nothing in this title shall be construed to encourage, prohibit, or authorize conducting drug testing of job applicants or employees or making employment decisions based on such test results.

With respect to the defense that transportation employers may require that transportation employees meet requirements established by the Secretary of Transportation pursuant to and consistent with Federal law, the Committee wishes to make the following clarifications.

First, licensing of motor carrier drivers and railroad engineers, and certification of airplane pilots involves consideration of drunk and drug-related driving convictions, as recorded by individual States and made available to employers through the National Drivers Register at the Department of Transportation. In addition, records of other drug or alcohol related violations of State or Federal law may be considered as indicators of "fitness for duty" for safety-sensitive transportation positions.

Second, this defense applies to violations of Department of Transportation regulations concerning drug and alcohol use outside the workplace e.g., an air crew member who, in violation of Federal Aviation Administration rules, drinks alcohol within 8 hours of going on duty.

Third, this defense applies to actions based on an individual's failure to pass DOT mandated drug and alcohol tests when administered in accordance with Federal and State laws e.g., a truck driver who tests positive for illegal drugs and the failure or refusal to take a drug test mandated by Department of Transportation regulations.

The Committee believes that test results should be accurate and encourages covered entities to follow the Mandatory Guidelines on Federal Workplace Testing as issued by the Department of Health and Human Services. In any event, testing must comply with applicable Federal, State, or local laws or regulations regarding quality control, confidentiality, and rehabilitation; provided that, with respect to transportation employees, if testing is undertaken, it must be done in compliance with applicable Federal laws and regulations.

The reasonable accommodation provision in section 102(b)(5) of this title does not affirmatively require that a covered entity must provide a rehabilitation program or an opportunity for rehabilitation for any job applicant who is a drug addict or alcoholic or for any current employee who is a drug addict or alcoholic against whom employment-related actions are taken for the reasons enumerated in section 103(c) relating to defenses.

Although the provision of a rehabilitation program or an opportunity for rehabilitation of a drug addict or alcoholic is not required by this title, the Committee strongly encourages covered entities to follow the lead of the Federal government and many private employers, consistent with the policy embedded in the Drug Free Workplace Act, to offer such rehabilitation programs or provide an opportunity for rehabilitation.

Finally, the Committee wishes to emphasize that the provisions of section 103(c) of this legislation apply only to addicts that are currently using illegal drugs or alcohol.

With respect to religious entities, section 103(d) of the legislation specifies that title I does not prohibit a religious corporation, association, educational institution, or society from giving preference in employment to individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its activities.

Because title I of this legislation incorporates by reference the definition of the term "employer" and "employee" used in title VII of the Civil Rights Act of 1964 and because of the similarity between the "religious preference" provisions in title VII and the ADA, it is the Committee's intent that title I of the ADA be interpreted in a manner consistent with title VII of the Civil Rights Act of 1964 as it applies to the employment relationship between a religious organization and those who minister on its behalf.

In addition, section 103(d) of the legislation includes a provision not included in title VII of the Civil Rights Act of 1964 which specifies that under title I of the legislation, a religious organization may require, as a qualification standard to employment, that all applicants and employees conform to the religious tenets of such organization. This exemption is modeled after the provision in title IX of the Education Amendments of 1972. Thus, is is the Committee's intent that the terms "religious organizations" and "religious tenets" be interpreted consistent with the Department of Education's regulations thereunder.

The inclusion of a "religious tenets" defense is not intended to affect in any way the scope given to section 702 of title VII of the Civil Right Act of 1964.

Posting notices

Section 104 of the legislation specifies that every employer, employment agency, labor organization, or joint labor-management committee covered under this title must post notices in an accessible format to applicants, employees, and members describing the applicable provisions of this Act, in the manner prescribed by section 711 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–10).

Regulations

Section 105 of the legislation specifies that not later than one year after the date of enactment of this Act, the Equal Employment Opportunity Commission must issue regulations in an accessible format to carry out this title in accordance with subchapter II of chapter 5 of title 5, United States Code.

It is the Committee's intent that these regulations will be drafted so as to be a self-contained document. The regulations should not incorporate by reference other laws or regulations. The Commission's regulations will have the force and effect of law.

This format will increase the likelihood of voluntray compliance on the part of covered entities and should minimize the need to hire a battery of lawyers to ascertain the obligations created by this legislation.

Enforcement

Section 106 of the legislation specifies that the remedies and procedures set forth in sections 706, 707, 709, and 710 of the Civil Rights Act of 1964 shall be available with respect to the Commission or any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of any provisions of this legislation, or regulations promulgated under section 105 concerning employmnet. As has been the case under title VII of the Civil Rights Act of 1964, the Attorney General may continue to have pattern or practice authority with respect to State and local governments.

Section 205 of S. 933, as originally introduced, provided protection to individuals who believe that they are being or who are "about to be subjected to discrimination." This provision has been deleted becasue the Committee determined that the case law under title VII of the Civil Rights Act of 1964 already provides protection against discrimination in those circumstances with which the Committee had had concerns, and thus, a specific provision in the ADA is unnecessary.

The Supreme Court enumerated the "futile gesture" doctrine under title VII: "When a person's desire for a job is not translated into a formal application solely because of his unwillingness to engage in a futile gesture he is as much a victim of discrimination as is he who goes through the motions of submitting an application." *Internatiional Brotherhood of Teamsters* v. *United States,* 431 U.S.C. 324, 365–67.

The term "is being subjected to discrimination" also includes the situation where the employee discovers that the employer is redesigning office space in such a way that it will become inaccessible to a disabled employee. In this situation, the employee should be able to stop the illegal constrution before it begins.

The Committee recognizes that this legislation's requirements are substantially different from the other statutes governing private sector employment that are enforced by the Commission. The fact that most of the Commission's current professional employees are unfamiliar with disability nondiscrimination requirements will necessitate that the Commission provide extensive training for staff.

The Committee expects the Commission will establish and implement employer training programs and otherwise provide technical assistance to employers seeking to comply with the legislation's requirements.

Effective date

Section 107 of the legislation specifies that title I shall become effective 24 months after the date of enactment.

TITLE II—PUBLIC SERVICES

Title II of the legislation has two purposes. The first purpose is to make applicable the prohibition against discrimination on the basis of disability, currently set out in regulations implementing section 504 of the Rehabilitation Act of 1973, to all programs, activities, and services provided or made available by state and local governments or instrumentalities or agencies thereto, regardless of whether or not such entities receive Federal financial assistance. Currently, section 504 prohibits discrimination only by recipients of Federal financial assistance.

The second purpose is to clarify the requirements of section 504 for public transportation entities that receive Federal aid, and to extend coverage to all public entities that provide public transportation, whether or not such entities receive Federal aid.

Extending a Federal prohibition against discrimination on the basis of disability to all State and local governmental entities

Section 202 of the legislation extends the nondiscrimination policy in section 504 of the Rehabilitation Act of 1973 to cover all State and local governmental entities. Specifically, section 202 provides that no qualified individual with a disability shall, by reason of such disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination by a department, agency, special purpose district, or other instrumentality of a State or a local government.

The forms of discrimination prohibited by section 202 are comparable to those set out in the applicable provisions of titles I and III of this legislation. It is the Committee's intent that section 202 and other sections of the legislation be interpreted consistent with *Alexander* v. *Choate*, 469 U.S. 287 (1985).

The Committee recognizes that the phrasing of section 202 in this legislation differs from section 504 by virtue of the fact that the phrase "solely by reason of his or her handicap" has been deleted. The deletion of this phrase is supported by the experience of the executive agencies charged with implementing section 504. The regulations issued by most executive agencies use the exact language set out in section 202 in lieu of the language included in the section 504 statute.

A literal reliance on the phrase "solely by reason of his or her handicap" leads to absurd results. For example, assume that an employee is black and has a disability and that he needs a reasonable accommodation that, if provided, will enable him to perform the job for which he is applying. He is the most qualified applicant. Neverthless, the employer rejects the applicant because he is black and because he has a disability.

In this case, the employer did not refuse to hire the individual solely on the basis of his handicap—the employer refused to hire him because of his disability and because he was black. Although he might have a claim of race discrimination under title VII of the

Civil Rights Act, it could be argued that he would not have a claim under section 504 because the failure to hire was not based solely on his disability and as a result he would not be entitled to a reasonable accommodation.

The Committee, by adopting the language used in regulations issued by the executive agencies, rejects the results described above. Court cases interpreting section 504 have also rejected such reasoning. As the Tenth Circuit explained in *Pushkin* v. *Regents of University of Colorado,* 658 F. 2d 1372, the fact that the covered entity lists a number of factors to rejection in addition to the disability is not dispositive. In this case, the University stated that Dr. Pushkin was rejected because of low interview scores. The court stated that "it is not possible to extricate ratings from the reactions to the handicap itself."

Morever, the interview ratings "as a general practice are not necessarily controlling in the selection process." The question was whether "the reasons articulated for the rejection other than handicap encompass unjustified consideration of the handicap itself" (Id. at 1387). As stated by the court, the "issue is whether rejecting Dr. Pushkin after expressly weighing the implication of his handicap was justified."

If the plaintiff is qualified for the position in question, a rejection which considered the disability as a factor would not be justified. The existence of non-disability related factors in the rejection decisions does not immunize employers. The entire selection procedure must be reviewed to determine if the disability was improperly considered.

As used in this title, the term "qualified individual with a disability" means an individual with a disability who, with or without reasonable modifications to rules, policies and practices, the removal of architectural, communication, and transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a department, agency, spcial purpose district, or other instrumentality of a State or a local government.

The term "instrumentality of a state and local government" includes public transit authorities.

With regard to school bus operations by public entities, it is not the intent of this Committee to require anything different under this legislation than is currently required of school systems and other entities receiving Federal financial assistance under section 504 of the Rehabilitation Act of 1973 (e.g., 34 CFR Part 104).

Agencies of a State, or a political subdivision of a State that provide school bus transportation are required to provide bus service to children with disabilities equivalent to that provided to children without disabilities (whether provided directly or by contract or other arrangement with a private entity).

The school bus transportation provided to children with disabilities must be provided in the most integrated setting possible. This means that when a child with a disability requires transporation, the school bus that serves his/her route should be accessible. This does not mean that all school buses need to be accessible; only that equal nonsegregated opportunities are provided to all children.

School bus operations, as defined in 49 CFRT 605.3(b) and the associated revisions established in Highway Safety Program Standard No. 17, means transportation by Type I and II school bus vehicles of school children, personnel, and equipment to and from school or school-related activities.

Actions applicable to public transportation considered discriminatory

Definition

As used in title II, the term "public transportation" means transportation by bus or rail, or by any other conveyance (other than air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis, including service contracted through a private sector entity.

As used in title II, the term "public entity" includes the National Railroad Passenger Corporation.

The Committee excluded transportation by air because the Congress recently passed the Air Carrier Access Act, which was designed to address the problem of discrimination by Air Carriers and it is the Committee's expectation that regulations will be issued that reflect congressional intent. However, this title applies to the public entities' fixed facilities used in air travel, such as airport terminals, and to related services, such as ground transportation, provided by public entities.

It is not the Committee's intent to make the vehicle accessibility provisions of this title applicable to vehicles donated to a public entity. The Committee understands that it is not usual to donate vehicles to a public entity. However, there could be instances where someone could conceivably donate a bus to a public transit operator in a will. In such a case, the transit operators should not be prevented from accepting the gift.

The Committee does not intend that this limited exemption for donated vehicles be used to circumvent the intent of the ADA. For example, a local transit authority could not arrange to be the recipient of donated inaccessible buses. This would be a violation of the ADA.

As a general rule, all requirements for nondiscrimination apply not only to the design of vehicles and facilities but to their operation as well. Thus, new fixed route buses must have lifts, and new and key stations must have elevators or other means to ensure accessibility as necessary components for a transit authority to be in compliance with the provisions of this title of the legislation. Merely installing the access equipment is never sufficient by itself, however; the lifts and elevators must also operate, be in good working order, and be available when needed for access in order for an entity to be in compliance with the law.

The Committee believes that a strong commitment from a transit authority's management team will ensure nondiscrimination in the provision of transportation to people with disabilities. This includes adequate training of maintenance personnel and bus operators, sensitivity training of all personnel which stresses the importance of providing transportation, and creative marketing strategies.

New buses, rail vehicles, and other fixed route vehicles

Section 203(b)(1) of the legislation specifies that it shall be considered discrimination, for purposes of this Act and for purposes of section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public entity to purchase or lease a new fixed route bus of any size, a new intercity rail vehicle, a new light rail vehicle to be used for public transportation, or any other new fixed route vehicle to be used for public transportation and for which a solicitation by such individual or entity is made later than 30 days after the date of enactment of this Act, if such bus, rail, or other vehicle is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

This requirement is included to ensure that an accessible transportation system is phased-in as new vehicles are purchased. It makes no sense, at this point in time, to perpertuate continued inaccessibility and to exclude persons with disabilities from the opportunity to use a key public service—transportation. Inaccessible vehicles affect more than just individuals with disabilities' ability to travel independently. It affects their ability to gain employment. When such individuals are able to depend on an accessible transportation system, one major barrier is removed which would prevent them from joining the work force. This ability ultimately affects our society as a whole. Accessible transportation also allows individuals with disabilities to enjoy cultural, recreational, commercial and other benefits that society has to offer.

Transportation affects virtually every aspect of American life. Mainline services are geared to moving people to and from work, school, stores, and other activities on schedules that reflect most people's daily routines. It is false and discriminatory to suggest that people with disabilities—who have the same needs as other community residents—are not as interested in or worthy of using transit services as people without disabilities.

The term "fixed route" means a bus system that operates on a continuing and regular basis on a fixed pattern and schedule.

The term "new" means buses which are offered for first sale or lease after manufacture without any prior use. Buses for which a solicitation is made within 30 days after enactment of this legislation are not subject to the accessibility requirement and thus are not required to have wheelchair lift equipment. However, buses that are solicited for after 30 days from enactment of this legislation are covered by the accessibility provision and would have to comply with the requirement that all newly purchased vehicles be accessible to people with disabilities including wheelchair users.

The phrase "for which a solicitation by such individual or entity is made" means when a public entity asks for bids from manufacturers to build buses or begins to offer to purchase or bid for the purchase of new buses 30 days after enactment of this legislation.

The term "readily accessible to and usable by" is a term of art that means the ability of individuals with disabilities, including individuals using wheelchairs, to enter into and exit and safely and effectively use a vehicle used for public transportation.

Lifts or ramps and other equipment, and fold-up seats or other wheelchair spaces with appropriate securement devices are among the features necessary to make transit vehicles readily accessible to and usable by individuals with disabilities. The requirement that a vehicle is to be readily accessible obviously entails that each vehicle is to have some spaces for individuals using wheelchairs or other mobility aids; how many spaces per vehicles are to be made available for wheelchairs is, however, a determination that depends upon various factors, including the number of vehicles in the fleet, the seat vacancy rates, and usage by people with disabilities.

The Committee intends, consistent with these factors, that the determination of how many spaces must be available for wheelchair use should be flexible and generally left up to the provider, provided that at least some seats on each vehicle are accessible. Technical specifications and guidance regarding lifts and ramps, wheelchair spaces, and securement devices are to be provided in the minimum guidelines and regulations to be promulgated under this legislation. These minimum guidelines should be consistent with the Committee's desire for flexibility and decisionmaking by the provider.

The Committee wishes to emphasize that the legislation uses the phrase "including individuals who use wheelchairs" because of misinterpretations of the nature and extent of obligations under section 504. The obligation to provide public transportation in a nondiscriminatory fashion applies to all persons with disabilities, including people with sensory impairments and those with cognitive impairments such as mental retardation. It is the Committee's intent that the obligation to provide lift service applies, not only to people who use wheelchairs, but also to other individuals who have difficulty in walking. For example, people who use crutches, walkers or three-wheeled mobility aids should be allowed to use a lift.

A public transit authority should develop training sessions to familiarize bus operators with the services that individuals with disabilities may need. For example, assuring that people with vision impairmants get off at the correct stop, training bus drivers how to use the lift in a bus, and developing a program which would assist people with mental retardation in how to use the transportation system. Transit authorities should also be required to have written materials available in a format accessible to people with vision impairments and to make TDD numbers available to persons with hearing and communication impairments.

Section 203(e) of the legislation provides temporary relief for public entities from the obligations under section 203(b) where lifts are unavailable. Specifically, with respect to the purchase of new buses, a public entity may apply for, and the Secretary of Transportation may temporarily relieve such entity from the obligation to purchase new buses of any size that are readily accessible to and usable by individuals with disabilities, if such public entity can demonstrate the existence of four factors:

(1) That the initial solicitation for new buses made by the public entity specified that all new buses were to be lift-equipped and were to be otherwise accessible to and usable by individuals with disabilities;

(2) The unavailability from any qualified manufacturer of hydraulic, electro-mechanical, or other lifts for such new buses;

(3) That the public entity seeking temporary relief has made good faith efforts to locate a qualified manufacturer to supply the lifts to the manufacturer of such buses in sufficient time to comply with such solicitation; and

(4) That any further delay in purchasing new buses necessary to obtain such lifts would significantly impair transportation services in the community served by the public entity.

Section 203(f) of the legislation makes it clear that any relief granted under subsection (e) must be limited in duration by a specified date. In addition, if, at any time, the Secretary of Transportation has reasonable cause to believe that such relief was fraudulently applied for, the Secretary of Transportation shall cancel such relief, if such relief is still in effect, and take other steps that he or she considers appropriate.

Further, the appropriate committees of the Congress must be notified of any such relief granted. The appropriate committees in the Senate include the Committee on Commerce, Science, and Transportation and the Committee on Labor and Human Resources.

Used vehicles

Section 203(b)(2) of the legislation specifies that if a public entity purchases or leases a used vehicle after the date of enactment of this Act, such public entity shall make demonstrated good faith efforts to purchase or lease a used vehicle that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The term "used vehicle" means a vehicle that was purchased before a date which is at least 30 days prior to the enactment of this legislation. Frequently small and rural communities do not purchase new buses. Many of these communities buy used buses that are less expensive than new buses in an effort to provide transportation to individuals in these areas without expending large sums of money. Purchasers of used vehicles are required by this legislation to make "demonstrated good faith efforts" to locate accessible used vehicles.

The phrase "demonstrated good faith efforts" is intended to require a nationwide search and not a search limited to a particular region. For instance, it would not be enough for a transit operator to contact only the manufacturer where the transit authority usually does business to see if there are accessible used buses. It might involve the transit authority advertising in a trade magazine, i.e., Passenger Transport, or contacting the transit trade association, American Public Transit Association (APTA), to determine whether accessible used vehicles are available.

It is the Committee's expectation that as the number of buses with lifts increases, the burden on the transit authority to demonstrate its inability to purchase accessible vehicles despite good faith efforts will become more and more difficult to satisfy.

Remanufactured vehicles

Section 203(b)(3) of the legislation specifies that if a public entity remanufacturers a vehicle, or purchases or leases a remanufactured vehicle, so as to extend its useful lift for 5 years or more, the vehicle shall, to the maximum extent feasible, be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The phrase "remanufactures a vehicle or purchases or leases a remanufactured vehicle so as to extend its usable life for 5 years or more" means that the vehicle is stripped to its frame and is then rebuilt. It does not simply mean an engine overhaul. The additional cost to make a remanufactured vehicle accessible would be comparable to the cost of making a new vehicle accessible. Therefore, remanufactured vehicles should be treated the same as new vehicles.

The phrase "to the maximum extent feasible" is included in order to provide clarification that the Committee does not intend to require accessibility for remanufactured vehicles if it would destroy the structural integrity of the vehicle.

Paratransit as a supplement to fixed route public transportation system

Section 203(c) of the legislation specifies that if a public entity operates a fixed route public transportation system to provide public transportation, it shall be considered discrimination, for purposes of this Act and for purpose of section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public transit entity to fail to ensure the provision of paratransit or other special transporation services sufficient to provide a comparable level of services as is provided to individuals using fixed route public transporation to individuals with disabilities, including individuals who use wheelchairs, who cannot otherwise use fixed route public transporation and to other individuals associated with such individuals with disabilities in accordance with service criteria established under rqulations promulgated by the Secretary of transportation unless the public transit entity can demonstrate that the provision of paratransit or other special transportation services would impose an undue financial burden on the public transit entity.

If the provision of comparable paratransit or other special transporation services would impose an undue financial burden on the public transit entity, such entity must provide paratransit and other special transportation services to the extent that providing such services would not impose an undue financial burden on such entity.

Regulations promulgated by the Secretary of Transportation to determine what constitutes an undue financial burden may include a flexible numerical formula that incorporates appropriate local characteristics such as population. Although the legislation mentions only population as an example of local characteristics that might be reflected is such a formula, other characteristics appropriate to consider include population density, level of paratransit services currently being provided in the area, residential patterns, and the interim degree of accessibility of fixed route transit service.

Notwithstanding the above provisions, the Secretary may require, at the discretion of the Secretary, public transit authority to provide paratransit services beyond the amount determined by such formula.

It is the Committee's intent that any criteria developed by the Secretary regarding the "undue financial burden" proviso, including the use of a formula, be consistent with that portion of the *ADAPT* v. *Skinner* decision handed down on July 24, 1989 by the Third Circuit Court of Appeals (Nos. 88-1139, 88-1177, and 88-1178) concerning the three percent "safe harbor" provision (pages 38-46 of the slip opinion).

The Committee recognizes that there will always be a need for paratransit services. Paratransit services must be available to individuals who are unable to use mainline public transportation. By "unable to use" the committee means to include those individuals who cannot gain access to the public transportation systems. The reasons for this inability to access the transit system could be because of the nature and severity of the individual's physical or mental disability or because of other factors determined by the local community, such as the lack of curb cuts which would prevent individuals with certain disabilities from traveling to a bus stop.

In developing the criteria that will be used to determine which individuals with disabilities are unable to use the transportation services, it is important to significantly involve organizations representing people with disabilities and individual consumers with disabilities. The Committee wishes to make it clear that criteria developed to determine eligibility for paratransit e.g., inability to use mainline transportation services shall not be used to prevent, limit, or otherwise exclude such individuals from using mainline services if they so choose.

The term "paratransit or other special transportation services" means a transporation system that is available to those individuals who are unable to use the transportation system available to other people. This has been characteristically provided by transit authorities or contracted out to private companies and uses small buses or vans. Usually, the services is demand responsive or door-to-door service.

The Committee does not intend to require a public transit authority to actually provide paratransit or other special transportation services if such services are provided by other entities serving the same geographical location as is served by the public transit authority providing the fixed route system. However, the Committee wishes to emphasize that the paratransit or other special transportation services provided must be consistent with the requirements set out in this legislation and a public transit entity must be ultimately accountable for ensuring that the services are being provided in compliance with this legislation.

The following minimum service criteria should apply to special paratransit service systems that are used to supplement a fixed route accessible system:

a. Eligibility: All persons with disabilities unable to use the fixed route vehicles and their companions shall be eligible to use the special service.

b. Response time: The service should be provided to a person with a disability with a comparable response time that a person without a disability would receive.

c. Restrictions or priorities based on trip purpose: There shall not be priorities or restrictions based on trip purpose on users of the special service.

d. Fares: The fare for a trip charged to a user of the special service system shall be comparable to the fare for a trip of similar length, at a similar time of day, charged to a user of the fixed route service.

e. Hours and days of service: The special service shall be available throughout the same hours of days as the fixed route service.

f. Service area: The special service shall be available throughout the service area in which the fixed route service is provided. Service to points outside this service area served by extended express or commuter bus service shall be available to persons with disabilities in an accessible manner.

The term "comparable level of services" means that when all aspects of a transportation system are analyzed, equal opportunities to use the transportation system exist for all persons—individuals with and without disabilities. The essential test to meet is whether the system is providing a level of service that meets the needs of persons with and without disabilities to a comparable extent.

For instance, if a person with a disability calls for a ride on a demand response system for the general public—and an accessible bus arrives within fifteen minutes—that is equal treatment if a person without a disability has to wait for the bus for an equivalent amount of time. However, if the bus arrives and it does not have a lift and one is needed, or if a disabled person has to wait considerably more time than a non-disabled person, then equal opportunity to use the demand responsive public transportation system is not being provided.

The term "other individuals associated with such individuals with disabilities" means the companions of those individuals who cannot otherwise use fixed route bus service whether they are part of the person's family, or friends of the individual with a disability. For instance, if a father wanted to take his children to the zoo and paratransit services are the only means of transportation that father is qualified for, he should be allowed to take his children on the paratransit bus. He should not be relegated to the paratransit by himself while his children are required to take fixed route public transportation.

If a man and woman were dating and the woman could not otherwise use public fixed route transportation then they should be able to use the paratransit services to and from that date. Likewise, if an individual had out of town guests and one of the out of town guests cannot use the fixed route bus system and is qualified to use the paratransit services of the state where they are visiting, then everyone in the group should be allowed to use the paratransit service to go sightseeing.

The Committee intends that during the interim period in which substantial numbers of fixed route buses are not accessible, the public transit authorities form an advisory committee to ensure the participation of individuals with disabilities in the planning, development, and implementation stages of the transportation system. One way to do this is by instituting an advisory group. Careful consideration should be given to the composition of the advisory group and every effort should be made to have adequate representation from all elements of the disability community.

This advisory group is an essential component to the development of standards which must then appear in the authorities' transit plan. Cooperation between the disability community and the transit operators is imperative during the period of time in which the system will be in transition, from an inaccessible system to an accessible one.

The transition options chosen will depend, to a certain extent, on the system involved. Some systems will require the broadest use of the existing accessible buses. For instance, it may be advantageous for a small system to require that all the accessible buses be in service during both off-peak and peak hours and at regular intervals so as to provide some service to the most people. A larger system might choose to make key lines accessible or ensure that the feeder lines are accessible. In this way, the system will be providing meaningful transportation at least to a portion of the individuals that need the access of the system.

The mainline interim service agreed upon by the advisory Committee must be available throughout the regular service area and during the normal service hours. This service, to the extent feasible, must meet a number of criteria as to convenience and comparability to regular mainline service (e.g., no restriction as to trip purpose, wait, fares and travel time).

Regardless of the mainline accessible transportation that will be available, it is important that a paratransit service be in place to ensure adequate access in those areas where accessible mainline service cannot yet be achieved. It is equally as important to realize that paratransit will always be necessary for those individuals who for legitimate reasons are unable to use mainline accessible service.

The local transit authority must be sincere in its efforts to coordinate special services in the locality to meet the service standards. The paratransit services should meet the service criteria both during the transition phase and thereafter.

Community operating demand responsive systems for the general public

Section 203(d) of the legislation specifies that if a public entity operates a demand responsive system that is used to provide public transportation for the general public, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such public entity to purchase or lease a new vehicle, for which a solicitation is made later than 30 days after the date of enactment of this Act, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the general public.

The intent of the Committee is to provide flexibility for rural and small urban communities that only have a demand responsive system for everyone. These systems are available to people without disabilities as well as to those with disabilities. The Committee intends that the time delay between a telephone call to access the demand responsive system and the pick up of the individual is not to be greater because the individual needs a lift or ramp or other accommodation to access the vehicle.

The term "demand responsive service" means service where the individual must request transportation service before it is rendered. This fact distinguishes this type of service from fixed route service.

With fixed route service, no action is needed by an individual to initiate public transportation. If an individual is at a bus stop at the time the bus is scheduled to appear then that individual will be able to access the transportation system. With demand-responsive service, an additional step must be taken by the individual before he or she can ride the bus, i.e., the individual must make a telephone call. In this type of service, the transit provider will know ahead of time whether or not an accessible vehicle is necessary. Therefore, all demand responsive vehicles need not be accessible as long as the level of service provided to individuals with disabilities is equal to that provided to those without disabilities.

The phrase "when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the general public" means that when all aspects of a transportation system are analyzed, equal opportunities for each individual with a disability to use the transportation system must exist.

The Committee wishes to make it clear that the authority of the Secretary to grant temporary relief where lifts are unavailable applies to communities operating demand responsive as well as fixed route bus systems.

New facilities

Section 203(g) of the legislation specifies that for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to build a new facility that will be used to provide public transportation services, including bus service, intercity rail service, rapid rail service, commuter rail service, light rail service, and other service used for public transportation that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The meaning of the key phrases used in this subsection are described subsequently in the section of the report pertaining to title III of the Act.

Alterations of existing facilities

Section 203(h) of the legislation specifies that, with respect to a facility or any part thereof that is used for public transportation and that is altered by, on behalf of, or for the use of a public entity in a manner that affects or could affect the usability of the facility or part thereof, it shall be considered discrimination, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such individual or entity to fail to make the alterations in such a manner that, to the maximum extent feasible, the altered portion of the facility is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

If such public entity is undertaking major structural alterations that affect or could affect tthe usability of the facility (as defined under criteria established by the Secretary of Transportation) such public entity shall also make any additional alterations that are necessary to ensure that, to the maximum extent feasible, a path of travel from a primary entrance, and a reasonable number of bathrooms, telephones, and drinking fountains serve such path of travel are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The key phrases used in this subsection are described subsequently under the section of the report concerning title III of the legislation.

Existing facilities

Section 203(i)(1) of the legislation specifies that with respect to existing facilities used for public transportation, it shall be considered discrimination, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public entity to fail to operate such public transportation program or activity conducted in such facilities so that, when viewed in the entirety, it is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

This is the same standard that currently applies under section 504 regulations issued by the Department of Transportation.

The standards set out above do not apply to stations in intercity rail systems, and rapid rail, commuter rail and light rail systems. Such stations are governed by section 203(i)(3) of the legislation, which specifies that for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to make stations in intercity rail systems and key stations in rapid rail, commuter rail and light rail systems readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

Intercity rail systems, including the National Railroad Passenger Corporation, must be made accessible as soon as practicable, but in no event later than 20 years after the date of enactment. Key stations in rapid rail, commuter rail, and light rail systems must be made accessible as soon as practicable but in no event later than 3 years after the date of enactment of this Act, except that the time limit may be extended by the Secretary of Transportation up to 20 years for extraordinarily expensive structural changes to, or replacement of, existing facilities necessary to achieve accessibility.

The Committee intends that the term "key stations" shall include stations that have high ridership, and stations that serve as transfer and feeder stations. The public transit authority shall develop a plan for complying with the requirement that reflects consultation with individuals with disabilities affected by such plan and that establishes milestones for achievement of this requirement.

The phrase "key stations" includes high ridership stations since individuals with disabilities have the same travel objectives as individuals without disabilities. Stations may have high ridership because they are located in business and employment districts, cultural, educational, recreational and entertainment centers, or are transfer points from other modes of transportation.

In addition to high ridership stations, "feeder stations" should be designated as "key" because they generally are located in suburban areas. Making these stations accessible will provide individuals with disabilities who live in these areas the ability to commute.

Exactly what stations will be determined "key" is a decision best left to the local community. The Committee does not intend to mandate a process to identify "key stations" except that—in developing the criteria that will be used to determine which stations will be "key"—it is important to significantly involve organizations representing people with disabilities and individual consumers with disabilities.

It is the Committee's understanding the settlement agreements recently reached in New York City specifying approximately 38 particular stations out of over 465 stations in the system and in Philadelphia where 11 out of approximately 53 stations on the high speed line and 31 out of approximately 172 commuter rail stations are to be considered "key stations" are in full compliance with the criteria and procedures set out above.

The phrase "as soon as practicable" is included in order to create an obligation to attain accessibility before the specified period of time has elapsed. It is the intent of this Committee that this requirement would prohibit a transit authoriety from delaying the installation of an elevator, if capital funds were available and the installation could otherwise be accomplished, could be just because the absolute time limit is not up.

The phrase "extraordinarily expensive structural change to or replacement of existing. facilities" is intended to create a narrow exemption for the facilities where the only means of creating accessibility would be to raise the entire platform of a station or to install an elevator. The costs to accomplish these structural changes can be extremely costly.

In issuing regulations for the enforcement of this section, the Secretary of Transportation may prescribe a procedure for the resolution of disputes when a local rail transit operator and representatives of the disability community are unable to reach mutual agreement.

Intercity, rapid, light, and commuter rail systems

Section 203(i)(2) of the legislation specifies that with respect to vehicles operated by intercity, light, rapid and commuter rail systems, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to have at least one car per train that is accessible to individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in any event in no less than 5 years.

It is the Committee's expectation that the regulations issued by the Secretary of Transportation will ensure that the car that is accessible stops at an appropriate place in the station that is level with the car and that signage is included to indicate where such car will stop.

Regulations

Section 204 of the legislation specifies that not later than one year after the date of enactment of this Act, the Attorney General shall promulgate regulations in an accessible format that implement this title (other than section 303), and such regulations shall be consistent with this title and with the coordination regulations under part 41 of title 28 Code of Federal Regulations (as promulgated by the Department of Health, Education, and Welfare on January 13, 1978), applicable to recipients of Federal financial assistance under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) except, with respect to "program accessibility, existing facilities" and "communications" such regulations shall be consistent with applicable portions of regulations and analysis relating to Federally conducted activities under section 504 of the Rehabilitation Act of 1973 (part 39 of title 28 of the Code of Federal Regulations).

Section 204(b) of the legislation specifies that not later than one year after the date of enactment of this Act, the Secretary of Transportation shall promulgate regulations in an accessible format that include standards applicable to facilities and vehicles covered under section 203.

Such standards shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504.

Enforcement

Section 205 of the legislation specifies that the remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be available with respect to any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of any provisions of this Act, or regulations promulgated under section 204, concerning public services.

It is the Committee's intent that enforcement of section 202 of the legislation should closely parallel the Federal government's experience with section 504 of the Rehabilitation Act of 1973. The Attorney General should use section 504 enforcement procedures and the Department's coordination role under Executive Order 12250 as models for regulation in this area.

The Committee envisions that the Department of Justice will identify appropriate Federal agencies to oversee compliance activities for State and local government. As with section 504, these Federal agencies, including the Department of Justice, will receive, investigate, and where possible, resolve complaints of discrimination. If a Federal agency is unable to resolve a complaint by voluntary means, the Federal government would use the enforcement sanctions of section 505 of the Rehabilitation Act of 1973. Because the fund termination procedures of section 505 are inapplicable to State and local government entities that do not receive Federal funds, the major enforcement sanction for the Federal government will be referral of cases by these Federal agencies to the Department of Justice.

The Department of Justice may then proceed to file suits in Federal district court. As with section 504, there is also a private right of action for persons with disabilities. Again, consistent with section 504, it is not our intent that persons with disabilities need to exhaust Federal administrative remedies before exercising the private right of action.

Effective date

In accordance with section 206 of the legislation, title II of the bill shall become effective 18 months after the date of enactment except that the provisions of the bill applicable to the purchase of new fixed route vehicles shall become effective on the date of enactment of this Act.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

Section 504 of the Rehabilitation Act of 1973 prohibits Federal agencies and recipients of Federal financial assistance from discriminating against persons with disabilities. The purpose of title III of the legislation is to extend these general prohibitions against discrimination to privately operated public accommodations and to bring individuals with disabilities into the economic and social mainstream of American life. Title III fulfills these purposes in a clear, balanced, and reasonable manner.

Title III is not intended to govern any terms or conditions of employment by providers of public accommodations or potential places of employment; employment practices are governed by title I of this legislation.

Title III also prohibits discrimination in public transportation services provided by private entities.

Scope of coverage of public accommodations

Section 301(3) of the legislation sets forth the definition of the term "public accommodation." The following privately operated entities are considered public accommodations for purposes of title III, if the operations of such entities affect commerce:

(1) An inn, hotel, motel, or other similar place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor;

(2) A restaurant, bar, or other establishment serving food or drink;

(3) A motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment;

(4) An auditorium, convention center, or lecture hall;

(5) A bakery, grocery store, clothing store, hardware store, shopping center, or other similar retail sales establishment;

(6) A laundromat, dry-cleaner, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other similar service establishment;

(7) A terminal used for public transportation;

(8) A museum, library, gallery, and other similar place of public display or collection;

(9) A park or zoo;

(10) A nursery, elementary, secondary, undergraduate, or postgraduate private school;

(11) A day care center, senior citizen center, homeless shelter, food bank, adoption program, or other similar social service center; and

(12) A gymnasium, health spa, bowling alley, golf course, or other similar place of exercise or recreation.

The twelve categories of entities included in the definition of the term "public accommodation" are exhaustive. However, within each of these categories, the legislation only lists a few examples and then, in most cases, adds the phrase "other similar" entities. The Committee intends that the "other similar" terminology should be construed liberally consistent with the intent of the legislation that people with disabilities should have equal access to the array of establishments that are available to others who do not currently have disabilities.

For example, the legislation lists "golf course" as an example under the category of "place of exercise or recreation." This does not mean that only driving ranges constitute "other similar establishments." Tennis courts, basketball courts, dance halls, playgrounds, and aerobics facilities, to name a few other entities are also included in this category. Other entities covered under this category include video arcades, swimming pools, beaches, camping areas, fishing and boating facilities, and amusement parks.

Similarly, although not expressly mentioned, bookstores, video stores, stationary stores, pet stores, computer stores, and other stores that offer merchandise for sale or rent are included as retail sales establishments.

The phrase "privately operated" is included to make it clear that establishments operated by Federal, State, and local governments are not covered by this title. Of course an establishment operated by a private entity which is otherewise covered by this title that also receives Federal, State, or local funds is still covered by this title.

Only nonresidential entities or portions of entities are covered by this title. For example, in a large hotel that has a residential apartment wing, the apartment wing would be covered by the Fair Housing Act, but not this title. The nonresidential accommodations in the rest of the hotel would be covered by this title. Although included in the definition of public accommodations, homeless shelters are subject to the provisions of this title only to the extent that they are not covered by the Fair Housing Act, as amended in 1988.

Private schools, including elementary and secondary schools, are covered by this title. The Committee does not intend, however, that compliance with this legislation requires a private school to provide a free appropriate education or develop an individualized education program in accordance with regulations implementing section 504 of the Rehabilitation Act of 1973 (34 CFR Part 104) and regulations implementing part B of the Education of the Handicapped Act (34

CFR Part 300). Of course, if a private school is under contract with a public entity to provide a free appropriate public education, it must provide such education in accordance with section 504 and part B.

The term "commerce" is defined in section 301(1) of the legislation to mean travel, trade, traffic, commerce, transportation, or communication among the several States, or between any foreign country or any territory or possession and any State or between points in the same state but through another state or foreign country.

Prohibition of discrimination by public accommodations

Section 302(a) of the legislation specifies that no individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation.

"Full and equal enjoyment" does not encompass the notion that persons with disabilities must achieve the identical result or level of achievement of nondisabled persons, but does mean that persons with disabilities must be afforded equal opportunity to obtain the same result.

Section 302(b)(1) of the legislation specifies general forms of discrimination prohibited by this title. These provisions are consistent with the general prohibitions which were included in title I of S. 933, as originally introduced. As explained previously in the report, the general prohibitions title has been deleted by the Substitute.

Sections 302(b)(1)(A) (i), (ii), and (iii) of the legislation specify that it shall be discriminatory:

> To subject an individual or class of individuals on the basis of disability or disabilities of such individual or class, directly, or through contractural, licensing, or other arrangements, to a denial of the opportunity of the individual or class to participate in or beanefit from the goods, services, facilities, privileges, advantages, and accommodations of an entity;
>
> To afford such an opportunity that is not equal to that afforded other individuals; or
>
> To provide such an opportunity that is different or separate from that provided to other individuals, unless such action is necessary to provide the individual or class of individuals with an opportunity that is as effective as that provided to others.

Section 302(b)(1)(B) of the legislation specifies that goods, services, privileges, advantages, accommodations, and services shall be afforded to an individual with a disability in the most integrated setting appropriate to the needs of the individual.

Section 302(b)(1)(C) of the legislation specifies that notwithstanding the existence of separate or different programs or activities provided in accordance with this section, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different.

Taken together, these provisions are intended to prohibit exclusion and segregation of individuals with disabilities and the denial of equal opportunities enjoyed by others based on, among other things, presumptions, patronizing attitudes, fears, and stereotypes above individuals with disabilities. Consistent with these standards, covered entities are required to make decisions based on facts applicable to individuals and not on the basis of presumptions as to what a class individuals with disabilities can or cannot do.

The Committee wishes to emphasize that these provisions should not be construed to jeopardize in any way the continued viability of separate private schools providing special education for particular categories of children with disabilities, sheltered workshops, special recreational programs, and other similar programs.

At the same time, the Committee wishes to reaffirm that individuals with disabilities cannot be denied the opportunity to participate in programs that are not separate or different. This is an important and over-arching principle of the Committee's bill. Separate, special, or different programs are designed to make participation by persons with disabilities possible. Such programs are not intended to restrict the participation of disabled persons in ways that are appropriate to them.

For example, a blind person may wish to decline participating in a special museum tour that allows persons to touch sculptures in an exhibit and instead tour the exhibit at his own pace with the museum's recorded tour. It is not the intent of this title to require the blind person to avail him or herself of the special tour. The Committee intends that modified participation for persons with disabilities be a choice but not a requirement.

In addition, it would not be a violation of this title for an establishment to offer recreational programs specially designed for children with mobility impairments. However, it would be a violation of this title if the entity then excluded such children from other recreational services made available to nondisabled children, or required children with disabilities to attend only designated programs.

Section 302(b)(1)(D) of the legislation specifies that an individual or entity shall not, directly, or through contractual or other arrangements, utilize standards or criteria or methods of administration that have the effect of discriminating on the basis of disability or that perpetuate the discrimination of others who are subject to common administrative control. This provision is identical to section 102(b)(3) of the bill, which was discussed previously in the report.

Section 302(b)(1)(E) of the legislation specifies that it shall be discriminatory to exclude or otherwise deny equal goods, services, privileges, advantages, and accommodations, or other opportunities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association. This provisions is comparable to section 102(b)(4) of the legislation, which was discussed previously in the report.

Section 302(b)(2) of the legislation includes specific applications of the general prohibition against discrimination in section 302(a) and the general prohibitions set out in section 302(b)(1) of the legislation. The Committee wishes to emphasize that the specific provisions contained in title III, including the exceptions and terms of limitation, control over the more general provisions in section 302(a) and section 302(b)(1) to the extent there is any apparent conflict.

Section 302(b)(2)(A)(i) of the legislation specifies that the term "discrimination" includes the imposition or application of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any goods, services, facilities, privileges, advantages, and accommodations, unless such criteria can be shown to be necessary for the provision of the goods, services, facilities, privileges, advantages, or accommodations being offered.

As explained above, it is a violation of this title to exclude persons with disabilities. For example, it would be a violation for a grocery store to impose a rule that no blind persons would be allowed in the store, or for a drugstore to refuse to serve deaf people. It also would be a violation for such an establishment to invade such people's privacy by trying to identify unnecessarily the existence of a disability, as, for example, if the credit application of a department store were to inquire whether an individual has epilepsy, has ever had been hospitalized for mental illness, or has other disability.

Similarly, it can constitute a violation to impose criteria that limit the participation of people with disabilities, as for example, by requiring that individuals with Down syndrome can only be seated at the counter, but not the table-seating section of a diner.

And it would be a violation to adopt policies which impose additional requirements or burdens upon people with disabilities not applied to other persons. Thus, it would be a violation for a theater or restaurant to adopt a policy specifying that individuals who use wheelchairs must be chaperoned by an attendant.

In addition, this subsection prohibits the imposition of criteria that "tend to" screen out an individual with a disability. This concept, drawn from current regulations under Section 504 (See, e.g. 45 C.F.R. 84.13), makes it discriminatory to impose policies or criteria that, while not creating a direct bar to individuals with disabilities, diminish such individuals' chances of participation.

Such diminution of opportunity to participate can take a number of different forms. If, for example, a drugstore refuses to accept checks to pay for prescription drugs unless an individual presents a driver's license, and no other form of identification is acceptable the store is not imposing a criterion that identifies or mentions disability. But for many individuals with visual impairments, and various other disabilities, this policy will operate to deny them access to the service available to other customers; people with disabilities will be disproportionately screened out.

Section 302(b)(2)(A)(ii) of the legislation specifies that discrimination includes a failure to make reasonable modifications in policies, practices, and procedures when such modifications may be necessary to afford such goods, services, facilities, privileges, advantages, and accommodations unless the entity can demonstrate that making such modifications would fundamentally alter the nature of such goods, services, facilities, privileges, advantages, and accommodations.

For example, a physician who specializes is treating burn victims could not refuse to treat the burns of a deaf person because of his or her deafness. However, such a physician need not treat the deaf individual if he or she does not have burns nor need the physician provide other types of medical treatment to individuals with disabilities unless he or she provides other types of medical treatment to nondisabled invididuals.

Thus, nothing in this legislation is intended to prohibit a physician from providing the most appropriate medical treatment in the physician's judgment or from referring an individual with a disability to another physician when the physician would make such a referral of an individual who does not have a disability.

Similarly, a drug rehabilitation clinic could refuse to treat a person who was not a drug addict but could not refuse to treat a person who was a drug addict simply because the patient tests positive for HIV.

A public accommodation which does not allow dogs must modify that rule for a blind person with a seeing-eye dog, a deaf person with a hearing ear dog, or a person with some other disability who uses a service dog.

Section 302(b)(2)(A)(iii) of the legislation specifies that discrimination includes a failure to take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the entity can demonstrate that taking such steps would fundamentally alter the nature of the goods, services, facilities, advantages, and accommodations being offered or would result in an undue burden.

The phrase "undue burden" is the limit applied under the ADA upon the duty of places of public accommodation to provide auxiliary aids and services. It is analogous to the phrase "undue hardship" used in the employment title of ADA (see previous discussion in the report) and is derived from section 504 and regulations thereunder. The determination of whether the provision of an auxiliary aid or service imposes an undue burden on a business will be made on a case-by-case basis, taking into account the same factors used for purposes of determinng "undue hardship."

The fact that the provision of any particular auxiliary aid would result in a undue burden does not relieve the business from the duty to furnish an alternative auxiliary aid, if available, that would not result in such a burden.

The term "auxiliary aids and services" is defined in section 3(1) of the legislation. The definition includes illustrations of aids and services that may be provided. The list is not meant to be exhaustive; rather, it is intended to provide general guidance about the nature of the obligation.

The Committee expects that the covered entity will consult with the individual with a disability before providing a particular auxiliary aid or service. Frequently, an individual with a disability requires a simple adjustment or aid rather than an expensive or elaborate modification often envisioned by a covered entity.

For example, auxiliary aids and services for blind persons include both readers and the provision of brailled documents (see below). A restaurant would not be required to provide menus in braille if it provided a waiter or other person who was willing to read the menu. Similarly, a bookstore need not braille its price tags, stock brailled books, or lower all its shelves so that a person who uses a wheelchair can reach all the books. Rather, a salesperson can tell the blind person how much an item costs, make a special order of brailled books, and reach the books that are out of the reach of the person who uses a wheelchair.

The legislation specifies that auxiliary aids and services includes qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments. Other effective methods may include: telephone handset amplifiers, telephones compatible with hearing aids, telecommunication devices for the deaf, closed captions, and decoders.

For example, it would be appropriate for regulations issued by the Attorney General to require hotels of a certain size to have decoders for closed captions available or, where televisions are centrally controlled by the hotel, to have a master decoder.

It is also the Committee's expectation that regulations issued by the Attorney General will include guidelines as to when public accommodations are required to make available portable telecommunication devices for the deaf. In this regard, it is the Committee's intent that hotels and other similar establishments that offer nondisabled individuals the opportunity to make outgoing calls, on more than an incidental convenience basis, to provide a similar opportunity for hearing impaired customers and customers with communication disorders to make such outgoing calls by making available a portable telecommunication device for the deaf.

It is not the Committee's intent that individual retail stores, doctors' offices, restaurants or similar establishments must have telecommunications devices for the deaf since people with hearing impairments will be able to make inquiries, appointments, or reservations with such establishments through the relay system established pursuant to title IV of the legislation, and the presence of a public telephone in these types of establishments for outgoing calls is incidental.

Open-captioning, for example, of feature films playing in movie theaters, is not required by this legislation. Filmmakers are, however, encouraged to produce and distribute open-captioned versions of films and theaters are encouraged to have at least some preannounced screenings of a captioned version of feature films.

Places of public accommodations that provide film and slide shows to impart information are required to make such information accessible to people with disabilities.

The legislation also specifies that auxiliary aids and services includes qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments. Additional examples of effective methods of making visually delivered materials available include: audio recordings and the provision of brailled and large print materials.

The legislation specifies that auxiliary aids and services includes the acquisition or modification of equipment or devices. For example, a museum that provides audio cassettes and cassette players for an audio-guided tour of the museum may need to add brailled adhesive labels to the buttons on a select number of the tape-players so that they can be operated by a blind person.

The Committee wishes to make it clear that technological advances can be expected to further enhance options for making meaningful and effective opportunities available to individuals with disabilities. Such advances may enable covered entities to provide auxiliary aids and services which today might be considered to impose undue burdens on such entities.

Section 302(b)(2)(A)(iv) of the legislation specifies that discrimination includes a failure to remove architectural barriers and communication barriers that are structural in nature in existing facilities, and transportation barriers in existing vehicles used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles by the installation of a hydraulic or other lift), where such removal is readily achievable.

The Committee was faced with a choice in how to address the question of what actions, if any, a public accommodation should be required to take in order to remove structural barriers in existing facilities and vehicles. On the one hand, the Committee could have required retrofitting of all existing facilities and vehicles to make them fully accessible. On the other hand, the Committee could have required that no actions be taken to remove barriers in existing facilities and vehicles.

The Committee rejected both of these alternatives and instead decided to adopt a modest requirement that covered entities make structural changes or adopt alternative methods that are "readily achievable."

The phrase "readily achievable" is defined in section 301(5) to mean easily accomplishable and able to be carried out without much difficulty or expense. In determining whether an action is readily achievable, factors to be considered include:

(1) The overall size of the covered entity with respect to number of employees, number and type of facilities, and the size of the budget;

(2) The type of operation of the covered entity, including the composition and structure of the entity; and

(3) The nature and cost of the action needed.

It is important to note that readily achievable is a significantly lesser or lower standard than the "undue burden" standard used in this title and the "undue hardship" standard used in title I of this legislation. Any changes that are not easily accomplishable and are not able to be carried out without much difficulty or expense when the preceding factors are weighed are not required under the readily achievable standard, even if they do not impose an undue burden.

The concept of readily achievable should not be confused with the phraseology of "readily accessible" used in regard to accessibility requirements for alterations (section 302(b)(2)(A)(vi)) and new construction (section 303). While the word "readily" appears in both phrases and has roughly the same meaning in each context—easily, without much difficulty—the concepts of "readily achievable" and "readily accessible" are sharply distinguishable and represent almost polar opposites in focus.

The phrase "readily accessible to and usable by individuals with disabilities" focuses on the person with a disability and addresses the degree of ease with which an individual with a disability can enter and use a facility; it is access and usability which must be "ready."

"Readily achievable," on the other hand, focuses on the business operator and addresses the degree of ease or difficulty of the business operator in removing a barrier; if barrier removal cannot be accomplished readily, then it is not required.

What the "readily achievable" standard will mean in any particular public accommodation will depend on the circumstances, considering the factors listed previously, but the kind of barrier-removal which is envisioned includes the addition of grab bars, the simple ramping of a few steps, the lowering of telephones, the addition of raised letter and braille markings on elevator control buttons, the addition of flashing alarm lights, and similar modest adjustments.

This section may require the removal of physical barriers, including those created by the arrangement or location of such temporary or movable structures as furniture, equipment, and display racks. For example, a restaurant may need to rearrange tables and chairs, or a department store may need to adjust its layout of display racks and shelves, in order to permit access to individuals who use wheelchairs, where these actions can be carried out without much difficulty or expense.

A public accommodation would not be required to provide physical access if there is a flight of steps which would require extensive ramping or an elevator. The readily achievable standard only requires physical access that can be achieved without extensive restructuring or burdensome expense.

In small facilities like single-entrance stores or restaurants, "readily achievable" changes could involve small ramps, the installation of grab bars in restrooms in various sections and other such minor adjustments and additions.

The readily achievable standard allows for minimal investment with a potential return of profit from use by disabled patrons, often more than justifying the small expense.

Section 302(b)(2)(A)(v) of the legislation specifies that where an entity can demonstrate that removal of a barrier is not readily achievable, discrimination includes a failure to make such goods, services, facilities, privileges, advantages, and accommodations available through alternative methods if such methods are readily achievable.

With respect to the adoption of alternative methods, examples of "readily achievable" include: coming to the door to receive or return drycleaning; allowing a disabled patron to be served beverages at a table even though nondisabled persons having only drinks are required to drink at the inaccessible bar; providing assistance to retrieve items in an inaccessible location; and rotating movies between the first floor accessible theater and a comparable second floor inaccessible theater.

Section 302(b)(2)(A)(vi) of the legislation specifies that discrimination includes, with respect to a facility or part thereof that is altered by, on behalf of, or for the use of an establishment in a manner that affects or could affect the usability of the facility or part thereof, a failure to make the alterations in such a manner that, to the maximum extent feasible, the altered portion of the facility is readily accessible to and usable by individuals with disabilities.

Where the entity is undertaking major structural alterations that affect or could affect the usability of the existing facility, the entity must also make the alterations in such manner that, to the maximum extent feasible, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the remodeled area, are readily accessible to and usable by individuals with disabilities.

The phrase "major structural alterations" will be defined by the Attorney General. The Committee intends that the term "structural" means elements that are a permanent or fixed part of the building, such as walls, suspended ceilings, floors, or doorways.

The term "major structural alterations" refers to structural alterations or additions that affect the primary functional areas of a building, e.g., the entrance, a passageway to an area in the building housing a primary function, or the areas of primary functions themselves. For example, structural alteration to a utility room in an office building would not be considered "major." On the other hand, structural alteration to the customer service lobby of a bank would be considered major because it houses a major or primary function of the bank building.

The legislation includes an exception regarding the installation of elevators, which specifies that the obligation to make a facility readily accessible to and usable by individuals with disabilities shall not be construed to require the installation of an elevator for facilities that are less than three stories or that have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

The Committee wishes to make it clear that the exception regarding elevators does not obviate or limit in any way the obligation to comply with the other accessibility requirements established by this legislation, including requirements applicable to floors which, pursuant to the exception, are not served by an elevator. And, in the event a facility which meets the criteria for the exception nonetheless has an elevator installed, then such elevator shall be required to meet accessibility standards.

The Committee intends that the term "facility" means all or any portion of buildings, structures, sites, complexes, equipment, roads, walks, passageways, parking lots, or other real or personal property or interest in such property, including the site where the building, property, structure or equipment is located. This definition is consistent with the definitions used under current Federal regulations and standards and thus includes both indoor areas and outdoor areas where human-constructed improvements, structures, equipment, or property have been added to the natural environment.

The phrase "readily accessible to and usable by individuals with disabilities" is a term of art which is explained in the section of the report concerning new construction.

The phrase "to the maximum extent feasible" has been included to allow for the occasional case in which the nature of an existing facility is such as to make it virtually impossible to renovate the building in a manner that results in its being entirely accessible to and usable by individuals with disabilities. In all such cases, however, the alteration should provide the maximum amount of physical accessibility feasible.

Thus, for example the term "to the maximum extent feasible" should be construed as not requiring entities to make building alterations that have little likelihood of being accomplished without removing or altering a load-bearing structural member unless the load-bearing structural member is otherwise being removed or altered as part of the alteration.

Section 302(b)(2)(B) of the legislation includes policies applicable to fixed route vehicles used by entities that are not in the principal business of transporting people. First, it is considered discrimination for an entity to purchase or lease a bus or a vehicle that is capable of carrying in excess of 16 passengers, for which solicitations are made later than 30 days after the effective date of this Act that are not readily accessible to and usable by individuals with disabilities except that over-the-road buses shall be subject to section 304(b)(4) (which delays the effective date for 6 years for small operators and 5 years for other operators) and section 305 (which provides for a study of how to make the impact of making such buses accessible).

If an entity not in the principal business of transporting people purchases or leases a vehicle carrying 16 or fewer passengers after the effective date of title III that is not readily accessible to or usable by individuals with disabilities, it is discriminatory for such an entity to fail to operate a system that, when viewed in its entirety, ensures a level of service to individuals with disabilities equivalent to the level of service provided to the general public.

Section 302(b)(2)(C) includes provisions applicable to vehicles used in demand-responsive systems by entities that are not in the principal business of transporting people. The provisions applicable to such vehicles are the same as those applicable to fixed route vehicles except that the entity need not ensure that all new vehicles carrying more than 16 passengers are accessible if it can demonstrate that the system, when viewed in its entirety, already provides a level of service to individuals with disabilities equivalent to that provided to the general public.

For example, where a hotel at an airport provides free shuttle service, the hotel need not purchase new vehicles that are accessible so long as it makes alternative equivalent arrangements for transporting people with disabilities who cannot ride the inaccessible vehicles. This might be accomplished through the use of a portable lift or by making arrangements with another entity that has an accessible vehicle that can be made available to provide equivalent shuttle service.

New construction

Section 303 of the legislation sets forth obligations with respect to the construction of new facilities. This section is applicable to public accommodations and potential places of employment.

The term "potential places of employment" is defined in section 301(2) to mean facilities that are intended for nonresidential use and whose operations affect commerce. The Committee expects that implementing regulations concerning "potential places of employment" will cover the same areas in a facility as existing design standards. Thus, unusual spaces that are not duty stations, such as catwalks and fan rooms, would continue to lie outside the scope of design standards.

The term does not include facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968.

Specifically, section 303(a) of the legislation specifies that it is unlawful discrimination for a public accommodation or potential place of employment to fail to design and construct facilities for first occupancy later than 30 months after the date of enactment of this Act that are readily accessible to and usable by individuals with disabilities, except where an entity can demonstrate that it is structurally impacticable to do so, in accordance with standards set forth or incorporated by reference in regulations issued under title III.

Section 303(b) of the legislation exempts entities from installing elevators under the same circumstances applicable to alterations (see section 302(b)(2)(A)(vi) and the accompanying clarifications in the report).

The phrase "readily accessible to or usable by" is a term of art which, in slightly varied formulations, has been applied in the Architectural Barriers Act of 1968 ("ready access to, and use of"), the Fair Housing Act of 1968, as amended ("readily accessible to and usable by"), and the regulations implementing section 504 of the Rehabilitation Act of 1973 ("readily accessible to and usable by") and is included in standards used by Federal agencies and private industry e.g., the Uniform Federal Accessibility Standards (UFAS) ("ready access to and use of") and the American National Standard for Buildings and Facilities—Providing Accessibility and Usability for Physically Handicapped People (ANSI A117.1) (readily accessible to, and usable by).

The term is intended to enable people with disabilities (including mobility, sensory, and cognitive impairments) to get to, enter, and use a facility. While the term does not necessarily require the accessibility of every part of every area of a facility, the term contemplates a high degree of convenient accessibility, entailing accessibility of parking areas, accessible routes to and from the facility, accessible entrances, usable bathrooms and water fountains, accessibility of public and common use areas, and access to the goods, services, programs, facilities, and accommodations offered at the facility.

The term is not intended to require that all parking spaces, bathrooms, stalls within bathrooms, etc. are accessible; only a reasonable number must be accessible, depending on such factors as their location and number.

Accessibility elements for each particular type of facility should assure both ready access to the facility and usability of its features and equipment and of the goods, services, and programs available therein.

For example, for a hotel "readily accessible to and usable by" includes, but is not limited to, providing full access to the public use and common use portions of the hotel; requiring all doors and doorways designed to allow passage into and within all hotel rooms and bathrooms to be sufficiently wide to allow passage by individuals who use wheelchairs; making a percentage of each class of hotel rooms fully accessible (e.g., including grab bars in bath and at the toilet, accessible counters in bathrooms); audio loops in meeting areas; signage, emergency flashing lights or alarms; braille or raised letter words and numbers on elevators; and handrails on stairs and ramps.

Of course, if a person with a disability needing a fully accessible room makes an advance registration without informing the hotel of the need for such a room arrives on the date of the reservation and no fully accessible room is available, the hote has not violated the Act. Moreover, a hotel is not required to forego renting fully accessible rooms to nondisabled persons if to do so would cause the hotel to lose a rental.

In a physician's office, "readily accessible to and usable by" would include ready access to the waiting areas, a bathroom, and a percentage of the examining rooms.

Historically, particularized guidance and specifications regarding the meaning of the phrase "readily accessible to and usable by" for various type of facilities have been provided by MGRAD, UFAS, and the ANSI standards. Under this legislation, such specificity will be provided by the expanded MGRAD standards to be issued by the Architectural and Transportation Barriers Compliance Board and by the regulations issued by the Attorney General, both of which are discussed subsequently in this report.

It is the expectation of the Committee that the regulations issued by the executive branch could utilize appropriate portions of MGRAD.

It is also the Committee's intent that the regulations will include language providing that departures from particular technical and scoping requirements, as revised, will be permitted so long as the alternative methods used will provide substantially equivalent or greater access to and utilization of the facility. Allowing these departures will provide covered entities with necessary flexibility to design for special circumstances and will facilitate the application of new technologies.

The phrase "structurally impracticable" is a narrow exception that will apply only in rare and unusual circumstances where unique characteristics of terrain make accessibility unusually difficult. Such limitations for topographical problems are analogous to an acknowledged limitation in the application of the accessibility requirements of the Fair Housing Amendments Act of 1988. In the House Committee Report accompanying the Act, the House Committee on the Judiciary noted:

> certain natural terrain may pose unique building problems. For example, in areas which flood frequently, such as waterfronts or marshlands, housing traditionally may be built on stilts. The Committee does not intend to require that the accessibility requirements of this Act over-

> ride the need to protect the physical integrity of multifamily housing that may be built on such sites.

By incorporating the phrase "structurally impracticable," the ADA explicitly recognizes an exception analogous to the "physical integrity" exception for peculiarities of terrain recognized implicitly in statutory language and expressly in the House Committee Report accompanying the Fair Housing Amendments Act. As under the Fair Housing Amendments Act, this is intended to be a narrow exception to the requirement of accessibility. It means that only where unique characteristics of terrain prevent the incorporation of accessibility features and would destroy the physical integrity of a facility is it acceptable to deviate from accessibility requirements. Buildings that must be built on stilts because of their location in marshlands or over water are one of the few situations in which the structurally impracticable exception would apply.

Neither under the ADA nor the Fair Housing Amendments Act should an exception to accessibility requirements be applied to situations in which a facility is located in "hilly" terrain or on a plot of land upon which there are steep grades; in such circumstances, accessibility can be achieved without destroying the physical integrity of a structure, and ought to be required in the construction of new facilities.

In those are circumstances in which it is structurally impracticable to achieve full compliance with accessibility requirements under the ADA, public accommodations should still be designed and constructed to incorporate accessibility features to the extent that they are structurally practicable. The accessibility requirements should not be viewed as an all-or-nothing proposition in such circumstances.

If it is structurally impracticable for a facility in its entirety to be readily accessible to and usable by people with disabilities, then those portions which can be made accessible should be. If a building cannot comply with the full range of accessibility requirements because of structural impracticability, then it should still be required to incorporate those features which are structurally practicable. And if it is structurally impracticable to make a particular facility accessible to persons who have particular types of disabilities, it is still appropriate to require it to be made accessible to persons with other types of disabilities.

If, for example, a facility which is of necessity built on stilts cannot be made accessible to persons who use wheelchairs because it is structurally impracticable to do so, this is no reason not to still require it to be accessible for individuals with vision or hearing impairments or other kinds of disabilities.

The new construction provision includes establishments that "are potential places of employment" as well as public accommodations. The Committee decided to include this provision to ensure that unnecessary barriers to employment are not built into facilities that are constructed in the future. Since it is easy and inexpensive to incorporate accessibility features in new construction, the Committee concluded that there is no rational justification for employers to continue to construct inaccessible facilities that will bar the entrance of and limit opportunities for people with disabilities for years to come.

In addition, this provision will ensure that all new facilities which potentially may be occupied by places of public accommodation but whose first occupant may not be such an entity are constructed in such a way that they are readily accessible to and usable by individuals with disabilities for the original use for which the building is intended.

The Committee decided not to limit this provision to potential places of employment of 15 or more employees because of the desire to establish a uniform requirement of accessibility in new construction, because of the ease with which such a requirement can be accomplished in the design and construction stages, and because future expansion of a business or sale or lease of the property to a larger employer or to a business that is open to the public is always a possibility.

The phrase "are potential places of employment" is not intended to make an establishment that is not a public accommodation subject to the other provisions of this title e.g., the obligation to provide auxiliary aids or services.

Prohibition of discrimination in public transportation services provided by private entities

Section 304(a) of the legislation specifies that no individual shall be discriminated against on the basis of disability in the full and equal enjoyment of public transportation services provided by a privately operated entity that is primarily engaged in the business of transporting people, but is not in the principal business of providing air transportation, and whose operations affect commerce.

The term "public transportation" is defined in section 301(4) of the legislation to mean transportation by bus or rail, or by any other conveyance (other than by air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

The Committee wishes to make it clear that the provisions of title III do not apply to public entities such as public transit authorities and school districts. Public entities providing transportation services are generally subject to the provisions of title II of this legislation and school bus operations are generally covered by regulations implementing section 504 of the Rehabilitation Act of 1973 issued by agencies providing Federal financial assistance to school districts.

The Committee also wishes to make it clear that title III does not apply to volunteer-driven commuter ridership arrangements.

The Committee excluded transportation by air because the Congress recently passed the Air Carriers Access Act, which was designed to address the problem of discrimination by air carriers and it is the Committee's expectation that regulations will be issued that reflect congressional intent.

Section 304(b) of the legislation includes specific applications of the general prohibition set out in section 303(a). As used in subsection (a), the term "discrimination against" includes:

(1) The imposition or application by an entity of eligibility criteria that screen out or tend to screen out an individual

with a disability or any class of individuals with disabilities from fully enjoying the public transportation services provided by the entity;

(2) The failure of an entity to—

(A) make reasonable modifications consistent with those required under section 302(b)(2)(A)(ii);

(B) provide auxiliary aids and services consistent with the requirements of section 302(b)(2)(A)(iii); and

(C) remove barriers consistent with the requirements of section 302(b)(2)(A) (iv), (v), and (vi); and

(3) The purchase or lease of a new vehicle (other than an automobile or over-the-road bus) that is to be used to provide public transportation services, and for which a solicitation is made later than 30 days after the effective date of this Act, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The bill includes a special exception for vehicles used in a demand-responsive system. In the case of a vehicle used in a demand-response system, the new vehicle need not be readily accessible to and usable by individuals with disabilities if the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the level of service provided to the general public.

With respect to the purchase of new over-the-road buses, it is considered discrimination to purchase or lease a new over-the-road bus that is used to provide public transportation services and for which a solicitation is made later than 6 years after the date of enactment of this Act for small providers (as defined by the Secretary of Transportation) and 5 years for other providers, that is not readily accessible to and usable by individuals with disabilities.

The term "readily accessible to and usable by" means, with respect to vehicles used for public transportation, able to be entered into and exited from and safely and effectively used by individuals with disabilities, including individuals who use wheelchairs.

Currently, technology may not exist that will enable an individual who uses a wheelchair to access restrooms in over-the-road buses without resulting in the significant loss of current seating capacity. Since this legislation is future driven, the Committee intends that the Department of Transportation develop regulations which require that accessible restrooms be installed on intercity coaches when technologically feasible.

Lifts or ramps, and fold-up seats or other wheelchair spaces with appropriate securement devices are among the current features necessary to make transit vehicles readily accessible to and usable by individuals with disabilities. The requirement that a vehicle is to be readily accessible obviously entails that each vehicle is to have some spaces for individuals who use wheelchairs or three-wheeled mobility aids; how many spaces per vehicle are to be made available for wheelchairs is, however, a determination that depends on various factors, including the number of vehicles in the fleet, seat vacancy rates, and usage by people with disabilities.

The Committee intends that, consistent with these general factors, the determination of how many spaces must be available should be flexible and generally left up to the provider; provided that at least some spaces on each vehicle are accessible. Technical specifications and guidance regarding lifts and ramps, wheelchair spaces, and securement devices are to be provided in the minimum guidelines and regulations to be issued under this legislation.

The Committee intends that during the interim periods prior to the date when over-the-road buses must be readily accessible to and usable by individuals with disabilities that regulations specify that providers modify their policies so that individuals who use wheelchairs may get on and off such buses without having to bring their own attendant to help them get on and off the bus. Further, policies should be modified to require the on-board storage of batteries for battery operated wheelchairs.

Section 305 of the legislation directs the Architectural and Transportation Barriers Compliance Board to undertake a study to determine the access needs of individuals with disabilities to over-the-road buses and the most cost effective methods for making over-the-road buses readily accessible to and usable by individuals with disabilities.

In determining the most cost-effective methods for making over-the-road buses readily accessible to and usable by persons with disabilities, particularly individuals who use wheelchairs, the legislation specifies that the study should analyze the cost of providing accessibility, recent technological and cost saving developments in equipment and devices, and possible design changes.

Thus, the Committee is interested in having the study include a review of current technology such as lifts that enable persons with mobility impairments, particularly those individuals who use wheelchairs, to get on and off buses without being carried; alternative designs to the current lifts; as well as alternative technologies and modifications to the design of buses that may be developed that will also enable such individuals to get on and off over-the-road buses without being carried.

It is also expected that the study will review alternative design modifications that will enable an individual using the over-the-road bus to have access to the restroom and at the same time permitting the provider to retain approximately the same seating capacity.

The study must also assess the impact of accessibility requirements on the continuation of inter-city bus service by over-the-road buses, with particular consideration of impact on rural service in light of the economic pressures on the bus industry that have lead to a reduction of service, particularly in rural America. According to an analysis by the Interstate Commerce Commission staff, 3,400 communities lost all intercity bus service between 1982 and 1986. Of these nine-tenths were areas with populations of under 10,000.

Thus, this study should analyze how the private bus operators can comply with the requirement in section 304 of the legislation that over-the-road buses be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, without contributing to the deterioration of rural bus service.

It is the Committee expectation that the study will also review current policies that impede the shared use by private companies providing tours and charter services of public buses that are currently accessible. Another component of the study may be to seek ways to link local providers of accessible transportation services with intercity bus service in hub areas. This may necessitate expansion of service by local providers to match intercity and intermodal schedules in order to help ensure effective development of such a feeder service relationship.

The Committee recognizes that after deregulation of the airline and rail industries, safety net programs were implemented to assist States in preserving efficient air and rail transportation, primarily between smaller cities and communities threatened by the loss of service. No similar Federal program was established to assist the private bus industry. The Committee expects that the study will consider whether and, if deemed appropriate, identify policy alternatives that might assist private bus companies meet the mandates in this legislation.

The legislation also calls for the establishment of an advisory board of which 50 percent of the members must be selected from among private operators using over-the-road buses, bus manufacturers, and lift manufacturers; and 50 percent of the members must be individuals with disabilities, particularly individuals who use wheelchairs, who are potential riders of such buses.

Anyone in the business of providing taxi service shall not discriminate on the basis of disability in the delivery of that service. For example, it would be illegal under the Act to refuse to pick up a person on the basis of that person's disability. A taxi cab driver could not refuse to pick up someone in a wheelchair because he or she believes that the person could not get out of their chair or because he or she did not want to lift the wheelchair into the trunk of the taxi or put it in the back seat.

Regulations

Section 306(a) of the legislation specifies that not later than one year after the date of enactment of this Act, the Secretary of Transportation shall issue regulations in an accessible format that shall include standards applicable to facilities and vehicles covered under section 302(b)(2) (B) and (C) and section 304.

With respect to section 304(b)(4) of the legislation, the Committee recognizes the apparent anomaly in requiring the promulgation of regulations while a needs and impact assessment is in progress and two years prior to the submission of the study and its recommendations to the President and the Congress. This timing, however, should not be construed as calling into question the importance or necessity of empirical data and technolgical information to this rulemaking process. Rather, the Committee believed it wise that, with respect to over-the-road buses, regulations be in place well in advance of the compliance dates of the Act.

The Committee fully expects that, following submission, the study and its recommendations will be expeditiously and carefully reviewed to determine if, or to what extent, the regulations promulgated pursuant to this section of the legislation need to be revised or amended.

Section 306(b) of the legislation, specifies that not later than one year after the date of enactment of this Act, the Attorney General shall issue regulations in an acccessible format to carry out the remaining provisions of this title not referred to in subsection (a) that include standards applicable to facilities and vehicles covered under section 302.

Standards included in regulations issued under subsections (a) and (b) shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504.

Exemptions for private clubs and religious organizations

Section 307 of the legislation specifies that the provisions of title III do not apply to private clubs or establishments exempted from coverage under title II of the Civil Rights Act of 1964 or to religious organizations or to entities controlled by religious organizations. Places of worship and schools controlled by religious organizations are among those organizations and entities which fall within this exemption.

The reference to "entities controlled by a religious organization" is modeled after the provisions in title IX of the Education Amendments of 1972. Thus, it is the Committee's intent that the term "controlled by a religious organization" be interpreted consistently with the Attachment which accompanied the Assurance of Compliance with title IX required by the U.S. Department of Education. Of course, the Committee recognizes that unlike the title IX exemption, this provision applies to entities that are not educational institutions. The term "religious organization" has the same meaning as the term "religious organization" in the phrase "entitles controlled by a religious organization."

Activities conducted by a religious organization or an entity controlled by a religious organization on its own property which are open to nonmembers of that organization or entity are included in this exemption.

Enforcement

Section 308 of the legislation sets forth the scheme for enforcing the rights provided for in title III. Section 308(a)(1) provides a private right of action for any individual who is being or is about to be subjected to discrimination on the basis of disability in violation of title III. This subsection makes available to such an individual the remedies and procedures set forth in section 204a-3(a) of the Civil Rights Act of 1964 (preventive relief, including an application for a permanent or temporary injunction, restraining order, or other order).

Section 308(a)(2) of the legislation makes it clear that in the case of violations of section 302(b)(2)(A)(iv) pertaining to removing barriers in existing facilities, section 302(b)(2)(A)(vi) pertaining to alterations of existing facilities, and section 303(a) pertaining to new construction, injunctive relief shall include an order to alter facilities to make such facilities readily accessible to and usable by individuals with disabilities as required by title III.

Where appropriate, injunctive relief shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by this title.

Section 308(b) of the legislation specifies the enforcement scheme for the Attorney General. First, the Attorney General shall investigate alleged violations of title III, which shall include undertaking periodic reviews of compliance of covered entities.

If the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of resistance to the full enjoyment of any of the rights granted by title III or that any person or group of persons has been denied any of the rights granted by title III and such denial raises an issue of general public importance, the Attorney General may commence a civil action in any appropriate United States District Court.

In a civil action brought by the Attorney General, the court may grant any equitable relief it considers to be appropriate, including granting temporary, preliminary, or permanent relief, providing an auxiliary aid or service, modification of policy or alternative method, or making facilities readily accessible to and usable by individuals with disabilities, to the extent required by title III.

In addition, a court may award such other relief as the court considers to be appropriate, including monetary damages to persons aggrieved, when requested by the Attorney General. Thus, it is the Committee's intent that the Attorney General shall have discretion regarding the damages he or she seeks on behalf of persons aggrieved. It is not the Committee's intent that this authority include the authority to award punitive damages.

Furthermore, the court may vindicate the public interest by assessing a civil penalty against the covered entity in an amount not exceeding $50,000 for a first violation and not exceeding $100,000 for any subsequent violation.

Effective date

In accordance with section 309 of the legislation, title III of the legislation shall become effective 18 months after the date of enactment of this legislation.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICES

Title IV of the legislation, as reported, will help to further the statutory goals of universal service as mandated in the Communications Act of 1934. It will provide to hearing- and speech-impaired individuals telephone services that are functionally equivalent to those provided to hearing individuals.

Background

There are over 24 million hearing-impaired and 2.8 million speech-impaired individuals in the United States, yet inadequate attention has been paid to their special needs with respect to accessing the Nation's telephone system. Given the pervasiveness of the telephone for both commercial and personal matters, the inability to utilize the telephone system fully has enormous impact on an individual's ability to integrate effectively in today's society.

The Communications Act of 1934 mandates that communications services be "[made] available, so far as possbile, to *all* the people of the United States. * * *". (Section 1, emphasis added). This goal of universal service has governed the development of the Nation's telephone system for over fifty years. The inability of over 26 million Americans to access fully the Nation's telephone system poses a serious threat to the full attainment of the goal of universal service.

In order to realize this goal more fully, Title IV of this legislation amends Title II of the Communications Act of 1934, as amended, by adding a new section 225. This new section imposes on all common carriers providing interstate or intrastate telephone service, an obligation to provide to hearing and speech impaired individuals telecommunications services that enable them to communicate with hearing individuals. These services must be functionally equivalent to telephone service provided to hearing individuals. Carriers are granted the flexibility to determine whether such services are provided by the carrier alone, in concert with other carriers, or through a designee. Hereinafter, this part of the Report will be referring to this new section 225 and not to sections in S. 933, The Americans with Disabilities Act.

Currently, individuals with hearing and speech impairments can communicate with each other over the telephone network with the aid of Telecommunications Devices for the Deaf (TDDs). TDDs use a typewriter-style device equipped with a message display (screen and/or printer) to send a coded signal through the telephone network. However, users of TDDs can communicate only with other users of TDDs. This creates serious hardships for Americans with hearing and/or speech impairments, since access to the community at large is significantly limited.

The Committee intends that section 225 better serve to incorporate the hearing- and speech-impaired communities into the telecommunications mainstream by requiring that telephone services be provided to hearing and/or speech impaired individuals in a manner that is functionally equivalent to telephone services offered to those who do not have these impairments. This requirement will service to bridge the gap between the communications impaired telephone and the community at large. To participate actively in society, one must have the ability to call firends, family, businesses, and employers.

Current technology allows for communications between a TDD user and a voice telephone user by employing a type of relay system. Such systems include a third party operator who completes the connection between the two parties and who transmits messages back and forth in real time between the TDD user and the hearing individual. The originator of the call communicates to the operator either by voice or TDD. The operator then uses a video display system to translate the typed or voice message simultaneously from one medium to the other.

Although the Committee notes that relay systems represent the current state-of-the-art, this legislation is not intended to discourage innovation regarding telecommunications services to individuals with hearing and speech impairments. The hearing- and speech-impaired communities should be allowed to benefit from advancing technology. As such, the provisions of this section do not seek to entrench current technology but rather to allow for new, more advanced, and more efficient technology.

The Committee intends that the FCC have sufficient enforcement authority to ensure that telecommunications relay services are provided nationwide and that certain minimum federal standards are met by all providers of such services. The FCC's authority over the provision of intrastate telecommunications relay services, however, is expressly limited by certification procedures required to be established under this section whereby a state retains jurisdiction over the intrastate provision of telecommunications relay services.

The Committee finds it necessary to grant the FCC such residual authority in this instance to ensure universal service to the hearing- and speech-impaired community. Although a number of states have mandated statewide relay systems, the majority of states have not done so. Moreover, the systems that do exist vary greatly in quality and accessibility. The Committee finds that to ensure universal service to this population of users, service must be made uniformly available on a local, intrastate, and interstate basis. It is the Committee's hope and expectation, however, that all states will seek certification in a timely manner and that the FCC will not find it necessary to exercise its enforcement authority. It is essential to this population's well-being, self-sufficiency and full integration into society to be able to access the telecommunications network and place calls nationwide without regard to geographic location.

Attaining meaningful universal service for this population also requires that some level of minimum federal standards for service, service quality, and functional equivalency to voice telephone services be established and maintained. The FCC is therefore required to establish certain minimum federal standards that all telecommunications relay service providers must meet.

By requiring telecommunications relay services to be provided throughout the United States, this section takes a major step towards enabling individuals with hearing and speech impairments to achieve the level of independence in employment, public accommodations and public services sought by other sections of the Americans with Disabilities Act. The Committee concludes that expanding the FCC's authority in this instance will both promote interstate commerce and be of benefit to all Americans.

The grant of jurisdiction to the FCC is limited, however, by the state certification procedures required to be established under this section. It is the Committee's intention that these procedures operate to preserve initiatives by a state or group of states to implement a telecommunications relay services program within that state or within a region either through the state itself, through designees, or through regulation of intrastate common carriers. As such, the section provides that any state may regulate intrastate telecommunications relay services provided by intrastate carriers once the state is granted certification by the FCC. The FCC is to establish clearly defined procedures for requesting certification and a review process to ensure that a state program, however it is provided, satisfies the minimum standards promulgated under this section. The certification procedures and review process should afford the least possible intrusion into state jurisdiction consistent with the goals of this section to have nationwide universal service for hearing- and speech-impaired individuals.

The Committee intends that telecommunications relay services be governed by minimum federal standards that will ensure that telephone service for hearing and speech impaired individuals is functionally equivalent to telephone services offered to hearing individuals. Such standards, however, should not have the effect of freezing technology or thwarting the introduction of a superior or more efficient technology.

Cost recovery for telecommunications relay services will be determined by the FCC in the case of interstate telecommunications relay services and by certified states in the case of intrastate telecommunications relay services. While states are granted the maximum latitude to determine the method of cost recovery for intrastate relay services provided under their jurisdiction, the FCC is specifically prohibited from allowing the imposition of a flat monthly charge on residential end users to recover the costs of providing interstate telecommunications relay service. It is the Committee's expectation that the costs of providing telecommunications relay services will be considered a legitimate cost of doing business and therefore a recoverable expense through the regulatory ratemaking process.

Definitions

Section 225(a) defines: (1) "Common Carrier or Carrier" to include interstate carriers and intrastate carriers for purposes of this section only; (2) "TDD" to mean a machine that may be used by a variety of disabled individuals such as deaf, hard of hearing, deaf-blind, or speech impaired individuals and that employs graphic communications through the transmission of coded signals over telephone wires; and (3) "Telecommunications relay services" to mean telephone transmission services that allow a hearing- and/or speech-impaired individual to communicate in a manner that is functionally equivalent to voice communications services offered to hearing individuals. The term includes, but is not limited to, TDD relay services.

Availability of telecommunications relay services

Section 225(b)(1) states that in furtherance of the goals of universal service, the FCC must ensure that interstate and intrastate telecommunications relay services are provided to the greatest extent possible and in the most efficient manner.

Section 225(b)(2) extends the remedies, procedures, rights and obligations applicable to interstate carriers under the Communications Act of 1934, as amended, to intrastate carriers for the limited purpose of implementing and enforcing the requirements of this section.

Provision of services

Section (c) requires that carriers providing telephone voice transmission services provide telecommunications relay services within two years after the date of enactment of this section. Carriers are to offer to hearing- and speech-impaired individuals services which are functionally equivalent to telephone services provided to hearing individuals including providing services with the same geographic radius that they offer to hearing individuals. Carriers are granted the flexibility to provide such services either individually, in concert with other carriers, or through designees. In exercising this flexibility to appoint designees, however, carriers must ensure that all requirements of this section are complied with.

Regulations

Section (d) requires the FCC to prescribe the necessary rules and regulations to carry out the requirements of this section within one year of its enactment.

Also, given the unique and specialized needs of the population that will be utilizing telecommunications relay services, the FCC should pay particular attention to input from representatives of the hearing and speech impaired community. It is recommended that this input be obtained in a formal manner such as through an advisory committee that would represent not only telecommunications relay service consumers but also carriers and other interested parties. The Committee notes that the FCC has already issued several notices on the creation of an interstate relay system and the most efficient way such a system could be provided. While the FCC is afforded a significant amount of flexibility in implementing the goals of this section, subsection (d) requires that the FCC establish certain minimum standards, practices and criteria applicable to all telecommunications relay services and service providers as follows:

Section (d)(1)(A) requires the FCC to establish functional requirements, guidelines, and operational procedures for the provision of telecommunications relay services. One of these requirements shall be that all carriers subject to this section shall provide telecommunications relay services on a non-discriminatory basis to all users within their serving area. The FCC should pursue means in which the goals of this section may be met in the most efficient manner. In addition, the Commission should include specific language requiring that operators be sufficiently trained so as to effectively meet the specialized communications needs of individuals with hearing and speech impairments, including sufficient skills in typing, grammar and spelling.

Section (d)(1)(B) requires the FCC to establish minimum federal standards to be met by all providers of intrastate and interstate telecommunications relay services including technical standards, quality of service standards, and the standards that will define functional equivalence between telecommunications relay services and voice telephone transmission services. Telecommunications relay services are to be governed by standards that ensure that telephone service for hearing- and speech-impaired individuals is functionally equivalent to voice services offered to hearing individuals. In determining factors necessary to establish functional equivalency, the FCC should include, for example, the requirement that telecommunications relay services transmit messages between the TDD and voice caller in real time, as well as the requirement that blockage rates for telecommunications relay services be no greater than standard industry blockage rates for voice telephone services. Other factors that should be included are the opportunity for telecommunications relay service users to choose an interstate carrier whenever possible. The FCC should enumerate other such measurable standards to ensure that hearing and non-hearing individuals have equivalent access to the Nation's telephone networks.

Section (d)(1)(C) requires that such telecommunications relay services operate 24 hours a day, seven days a week.

Section (d)(1)(D) requires that users of telecommunications relay services pay rates no greater than the rates paid for functionally equivalent voice communication with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination. Although the Committee commends states that have chosen to implement a discount, this section is not intended to mandate a rate discount with respect to call duration.

Section (d)(1)(E) prohibits relay operators from refusing calls or limiting the length of calls that use such relay services.

Section (d)(1)(F) prohibits relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of that call. The Committee recognizes that printed records of such calls may be necessary to complete the call; however, this requirement is to ensure that records are not kept after termination of the conversation. In addition, the Committee recognizes that it may be technically impossible today to relay recorded messages in their entirety because TDDs can only transmit messages at a given speed. In these situations, a hearing or speech impaired individual should be given the option to have the message summarized.

Section (d)(1)(G) prohibits relay operators from intentionally altering any relayed conversation.

Section (d)(2) requires that the FCC ensure that regulations prescribed to implement this section encourage the use of state-of-the-art technology. Such regulations should not have the effect of freezing technology or thwarting the introduction of a superior or more efficient technology.

Section (d)(3) states that the Commission should issue regulations to govern the separation of costs for the services provided pursuant to this section. No change to the procedures for allocating joint costs between the interstate and intrastate jurisdictions as set forth elsewhere in the Communications Act of 1934 is intended.

Section (d)(4) prohibits the Commission from allowing the imposition of a fixed monthly charge on residential customers to recover the costs of providing interstate telecommunications relay services. However, the manner in which the costs of providing intrastate telecommunications relay services are recovered is left to the discretion of certified states. It is the Committee's expectation that the costs of providing such services will be considered a legitimate cost of doing business and therefore a recoverable expense through the regulatory ratemaking process.

Section (d)(5) grants the FCC flexibility to extend the date of full compliance with the requirements of this Section by one year for any carrier or group of carriers that it finds will be unduly burdened. Interested parties should be given an opportunity to comment on any such request for an extension and such requests should not be granted without compelling justification.

Enforcement

Section (e)(1) requires that the Commission enforce the requirements of this section subject to subsections (f) and (g). The Committee intends that the FCC have sufficient enforcement authority to ensure that telecommunications relay services are provided nationwide and that certain minimum federal standards are met by all providers of the service. The FCC's authority over the provision of intrastate telecommunications relay services, however, is expressly limited by certification procedures required to be established under subsection (f) whereby a state retains jurisdiction over the intrastate provision of telecommunications relay services.

Section (e)(2) requires that the Commission resolve any complaint by final order within 180 days after that complaint has been filed.

Certification

Sections (f) (1) and (2) describe the state certification procedure whereby states may apply to reassert jurisdiction over the provision of intrastate telecommunications relay services. The FCC may grant certification upon a showing that such services are being made available in the state and that they comply with the federal guidelines and standards promulgated pursuant to section (d). A state plan may make service available through the state itself, through designees or through regulation of intrastate carriers.

Section (f)(3) states that, except for reasons affecting rules promulgated pursuant to section (d), the FCC may not deny certification to a state based solely on its chosen method of funding the provision of intrastate telecommunications relay services. Section (d), however, would require that a state program not include cost recovery mechanisms that would have the effect of requiring users of telecommunications relay services to pay effectively higher rates than those paid for functionally equivalent voice communications services. Additionally, the Committee urges that because this service is of benefit to all society that any funding mechanism not be labeled so as to unduly prejudice the hearing- and speech-impaired community.

Section (f)(4) allows for the Commission to revoke such certification, if after notice and opportunity for hearing, the Commission determines that certification is no longer warranted.

Complaint

Section (g)(1) states that when a complaint is filed with the Commission that alleges a violation of this section with respect to the provision of intrastate telecommunication relay services, the Commission shall refer such complaint to the appropriate State commission if that State has been duly certified by the FCC pursuant to section (f). If the appropriate State has not been duly certified, then the Commission will handle the complaint pursuant to sections (e) (1) and (2).

Once a complaint has been properly referred to a State Commission, subsection (g)(2) permits the FCC to exercise its jurisdiction over such a complaint only if final action has not been taken within 180 days after the complaint is filed with the State, or within a shorter period as prescribed by the regulations of such State, or if the Commission determines that a State program no longer qualifies for certification under section (f).

TITLE V—MISCELLANEOUS PROVISIONS

Construction

Section 501 of the legislation specifies the relationship between this legislation and the Rehabilitation Act of 1973 and other Federal, State or local laws. Section 501 also specifies the relationship between this legislation and the regulation of insurance.

With respect to the Rehabilitation Act of 1973, section 501(a) of the legislation specifies that nothing in this legislation should be construed to reduce the scope of coverage or apply a lesser standard than the coverage required or the standards applied under title V of the Rehabilitation Act of 1973 (29 U.S.C. 790 et seq.) or the regulations issued by the Federal agencies pursuant to such title.

With respect to other laws, section 501(b) of the legislation specifies that nothing in this legislation should be construed to invalidate or limit any other Federal law or law of any State or political subdivision of any State or jurisdiction that provides greater protection for the rights of individuals with disabilities that are afforded by this legislation. This legislation could be construed to be in conflict with other laws governing spaces or worksites, for example OSHA requirements. The Committee expects the Attorney General to exercise coordinating authority to avoid and eliminate conflicts.

With respect to insurance, section 501(c) of the legislation specifies that titles I, II, and III of this legislation shall not be construed to prohibit or restrict—

> (1) An insurer, hospital or medical service company, health maintenance organization, or any agent, or entity that administers benefit plans, or similar organizations from underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or
>
> (2) Any person or organization covered by this Act from establishing, sponsoring or observing the terms of a bona fide benefit plan which terms are based on underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law;

provided that points (1) and (2) are not used as a subterfuge to evade the purposes of titles I, II and III of this legislation.

As indicated earlier in this report, the main purposes of this legislation include prohibiting discrimination in employment, public services, and places of public accommodation. The Committee does not intend that any provisions of this legislation should affect the way the insurance industry does business in accordance with the State laws and regulations under which it is regulated.

Virtually all States prohibit unfair discrimination among persons of the same class and equal expectation of life. The ADA adopts this prohibition of discrimination. Under the ADA, a person with a disability cannot be denied insurance or be subject to different terms or conditions of insurance based on disability alone, if the disability does not pose increased risks.

Since there is some uncertainty over the possible interpretations of the language contained in titles I, II and III as it applies to insurance, the Committee added section 501(c) to make it clear that this legislation will not disrupt the current nature of insurance underwriting or the current regulatory structure for self-insured employers or of the insurance industry in sales, underwriting, pricing, administrative and other services, claims, and similar insurance related activities based on classification of risks as regulated by the States.

However, the decision to include this section may not be used to evade the protections of title I pertaining to employment, title II pertaining to public services, and title III pertaining to public accommodations beyond the terms of points (1) and (2), regardless of the date an insurance plan or employer benefit plan was adopted.

For example, an employer could not deny a qualified applicant a job because the employer's current insurance plan does not cover the person's disability or because of the increased costs of the insurance.

Moreover, while a plan which limits certain kinds of coverage based on classification of risk would be allowed under this section, the plan may not refuse to insure, or refuse to continue to insure, or limit the amount, extent, or kind of coverage available to an individual, or charge a different rate for the same coverage solely because of a physical or mental impairment, except where the refusal, limitation, or rate differential is based on sound actuarial principles or is related to actual or reasonably anticipated experience.

For example, a blind person may not be denied coverage based on blindness independent of actuarial risk classification. Likewise, with respect to group health insurance coverage, an individual with a pre-existing condition may be denied coverage for that condition for the period specified in the policy but cannot be denied coverage for illnesses or injuries unrelated to the pre-existing condition.

Specifically, point (1) makes it clear that insurers may continue to sell to and underwrite individuals applying for life, health, or other insurance on an individually underwritten basis, or to service such insurance products.

Point (2) recognizes the need for employers, and/or agents thereof, to establish and observe the terms of employee benefit plans, so long as these plans are based on underwriting or classification of risks.

In both cases, points (1) and (2) shall not be used as a subterfuge to evade the purposes of titles I, II and III of the legislation, regardless of the date the insurance plan or employer benefit plan was adopted.

As explained previously in this report, the Committee also wishes to clarify that in its view, as is stated by the U.S. Supreme Court in *Alexander* v. *Choate*, 469 U.S. 287 (1985), employee benefit plans should not be found to be in violation of this legislation under impact analysis simply because they do not address the special needs of every person with a disability, e.g., additional sick leave or medical coverage.

Moreover, this subsection must be read to be consistent with subsection (b) of section 501 pertaining to other Federal and State laws.

In sum, section 501(c) is intended to afford to insurers and employers the same opportunities they would enjoy in the absence of this legislation to design and administer insurance products and benefit plans in a manner that is consistent with basic principles of insurance risk classification. Without such a clarification, this legislation could arguably find violative of its provisions any action taken by an insurer or employer which treats disabled persons differently under an insurance or benefit plan because they represent an increased hazard of death or illness.

The provisions recognize that benefit plans (whether insured or not) need to be able to continue present business practices in the way they underwrite, classify, and administer risks, so long as they carry out those functions in accordance with accepted principles of insurance risk classification.

While the bill is intended to apply nondiscrimination standards equally to self-insured plans as well as to third-party payer and third-party administered plans with respect to persons with disabilities, section 501(c) of this legislation should not be interpreted as subjecting self-insured plans to any State insurance laws of general application regarding underwriting risks, classifying risks, or administering such risks that are otherwise preempted by the Employee Retirement Income Security Act of 1974 (ERISA).

Prohibition against retaliation and coercion

Section 502(a) of the legislation specifies that no individual shall discriminate against any other individual because such other individual has opposed any act or practice made unlawful by this Act or because such other individual made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this Act.

Section 502(b) of the legislation specifies that it shall be unlawful to coerce, intimidate, threaten, or interfere with any person in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her have aided or encouraged any other person in the exercise or enjoyment of, any right granted or protected by this legislation.

Section 502(c) of the legislation specifies that the remedies and procedures available under sections 106, 205, and 308 shall be available to aggrieved persons for violations of subsections (a) and (b).

State immunity

Section 503 of the legislation specifies that a State shall not be immune under the Eleventh Amendment to the Constitution of the United States from an action in Federal court for a violation of this Act. In any action against a State for a violation of the requirements of this Act, remedies (including remedies both at law and in equity) are available for such a violation to the same extent as such remedies are available for such a violation in an action against any public or private entity other than a State.

This provision is included in order to comply with the standards for covering states set forth in the *Atascadero State Hospital* v. *Scanlon*, 105 S. Ct. 3142 (1985).

Regulations by the Architectural and Transportation Barriers Compliance Board

Section 504 specifies that not later than 6 months after the date of enactment of this Act, the Architectural and Transportation Barriers Compliance Board shall issue minimum guidelines that shall supplement the existing Minimum Guidelines and Requirements for Accessible Design for purposes of titles II and III.

These guidelines shall establish additional requirements, consistent with this Act, to ensure that buildings, facilities, and vehicles are accessible, in terms of architecture and design, transportation, and communication, to individuals with disabilities.

The "Minimum Guidelines and Requirements for Accessible Design" (MGRAD), as issued and revised by the Board have provided guidance to four Federal standard-setting agencies (the General Services Administration, the Department of Defense, the Department of Housing and Urban Development, and the U.S. Postal Service) in their regulations establishing the Uniform Federal Accessibility Standards (UFAS).

The ADA directs the Board to issue supplemental guidelines and requirements to guide two additional Federal standard-setting agencies—the Department of Transportation and the Department of Justice—in their development of regulations under this legislation.

The development of supplemental MGRAD will require the Board to complete and expand its previous guidelines and requirements. There are some areas within the Board's MGRAD authority in which it has not yet issued minimum guidelines. One such example is the area of recreation. In 1985, the Federal Government Working Group on Access to Recreation Developed for the Board a technical paper titled, "Access to Outdoor Recreation Planning and Design," including technical requirements and specific guidelines, but the Board has not officially issued minimum guidelines and requirements in this area. The Committee expects the Board to take prompt action to complete the filling of such gaps in the existing MGRAD.

In issuing the supplemental minimum guidelines and requirements called for under this legislation, the Board should consider whether other revisions or improvements of the existing MGRAD (including scoping provisions) are called for to achieve consistency with the intent and the requirements of this legislation. Particular attention should be paid to providing greater guidance regarding communication accessbility.

In no event shall the minimum guidelines issued under this legislation reduce, weaken, narrow, or set less accessibility standards than those included in existing MGRAD.

This legislation also explicitly provides that the Board is to develop minimum guidelines for vehicles. The Committee intends that the Board shall issue minimum guidelines regarding various types of conveyances and means of transport that come within the ambit of titles II and III of the legislation. Such guidelines should include specifications regarding wheelchair lifts and ramps on vehicles where necessary for boarding and getting off. The Board should also review its minimum guidelines regarding stations and other places of boarding or departure from vehicles to make sure that they are coordinated with and complementary to the minimum guidelines regarding vehicles.

Attorneys fees

Section 505 specifies that in any action or administrative proceeding commenced pursuant to this Act, the court or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

Technical assistance

Section 506 specifies that the Attorney General, in consultation with the Secretary of Transportation, the Chairman of the Federal Communications Commission, and the Secretary of Commerce, shall, within 180 days after the enactment of this legislation, develop and implement a plan to assist entities covered under this legislation.

The Attorney General is authorized to obtain the assistance of other Federal agencies in carrying out his or her responsibilities.

VII. Regulatory Impact

In accordance with paragraph 11(b) of rule XXVI of the Standing Rules of the Senate, the following statement of the regulatory impact of S. 933 is made:

A. ESTIMATED NUMBER OF INDIVIDUALS AND BUSINESSES REGULATED AND THEIR GROUPS OR CLASSIFICATIONS

S. 933 would regulate all private sector employers with 15 or more employees. Data from the Equal Employment Opportunity Commission for 1989 put the number of employers with 15 or more employees at 666,000. The bill would regulate all units of State and local government, which do not receive Federal aid. The total number of units of State and local government in the United States is 83,250. Many of these units of government already are subject to section 504 of the Rehabilitation Act of 1973, as amended, which contains similar requirements to this bill.

S. 933 would also regulate private businesses engaged in commerce and open to the general public, of which Census Bureau figures indicate there are approximately 3.9 million. For new construction, the ADA will add accessibility requirements not already contained in existing State laws to 44 percent of new commercial construction.

There are over 1500 telephone common carriers in the United States that will be subject to the provisions of this law. The law permits these companies to act in concert or to contract out to third parties to provide this service over their networks, much as they do today in providing various forms of operator services. The legislation deliberately leaves these options to the carriers in order to encourage them to find the most economically efficient means of providing the service.

Approximately forty-three million persons with disabilities will be entitled to the protections of this legislation as employees, job applicants, clients and customes of places of public accommodation, and users of telephone services. There are approximately 24 million hearing impaired and 2.75 million speech impaired persons in the United States that will benefit from having telecommunication relay service available to them.

B. ECONOMIC IMPACT ON THE INDIVIDUALS, CONSUMERS AND BUSINESSES AFFECTED

Individuals with disabilities will have barriers to participation in all aspects of our society eliminated, permitting them to be employed, use public transportation, enjoy the services of State and local governments and public accommodations and use telephone services.

Savings to the public and private sectors in the form of increased earnings for people with disabilities and decreased government benefit and private insurance and benefit payments is estimated to be in the billions of dollars per year.

Costs to businesses for reasonable accommodations are expected to be less than $100.00 per worker for 30% of workers needing an accommodation, with 51% of those needing an accommodation requiring no expenses at all. A Louis Harris national survey of people with disabilities found that among those employed, accommodations were provided in only 35% of the cases.

For renovation and new construction, costs of accessibility are generally between zero and one percent of the construction budget. For new buses, lifts are available for approximately $11,000 per bus, with a Federal subsidy for 80% of the capital costs of municipal buses. There are no reliable figures for determining how much the provision of telecommunications relay service will cost. AT&T has informally estimated the cost to be around $300 million, while the Federal Communications Commission's estimate is $250 million. This translates to about $1.20 per customer per year.

Impact of the act on personal privacy

The Committee believes that this legislation has no significant impact on personal privacy. With respect to telecommunications, the legislation contains provisions to ensure that the privacy of the individuals using the service is protected. Section 225(d)(1)(F) of the Communications Act of 1934, as added by this legislation, specifically prohibits relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any conversations beyond the duration of the call. Section 225(d)(1)(G) also prohibits relay operators from intentionally altering a relayed conversation. The Federal Communications Commission is directed to adopt regulations to enforce these provisions. Violators of these provisions are subject to the penalty provisions contained in the Communications Act.

Additional paperwork, time and costs

With respect to titles I (employment), II (public services), and III (public accommodations), the bill would result in some additional paperwork, time and costs to the EEOC, the Justice Department, and the Department of Transportation, which are entrusted with the enforcement of the Act. The bill does not contain additional recordkeeping requirements.

With respect to title IV (telecommunication relay services), this legislation will require minimal amount of paperwork. The Federal Communications Commission must adopt rules to implement this legislation, and for this purpose should collect and review comments from interested parties. The Commission has an outstanding rulemaking proceeding at the present time which can be supplemented to implement this legislation. This should reduce the regulatory burden on the Commission and interested parties. Some additional paperwork will be required of States that wish to certify their programs with the Commission. One certified, however, the enforcement and paperwork burdens will be transferred to the State with minimal oversight by the Commission. Further, once the carriers have established systems that comply with this legislation, additional oversight and paperwork should be minor.

VIII. COST ESTIMATE

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, August 29, 1989.

Hon. EDWARD M. KENNEDY,
Chairman, Committee on Labor and Human Resources,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has reviewed S. 933, the Americans with Disabilities Act of 1989, as ordered reported by the Committee on Labor and Human Resources on August 2, 1989. CBO estimates enactment of S. 933 would result in no direct spending by the federal government. The bill would require several agencies to establish regulations and standards with regard to this bill. We estimate the costs of these activities to be $20 million in fiscal year 1990 and $19 million annually in 1991-1994, assuming appropriation of the necessary funds. The costs to state and local governments are likely to be greater, particularly for improvements in transit systems. While these costs cannot be precisely estimated, they are discussed under costs to state and local governments.

If enacted, S. 933 would prohibit discrimination against people with disabilities in areas such as employment practices, public accommodations and services, transportation services and telecommunication services. S. 933 would require that the Equal Employment Opportunities Commission, the Department of Transportation, the Architectural and Transportation Barriers Compliance Board, the Department of Justice, and the Federal Communications Commission develop and issue regulations and standards for implementation and enforcement of this Act.

IMPACT ON THE FEDERAL BUDGET

Equal Employment Opportunities Commission (EEOC).—Title II—Public Services—would prohibit discrimination by employers against qualified individuals with disabilities. S. 933 would require the EEOC to issue regulations to carry out Title II and to provide for enforcement of the provisions. Although no specific authorization level is stated in the bill, CBO estimates this cost would be $15 million annually. This estimate is based on the EEOC's past experience with enforcing civil rights standards and assumes that approximately 240 additional full-time employees would be need for the Commission's 52 field offices and that approximately 70 additional staff would be needed for the EEOC headquarters.

Department of Transportation.—S. 933 would direct the Secretary of Transportation to issue regulations within one year including standards applicable to the facilities and vehicles covered by these provisions. CBO estimates that the cost to the federal government of developing these regulations would be about $0.5 million in fiscal year 1990. In addition, the federal government might bear some part of the costs of making transit services accessible to the handicapped, which are discussed below. The capital and operating costs of most mass transit systems are heavily subsidized by the federal government through grants by the Urban Mass Transportation Administration. We cannot predict the extent to which these grants might be increased to compensate for the additional costs attributable to S. 933.

Architectural and Transportation Barriers Compliance Board.—S. 933 would require the board to develop, issue, and maintain minimum guidelines for the design of accessible buildings, facilities and vehicles, and to establish an advisory committee for the following study. The board would be required to undertake a study to determine (1) the needs of individuals with disabilities with regards to buses and (2) a cost-effective method for making buses accessible and usable by those with disabilities. Although no specific authorization level is stated in the bill, CBO estimates the cost of the guidelines, study and advisory committee would be $0.3 million in fiscal year 1990, $0.3 million in 1991, $0.1 million in 1992, $0.1 million in 1993 and $0.2 million in 1994. The cost estimate for this section fluctuates because: (1) salaries and expense costs ($104,000) are reflected in all years, (2) the study costs ($150,000) are reflected in fiscal years 1990 and 1991, (3) the advisory committee costs ($40,000) are reflected in 1991 and 1992, and (4) the research contracts costs ($80,000) for updating the minimum guidelines are reflected in 1994. This estimate assumes that 2.5 additional full-time employees would be needed as well as additional research contracts for the study and guidelines.

Department of Justice.—S. 933 also would require the Attorney General to develop regulations to carry out sections 201 and 202 of Title II—Public Services—and to investigate alleged violations of Title III—Public Accommodations—which includes undertaking periodic reviews of compliance of covered entities under Title III. These regulations would ensure that a qualified individual with a disability would not be excluded from participation in, or denied benefits by a department, agency, special purpose district or other instrumentality of a state or local government. Based on discussions with staff in the Department of Justice and on comparisons with the costs of similar tasks in other agencies, we estimate the cost of these activities would be $4 million annually.

Federal Communications Commission (FCC).—S. 933 requires the FCC to prescribe and enforce regulations with regards to telecommunications relay services. These regulations include: (1) establishing functional regulations, guidelines and operations for telecommunications relay services, (2) establishing minimum standards that shall be met by common carriers, and (3) ensuring that users of telecommunications relay services pay rates no greater than rates paid for functionally equivalent voice communication services with respect to duration of call, the time of day, and the distance from point of origination to point of termination. While no authorization level is stated, CBO estimates the cost of developing and enforcing these regulations to be $0.1 million in fiscal year 1990, negligible in fiscal year 1991, $0.2 million in 1992, $0.2 million in 1993, and $0.1 million in 1994. The FCC anticipates a lull in fiscal year 1991 because the states will be designing telecommunications relay systems and there won't be much FCC involvement. During fiscal years 1992 and 1993, the actual certification and evaluation of state programs would occur.

In addition to the federal costs of establishing and enforcing new regulations, S. 933 could also affect the federal budget indirectly through changes in employment and earnings. If employment patterns and earnings were to change, both federal spending and federal revenues could be affected. There is, however, insufficient data to estimate these secondary effects on the federal budget.

COSTS TO STATE AND LOCAL GOVERNMENTS

Public Buildings.—S. 933 would mandate that newly constructed state and local public buildings be made accessible to the handicapped. All states currently mandate accessibility in newly constructed state-owned public buildings and therefore would incur little or no costs if this bill were to be enacted. It is possible, however, in rare cases, for some local governments not to have such law. These municipalities would incur additional costs for making newly-constructed, locally-owned public buildings accessible if this bill were to become law. According to a study conducted by the Department of Housing and Urban Development in 1978, the cost of making a building accessible to the handicapped is less than one percent of total construction costs. This estimate assumes that the accessibility features are included in the original building design. Otherwise, the costs could be much higher.

Public Transit.—Due to the limited time available to prepare this estimate, CBO cannot provide a comprehensive analysis of the impact of S. 933 on mass transit costs of state and local governments. The scope of the bill's requirements in this area is very broad, many provisions are subject to interpretation, and the potential effects on transit systems are significant and complex. While we have attempted to discuss the major potential areas of cost, we cannot assign a total dollar figure to these costs.

S. 933 would require that all new buses and rail vehicles be accessible to handicapped individuals, including those who use wheelchairs, and that public transit operators offer paratransit services as a supplement to fixed route public transportation. In addition, the bill includes a number of requirements relating to the accessibility of mass transportation facilities. Specifically, all new facilities, alterations to existing facilities, intercity rail stations, and key stations in rapid rail, commuter rail, and light rail systems would have to be accessible to handicapped persons.

Bus and Paratransit Services.—CBO estimates that it would cost state and local governments between $20 million and $30 million a year over the next several years to purchase additional lift-equipped buses as required by S. 933. Additional maintenance costs would increase each year as lift-equipped buses are acquired, and would reach $15 million by 1994. The required paratransit systems would add to those costs.

Based on the size of the current fleet and on projections of the American Public Transit Association (APTA), CBO expects that public transit operators will purchase about 4,300 buses per year, on average, over the next five years. About 37 percent of the existing fleet of buses is currently equipped with lifts to make them accessible to handicapped individuals and, based on APTA projections, we estimate that an average of 55 percent to 60 percent of future bus purchases will be lift-equipped in the absence of new legislation. Therefore, this bill would require additional annual purchases of about 1,900 lift-equipped buses. Assuming that the added cost per bus for a lift will be $10,000 to $15,000 at 1990 prices, operators would have to spend from $20 million to $30 million per year, on average, for bus acquisitions as a result of this bill.

Maintenance and operating costs of lifts have varied widely in different cities. Assuming that additional annual costs per bus average $1,500, we estimate that it would cost about $2 million in 1990, increasing to $15 million in 1994, to maintain and operate the additional lift-equipped buses required by S. 933.

In addition, bus fleets may have to be expanded to make up for the loss in seating capacity and the increase in boarding time needed to accommodate handicapped persons. The cost of expanding bus fleets is uncertain since the extent to which fleets would need to be expanded depends on the degree to which handicapped persons would utilize the new lift-equipped buses. If such use increases significantly, added costs could be substantial.

These costs are sensitive to the number of bus purchases each year, which may vary considerably. In particular, existing Environmental Protection Agency emissions regulations may result in accelerated purchases over the next two years as operators attempt to add to their fleets before much more stringent standards for new buses go into effect. Such variations in purchasing patterns would affect the costs of this bill in particular years. In addition, these estimates reflect total costs for all transit operators, regardless of their size. Costs may fall disproportionately on smaller operators, who are currently more likely to choose options other than lift-equipped buses to achieve handicapped access.

The bill also requires transit operators to offer paratransit or other special transportation services providing a level of service comparable to their fixed route public transportation to the extent that such service would not impose an "undue financial burden". Because we cannot predict how this provision will be implemented, and because the demand for paratransit services is very uncertain, we cannot estimate the potential cost of the paratransit requirement, but it could be significant. The demand for paratransit services probably would be reduced by the greater availability of lift-equipped buses.

Transit Facilities.—We expect that the cost of compliance with the provisions concerning key stations would be significant for a number of transit systems, and could total several hundred million dollars (at 1990 prices) over twenty years. The precise level of these costs would depend on future interpretation of the bill's requirements and on the specific options chosen by transit systems to achieve accessibility. The costs properly attributable to this bill would also depend on the degree to which transit operators will take steps to achieve accessibility in the absence of new legislation.

In 1979, CBO published a study (*Urban Transportation for Handicapped Persons: Alternative Federal Approaches,* November 1979) that outlined the possible costs of adapting rail systems for handicapped persons. In that study, CBO estimated that the capital costs of adapting key subway, commuter and light rail stations and vehicles for wheelchair users would be $1.1 billion to $1.7 billion, while the additional annual operating and maintenance costs would be $14 million to $21 million.

Based on a 1981 survey of transit operators, the Department of Transportation has estimated that adapting key stations and transit vehicles would require additional capital expenditures of $2.5 billion over 30 years and would result in additional annual operating costs averaging $57 million (in 1979 dollars) over that period. Many groups representing the handicapped asserted that the assumptions and methodology used by the transit operators in this survey tended to severely overstate these costs. The department estimated that the cumulative impact of using the assumptions put forth by these groups could lower the total 30-year costs to below $1 billion.

CBO believes that the figures in both these studies significantly overstate the cost of the requirements of S. 933, because, in the intervening years, several of the major rail systems have begun to take steps to adapt a number of their existing stations for handicapped access. In addition, based on a draft of language in the committee's report on this bill, we expect that the number of stations that would be defined as "key" under this bill would be much lower than that assumed in either of those studies. Furthermore, the Metropolitan Transit Authority in New York and the Southeastern Pennsylvania Transportation Authority in Philadelphia, two large rail systems, have entered into settlement agreements with handicapped groups that include plans for adaptation of key stations. The committee's draft report language indicates that these plans would satisfy the bill's requirement for accessibility of key stations. Other rail systems are also taking steps to make existing stations accessible. Therefore, we expect that the cost of the bill's requirements concerning key stations would probably not be greater than $1 billion (in 1990 dollars) and might be considerably less.

If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contacts are Cory Leach (226-2820) and Marjorie Miller (226-2860).

Sincerely,

ROBERT D. REISCHAUER,
Director.

IX. CHANGES IN EXISTING LAWS

In the opinion of the Committee, it is necessary to dispense with the requirements of paragraph (12) of rule XXVI of the Standing Rules of the Senate in order to expedite the business of the Senate.

ADDITIONAL VIEWS OF SENATOR HATCH

The story of America is one of ever growing inclusiveness, as more and more Americans have become able to participate in the great mainstream of American life. Persons with disabilities, no less than other Americans, are entitled to an equal opportunity to participate in the American dream.

Indeed, through their own efforts, and with the benefit of a growing array of programs and antidiscrimination provisions at the local, state, and federal levels designed to enhance their abilities to lead lives of independence, not dependence, persons with disabilities have long been writing an inspiring chapter in this quintessential American story. Persons with disabilities, through their hard work and determination, have already made great advances and destroyed many stereotypes which have been used to deny them equal opportunities in the past. They have demonstrated they are no "insular minority" in America. But more can still be done to provide equal opportunity for persons with disabilities.

At the outset of the hearings on S. 933, I stated my support for a comprehensive federal civil rights bill banning discrimination against persons with disabilities. Such protection against discrimination is long overdue. At the same time, I also expressed the view that such legislation must be both meaningful and reasonable. Accordingly, I was unable to endorse S. 933, as introduced. There were several serious problems with S. 933, as introduced, including: its excessive penalty scheme; its breadth of coverage of "public accommodations"; its significant departure from the standards of Section 504 of the Rehabilitation Act of 1973, which bans disability discrimination in programs or activities receiving federal aid and in federally conducted programs; and its onerous treatment of the private bus industry.

The substitute version, which emerged from a period of negotiations and was adopted unanimously by the Labor and Human Resources Committee, is still not a perfect compromise. It retains features that I believe merit further improvement. But it incorporated enough important changes to enable me to cosponsor it at the mark-up, while I reserved my right to pursue further changes on the Floor.

At the mark-up, the Committee accepted an amendment which I offered, requiring the Attorney General, in consultation with other federal agencies, to develop and implement a plan to assist covered entities in understanding their duties under the bill.

I also have further concerns about the bill in certain areas.

I. SMALL BUSINESS EXEMPTION FOR PUBLIC ACCOMMODATIONS

Title I of the bill bans employment discrimination and is effective in two years. At that time, the employment discrimination provisions will apply to employers with 25 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding year. Two years thereafter—four years after enactment—the employment provisions will apply to employers of 15 or more employees.

Title III of the bill covers "public accommodations and services operated by private entities." Private entities defined as "potential places of employment" are subject only to accessibility requirements concerning new facilities designed and constructed for first occupancy later than 30 months after the bill's enactment. These entities include facilities intended for nonresidential use and whose operations affect commerce. Section 301(2).

Private entities defined as "public accommodations," which include much of the private sector, are subject not only to this new construction requirement but also to a wide variety of prohibitions and obligations with respect to their existing facilities and general policies. These prohibitions and obligations pertain to a business in its treatment of customers, clients, and visitors.

The term "public accommodation" is defined very broadly. It includes not only businesses covered by Title II of the 1964 Civil Rights Act, which bans racial, ethnic, and religious discrimination in public accommodations, defined as places of eating; places of lodging; places of entertainment; and gasoline stations, but it also includes retail stores, service establishments, and other elements of the private sector. Section 301(e).[1]

This ban on discrimination in privately operated "public accommodations" in Title III of the bill is effective 18 months after enactment. In stark contrast to the small business exemption from the bill's employment provisions, however, the bill contains no small business entity exemption whatsoever from these public accommodations provisions.

Thus, the bill creates the following anomaly: a mom-and-pop grocery store is not subject to the bill when it hires a clerk as a new employee, but it is subject to all of the bill's requirements in its treatment of customers, as well as to an extremely onerous penalty scheme when it violates any of these requirements.

Even under the standards of the substitute bill, the costs some small businesses may incur can be significant.[2] In the disability rights area, nondiscrimination requirements, including those in this bill, not only require elimination of outright exclusion based on stereotypes, they often impose additional duties to make reasonable accommodations to the needs of persons with disabilities. I support these requirements. But, we must acknowledge that these accommodations can cost money. Sometimes the cost is not great, but even under the standards of this bill, these costs can be more than *de minimus* where necessary to provide accessibility. This is a crucial difference between a disability civil rights statute and a civil rights statute in the race area. In order to provide equal treatment to racial minorities, a business need only disregard race and judge a person on his or her merits. To provide equal opportunity for a person with a disability will sometimes require additional actions and costs than those required to provide access to a person without a disability.

---

[1] Religious organizations and entities controlled by religious organizations are completely exempt from coverage under Title III.

[2] Some persons may assert that costs should not be a factor in designing a disability civil rights law. In the context of a disability rights law, however, costs may have to be incurred in order to provide nondiscriminatory treatment; e.g., putting in a ramp, providing auxiliary aids and services, and other accommodations. Indeed, the failure to incur reasonable costs in order to provide access is regarded as discriminatory. At some point, however, the undertaking of an accommodation can be so costly or represent such a fundamental alteration in the covered entity's program that the failure to undertake the accommodation is simply not discriminatory. This principle reflects Supreme Court caselaw interpreting Section 504 of the Rehabilitation Act of 1973. E.g. *School Board of Nassau County* v. *Arline*, 480 U.S. 273, 287 n. 17 (1987); *Alexander* v. *Choate*, 469 U.S. 287 (1985); *Southeastern Community College* v. *Davis*, 442 U.S. 397, 409–414 (1979).

For example, under the public accommodations title of this bill, covered entities must seek to provide "full and equal enjoyment of [their] goods, services, facilities, privileges, advantages and accommodations." Section 302(a). Among the specific requirements applicable to the smallest businesses are:

1. The obligation to provide auxiliary aids and services to persons with disabilities, unless to do so would cause either an undue burden to the entity or a fundamental alteration in its activities. Section 302(b)(2)(A)(iii). Auxiliary aids and services are defined in Section 3(1) and can include providing qualified interpreters, qualified readers, signage, taped texts; the acquisition or modifications of equipment or devices; and similar actions and devices.
2. The obligation to make reasonable modifications in policies, practices, and procedures, unless doing so fundamentally alters the entity's activities. Section 302(b)(2)(A)(ii).
3. The obligation to remove "architectural barriers, and communication barriers that are structural in nature, in existing facilities * * * where such removal is readily achievable." Section 302(b)(2)(A)(iv). The term "readily achievable" is defined in Section 301(5).
4. The obligation to remove "transportation barriers in existing vehicles used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles by the installation of a hydraulic or other lift), where such removal is readily achievable." Section 302(b)(2)(A)(iv)).
5. Where the removal of a barrier described in paragraphs 3 and 4 is not readily achievable, an obligation "to make [the entity's] goods, services, facilities, privileges, advantages available through alternative methods if such methods are readily achievable." Section 302(b)(2)(A)(v).
6. The elimination of eligibility criteria that screen out or tend to screen out a person or persons with disabilities unless the criteria are shown to be necessary to the conduct of the activity in question. Section 302(b)(2)(A)(i).

While these requirements will, in theory, generally translate into less actual cost the smaller the entity, any financial or administrative impact on the smallest businesses can be very troublesome for those businesses. Even comparatively "lesser" costs can be quite burdensome for a small business struggling to survive. Further, the determination as to whether an accommodation is an undue burden or a barrier removal is readily achievable may ultimately be made by a federal agency or judge. A small business is less able to absorb an overreaching determination by these authorities than a larger business.

Moreover, government compliance reviews (Section 308(b)(1)), and the costs of private as well as Attorney General litigation, will add further to those expenses small businesses must bear under the bill's public accommodation title. Indeed, in a private enforcement action, a plaintiff can obtain injunctive relief and attorneys fees. For larger businesses, these costs can be more readily absorbed and passed on to a large consumer base. For some smaller businesses, the cost of compliance with injunctive relief combined with attorneys fees might be onerous.

But it is the penalty scheme in an Attorney General action to enforce the public accommodations title that is of particular concern. In an Attorney General action, a court, at the request of the Attorney General, can order the smallest business to pay monetary damages to aggrieved persons. Moreover, the court can order such a business to pay a civil penalty of up to $50,000 for a first violation and up to $100,000 for subsequent violations. This remedy scheme is potentially a very heavy burden, which I will also address as a separate concern.

Opponents of a small business exemption in the public accommodations title of S. 933 claim that since Title II of the 1964 Civil Rights Act has no small business exemption, neither should S. 933. There are several responses to this argument:

1. S. 933 already departs from Title II of the 1964 Civil Rights Act in two important ways:

A. Title II only covers places of eating, lodging, entertainment, and gasoline stations. S. 933 goes well beyond such coverage, encompassing virtually all elements of the private sector as "public accommodations" or "potential places of employment," except religious organizations and entities controlled by religious organizations.

B. Title II provides only for injunctive relief in Attorney General actions; this bill, as mentioned earlier, permits recovery of monetary damages and huge civil fines in Attorney General actions.

Thus, it is inconsistent for the opponents of a small business exemption to rely upon Title II as the basis for their opposition when they have so readily departed from that parallel statute in other important respects.

2. In any case, compliance with Title II of the 1964 Civil Rights Act imposes no costs—it simply requires admitting and serving persons without regard to their color, ethnicity, or religion. As mentioned earlier, compliance with S. 933 can result in costs to covered entities. This difference between Title II and S. 933 alone justifies a small business exemption in public accommodations.

I favor an exemption of small businesses from the prohibitions and obligations in the public accommodations provisions of the bill, i.e., provisions relating to a business's existing facilities and general policies. I would not, however, exempt *any* public accommodation from the requirement that its new facilities be accessible. The cost of accessibility to a new facility when "built-in" to the plans and construction of such a new facility is not burdensome. But for businesses in the operation of their existing facilities and in the provision of auxiliary aids and services, modifications of policies, procedures, and criteria, a small entity exemption is appropriate.

I also believe that even with an exemption for small businesses, the marketplace will exert pressure on small businesses which will lead to increased accessibility. When a small business operator sees a larger competitor gain customers with disabilities because the latter business is accessible, the small business operator is likely to take steps it can afford to get some of those customers—even if those steps don't meet every single requirement of this title—without exposure to the costs of compliance reviews and litigation.

With this voluntary activity, the requirement that *all new* facilities be accessible, and the full coverage of all "public accommodations" other than small businesses, I believe we can provide genuine access to public accommodations for persons with disabilities, while assuring that we do not overly burden small businesses in America.

II. EXCESSIVE PENALTIES AGAINST PUBLIC ACCOMMODATIONS

Under Title II of the 1964 Civil Rights Act (hereinafter "Title II"), as mentioned earlier, a private plaintiff can obtain injunctive relief and attorneys fees. The Attorney General can obtain injunctive relief. No monetary damages or civil penalties are available in either action.

Under S. 933, in an action for a violation of the public accomodations title, a private plaintiff can obtain an injunction and attorneys fees. I believe such relief, paralleling that of Title II, is appropriate.

But, in an Attorney General action under this bill the court can award not only an injunction, but also civil penalties of up to $50,000 for a first violation, and up to $100,000 for subsequent violations. Further, the court can award monetary damages to aggrieved persons when requested to do so by the Attorney General. This relief is excessive and unjustifiable.

The threat of litigation, its cost to covered entities, the added expense of paying the plaintiff's attorneys fees in private litigation, and marketplace factors are all powerful incentives for a business to comply with this bill in the first instance.

Moreover, if an entity is in noncompliance, injunctive relief is significant. An injunction requires the offending entity to cease its discrimination. If a ramp must be put in, a bathroom made accessible, or policies changed, pursuant to the entity's duties under the bill's public accommodations provisions, a court can order such relief.

Everyone knows that 25 years ago black people and other racial and ethnic minorities were routinely denied the opportunity to eat, to lodge, and to be entertained in places they could afford. Today, while there are still instances of racial and ethnic discrimination in public accommodations, we face an entirely different situation. The public accommodations covered by Title II are now essentially open on a nondiscriminatory basis. This resulted largely from Title II's enactment, with the injunctive relief and attorneys fees enforcement scheme previously described.

Yet, relief in an Attorney General action against a public accommodations under this bill goes well beyond the relief available in an Attorney General action under Title II.

Ironically, a private party, in his own action, cannot obtain monetary damages for himself. The court can award monetary damages, however, to an aggrieved person, in an Attorney General action.

There is a further anomaly in the bill. The bill subjects state and local governments to the remedies available under Section 505 of the Rehabilitation Act of 1973. Under Section 505, a federal agency, in an enforcement action, may either terminate federal aid to the part of a covered entity where the discrimination occurs or it may refer the case to the Department of Justice for injunctive relief. Civil penalties are not recoverable by the federal government in an enforcement action. Thus, in an Attorney General action, state and local governments, with their enormous tax resources, are subject to lesser penalties than the private sector, which is not supported by tax revenues or, for the most part, federal aid. The potential for a sole proprietor, a mom-and-pop business, or any other business to be more harshly sanctioned than a state or local government in an Attorney General action requires further consideration.

Our purpose here should not be punitive. Providing for monetary damages and huge civil penalties in Attorney General actions is excessive. To the extent we are trying to provide access by enacting this bill, since such access can impose costs on covered entities, rather than penalize a public accommodation by imposing monetary damages and huge civil penalties, we should keep the money available to the entity for use in providing access pursuant to the injunctive relief.

Proponents of the stiff remedy provisions in S. 933 assert that it parallels remedies now available in an Attorney General action under the Fair Housing Act, as amended last year. This analogy, however, is unpersuasive.

In the field of housing, the original remedies of the 1968 Fair Housing Act proved inadequate to the task of rooting out racial and ethnic discrimination in housing as quickly as hoped. Why? In my opinion, it is because housing discrimination is probably the most peristent form of racial discrimination in the nation today. Thus, toughening the penalties for such discrimination in 1988 made sense and I supported the effort to do so.

But the record in the public accommodations area is much different. As mentioned earlier, the Title II penalties—injunctive relief and attorneys fees—have been adequate to work a revolution of equal opportunity.

If the Fair Housing Amendments Act of 1988 had not added disability discrimination to the list of prohibited conduct under the Fair Housing Act, and a ban on housing discrimination on the basis of disability was being added in this bill, the use of Fair Housing Act remedies for such housing discrimination would be appropriate. It is inappropriate, however, to use the Fair Housing Act, rather than Title II of the 1964 Civil Rights Act, as the analogue for the remedies in the public accommodations context in this bill.

I note that, with respect to employment discrimination, S. 933 uses the remedies available under the parallel civil rights statute, Title VII of the 1964 Civil Rights Act. Unfortunately, this parallelism was not maintained with respect to public accommodations.

I prefer to retain such parallelism in remedies. I am prepared, however, to break the parallelism with Title II and to consider a more modest enforcement scheme in this area that goes beyond Title II relief but is more reasonable than the provision currently in the bill.

III. THE BILL'S THREAT TO THE PRIVATE BUS TRANSPORTATION INDUSTRY

The bill applies to transportation services "provided by a privately operated entity that is primarily engaged in the business of transporting people," except for air carriers. Section 304(a). This coverage includes private rail, limousine, taxi, and bus companies.

I am especially concerned about this bill's impact on the private bus transportation industry. The bill imposes a variety of requirements on these companies, including:

1. The obligation to make reasonable modifications in policies, practices, and procedures, unless to do so would fundamentally alter the company's activities. Section 304(b)(2)(A).

2. The obligation to provide auxiliary aids and services to persons with disabilities, unless to do so would cause an undue burden or fundamentally alter the company's activities. Section 304(b)(2)(B).

3. The obligation to remove "transportation barriers in existing vehicles * * * where such removal is readily achievable." This obligation does not include the addition of a lift. Section 304(b)(2)(C).

4. Where the removal of a barrier described in paragraph 3 is not readily achievable, an obligation "to make [the entity's] goods, services, facilities, privileges, advantages available through alternative methods if such methods are readily achievable." Section 304(b)(2)(C).

I favor these provisions.

The truly onerous provision, however, is the requirement that all small bus companies must purchase or lease all new over-the-road buses with lifts six years after the bill's enactment; large bus companies must do so beginning five years after enactment. In the meantime, ironically having imposed this major requirement on the private bus transportation industry, the bill requires a three-year study to determine whether this requirement is, in effect, feasible. The requirement, however, is not contingent on the results of the study—it remains in place under this bill even if the study shows that the requirement is excessive.

The bill, in its present form, presents the strong likelihood that private intercity and charter and tour bus service will be seriously curtailed soon after the bill's new bus requirements become effective, if not virtually eliminated at some point thereafter. The stakes are that high.

Unlike state and local government mass transit, which is heavily subsidized by the federal government, private transportation companies receive virtually no federal aid. Private companies provide virtually all of the intercity bus transportation in the country. There are well over one thousand such private, intercity bus companies, such as Greyhound, Gold Line, East Coast Parlor, and Peter

Pan. Some of these companies provide two kinds of services: over the road regular route service—that is, scheduled service between communities—and charter and tour services. Other companies provide only charter and tour services.

These companies serve about 10,000 communities, most of which have no other intercity transportation available to them. The number of communities served has been declining in the last 30 years. According to an Interstate Commerce Commission staff analysis, there was a net loss of nearly 3,400 communities receiving intercity bus service between 1982 and 1986 alone. Ninety percent of the communities losing this service had populations of less than 10,000. This industry operates on a low profit margin. In many rural areas, including in Utah, this private bus service is the only available intercity transportation. There is only token Amtrak service available. Intercity buses provide transportation for those who need a low cost transportation alternative.

The requirement that all new buses have wheelchair lifts would quickly accelerate the loss of private, intercity bus service to our nation's communities, if not entirely end such service, according to the American Bus Association, United Bus Owners of America, and Greyhound (the largest company). Delaying this result by five or six years, in the hope an efficient and economical lift will appear on the scene, is small comfort.

A lift for an intercity bus is more expensive than for an intracity bus, such as the Metrobuses used in the District of Columbia, because with the baggage compartment and other differences, access to the intercity bus is higher off the ground—as much as four or six feet, rather than one foot for an intracity bus.

The added costs for new buses for these private companies include not only the cost of the lift but widening the aisles and making the bathrooms accessible. There are maintenance costs—and there is little experience with maintenance of intercity bus lifts. There will be a loss of as many as four seats, which especially hurts bus companies during their peak periods, such as holiday periods. Moreover, particularly in rural areas, these companies are successful because of their package express service. The room available for carrying such packages, however, is reduced in lift-equipped buses.

Even if the least expensive lift is used on all new buses—and this is, I am told, a lift which has had little use in this country and one which not all bus companies might feel is suited to their operations—the cost of this provision is unreasonable. Indeed, I understand that the principal basis for this provision is information from the Regional Transportation District of Denver, Colorado. According to the Department of Transportation, however, Denver has only 17 buses which use a "less expensive" lift developed in Germany. I understand these buses have been in use in Denver for about one year. Moreover, according to the Department of Transportation, Denver uses these buses on one-way routes of less than 30 miles. This usage is atypical for the private bus industry as a whole, which consists of some 20,000 buses which travel far greater distances on trips.

Representatives of the private bus transportation industry have stated that their lowest annual cost estimate for the bill's requirement regarding new buses, which includes lift and accessible restroom installation, loss of revenue seats for lift and restroom accessibility, maintenance costs, and training costs would be so high as to seriously threaten the viability of the private bus transportation industry. This lowest annual cost estimate is based on a cost of $10,100 per new bus for each year its service, and assumes a 10-year life span for the industry's 20,000 bus fleet. In other words, under this analysis, each new bus will cost a company $101,000 over the life of the bus. I note that representatives of the industry believe these estimates are unrealistic and actual costs will be higher.

The Committee heard virtually no testimony on this vital issue. I, along with proponents of the present provision, can point to correspondence from officials of the Denver system and the American distributor of the lift in question citing a variety of different figures and costs related to wheelchair accessibility for these over-the-road buses. Following the hearings on the bill, the cost figures have been flying back and forth concerning costs associated with the lift which has recently begun to be used in Denver. The dispute over the utility of any particular lift and its costs are precisely why a study is most appropriate.

I support a requirement that bans discrimination based on stereotypes against persons with disabilities in their use of privately operated buses. I also support a requirement that private bus companies make reasonable accommodations to the needs of persons with disabilities with respect to their current bus fleet.

The Committee, however, simply has not been presented with enough clear testimony and data to know what is reasonable with respect to requirements such as lifts on new buses purchased or leased by the private bus industry. That is why a study of private bus accessibility, followed by Congressional action based on the study, is the most sensible course of action with respect to any future requirements, such as lifts, concerning new buses.

It might be suggested that this bill will have no significant impact on bus companies for the next five years. Even this suggestion is doubtful. In an August 1, 1989, letter to Roger Porter, domestic policy advisor to the President, Theodore Knappen, a Senior Vice President at Greyhound Lines, Inc., opposed this provision of S. 933. He wrote, "Greyhound Lines Inc. is a new company, which is the result of the merger of two failing bus systems, Greyhound and Trailways. We are highly leveraged with $375 million in debt * * *." Greyhound "lost $17 million last year and will be marginally profitable this year. The annual cost of full implementation of S. 933 will be at a minimum, $40 million. Even if the startup is delayed for five years, the financial institutions upon which we rely are not likely to continue to support us in light of this burden. The system will inevitably crumble with the marginal rural service being the first to go. I should add that most small bus companies are in a similar financial situation."

In summary, the current provision regarding the private bus transportation industry's purchase and lease of readily accessible new buses rests on inadequate and contested data and runs a serious risk of unintentionally causing devastating effects in the private bus industry. The prudent course is to study the issue first and then to impose appropriate requirements based on the study—not the reverse, as currently provided for in the bill.

ORRIN G. HATCH.

ADDITIONAL VIEWS OF SENATOR COATS

I am pleased to have been able to vote in favor of reporting S. 933 favorably out of Committee despite certain problems that I see in this legislation. Full and equal protection under the law for persons with disabilities is long overdue. Our society must no longer tolerate discrimination against any of its citizens, especially those with physical and mental impairments.

I believe that this landmark civil rights bill, despite its flaws, will accomplish its goals. The ADA bill is comprehensive, far-reaching, fair and tough. It has real teeth in its enforcement provisions. I believe that it will ensure that Americans with disabilities will no longer face discrimination in employment, in public accommodations, in public services, transportation or communications services. I earnestly believe that the provisions of S. 933, together with the force of Judaeo-Christian good will and a healthy and vibrant free market economy, will help bring all disabled persons into the mainstream of American life.

I am pleased that my amendments relating to drug and alcohol abuse and religious institutions were substantially incorporated into the ADA bill during the lengthy negotiations that resulted in the radically amended, much improved version of S. 933 that the Committee finally approved. Despite certain ambiguities that remain in the bill, I am satisfied that S. 933 will ensure that employers can implement a zero tolerance policy and maintain a drug-free workplace. Section 103(c) of Title I is intended to make clear that an individual applicant or employee who currently uses alcohol or illegal drugs is not protected by the ADA's nondiscrimination provisions. Similarly, this section makes clear that an individual who is an alcoholic or current or past user of drugs—illegal or legal—can be held to the same standards of job performance and behavior as other individuals, even if the unsatisfactory performance or behavior is related to the drug use or alcoholism. At the same time, and consistent with the Rehabilitation Act of 1973, it is intended that rehabilitated alcoholics and drug users will be protected under this law. I believe that the bill's language and accompanying report make clear that an employer can subject job applicants and employees to drug urinalysis or other testing to determine the unlawful use of drugs or the presence of alcohol, and can refuse to hire job applicants and can discipline or discharge employees who are found to be using illegal drugs or alcohol, without being charged with discrimination.

Having stated my support for S. 933 and my intention to work for its speedy passage, I also wish to associate myself with the additional views of Senator Hatch. I share many of the concerns he has expressed so clearly, particularly with regard to the need for a small business exemption and the problems facing the bus industry as a consequence of the costly requirements imposed on both by this legislation. I am hopeful that the spirit of compromise and determination which resulted in the amended legislation that we voted out of committee will carry the day, so that these remaining problems can be worked out to the satisfaction of all parties, and legislation, which has White House support, will be enacted law.

Dan Coats.

HOUSE REPORT 101-485, Parts 1, 2, 3, and 4

101st Congress | HOUSE OF REPRESENTATIVES | Rept. 101-485
2d Session | | Part 1

AMERICANS WITH DISABILITIES ACT OF 1990

May 14, 1990.—Continued to the Committee of the Whole House on the State of the Union and ordered to be printed

Mr. Anderson, from the Committee on Public Works and Transportation, submitted the following

REPORT

together with

ADDITIONAL AND MINORITY VIEWS

[To accompany H.R. 2273]

[Including cost estimate of the Congressional Budget Office]

The Committee on Public Works and Transportation, to whom was referred the bill (H.R. 2273) to establish a clear and comprehensive prohibition of discrimination on the basis of disability, having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) Short Title.—This Act may be cited as the "Americans with Disabilities Act of 1990".

(b) Table of Contents.—The table of contents is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Findings and purposes.
Sec. 3. Definitions.

TITLE I—EMPLOYMENT

Sec. 101. Definitions.
Sec. 102. Discrimination.
Sec. 103. Defenses.
Sec. 104. Illegal drugs and alcohol.
Sec. 105. Posting notices.
Sec. 106. Regulations.
Sec. 107. Enforcement.
Sec. 108. Effective date.

39-081

TITLE II—PUBLIC SERVICES

Sec. 201. Definitions.
Sec. 202. Prohibition against discrimination.
Sec. 203. Public entities operating fixed route systems.
Sec. 204. Paratransit as a complement to fixed route service.
Sec. 205. Public entity operating a demand responsive system.
Sec. 206. Temporary relief where lifts are unavailable.
Sec. 207. New facilities.
Sec. 208. Alterations of existing facilities.
Sec. 209. Public transportation programs and activities in existing facilities and one car per train rule.
Sec. 210. Regulations.
Sec. 211. Enforcement.
Sec. 212. Effective date.
Sec. 213. Applicability to certain commuter rail systems.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

Sec. 301. Definitions.
Sec. 302. Prohibition of discrimination by public accommodations.
Sec. 303. New construction in public accommodations and potential places of employment.
Sec. 304. Prohibition of discrimination in public transportation services provided by private entities.
Sec. 305. Study.
Sec. 306. Regulations.
Sec. 307. Exemptions for private clubs and religious organizations.
Sec. 308. Enforcement.
Sec. 309. Effective date.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICE

Sec. 401. Telecommunication services for hearing-impaired and speech-impaired individuals.

TITLE V—MISCELLANEOUS PROVISIONS

Sec. 501. Construction.
Sec. 502. Prohibition against retaliation and coercion.
Sec. 503. State immunity.
Sec. 504. Regulations by the Architectural and Transportation Barriers Compliance Board.
Sec. 505. Attorney's fees.
Sec. 506. Technical assistance.
Sec. 507. Federal wilderness areas.
Sec. 508. Transvestites.
Sec. 509. Congressional inclusion.
Sec. 510. Illegal drug use.
Sec. 511. Definitions.
Sec. 512. Amendments to the Rehabilitation Act.
Sec. 513. Severability.

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) some 43,000,000 Americans have one or more physical or mental disabilities, and this number is increasing as the population as a whole is growing older;

(2) historically, society has tended to isolate and segregate individuals with disabilities and, despite some improvements, such forms of discrimination against individuals with disabilities continue to be a serious and pervasive social problem;

(3) discrimination against individuals with disabilities persists in such critical areas as employment, housing, public accommodations, education, transportation, communication, recreation, institutionalization, health services, voting, and access to public services;

(4) unlike individuals who have experienced discrimination on the basis of race, sex, national origin, religion, or age, individuals who have experienced discrimination on the basis of disability have often had no legal recourse to redress such discrimination;

(5) individuals with disabilities continually encounter various forms of discrimination, including outright intentional exclusion, the discriminatory effects of architecural, transportation, and communication barriers, overprotective rules and policies, failure to make modifications to existing facilities and practices, exclusionary qualification standards and criteria, segregation, and relegation to lesser services, programs, activities, benefits, jobs, or other opportunities;

(6) census data, national polls, and other studies have documented that people with disabilities, as a group, occupy an inferior status in our society, and are severely disadvantaged socially, vocationally, economically, and educationally;

(7) individuals with disabilities are a discrete and insular minority who have been faced with restrictions and limitations, subjected to a history of purposeful unequal treatment, and relegated to a position of political powerlessness in our society, based on characteristics that are beyond the control of such individuals and resulting from stereotypic assumptions not truly indicative of the individual ability of such individuals to participate in, and contribute to, society;

(8) the Nation's proper goals regarding individuals with disabilities are to assure equality of opportunity, full participation, independent living, and economic self-sufficiency for such individuals; and

(9) the continuing existence of unfair and unnecessary discrimination and prejudice denies people with disabilities the opportunity to compete on an equal basis and to pursue those opportunities for which free society is justifiably famous, and costs the United States billions of dollars in unnecessary expenses resulting from dependency and nonproductivity.

(b) **Purpose.**—It is the purpose of this Act—

(1) to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities;

(2) to provide clear, strong, consistent, enforceable standards against discrimination against individuals with disabilities;

(3) to ensure that the Federal Government plays a central role in enforcing the standards established in this Act on behalf of individuals with disabilities; and

(4) to invoke the sweep of congressional authority, including its power to enforce the fourteenth amendment and to regulate commence, in order to address the major areas of discrimination faced day-to-day by people with disabilities.

SEC. 3. DEFINITIONS.

As used in this Act, the following definitions apply:

(1) **Auxiliary aids and service.**—The term "auxiliary aids and services" includes—

(A) qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments;

(B) qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments;

(C) acquisition or modification of equipment or devices; and

(D) other similar services and actions.

(2) **Disability.**—The term "disability" means, with respect to an individual—

(A) a physical or mental impairment that substantially limits one or more of the major life activities of such individual;

(B) a record of such impairment; or

(C) being regarded as having such an impairment.

(3) **State.**—The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

TITLE I—EMPLOYMENT

SEC. 101. DEFINITIONS.

As used in this title, the following definitions apply:

(1) **Commission.**—The term "Commission" means the Equal Employment Opportunity Commission established by section 705 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-4).

(2) **Covered entity.**—The term "covered entity" means an employer, employment agency, labor organization, or joint labor-management committee.

(3) **Employee.**—The term "employee" means an individual employed by an employer.

(4) **Employer.**—

(A) **In general.**—The term "employer" means a persion engaged in an industry affecting commerce who has 15 or more employee for each working day in each of 20 or more calendar weeks in the current or preceding calendar year, and any agent of such person; except that, for 2 years following the effective date of this title, an employer means a person engaged in an industry affecting commerce who has 25 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding year, and any agent of such person.

(B) **Exceptions.**—The term "employer" does not include—

(i) the United States, a corporation wholly owned by the government of the United States, or an Indian tribe; or

(ii) a bona fide private membership club (other than a labor organization) that is exempt from taxation under section 501(c) of the Internal Revenue Code of 1986.

(5) Illegal drug.—The term "illegal drug" means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812), the possession or distribution of which is unlawful under such Act. The term "illegal drug" does not mean the use of a controlled substance pursuant to a valid prescription or other uses authorized by this Act.

(6) Person, etc.—The terms "person", "labor organization", "employment agency", "commerce", and "industry affecting commerce" have the same meaning such terms have in section 701 of the Civil Rights Act of 1964 (42 U.S.C. 2000e).

(7) Qualified individual with a disability.—The term "qualified individual with a disability" means an individual with a disability who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires.

(8) Reasonable accommodation.—The term "reasonable accommodation" includes—

(A) making existing facilities used by employers readily accessible to and usable by individuals with disabilities; and

(B) job restructuring, part-time or modified work schedules, reassignment to a vacant position, acquisition or modification of equipment or devices, appropriate adjustment or modifications of examinations, training materials or policies, the provision of qualified readers or interpreters, and other similar accommodations for individuals with disabilities.

(9) Undue hardship.—

(A) In general.—The term "undue hardship" means an action requiring significant difficulty or expense.

(B) Determination.—In determining whether an accommodation would impose an undue hardship on a covered entity, factors to be considered include—

(i) the overall size of the business of a covered entity with respect to the number of employees, number and type of facilities, and the size of the budget;

(ii) the type of operation maintained by the covered entity, including the composition and structure of the workforce of such entity; and

(iii) the nature and cost of the accommodation needed under this Act.

SEC. 102. DISCRIMINATION.

(a) General rule.—No covered entity shall discriminate against a qualified individual with a disability because of the disability of such individual in regard to job application procedures, the hiring or discharge of employees, employee compensation, advancement, job training, and other terms, conditions, and privileges of employment.

(b) Construction.—As used in subsection (a), the term "discrimination" includes—

(1) limiting, segregating, or classifying a job applicant or employee in a way that adversely affects the opportunities or status of such applicant or employee because of the disability of such applicant or employee;

(2) participating in a contractual or other arrangement or relationship that has the effect of subjecting a qualified applicant or employee with a disability to the discrimination prohibited by this title (such relationship includes a relationship with an employment or referral agency, labor union, an organization providing fringe benefits to an employee of the covered entity, or an organization providing training and apprenticeship programs);

(3) utilizing standards, criteria, or methods of administration—

(A) that have the effect of discrimination on the basis of disability; or

(B) that perpetuate the discrimination of others who are subject to common administrative control;

(4) excluding or otherwise denying equal jobs or benefits to a qualified individual because of the known disability of an individual with whom the qualified individual is known to have a relationship or association;

(5) not making reasonable accommodations to the known physical or mental limitations of a qualified individual who is an applicant or employee, unless such covered entity can demonstrate that the accommodation would impose an undue hardship on the operation of the business of such covered entity;

(6) denying employment opportunities to a job applicant or employee who is a qualified individual with a disability, if such denial is based on the need of such covered entity to make reasonable accommodation to the physical or mental impairments of the employee or applicant;

(7) using employment tests or other selection criteria that screen out or tend to screen out an individual with a disability or a class of individuals with disabilities unless the test or other selection criteria, as used by the covered entity, is shown to be job-related for the position in question and is consistent with business necessity; and

(8) failing to select and administer tests concerning employment in the most effective manner to ensure that, when such test is administered to a job applicant or employee who has a disability that impairs sensory, manual, or speaking skills, such test accurately reflects the skills, aptitude, or whatever other factor of such applicant or employee that such test purports to measure, rather than reflecting the impaired sensory, manual, or speaking skills of such employee or applicant (except where such skills are the factors that the test purports to measure).

(c) Medical Examinations and Inquiries.—

(1) In general.—The prohibition against discrimination as referred to in subsection (a) shall include medial examinations and inquiries.

(2) Preemployment.—

(A) Prohibited examination or inquiry.—Except as provided in paragraph (3), a covered entity shall not conduct a medical examination or make inquiries of a job applicant or employee as to whether such applicant or employee is an individual with a disability or as to the nature or severity of such disability.

(B) Acceptable inquiry.—A covered entity may make preemployment inquiries into the ability of an applicant to perform job-related functions.

(3) Employment entrance examination.—A covered entity may require a medical examination after an offer of employment has been made to a job applicant and prior to the commencement of the employment duties of such applicant, and may condition an offer of employment on the results of such examination, if—

(A) all entering employees are subjected to such an examination regardless of disability;

(B) information obtained regarding the medical condition or history of the applicant is collected and maintained on separate forms and in separate medical files and is treated as a confidential medical record, except that—

(i) supervisors and managers may be informed regarding necessary restrictions on the work or duties of the employee and necessary accommodations;

(ii) first aid and safety personnel may be informed, when appropriate, if the disability might require emergency treatment; and

(iii) government officials investigating compliance with this Act shall be provided relevant information on request; and

(C) the results of such physical examination are used only in accordance with this title.

(4) Examination and inquiry.—

(A) Prohibited examinations and inquiries.—A covered entity shall not conduct or require a medical examination and shall not make inquiries of an employee as to whether such employee is an individual with a disability or as to the nature or severity of the disability, unless such examination or inquiry is shown to be job-related and consistent with business necessity.

(B) Acceptable inquiries.—A covered entity may make inquiries into the ability of an employee to perform job-related functions.

SEC. 103. DEFENSES.

(a) In General.—It may be a defense to a charge of discrimination under this Act that an alleged application of qualification standards, tests, or selection criteria that screen out or tend to screen out or otherwise deny a job or benefit to an individual with a disability has been shown to be job-related and consistent with business necessity, and such performance cannot be accomplished by reasonable accomodation.

(b) Qualification Standards.—The term "qualification standards" may include a requirement that an individual with a currently contagious disease or infection shall not pose a direct threat to the health or safety of other individuals in the workplace.

(c) Religious Entities.—

(1) In general.—This title shall not prohibit a religious corporatoin, association, educational institution, or society from giving preference in employment to individuals or a particular religion to perform work connected with the carry-

ing on by such corporation, association, educational institution, or society of its activities.

(2) **Qualification standard.**—Under this title, a religious organization may require, as a qualification standard to employment, that all applicants and employees conform to the religious tenets of such organization.

SEC. 104. ILLEGAL DRUGS AND ALCOHOL.

(a) **Qualified Individual With a Disability.**—For purposes of this title, the term "qualified individual with a disability" does not include any employee or applicant who is a current user of illegal drugs, except that an individual who is otherwise handicapped shall not be excluded from the protections of this Act if such individual also uses or is also addicted to drugs.

(b) **Authority of Covered Entity.**—A covered entity—

(1) may prohibit the useof alcohol or illegal drugs at the workplace by all employees;

(2) may require that employees shall not be under the influence of alcohol or illegal drugs at the workplace;

(3) may require that employees behave in conformance with the requirements established under the Drug-Free Workplace of 1988 (41 U.S.C. 701 et seq.) and that transportation employees meet requirements established by the Secretary of Transportation with respect to drugs and alcohol; and

(4) may hold an employee who is a drug user or alcoholic to the same qualification standards for employment or job performance and behavior that such entity holds other employees, even if any unsatisfactory performance or behavior is related to the drug use or alcoholism of such employee.

(c) **Drug Testing.**—

(1) **In general.**—For purposes of this title, a test to determine the use of illegal drugs shall not be considered a medical examination.

(2) **Construction.**—Nothing in this title shall be construed to encourage, prohibit, or authorize the conducting of drug testing of job applicants or employees or making employment decisions based on such test results.

SEC. 105. POSTING NOTICES.

Every employer, employment agency, labor organization, or joint labor-management committee covered under this title shall post notices in an accessible format to applicants, employees, and members describing the applicable provisions of this Act, in the manner prescribed by section 711 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-10).

SEC. 106. REGULATIONS.

Not later than 1 year after the date of enactment of this Act, the Commission shall issue regulations in an accessible format to carry out this title in accordance with subchapter II of chapter 5 of title 5, United States Code.

SEC. 107. ENFORCEMENT.

The remedies and procedures set forth in sections 706, 707, 709, and 710 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-5, 2000e-6, 2000e-8, and 2000e-9) shall be available, with respect to the Commission or any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of any provisions of this Act, or regulations promulgated under section 106, concerning employment.

SEC. 108. EFFECTIVE DATE.

This title shall become effective 24 months after the date of the enactment of this Act.

TITLE II—PUBLIC SERVICES

SEC. 201. DEFINITIONS.

As used in this title—

(1) **Demand responsive system.**—The term "demand responsive system" means any system of providing public transportation which is not a fixed route system.

(2) **Fixed route system.**—The term "fixed route system" means a system of providing public transporttion on which a vehicle is operate along a prescribed route according to a fixed schedule.

(3) **Operates.**—The term "operates", as used with respect to a fixed route system or demand responsive system, includes operation of such system by a

person under a contractual or other arrangement or relationship with a public entity.

(4) **Public entity.**—The term "public entity" means a department, agency, special purpose district, or other instrumentality of a State or local government.

(5) **Public school transportation.**—The term "public school transportation" means transportation by schoolbus vehicles of schoolchildren, personnel, and equipment to and from a public elementary or secondary school and school-related activities.

(6) **Public transportation.**—The term "public transportation" means transportation (other than public school transportation), by bus, rail, or by any other conveyance (other than aircraft) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

(7) **Qualified individual with a disability.**—The term "qualified individual with a disability" means an individual with a disability who, with or without reasonable modifications to rules, policies, and practices, the removal of architectural communication, and transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a public entity.

(8) **Secretary.**—The term "Secretary" means the Secretary of Transportation.

SEC. 202. PROHIBITION AGAINST DISCRIMINATION.

Subject to the provisions of this title, no qualified individual with a disability shall, by means of such disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity or be subjected to discrimination by a public entity.

SEC. 203. PUBLIC ENTITIES OPERATING FIXED ROUTE SYSTEMS.

(a) **Purchase and Lease of New Vehicles.**—It shall be considered discrimination for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity which operates a fixed route system to purchase or rapid rail vehicle, a new light rail vehicle, or any other new vehicle to be used on such system if the solicitation for such purchase or lease is made after the 30th day following the effective date of this subsection and if such bus, rail vehicle, or other vehicle is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(b) **Purchase and Lease of Used Vehicles.**—Subject to subsection (c)(1), it shall be considered discrimination for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity which operates a fixed route system to purchase or lease, after the 30th day following the effective date of this subsection, a used vehicle for use on such system unless such entity makes demonstrated good faith efforts to purchase or lease a used vehicle for use on such system that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(c) **Remanufactured Vehicles.**—

(1) **General rule.**—Except as provided in paragraph (2), it shall be considered discrimination for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity which operates a fixed route system—

(A) to manufacture a vehicle for use on such system so as to extend its usable life for 5 years or more, which remanufacture begins) or for which the solicitation is made) after the 30th day following the effective date of this subsection; or

(B) to purchase or lease for use on such system a remanufactured vehicle which has been remanufactured so as to extend its usable life for 5 years or more, which purchase or lease occurs after such 30th day and during the period in which the usable life is extended;

unless after remanufacture, the vehicle is, to the maximum extent feasible, readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) **Exception for historic vehicles.**—

(A) **General rule.**—If a public entity operates a fixed route system any segment of which is included on the National Register of Historic Places and if making a vehicle of historic character to be used solely on such segment readily accessible to and usable by individuals with disabilities would significantly alter the historic character of such vehicle, the public entity only has to make (or to purchase or lease a remanufactured vehicle with) those modifications which are necesary to meet the requirements of paragraph (1) and which do not significantly alter the historic character of such vehicle.

(B) Vehicles of historic character defined by regulations.—For purposes of this paragraph and section 209(b), a vehicle of historic character shall be defined by the regulations issued by the Secretary to carry out this subsection.

SEC. 294. PARATRANSIT AS A COMPLEMENT TO FIXED ROUTE SERVICE.

(a) General Rule.—It shall be considered discrimination for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity which operates a fixed route system (other than a system which provides solely commuter bus service or commuter rail service) to fail to provide, in accordance with this section, paratransit and other special transportation services to individuals with disabilities, including individuals who use wheelchairs, that are sufficient to provide to such individuals a level of service (1) which is comparable to the level of public transportation services provided to individuals without disabilities using such system; or (2) in the case of response time, which is comparable, to the extent practicable, to the level of public transportation services provided to individuals without disabilities using such system.

(b) Issuance of Regulations.—Not later than 1 year after the effective date of this subsection, the Secretary shall issue final regulations to carry out this section.

(c) Required Contents of Regulations.—

(1) Eligible recipients of service.—The regulations issued under this section shall require each public entity which operates a fixed route system to provide the paratransit and other special transportation services required under this section—

(A)(i) to any individual with a disability who is unable, as a result of a physical or mental impairment (including a vision impairment) and without the assistance of another individual (except an operator of a wheelchair lift or other boarding assistance device), to board, ride, or disembark from any vehicle on the system which is readily accessible to and usable by individuals with disabilities;

(ii) to any individual with a disability who needs the assistance of a wheelchair lift or other boarding assistance device (and is able with such assistance) to board, ride, and disembark from any vehicle which is readily accessible to and usable by individuals with disabilities if the individual wants to travel on a route on the system during the hours of operation of the system at a time (or within a reasonable period of such time) when such a vehicle is not being used to provide public transportation on the route; and

(iii) to any individual with a disability who has a specific impairment-related condition which prevents such individual from traveling to a boarding location or from a disembarking location on such system; and

(B) to 1 other individual accompanying the individual with the disability.

For purposes of clauses (i) and (ii) of subparagraph (A), boarding or disembarking from a vehicle does not include travel to the boarding location or from the disembarking location.

(2) Service area.—The regulations issued under this section shall require the provision of paratransit and special transportation services required under this section in the service area of each public entity which operates a fixed route system, other than any portion of the service area in which the public entity solely provides commuter bus service area in which the public entity solely provides commuter bus service or commuter rail service.

(3) Service criteria.—Subject to paragraphs (1) and (2), the regulations issued under this section shall establish minimum service criteria for determining the level of services to be required under this section.

(4) Undue financial burden limitation.—The regulations issued under this section shall provide that, if the public entity is able to demonstrate to the satisfaction of the Secretary that the provision of paratransit and other special transportation services otherwise required under this section would impose an undue financial burden on the public entity, the public entity, notwithstanding any other provision of this section (other than paragraph (5)), shall only be required to provide such services to the extent that providing such services would not impose such a burden.

(5) Additional services.—The regulations issued under undere this section shall establish circumstances under which the Secretary may require a public entity to provide, notwithstanding paragraph (4), paratransit and other special transpor-

tation services under this section beyond the level of paratransit and other special transportation services which would otherwise be required under paragraph (4).

(6) Public participation.—The regulations issued under this section shall require that each public entity which operates a fixed route system hold a public hearing, provide an opportunity for public comment, and consult with individuals with disabilities in preparing its plan under paragraph (7).

(7) Plans.—The regulations issued under this section shall require that each public entity which operates a fixed route system—

(A) within 18 months after the effective date of this subsection, submit to the Secretary and commence implementation of, a plan for providing paratransit and other special transportation services which meets the requirements of this section; and

(B) on an annual basis thereafter, submit to the Secretary, and commence implementation of, a plan for providing such services.

(8) Provision of services by others.—The regulations issued under this section shall—

(A) require that a public entity submitting a plan to the Secretary under this section identify in the plan any person or other public entity which is providing a paratransit or other special transportation service for individuals with disabilities in the service area to which the plan applies; and

(B) provide that the public entity does not have to provide under the plan such service for individuals with disabilities.

(9) Other provisions.—The regulations issued under this section shall include such other provisions and requirements as the Secretary determines are necessary to carry out the objectives of this section.

(d) Review of Plan.—

(1) General rule.—The Secretary shall review a plan submitted under this section for the purpose of determining whether or not such plan meets the requirements of this section, including the regulations issued under this section.

(2) Disapproval.—If the Secretary determines that a plan reviewed under this subsection fails to meet the requirements of this section, the Secretary shall disapprove the plan and notify the public entity which submitted the plan of such disapproval and the reasons therefore.

(3) Modification of disapproved plan.—Not later than 90 days after the date of disapproval of a plan under this subsection, the public entity which submitted the plan shall modify the plan to meet the requirements of this section and shall submit to the Secretary and commence implementation of, such modified plan.

(e) Discrimination Defined.—As used in subsection (a), the term "discrimination" includes—

(1) failure of a public entity to which the regulations issued under this section apply to submit, or commence implementation of, a plan in accordance with subsections (c)(6) and (c)(7);

(2) a failure of such entity to submit, or commence implementation of, a modified plan in accordance with subsection (d)(3);

(3) submission to the Secretary of a modified plan under subsection (d)(3) which does not meet the requirements of this section; or

(4) a failure of such entity to provide paratransit or other special operation services in accordance with the plan or modified plan the public entity submitted to the Secretary under this section.

(f) Statutory Construction.—Nothing in this section shall be construed as preventing a public entity—

(1) from providing paratransit or other special transportation services at a level which is greater than the level of such services which are required by this section,

(2) from providing paratransit or other special transportation services in addition to those paratransit and special transportation services required by this section, or

(3) from providing such services to individuals in addition to those individuals to whom such services are required to be provided by this section.

SEC. 205. PUBLIC ENTITY OPERATING A DEMAND RESPONSIVE SYSTEM.

If a public entity operates a demand responsive system, it shall be considered discrimination, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such entity to purchase or lease a new vehicle for use on such system, for which a solicitation is made after the 30th day following the effective date of this section, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless such system, when viewed in its entirety, provides a level of service to such individuals equivalent to the level of service such system provides to individuals without disabilities.

SEC. 206. TEMPORARY RELIEF WHERE LIFTS ARE UNAVAILABLE.

(a) GRANTING.—With respect to the purchase of new buses, a public entity may apply for, and the Secretary may temporarily relieve such public entity from the obligation under section 203(a) or 205 to purchase new buses that are readily accessible to and usable by individuals with disabilities if such public entity demonstrates to the satisfaction of the Secretary—

(1) that the initial solicitation for new buses made by the public entity specified that all new buses were to be lift-equipped and were to be otherwise accessible to and usable by individuals with disabilities;

(2) the unavailability from any qualified manufacturer of hydraulic, electromechanical, or other lifts for such new buses;

(3) that the public entity seeking temporary relief has made good faith efforts to locate a qualified manufacturer to supply the lifts to the manufacturer of such buses in sufficient time to comply with such solicitation; and

(4) that any further delay in purchasing new buses necessary to obtain such lifts would significantly impair transportation services in the community served by the public entity.

(b) DURATION AND NOTICE TO CONGRESS.—Any relief granted under subsection (a) shall be limited in duration by a specified date, and the appropriate committees of Congress shall be notified of any such relief granted.

(c) FRAUDULENT APPLICATION.—If, at any time, the Secretary as reasonable cause to believe that any relief granted under subsection (a) was faudulently applied for, the Secretary shall—

(1) cancel such relief if such relief is still in effect; and

(2) take such other action as the Secretary considers appropriate.

SEC. 207. NEW FACILITIES.

For purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a pbulic entity to construct a new facility to be used in the provision of public transportation services unless such facility is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

SEC. 208. ALTERATIONS OF EXISTING FACILITIES.

(a) GENERAL RULE.—With respect to a facility or part thereof that is used in the provision of public transportation services and that is altered by, on behalf of, or for the use of a public entity in a manner that affects or could affect the usability of the facility or part thereof, it shall be considered discrimination, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such entity to fail to make the alterations (or to ensure that the alterations are made) in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. Where the entity is undertaking an alteration that affects or could affect usability of or access to an area of the facility containing a primary function, the entity shall also make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities if such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General).

(b) SPECIAL RULE FOR STATIONS.—

(1) GENERAL RULE.—For purpsoes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail, in accordance with the provisions of this subsection, to make stations in intercity rail systems and key stations (as determined under criteria established by the Secretary by regulation) in rapid rail, commuter rail, and light rail systems readily accessible to and usable by individuals with disabilities, including idividuals who use wheelchairs.

(2) RAPID RAIL, COMMUTER RAIL, AND LIGHT RAIL KEY STATIONS.—

(A) ACCESSIBILITY.—Except as otherwise provided in this paragraph, all key statons (as determined under criteria established by the Secretary by regulation) in rapid rail, commuter rail, and light rail systems shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than the last day of the 3-year period beginning on the effective date of this paragraph.

(B) Extension for extraordinarily expensive structural changes.—The Secretary may extend the 3-year period under subparagraph (A) up to a 30-year period for key stations in a rapid rail, commuter rail, or light rail system which stations need extraordinarily expensive structural changes to, or replacement of, existing facilities; except that by the last day of the 20th year following the date of the enactment of this Act at least ⅔ of such key stations must be readily accessible to and usable by individuals with disabilities.

(3) Intercity rail systems.—All stations in intercity rail systems shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable, but in no event later than 20 years after the date of the enactment of this Act.

(4) Plans and milestones.—The Secretary shall require the appropriate public entity to develop and submit to the Secretary a plan for compliance with this subsection—

(A) that reflects consultation with individuals with disabilities affected by such plan and the results of a public hearing and public comments on such plan, and

(B) that establishes milestones for achievement of the requirements of this subsection.

SEC. 209. PUBLIC TRANSPORTATION PROGRAMS AND ACTIVITIES IN EXISTING FACILITIES AND ONE CAR PER TRAIN RULE.

(a) Public Transportation Programs and Activities in Existing Facilities.—With respect to existing facilities used in the provision of public transportation services (other than facilities which have not been made readily accessible to and usable by individuals with disabilities in accordance with section 208(b)), it shall be considered discrimination, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public entity to fail to operate a public transportation program or activity conducted in such facilities so that, when viewed in the entirety, the program or activity is readily accessible to and usable by such individuals.

(b) One Car Per Train Rule.—

(1) General rule.—Subject to paragraph (2), with respect to 2 or more vehicles operated as a train by intercity, light, rapid, and commuter rail systems, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to have at least 1 vehicle per train that is accessible to individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than the last day of the 5-year period beginning on the effective date of this section.

(2) Historic trains.—In order to comply with paragraph (1) with respect to the remanufacture of a vehicle of historic character which is to be used on a segment of an intercity, light rapid, or commuter rail system which is included on the National Register of Historic Places, if making such vehicle readily accessible to and usable by individuals with disabilities would significantly alter the historic character of such vehicle, the public entity which operates such system only has to make (or to purchase or lease a remanufactured vehicle with) those modifications which are necessary to meet the requirements of section 203(c)(1) and which do not significantly alter the historic character of such vehicle.

SEC. 210. REGULATIONS.

(a) Attorney General.—Not later than 1 year after the date of the enactment of this Act, the Attorney General shall issue regulations in an accessible format that implement this title (other than sections 201(1), 201(2), 201(4), 201(5), 203 through 209, and 213). Except for "program accessibility", "existing facilities", and "communications", such regulations shall be consistent with the coordination regulations under part 41 of title 28, Code of Federal Regulations (as promulgated by the Department of Health, Education, and Welfare on January 13, 1978), applicable to recipients of Federal financial assistance under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794). With respect to "program accessibility", "existing facilities", and "communications", such regulations shall be consistent with regulations and analysis as in part 39 of title 28 of the Code of Federal Regulations, applicable to federally conducted activities under such section 504.

(b) SECRETARY.—

(1) IN GENERAL.—Not later than 1 year after the date of the enactment of this Act, the Secretary shall issue in an accessible format regulations to carry out sections 201(1), 201(2), 201(4), 201(5), 203, 205, 206, 207, 208, 209, and 213.

(2) STANDARDS.—The regulations issued under this section and section 204 shall include standards applicable to facilities and vehicles covered by such sections. The standards shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504 of this Act.

SEC. 211. ENFORCEMENT.

The remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be available with respect to any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of this title, including the regulations issued under this title.

SEC. 212. EFFECTIVE DATE.

(a) GENERAL RULE.—Except as provided in subsection (b), this title shall become effective 18 months after the date of the enactment of this Act.

(b) EXCEPTION.—Sections 203, 204 (other than subsection (a)), 205, 206, 208(b), 209(b), 210, and 213 shall take effect on the date of the enactment of this Act.

SEC. 213. APPLICABILITY TO CERTAIN COMMUTER RAIL SYSTEMS.

(a) GENERAL RULE.—Subject to subsection (b), a public entity which operates a fixed route system providing commuter rail service does not have to purchase or lease readily accessible and usable commuter rail vehicles to meet the requirements of this title and does not have to remanufacture commuter rail vehicles to meet the requirements of this title—

(1) if such entity is meeting the requirement of this title relating to 1 car per train being accessible to individuals with disabilities;

(2) if such entity provides clear, concise, and adequate notice, in its stations, of which cars are so accessible and the location of such cars on its trains; and

(3) if, in any case in which additional services are offered in a nonaccessible car of a train, such entity makes reasonable provision to ensure that such services are available to individuals with disabilities in the accessible car or cars of such train.

(b) ADDITIONAL ACCESSIBLE CARS TO MEET DEMAND.—In order for a public entity to be exempt under subsection (a), in any case in which actual continuing demand for accessible service cannot be met by the public entity with 1 accessible car per train, the public entity must use such additional accessible cars per train as may be necessary to meet such demand.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

SEC. 301. DEFINITIONS.

As used in this title, the following definitions apply:

(1) COMMERCE.—The term "commerce" means travel, trade, traffic, commerce, transportation, or communications—

(A) among the several States;

(B) between any foreign country or any territory or possession and any State; or

(C) between points in the same State but through another State or foreign country.

(2) DEMAND RESPONSIVE SYSTEM.—The term "demand responsive system" means any system of providing transportation of individuals which is not a fixed routine system.

(3) FIXED ROUTE SYSTEM.—The term "fixed route system" means a system of providing transporation of individuals (other than by aircraft) on which a vehicle is operated along a prescribed route according to a fixed schedule.

(4) OVER-THE-ROAD BUS.—The term "over-the-road bus" means a bus characterized by an elevated passenger deck located over a baggage compartment.

(5) POTENTIAL PLACES OF EMPLOYMENT.—The term "potential places of employment" means facilities—

(A) that are intended for nonresidential use; and

(B) whose operations will affect commerce.

Such term does not include facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968 (42 U.S.C. 3601 et seq.).

(6) Private entity.—The term "private entity" means any entity other than a department, agency, special purpose district, or other instrumentality of a Federal, State or local government.

(7) Public accommodation.—The following privately operated entities are considered public accommodations for purposes of this title, if the operations of such entities affect commerce—

(A) an inn, hotel, motel, or similar places of lodging, except for an establishment located within a building that contains not more than 5 rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor;

(B) a restaurant, bar, or other establishment serving food or drink;

(C) a motion picture house, theater, concert hall, staduim, or other place of exhibition or entertainment;

(D) an auditorium, convention center or lecture hall;

(E) a bakery, grocery store, clothing store, hardware store, shopping center or other similar retail sales establishment;

(F) a laundromat, dry-cleaners, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other similar service establishment;

(G) a terminal used for public transportation;

(H) a museum, library, gallery, and other similar place of public display or collection;

(I) a park or zoo;

(J) a nursery, elementary, secondary, undergraduate, or postgraduate private school;

(K) a day care center, senior citizen center, homeless shelter, good bank, adoption program, or other similar social service center; and

(L) a gymnasium, health spa, bowling alley, golf course, or other similar place of exercise or recreation.

(8) Public transportation.—The term "public transportation" means transportation by bus or rail, or by other conveyance (other than by aircraft) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

(9) Readily achievable.—

(A) In general.—The term "readily achievable" means easily accomplishable and able to be carried out without much difficulty or expense.

(B) Determination.—In determining whether an action is readily achievable, factors to be considered include—

(i) the overall size of the covered entity with respect to a number of employees, number and type of facilities, and the size of budgets;

(ii) the type of operation of the coverd entity, including the composition and structure of the entity; and

(iii) the nature and cost of the action needed.

SEC. 302. PROHIBITION OF DISCRIMINATION BY PUBLIC ACCOMMODATION.

(A) General Rule.—No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, priviledges, advantages, and accommodations of any public accommodation.

(b) Construction.—

(1) General prohibition.—

(A) activities.—

(i) Denial of participation.—It shall be discriminatory to subject an individual or class of individuals on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements, to a denial or the opportunity of the individual or class to participate in or benefit from the goods, services, facilities, priviledges, advantages, and accommodations of an entity.

(ii) Participation in unequal benefit.—It shall be discriminatory to afford an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractural, contractural, licensing, or other arrangements with the opportunity to participate in or benefit from a good, service, facility, priviledge, advantage, and accommodation that is not equal to that afforded to other individuals.

(iii) Separate benefit.—It shall be discriminatory to provide an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractural, licensing, or other arrangements with a good, service, facility privilege, advantage, or accommodation that is different or separate from that provided to other individuals, unless such action is necessary to provide the individual or class of individuals with a good, service, facility, priviledge, advantage, or accommodation, or other opportunity that is as effective as that provided to others.

(B) Integrated settings.—Goods, facilities, privileges, advantages accommodations, and services shall be afforded to an individual with a disability in the most integrated setting appropriate to the needs of the individual.

(C) Opportunity to participate.—Notwithstanding the existence of separate or different programs or activities provided in accordance with this section, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different.

(D) Administrative methods.—An individual or entity shall not, directly or through contractual or other arrangements, utilize standards or criteria or methods of administration—

(i) that have the effect of discriminating on the basis of disability; or

(ii) that perpetuate the discrimination of others who are subject to common administrative control.

(E) Association.—It shall be discriminatory to exclude or otherwise deny equal goods, services, facilities, privileges, advantages, and accommodations, or other opportunities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association.

(2) Specific prohibitions.—

(A) Discrimination.—As used in subsection (a), the term "discrimination" includes—

(i) the imposition or application of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any goods, services, facilities, privileges, advantages, and accommodations, unless such criteria can be shown to be necessary for the provision of the goods, services, facilities, privileges, advantages, or accommodations being offered;

(ii) a failure to make reasonable modifications in policies, practices, procedures, when such modifications are necessary to afford such goods, services, facilities, privileges, advantages, or accommodations to individuals with disabilities, unless the entity can demonstrate that making such modifications would fundamentally after the nature of such goods, services, facilities, privileges, advantages, or accommodations;

(iii) a failure to take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individual because of the absence of auxiliary aids and services, unless the entity can demonstrate that taking such steps would fundamentally alter the nature of the good, service, facility, privilege, advantage, or accommodation being offered or would result in undue burden;

(iv) a failure to remove architectual barriers, and communication barriers that are structural in nature, in existing facilities, and transportation barriers in existing vehicles used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles by the installation of a hydraulic or other lift), where such removal is readily achievable;

(v) where an entity can demonstrate that the removal of a barrier under clause (iv) is not readily achievable, a failure of make such goods, services, facilities, privileges, advantages, or accommodations available through alternative methods if such methods are readily achievable; and

(vi) with respect to a facility or part thereof that is altered by, on behalf of, or for the use of an establishment in a manner that affects or could affect the usability of the facility or part thereof, a failure to make alterations in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, and where the entity is undertaking an alteration that affects or could affect usability of or access to an area of the facility containing a primary function, the entity shall also make the alterations in such manner that, to the maximum extent feasible, the path of travel to the altered area and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities if such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General), except that this paragraph shall not be construed to require the installation of an elevator for facilities that are less than 3 stories or that have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the uses of such facilities.

(B) Fixed route system.—

(i) Accessibility.—It shall be considered discrimination for a private entity which operates a fixed route system and which is not subject to section 304 to purchase or lease a vehicle with a seating capacity in excess of 16 passengers (including the driver) for use on such system, for which a solicitation is made after the 30th day following the effective date of this subparagraph, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(ii) Equivalent service.—If a private entity which operates a fixed route system and which is not subject to section 304 purchases or leases a vehicle with a seating capacity of 16 passengers or less (including the driver) for use on such system after the effective date of this subparagraph that is not readily accessible to or usable by individuals with disabilities, it shall be considered discrimination for such entity to fail to operate such system so that, when viewed in its entirety, such system ensures a level of service to individuals with disabilities, including individuals who use wheelchairs, equivalent to the level of service provided to individuals without disabilities.

(C).—Demand responsive system.—As used in subsection (a), the term "discrimination" includes—

(i) a failure of a private entity which operates a demand responsive system and which not subject to section 304 to operate such system so that, when viewed in its entirety, such system ensures a level of service to individuals with disabilities, including individuals who use wheelchairs, equivalent to the level of service provided to individuals without disabilities; and

(ii) the purchase or lease by such entity for use on such system of a vehicle with a seating capacity in excess of 16 passengers (including the driver), for which solicitations are made after the 30th day following the effective date of this subparagraph, that is not readily accessible to and usable by individuals with disabilities (including individuals who use wheelchairs) unless such entity can demonstate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to that provided to individuals without disabilities.

(D) Over-the-road buses.—

(i) Limitation on applicability.—Subparagraphs (B) and (C) do not apply to over-the-road buses.

(ii) Accessibility requirements.—As used in subsection (a), the term "discrimination" includes (I) the purchase or lease of an over-the-road bus bus which does not comply with the regulations issued under section 306(a)(2) by a private entity which provides transportation of individuals and which is not primarily engaged in the business of transporting people, and (II) any other failure to such entity to comply with such regulations.

SEC. 303. NEW CONSTRUCTION IN PUBLIC ACCOMMODATIONS AND POTENTIAL PLACES OF EMPLOYMENT.

(a) Application of Term.—Except as provided in subsection (b), as applied to a—

(1) public accommodation; and

(2) potential place of employment;

the term "discrimination" as used in section 302(a) means a failure to design and construct facilities for first occupancy later than 30 months after the date of the enactment of this Act that are readily accessible to and usable by individuals with disabilities, except where an entity can demonstrate that it is structually impracticable to meet the requirements of such subsection in accordance with standards set forth or incorporated by reference in regulations issued under this title.

(b) ELEVATOR.—Subsection (a) shall not be construed to require the installation of an elevator for facilities that are less than three stories or have less than 3,000 square feet per story the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

SEC. 304. PROHIBITION OF DISCRIMINATION IN PUBLIC TRANSPORTATION SERVICES PROVIDED BY PRIVATE ENTITIES.

(a) GENERAL RULE.—No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of public transportation services provided by a private entity that is primarily engaged in the business of transporting people and whose operations affect commerce.

(b) CONSTRUCTION.—As used in subsection (a), the term "discrimnated against" includes—

(1) the imposition or application by a private entity that is primary engaged in the business of transporting people and whose operations affect commerce of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully enjoying the public transportation services provided by such entity, unless such criteria can be shown to be necessary for the provision of such services;

(2) the failure of such entity to—

(A) make reasonable modifications consistent with those required under section 302(b)(2)(A)(ii);

(B) provide auxiliary aids and services consistent with the requirements of section (b)(2)(A)(iii); and

(C) remove barriers consistent with the requirements of section 302(b)(2)(A)(iv) and (v), and (vi);

(3) the purchase or lease by such entity of a new vehicle (other than an automobile, a van with a seating capacity of less than 8 passengers, including the driver, or an over-the-road bus) which is to be used to provide public transportation and for which a solicitation is made after the 30th day following the effective date of this section, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs; except that the new vehicle need not be readily accessible to and usable by such individuals if the new vehicle is to be used solely in a demand responsive system and if the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to such individuals equivalent to the level of service provided to the general public;

(4)(A) the purchase or lease by such entity of an over-the-road bus which does not comply with the regulations issued under section 306(a)(2); and

(B) any other failure of such entity to comply with such regulations; and

(5) the purchase or lease by such entity of a new van with a seating capacity of less than 8 passengers, including the driver, which is to be used to provide public transportation and for which a solicitation is made after the 30th day following the effective date of this section that is not readily accessible to or usable by individuals with disabilities, including individuals who use wheelchairs; except that the new van need not be readily accessible to and usable by such individuals if the entity can demonstrate that the system for which the van is being purchased or leased, when viewed in its entirety, provides a level of service to such individuals equivalent to the level of service provided to the general public.

SEC. 305. STUDY.

(a) PURPOSES.—The Office of Techology Assessment shall undertake a study to determine—

(1) the access needs of individuals with disabilities to over-the-road buses and over-the-road bus service; and

(2) the most cost effective methods for providing access to over-the-road buses and over-the-road bus service to individuals with disabilities, particularly individuals who use wheelchairs, through all forms of boarding options.

(b) CONTENTS.—The study shall include, at a minimum, an analysis of the following:

(1) The anticipated demand by individuals with disabilities for accessible over-the-road buses and over-the-road bus service.

(2) The degree to which such buses and service, include any service required under sections 304(b)(4) and 306(a)(2), are readily accessible to and usable by individuals with disabilities.

(3) The effectiveness of various methods of providing accessibility to such buses and services to individuals with disabilities.

(4) The cost of providing accessible over-the-road buses and bus service to individuals with disabilities, including consideration of recent technological and cost saving developments in equipment and devices.

(5) Possible design changes in over-the-road buses that could enhance accessibility, including the installation of accessible restrooms which do not result in a loss of seating capacity.

(6) The impact of accessibility requirements of the continuation of over-the-road bus service, with particular consideration of the impact of such requirements on such service to rural communities.

(c) ADVISORY COMMITTEE.—In conducting the study required by subsection (a), the Office of Technology Assessment shall establish an advisory committee, which shall consist of—

(1) members selected from among private operators and manufacturers of over-the-road buses;

(2) members selected from among individuals with disabilities, particularly individuals who use wheelchairs, who are potential riders of such buses; and

(3) members selected for their technical assistance equipment and devices.

The number of members selected under each of paragraphs (1) and (2) shall be equal, and the total number of members selected under paragraphs (1) and (2) shall exceed the number of members selected under paragraph (3).

(d) DEADLINE.—The study required by subsection (a), along with recommendations by the Office of Technology Assessment, including any policy options for legislative action, shall be submitted to the President and Congress within 36 months after the date of the enactment of this Act. If the President determines that compliance with the regulations issued pursuant to section 306(a)(2)(B) on or before the applicable deadlines specified in section 306(a)(2)(B) will result in a significant reduction in intercity over-the-road bus service, the President shall extend each such deadline by 1 year.

(e) REVIEW.—In developing the study required by subsection (a), the Office of Technology Assessment shall provide a preliminary draft of such study to the Architectural and Transportation Barriers Compliance Board established under section 502 of the Rehabilitation Act of 1973 (29 U.S.C. 792). The Board shall have an opportunity to comment on such draft study, and any such comments by the Board made in writing within 120 days after the Board's receipt of the draft study shall be incorporated as part of the final study required to be submitted under subsection (d).

SEC. 306. REGULATIONS.

(a) TRANSPORTATION PROVISIONS.—

(1) GENERAL RULE.—Not later than 1 year after the date of the enactment of this Act, the Secretary of Transportation shall issue regulations in an accessible format to carry out sections 302(b)(2)(B) and (C) and 304 (other than subsection (b)(4)).

(2) SPECIAL RULES FOR PROVIDING ACCESS TO OVER-THE-ROAD BUSES.—

(A) INTERIM REQUIREMENTS—

(i) ISSUANCE.—Not later than 1 year after the date of the enactment of this Act, the Secretary of Transportation shall issue regulations in an accessible format to carry out sections 304(b)(4) and 302(b)(2)(D)(ii) that require each private entity which uses an over-the-road bus to provide transportation of individuals to provide accessibility to such bus; except that such regulations shall not require any structural changes in over-the-road buses in order to provide access to individuals who use wheelchairs during the effective period fo such regulations and shall not require the purchase of boarding assistance devices to provide access to such individuals.

(ii) Effective period.—The regulations issued pursuant to this subparagraph shall be effective until the effective date of the regulations issued under subparagraph (B).

(B) Final requirement.—

(i) Review of study and interim requirements.—The Secretary shall review the study submitted under section 305 and the regulations issued pursuant to subparagraph (A).

(ii) Issuance.—Not later than 1 year after the date of this submission of the study under section 305, the Secretary shall issue in an accessible format new regulations to carry out sections 304(b)(4) and 302(b)(2)(D)(ii) that require, taking into account the purposes of the study under section 305 and any recommendations resulting from such study, each private entity which uses an over-the-road bus to provide transportation to individuals to provide accessibility to such bus to individuals with disabilities, including individuals who use wheelchairs.

(iii) Effective period.—Subject to section 305(d), the regulations issued pursuant to this subparagraph shall take effect—

(I) with respect to small providers of transportation (as defined by the Secretary), 7 years after the date of the enactment of this Act; and

(II) with respect to other providers of transportation, 6 years after such date of enactment.

(C) Limitation on requiring installation of accessible restrooms.—The regulations issued pursuant to this paragraph shall not require the installation of accessible restrooms in over-the-road buses if such installation would result in a loss of seating capacity.

(3) Standards.—The regulations issued pursuant to this subsection shall include standards applicable to facilities and vehicles covered by sections 302(b)(2) and 304.

(b) Other Provisions.—Not later than 1 year after the date of the enactment of this Act, the Attorney General shall issue regulations in an accessible format to carry out the provisions of this title not referred to in subsection (a) that include standards applicable to facilities and vehicles covered under section 302.

(c) Consistency With ATBCB Guidelines.—Standards included in regulations issued under subsections (a) and (b) shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504 of this Act.

SEC. 307. EXEMPTIONS FOR PRIVATE CLUBS AND RELIGIOUS ORGANIZATIONS.

The provisions of this title shall not apply to private clubs or establishments exempted from coverage under title II of the Civil Rights Act of 1964 (42 U.S.C. 2000-a(e)) or to religious organizations or entities controlled by religious organizations, including places of worship.

SEC. 308. ENFORCEMENT.

(a) General.—

(1) Availability of remedies and procedures.—The remedies and procedures set forth in section 204 of the Civil Rights Act of 1964 (42 U.S.C. sec. 2000a-3(a)) shall be available to any individual who is being or is about to be subjected to discrimination on the basis of disability in violation of this title.

(2) Injunctive relief.—In the case of violations of section 302(b)(2)(A)(iv) and (vi) and section 303(a), injunctive relief shall include an order to alter facilities to make such facilities readily accessible to and usable by individuals with disabilities to the extent required by this title. Where appropriate, injunctive relief shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by this title.

(b) Enforcement by the Attorney General.—

(1) Denial of rights.—

(A) Duty to investigate.—The Attorney General shall investigate alleged violations of this title, which shall include undertaking periodic reviews of compliance of covered entities under this title.

(B) Potential violation.—If the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of resistance to the full enjoyment of any of the rights granted by this title or that any person or group of persons has been denied any of the rights granted by such title, and such denial raises an issue of general public importance, the Attorney General may commence a civil action in any appropriate United States direct court.

(2) **Authority of court.**—In a civil action under paragraph (1), the court—

(A) may grant any equitable relief that such court considers to be appropriate, including granting temporary, preliminary, or permanent relief, providing an auxiliary aid or service, modification of policy or alternative method, or making facilities readily accessible to and usable by individuals with disabilities, to the extent required by this title;

(B) may award such other relief as the court considers to be appropriate, including monetary damages to persons aggrieved when requested by the Attorney General; and

(C) may, to vindicate the public interest, assess a civil penalty against the entity in an amount—

(i) not exceeding $50,000 for a first violation; and

(ii) not exceeding $100,000 for any subsequent violation.

(3) **Judicial consideration.**—In a civil action under paragraph (1), the court, when considering what amount of civil penalty, if any, is appropriate, shall give consideration to any good faith effort or attempt to comply with this Act by the entity.

SEC. 309. EFFECTIVE DATE.

(a) **General Rule.**—Except as provided in subsection (b), this title shall become effective 18 months after the date of the enactment of this Act.

(b) **Exception.**—Section 302(a) for purposes of sections 302(b)(2) (B) and (C) only, 304(a) for purposes of section 304(b)(3) only, sections 304(b)(3), 305, and 306 shall take effect on the date of the enactment of this Act.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICES

SEC. 401. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

(a) **Telecommunications.**—Title II of the Communications Act of 1934 (47 U.S.C. 201 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 225. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

"(a) **Definitions.**—As used in this section—

"(1) **Common carrier or carrier.**—The term 'common carrier' or 'carrier' includes any common carrier engaged in interstate communication by wire or radio as defined in section 3(h), any common carrier engaged in intrastate communication by wire or radio, and any common carrier engaged in both interstate and intrastate communication, notwithstanding sections 2(b) and 221(b).

"(2) TDD.—The term 'TDD' means a Telecommunications Device for the Deaf, which is a machine that employs graphic communication in the transmission of coded signals through a wire or radio communication system.

"(3) **Telecommunications relay services.**—The term 'telecommunications relay services' means telephone transmission services that provide the ability for an individual who has a hearing impairment or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses a TDD or other nonvoice terminal device and an individual who does not use such a device.

"(b) **Availability of Telecommunications Relay Services.**—

"(1) **In general.**—In order to carry out the purposes established under section 1, to make available to all individuals in the United States a rapid, efficient nationwide communication service, and to increase the utility of the telephone system of the Nation, the Commission shall ensure that interstate and intrastate telecommunications relay services are available, to the extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals in the United States.

"(2) **Remedies.**—For purposes of this section, the same remedies, procedures, rights, and obligations under this Act that are applicable to common carriers engaged in interstate communication by wire or radio are also applicble to common carriers engaged in intrastate communication by wire or radio and common carriers engaged in both interstate and intrastate communication by wire of radio.

"(c) Provision of Service.—Each common carrier providing telephone voice transmission service shall provide telecommunications relay services individually, through designees, or in concert with other carriers not later than 3 years after the date of enactment of this section.

"(d) Regulations.—

"(1) in general.—The Commission shall, not later than 1 year after the date of enactment of this section, prescribe regulations to implement this section, including regulations that—

"(A) establish functional requirements, guidelines, and operations procedures for telecommunications relay services;

"(B) establish minimum standards that shall be met by common carriers in carrying out subsection (c);

"(C) require that telecommunications relay services operate every day for 24 hours per day;

"(D) require that users of telecommunications relay services pay rates no greater than the rate paid for functionally equivalent voice communication services with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination;

"(E) prohibit relay operators from refusing calls or limiting the length of calls that use telecommunications relay services;

"(F) prohibit relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of the call; and

"(G) prohibit relay operators from intentionally altering a relayed conversation.

"(2) Technology.—The Commission shall ensure that regulations prescribed to implement this section encourage the use of existing technology and do not discourage or impair the development of improved technology.

"(3) Jurisdictional separation of costs.—

"(A) In general.—The Commission shall prescribe regulations governing the jurisdictional separation of costs for the services provided pursuant to this section.

"(B) Recovering costs.—Such regulations shall generally provide that costs cause by interstate telecommunications relay services shall be recovered from the interstate jurisdiction and costs caused by intrastate telecommunications relay services shall be recovered from the intrastate jurisdiction.

"(C) Joint provision of services.—To the extent interstate and intrastate common carriers jointly provide telecommunications relay services, the procedures establish in section 410 shall be followed, as applicable.

"(4) Fixed monthly charge.—The Commission shall not permit carriers to impose a fixed monthly charge on residential customers to recover the cost of providing interstate telecommunication relay services.

"(5) Undue burden.—If the Commission finds that full compliance with the requirements of this section would unduly burden one or more common carriers, the Commission may extend the date for full compliance by such carrier for a period not to exceed 1 additional year.

"(e) Enforcement.—

"(1) In general.—Subject to subsection (f) and (g), the Commission shall enforce this section.

"(2) Complaint.—The Commission shall resolve, by final order, a complaint alleging a violation of this section within 180 days after the date such complaint is filed.

"(f) Certification.—

"(1) State documentation.—Each State may submit documentation to the Commission that describes the program of such State for implementing intrastate telecommunications relay services.

"(2) Requirements for certification.—After review of such documentation, the Commission shall certify the State program if the Commission determines that the program makes available to hearing-impaired and speech-impaired individuals either directly, through designees, or through regulation of intrastate common carriers, intrastate telecommunications relay services in such State in a manner that meets the requirements of regulations prescribed by the Commission under subsection (d).

"(3) Method of funding.—Except as provided in subsection (d), the Commission shall not refuse to certify a State program based solely on the method such State will implement for funding intrastate telecommunication relay services.

"(4) Suspension or revocation of certification.—The Commission may suspend or revoke such certification if, after notice and opportunity for hearing, the Commission determines that such certification is no longer warranted.

"(g) Complaint.—

"(1) Referral of complaint.—If a complaint to the Commission alleges a violation of this section with respect to intrastate telecommunications relay services within a State and certification of the program of such State under subsection (f) is in effect, the Commission shall refer such complaint to such State.

"(2) Jurisdiction of commission.—After referring a complaint to a State under paragraph (1), the Commission shall exercise jurisdiction over such complaint only if—

"(A) final action under such State program has not been taken on such complaint by such State—

"(i) within 180 days after the complaint is filed with such State; or

"(ii) within a shorter period as prescribed by the regulations of such State; or

"(B) the Commission determines that such State program is no longer qualified for certification under subsection (f).".

(b) Conforming Amendments.—The Communications Act of 1934 (47 U.S.C. 151 et seq.) is amended—

(1) in section 2(b) (47 U.S.C. 152(b)), by striking "section 223 or 224" and inserting "section 223, 224, and 225"; and

(2) in section 221(b) (47 U.S.C. 221(b)), striking "section 301" and inserting "sections 225 and 301".

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. CONSTRUCTION.

(a) Rehabilitation Act of 1973.—Nothing in this Act shall be construed to reduce the scope of coverage or apply a lesser standard than the coverage required or the standards applied under title V of the Rehabilitation Act of 1973 (29 U.S.C. 790 et seq.) or the regulations issued by Federal agencies pursuant to such title.

(b) Other Laws.—Nothing in this Act shall be construed to invalidate or limit any other Federal law or law of any State or political subdivision of any State or jurisdiction that provides greater or equal protection for the rights of individuals with disabilities than are afforded by this Act.

(c) Insurance.—Titles I through IV of this Act shall not be construed to prohibit it or restrict—

(1) an insurer, hospital or medical service company, health maintenance organization, or any agent, or entity that administers benefit plans, or similar organizations from underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law;

(2) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that are based on underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

(3) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide plan that is not subject to State laws that regulate insurance;

except that paragraphs (1), (2), and (3) are not used as a subterfuge to evade the purpose of title I and III.

SEC. 502. PROHIBITION AGAINST RETALIATION AND COERCION.

(a) Retaliation.—No individual shall discriminate against any other individual because such other individual has opposed any act or practice made unlawful by this Act or because such other individual made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this Act.

(b) Interference, Coercion, or Intimidation.—It shall be unlawful to coerce, intimidate, threaten, or interfere with any person in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other person in the exercise or enjoyment of, any right granted or protected by this Act.

(c) Remedies and Procedures.—The remedies and procedures available under sections 107, 211, and 308 of this Act shall be available to aggrieved persons for violations of subsections (a) and (b).

SEC. 503. STATE IMMUNITY.

A State shall not be immune under the eleventh amendment to the Constitution or the United States from an action in Federal court for a violation of this Act. In any action against a State for a violation of the requirements of this Act, remedies (including remedies both at law and in equity) are available for such a violation to the same extent as such remedies are available for such a violation in an action against any public or private entity other than a State.

SEC. 504. REGULATIONS BY THE ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD.

(a) Issuance of Guidelines.—Not later than 6 months after the date of the enactment of this Act, the Architectural and Transportation Barriers Compliance Board shall issue minimum guidelines that shall supplement the existing Minimum Guidelines and Requirements for Accessible Design for purposes of titles II and III.

(b) Contents of Guidelines.—The guidelines issued under subsection (a) shall establish additional requirements, consistent with this Act, to ensure that buildings, facilities, and vehicles are accessible, in terms of architecture and design, transportation, and communications, to individuals with disabilities.

SEC. 505. ATTORNEY'S FEES.

In any action or administrative proceeding commenced pursuant to this Act, the court or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonble attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

SEC. 506. TECHNICAL ASSISTANCE.

(a) Plan for Assistance.—

(1) In general.—Not later than 180 days after the date of the enactment of this Act, the Attorney General, in consultation with the Chairman of the Equal Employment Opportunity Commission, the Secretary of Transportation, the National Council on Disability, the Chairperson of the Architectural and Transportation Barriers Compliance Board, and the Chairman of Federal Communications Commission, shall develop a plan to assist entities covered under this Act, along with other executive agencies and commissions, in understanding the responsibility of such entities, agencies, and commissions under this Act.

(2) Publication of plan.—The Attorney General shall publish the plan referred to in paragraph (1) for public comment in accordance with the Administrative Procedure Act (5 U.S.C. 551 et seq.).

(b) Agency and Public Assistance.—The Attorney General is authorize to obtain the assistance of other Federal agencies in carrying out subsection (a), including the National Council on Disability, the President's Committee on Employment of People with Disabilities, the Small Business Administration, and the Department of Commerce.

(c) Implementation.—

(1) Authority to contract.—Each department or agency that has responsibility for implementing this Act may render technical assistance to idividuals and institutions that have rights or responsibilities under this Act.

(2) Implementation of titles.—

(A) Title I.—The Equal Employment Opportunity Commission and the Attorney General shall implement the plan for assistance, as described in subsection (a), for title I.

(B) Title II.—

(i) In general.—Except as provided for in clause (ii), the Attorney General shall implement such plan for assistance for title II.

(ii) Exception.—The Secretary of Transportation shall implement such plan for assistance for sections 203 through 209.

(C) Title III.—The Attorney General, in coordination with the Secretary of Transportation and the Chairperson of the Architectural Transportation Barriers Compliance Board, shall implement such plan for assistance for title III.

(D) Title IV.—The Chairman of the Federal Communications Commission, in coordination with the Attorney General, shall implement such plan for assistance for title IV.

(d) Grants and Contracts.—

(1) In general.—Each department and agency having responsibility for implementing this Act may make grants or enter into contracts with individuals, profit institutions, and nonprofit institutions, including educational institutions

and groups or associations representing individuals who have rights or duties under this Act, to effectuate the purposes of this Act.

(2) **Dissemination of information.**—Such grants and contracts, among other uses, may be designed to ensure wide dissemination of information about the rights and duties established by this Act and to provide information and technical assistance about techniques for effective compliance with this Act.

(e) **Failure to Receive Assistance.**—An employer, public accommodation, or other entity covered under this Act shall not be excused from meeting the requirements of the Act because of any failure to receive technical assistance under this section.

SEC. 507. FEDERAL WILDERNESS AREAS.

(a) **Study.**—The National Council on Disability shall conduct a study and report on the effect that wilderness designations and wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System as established under the Wilderness Act (16 U.S.C. 1131 et seq.)

(b) **Submission of Report.**—Not later than 1 year after the date of the enactment of this Act, the National Council on Disability shall submit the report required under subsection (a) to Congress.

SEC. 508. TRANSVESTITTES.

For the purposes of this Act, the term "disabled" or "disability" does not apply to an individual solely because that individual is a transvestite.

SEC. 509. CONGRESSIONAL INCLUSION.

Notwithstanding any other provision of this act or of law, the provisions of this Act shall apply in their entirety to the Senate, the House of Representatives, and all the instrumentalities of the Congress, or either House thereof.

SEC. 510. ILLEGAL DRUG USE.

(a) **General Rule.**—For purposes of this Act, an individual with a "disability" does not include any individual who uses illegal drugs, but may include an individual who has successfully completed a supervised drug rehabilitation program, or has otherwise been rehabilitated successfully, and no longer uses illegal drugs.

(b) **Exception.**—However, for purposes of covered entities providing medical services, an individual who uses illegal drugs shall not be denied the benefits of such services on the basis of his or her use of illegal drugs, if he or she is otherwise entitled to such services.

SEC. 511 DEFINITIONS.

Under this Act the term "disability" does not include "homosexuality", "bisexuality", "transvestism", "pedophilia", "transsexualism", "exhibitionism", "voyeurism", "compulsive gambling", "kleptomania", or "pyromania", "gender indentify disorder", "current psychoactive substance use disorders", "current psychoactive substance-induced organic mental disorders", as defined by DSM-III-R which are not the result of medical treatment, or other sexual behavior disorders.

SEC. 512. AMENDMENTS TO THE REHABILITATION ACT.

(a) **Handicapped Individual.**—Section 7(8) of the Rehabilitation Act of 1973 (29 U.S.C. 706(8)) is amended—

(1) in the first sentence of subparagraph (B) by striking "Subject to the second sentence of this subparagraph, the" and inserting "The";

(2) by striking the second sentence of subparagraph (B) and inserting the following:

"Notwithstanding any other provision of law, but subject to subparagraph (D) with respect to programs and activities providing education and the last sentence of this paragraph, the term 'individual with a handicap' does not include any individual who uses illegal drugs, except that an individual who is otherwise handicapped shall not be excluded from the protections of this Act if such individual also uses or is also addicted to drugs. For purposes of programs and activities providing medical services, and individual who currently uses illegal drugs shall not be denied the benefits of such programs or activities on the basis of his or her current use of illegal drugs if he or she is otherwise entitled to such services."; and

(3) by adding at the end the following new subparagraphs:

"(D) For purposes of programs and activities providing educational services, local educational agencies may take disciplinary action pertaining to the use or possession of illegal drugs or alcohol against any handicapped student who currently uses drugs or alcohol to the same extent that such disciplinary action is taken against nonhandicapped students. Furthermore, the due process procedures at 34 CFR 104.36 shall not apply to such disciplinary actions.

"(E) For purposes of section 503 and 504 of this Act as such sections relate to employment, the term "individual with handicaps' does not include any indivudal who is an alcoholic whose current use of alcohol prevents such individual for performing the duties of the job in question or whose employment, by reason of such current alcohol abuse, would constitute a direct threat to property or the safety of others.".

(b) Illegal Drugs Defined.—Section 7 of such Act (29 U.S.C. 706) is further amended by adding at the end thereof the following new paragraph:

"(22) The term 'illegal drugs' means controlled substances, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812), the possession or distribution of which is unlawful under such Act. The term "illegal drugs' does not mean the use of a controlled substances pursuant to a valid prescription or other uses authorized by the Controlled Substances Act or other provisions of Federal law.".

SEC. 513. SEVERABILITY.

Should any provision in this Act be found to be unconstitutional by a court of law, such provision shall be served from the remainder of the Act, and such action shall not affect the enforceability of the remaining provisions of the Act.

INTRODUCTION

The Americans With Disabilities Act (ADA) will permit the United States to take a long-delayed but very necessary step to welcome individuals with disabilities fully into the mainstream of American society. The specific provisions of the bill which lie within the jurisdiction of the Committee on Public Works and Transportation are primarily within Titles II and III, dealing with publicly and privately provided transportation services.

With regard to pubilicly provided transportation services, the bill requires the purchase of new transit vehicles for use on fixed route systems which are readily accessible to, and usable by, individuals with disabilities, including individuals who use wheelchairs. The bill also requires the provision of paratransit services for those individuals whose disabilities preclude their use of the fixed route system.

Transit agencies across the United States have already made some progress in the provision of accessible transit services—35% of America's transit buses are currently accessible. As more and more transit authorities make the commitment to provide fully accessible bus service, the percentage of new bus purchases which are accessible has grown to more than 50% annually. By the mid-1990's many American cities will have completely accessible fixed route systems. Furthermore, many of the transit systems in America already provide some type of paratransit services to the disabled. So, the passage of the ADA will not break sharply with existing transit policy. It will simply extend past successes to even more cities, so that this country can continue to make progress in providing much needed transit services for individuals with disabilities.

With regard to privately provided transportation services, which do not receive the high levels of federal subsidies that publicly provided services do, the requirements of the bill vary according to the size and type of vehicle, as well as according to the type of system on which the vehicle operates.

Nonetheless, in all cases, the Americans with Disabilities Act provides strong guarantees that individuals with disabilities will be treated with respect and dignity while using transporatation services. After all, the Americans With Disabilities Act is ultimately a civil rights bill. The history of the United States is rich with examples of diversity triumphing over discrimination, but not so rich that this country can ever afford to exclude, or segregate in any way, the significant number of its citizens who have disabilities.

SECTION 1. SHORT TITLE; TABLE OF CONTENTS

Subsection (a) of this section provides that the Act may be cited as the "Americans with Disabilities Act of 1990".

SECTION 2. FINDINGS AND PURPOSES

This section describes the findings and purposes of the Act.

SECTION 3. DEFINITIONS

This section defines the terms "auxiliary aids and services", "disability", and "State" for purposes of the Act.

TITLE I—EMPLOYMENT

SECTION 101. DEFINITIONS

This section defines the terms "Commission", "covered entity", "employee", "employer", "Illegal drug", "person", "labor organization", "employment agency", "commerce", "industry affecting commerce", "qualified individual with a disability", "reasonable accommodation", and "undue hardship" for purposes of the Title.

SECTION 102. DISCRIMINATION

Subsection (a) of this section prohibits discrimination against a qualified individual with a disability because of the disability of such individual in regard to job application procedures, the hiring or discharge of employees, employee compensation, advancement, job training, and other terms, conditions, and privileges of employment.

SECTION 103. DEFENSES

Subsection (a) of this section provides that a defense to a charge of discrimination under the Act may be that a denial of a job or benefit to a qualified individual with a disability was job-related, consistent with business necessity, and could not be avoided through reasonable accommodation.

SECTION 104. ILLEGAL DRUGS AND ALCOHOL

This section includes provisions regarding the use of alcohol or illegal drugs at the workplace, including provisions regarding tests to determine the use of illegal drugs.

SECTION 105. POSTING NOTICES

This section requires the posting of notices describing the provisions of the Act.

SECTION 106. REGULATIONS

This section requires the Equal Employment Opportunity Commission to issue regulations in an accessible format to carry out this Title not later than one year after the date of the enactment of the Act.

SECTION 107. ENFORCEMENT

This section provides that, with regard to employment, the remedies and procedures set forth in Title VII of the Civil Rights Act of 1964 shall be available to any individual who believes that he or she is being subjected to discrimination under the Act.

SECTION 108. EFFECTIVE DATE

This section provides that Title I become effective 24 months after the date of the enactment of the Act.

TITLE II—PUBLIC SERVICES

SECTION 201. DEFINITIONS

This section defines the terms "demand responsive system", "fixed route system", "operates", "public entity", "public school transportation", "public transportation", "qualified individual with a disability", and "Secretary" for purpose of the Title.

With regard to fixed route systems, the Committee defines these systems as those which operate along prescribed routes according to fixed schedules. The Committee intends that the "fixed schedule" component of this definition include those systems which operate vehicles at set times of day or at set intervals between vehicles. So long as the schedule is fixed, the system may operate at 5 minute intervals during periods of peak demand and 15 minute intervals during periods of weal demand and still be considered a fixed route system.

With regard to the operation of a system providing public transportation, if a public entity has entered into a contractual or other arrangement or relationship with a private entity to operate the system, or a portion of the system, the public entity must ensure that the same accessibility requirements are met by the private entity for service provided under a contractual, or other arrangement or relationship as would apply if the public entity were operating the system, or portion of the system, itself.

The Committee intends that the requirements of this legislation not be applied to "public school transportation" as defined in this Act, since such services are subject to the requirements of section 504 of the Rehabilitation Act of 1973, and it is not the intent of the Committee to require school systems receiving Federal financial assistance to meet any different requirements under this legislation than are currently required under seciton 504. Therefore, in promulgating regulations to implement this title, the Department of Transportation should recognize the special arrangements which are currently made with school districts in the provision of pupil transportation.

For example, although the definition speaks to transportation "to and from a public elementary or secondary school and school-related activities," it is the Committee's intent to include in the scope of this exemption from the provisions of the Act, transportation of pre-Kindergarten children to Head Start or special education programs which receive Federal assistance. Similarly, it is the Committee's intent to include in this exemption transportation arrangements which permit pre-school children of school bus drivers to ride a school bus, or special arrangements allowing pre-school children of teenage mothers to be transported to day care facilities at a school or along the school bus route so that these mothers may continue to attend school.

SECTION 202. PROHIBITION AGAINST DISCRIMINATION

This section, subject to the provisions of the title, prohibits discrimination against a qualified individual with a disability with regard to the services, programs or activities of a public entity.

SECITON 203. PUBLIC ENTITIES OPERATING FIXED ROUTE SYSTEMS

Subsection (a) of this section provides that it shall be considered discrimination for purposes of this Act and Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity which operates a fixed route system to purchase or lease a new bus, a new rail vehicle, or any other vehicle to be used on a fixed route system unless the vehicle is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. Although individuals who use wheelchairs are specifically referenced, the concept of making a vehicle "readily accessible to and usable by individuals with disabilities" involves more than simply making it accessible to an individual using a wheelchair. For example, the regulations implementing this section may require vehicles to incorporate non-slip floors for individuals whose disabilities cause balance problems or specific visual information for the hearing-impaired.

This subsection applies to any solicitation for a vehicle made more than 30 days after the date of the enactment of the Act and applies to any public entity which operates a fixed route system regardless of the size of the community in which the system operates.

With regard to rail vehicles, the Committee intends that the use of "mini-high platforms" or portable wheelchair lifts meet the requirement that these vehicles are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, so long as a mini-high platform or a portable wheelchair lift is available when needed to board an individual with a disability.

Subsection (b) of this section states that it is discrimination for a public entity which operates a fixed route system to fail to make demonstrated good faith efforts to purchase or lease accessible used vehicles. For purposes of this subsection, remanufactured vehicles shall be treated as used vehicles beginning on the day after the last day of the period by which the usable life of the remanufactured vehicle was extended.

Subsection (c) of this section provides that it is discrimination for a public entity which operates a fixed route system, when remanufacturing a vehicle to extend its usable life by five years or more, to fail to make that vehicle readily accessible to and usable by individuals with disabilities, to the maximum extent feasible. The word "remanufacture" means that the vehicle is stripped to its frame and rebuilt. Regarding the limitation of "to the maximum extent feasible", the Committee intends that remanufactured vehicles need only be modified to make them accessible to the extent that the modifications do not adversely affect the structural integrity of the vehicle in a significant way.

A partial exception to subsection (c) is provided for the remanufacturing of any vehicle operating on a segment of a system if that segment is included on the National Register of Historic Places. Vehicles used solely on such segments need only be made accessible to the extent that the modifications needed to provide accessibility to the vehicle do not significantly alter the historic character of such vehicles.

SECTION 204. PARATRANSIT AS A COMPLEMENT TO FIXED ROUTE SERVICE

This section states that it shall be considered discrimination for purposes of this Act and section 504 of the Rehablitation Act of 1973 for a public entity which operates a fixed route system, other than a system which provides solely commuter bus or commuter rail service, to fail to provide paratransit and other special transportation services to individuals with disabilities. The level of these services provided to individuals with disabilities must be comparable to the level of transit service provided to individuals without disabilities, except with regard to response time, in which case the level of service must only be comparable to the extent practicable. The paratransit service must be provided, beginning 18 months after the date of the enactment of the Act, in accordance with regulations issued by the Department of Transportation within one year after the date of the enactment of the Act.

Since the operations of fixed route and paratransit service differ so markedly, levels of service must only be comparable—not identical. With regard to response time, the Committee acknowledges that paratransit vehicle response time may not meet a standard of comparability with a fixed route system which operates vehicles at short headways. Instead, the legislation states that paratransit vehicle response time need only be "comparable to the extent practicable" to the response time of a vehicle provided on a fixed route system.

Subsection (c) of this section states that these regulations must require each public entity operating a fixed route system to provide paratransit service to any individual with a disability who is unable, as a result of a physical or mental impairment (including a vision impairment) and without the assistance of another individual (except an operator of a wheelchair lift or other boarding assistance device), to board, ride, or disembark from any vehicle on the system which is readily accessible to and usable by individuals with disabilities. The Committee intends "ride" to include both the physical ability to ride on the vehicle as well as the mental ability to understanding when to disembark from the vehicle.

The Committee specifically inserted the words "including a vision impairment" so that section 204 of the bill would unequivocally cover individuals with vision impairments. Individuals with severe vision impairments traveling in unfamiliar surroundings or recently impaired individuals often need paratransit service since they cannot board, ride, or disembark from fixed route vehicles without assistance. The bill clearly extends paratransit eligibility to the vision impaired under these conditions, so long as the impairment is sufficiently severe to substantially limit one or more of their major life activities (a component of the definition of disability under this Act).

Similarly, the Committee included the phrase "mental impairment" to ensure that mentally retarded and mentally ill individuals are also entitled to paratransit service if their mental impairment substantially limits one or more of their major life activities and they are unable to board, ride or disembark from a fixed route vehicle.

A public entity operating a fixed route system must also provide paratransit service to any individual with a disability who would otherwise be able to utilize an accessible fixed route vehicle at a time, or within a reasonable period of such time, when the individual wishes to use such a vehicle and one is not available.

In general, the Committee does not intend that the concepts of boarding and disembarking include travel to or from a boarding or disembarking location. However, the Committee included a very narrow exception in recognition of specific impairment-related conditions which certain individuals with disabilities may have. Under the bill, paratransit services must be provided to any individual with a disability who has a specific impairment-related condition that prevents the individual from traveling to a boarding location or from a disembarking location on a fixed route system. A specific condition related to the impairment of the individual with a disability such as chronic fatigue, blindness, a lack of cognitive ability to remember and follow directions, or a special sensitivity to temperature must be present.

The Committee does not intend for the existence of architectural barriers to trigger eligibility for paratransit under this section if these barriers are not the responsibility of the fixed route operator to remove. In particular, no eligibility for paratransit exists due simply to a lack of curb cuts in the path of travel of an individual with a disability since, in the short term, such barriers can often be navigated around and, more importantly, pressure to eliminate these architectural barriers must be maintained on the state and local governmental entities responsible for eliminating them. In the same way, distance from a boarding or disembarking location alone does not trigger eligibility under this section. In both of these cases, a specific condition related to the impairment of the individual with a disability such as those cited previously must also be present to trigger paratransit eligibility.

The Committee is concerned that a broad interpretation of this exception will discourage the use of fixed route transit systems by individuals with disabilities. The transportation provisions of the legislation carefully balance the increased use of fixed route transit service by individuals with disabilities against expanded, costly paratransit service for those individuals who cannot use fixed route systems. Both components must be implemented together to maintain this balance and to implement the bill cost-effectively.

The Committee is aware that special circumstances often eliminate or restrict the control that individuals with disabilities exercise over their lives. Therefore, the Committee encourages providers of special services to individuals with disabilities to locate these services near fixed route transit lines and to work with local fixed route operators to facilitate the use of their transit systems by individuals with disabilities.

Subsection (c) also specifies that paratransit service must be provided to one associate of each individual with a disability. The Committee anticipates occasions on which seats may be available on paratransit vehicles which could be used by additional associates—that is, in addition to the one associate accompanying the individual with a disability—wishing to accompany an individual with a disability. The Committee anticipates that these additional persons may be allowed to ride in the same paratransit vehicle as the individual with a disability and his or her associate, as long as the additional persons are going to the same destination, as the individual with a disability and do not use seats which would have otherwise been used by individuals with disabilities.

The Committee expects each fixed route operator to establish a local certification process to determine eligibility for paratransit service by individuals with disabilities in accordance with the provisions of this Act and the regulations issued pursuant to this section. As explicitly stated in subsection (f), a fixed route operator may regard the requirements of this section as a minimum level of paratransit service to be provided under the Act.

Section (c)(2) provides that paratransit service must be available throughout the public entity's service area, except for any area in which only commuter bus or commuter rail service is operated by the public entity. The Committee intends that any definitions of commuter bus and commuter rail service include widely accepted characteristics of commuter operations such as service almost exclusively in one direction during periods of peak demand, limited stops, use of multi-ride tickets or passes, and routes of extended length, usually from central business districts to outlying suburbs.

With regard to overlapping or contiguous service areas of fixed route systems operated by public entities, it is the Committee's expectation that, to the extent possible, the public entities providing paratransit services in these areas will coordinate the overall paratransit service provided. In fact, it is quite possible that a single public entity might provide better, coordinated paratransit service in the combined, overlapping or contiguous service areas of several fixed route operators (or better coordinate service among these operators) than if each of the operators provided a portion of the service itself.

Therefore, the regulations issued pursuant to this section should not prohibit one public entity, or a public entity in coordination with one or more fixed route operators, from providing or coordinating all of the paratransit service required under the Act in a region, or portion of a region, so long as the total level of service provided met or exceeded the combined level of service which would otherwise be required of all of the affected fixed route operators. The coordinating public entity would share joint responsibility with the fixed route operator(s) for providing the paratransit service required under the Act. This joint responsibility may include jointly fulfilling the requirements for public participation outlined in paragraph (6), so long as adequate opportunity for comment and consultation is provided to affected individuals with disabilities within a region, or portion of a region.

Subsection (c)(4) provides that if the paratransit requirements in this section would impose an undue financial burden on a public entity, the entity would not be required to provide service beyond this level of undue financial burden. The Committee intends that the determination of undue financial burden vary according to the financial constraints within which each public entity operates its fixed route system. A flexible numerical formula may be used to determine undue financial burden. Two examples of factors which may be considered when making this determination include the percentage increases in fares or reductions in levels of transit service which would be required to implement this section. Any determination of undue financial burden cannot have assumed the collection of additional revenues, such as those received through increases in local taxes or legislative appropriations, which would not have otherwise been made available to the fixed route operator.

Because a finding of undue financial burden on the part of a fixed route operator will restrict the level of paratransit service provided, the regulations issued pursuant to this section may include a requirement that each fixed route operator consider measures to improve the cost-effectiveness of the delivery of both fixed route and paratransit service provided by that operator before limiting paratransit service under the undue financial burden limitation.

Section (c)(5) specifies that the Secretary of Transportation may require a public entity to provide service beyond the undue financial burden limit. Among others, this provision addresses a potential situation in which a fixed route operator cannot provide even the most basic level of paratransit service without triggering the undue financial burden limitation. In that case, the Committee expects the regulations issued by the Secretary under this section to require a basic level of paratransit service to be provided by the fixed route operator.

Subsection (7) requires a public entity to submit, and begin implementation of, a paratransit service plan meeting the requirements of the regualtions issued pursuant to this section within 18 months after the date of the enactment of this Act. Thereafter, the plan must be revised annually.

Subsection (8) states that a public entity is not required to provide paratransit service provided by another public entity or person in a given service area. A public entity may identify in its paratransit seervice plan other entities or persons which are providing a sufficient level of paratransit service so that the public entity can state that, because of the existence of that service, it has met its obligation to provide paratransit service under the Act. However, the public entity must ensure that the paratransit service is actually being provided throughout the year.

The Committee intends that the DOT regulations issued under this section include provisions requiring adjustments in paratransit service in response to a significant occurrence in an operator's service area, such as the withdrawal from the marketplace of a private paratransit provider.

A public entity does not have to monitor private organizations that may be providing paratransit service in its service area which have not been identified in its paratransit plan. Instead, since the public entity is ultimately responsible for the provision of the paratransit service required of it under the Act, the public entity must only monitor and ensure adequate service from those entities or persons which it has identified in its paratransit plan as surrogates to meet its responsibilities under the Act.

A public entity violates the paratransit requirements of this section if it fails to submit and begin implementation of a paratransit plan or modified plan, if required; or if a modified plan fails to meet the requirements of the bill; or if the paratransit service included in the plan is not provided in accordance with the plan.

The Secretary must disapprove a paratransit plan if it does not meet the requirements of this section. If a plan is disapproved, the public entity must submit a modified plan within 90 days of the disapproval.

SECTION 205. PUBLIC ENTITIES OPERATING DEMAND RESPONSIVE SYSTEMS

This section provides that it is discrimination for purposes of this Act and Section 504 of the Rehabilitation Act of 1973 for a public entity operating a demand responsive system to fail to purchase or lease a new vehicle for use on such system that is readily accessible to and usable by individuals with disabilities, unless the entity can demonstrate that its system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to that provided to members of the general public without disabilities.

The standard of a system viewed in its entirety providing an equivalent level of service is met when an operator has, or has access to, a vehicle (including a vehicle operated in conjunction with a portable boarding assistance device) which is readily accessible to and usable by individuals with disabilities to meet the needs of such individuals on an "on-call" basis. Essentially, when all aspects of the system are analyzed, an individual with a disability must have an equivalent opportunity to use the system.

SECTION 206. TEMPORARY RELIEF WHERE LIFTS ARE UNAVAILABLE

This section provides for a temporary exemption from accessible bus requirements under sections 203(a) or 205 if wheelchair lifts are not available from a qualified manufacturer, a public entity has made good faith efforts to locate such a manufacturer, and any delay in purchasing new buses would significantly impair transportation services in the community served by the public entity.

The Committee understands that certain fixed route operators may be restricted from using accessible, 102" wide commuter buses for various reasons. One alternative vehicle which would meet the requirements of the Act is the 96" commuter bus, which some manufacturers are apparently unwilling to fully warranty due to the structural modifications necessary to accommodate a wheelchair lift. Another alternative is the 96" suburban bus, which does not have the structural difficulties in accommodating a lift that a commuter bus does. A fixed route operator would not qualify for a waiver under this section from wheelchair lift purchase requirements for a 96" commuter bus since an acceptable alternative—the 96" wide, lift-equipped suburban bus—exists. However, the Committee certainly encourages fixed route operators, commuter bus manufacturers, and the Secretary of Transportation to work towards the development of a fully warranted, accessible, 96" wide commuter bus, especially in light of recent improvements in lift technology.

SECTION 207. NEW FACILITIES

This section provides that it is discrimination for purposes of this title and section 504 of the Rehabilitation Act of 1973 for a public entity to fail to construct a new facility which will be used in the provision of public transportation services which is readily accessible to and usable by individuals with disabilities.

SECTION 208. ALTERATIONS OF EXISTING FACILITIES

This section provides that if an alteration to a facility used in the provision of public transportation services affects or could affect the usability of the facility, the altered portion must be readily accessible to and usable by individuals with disabilities, to the maximum extent feasible.

If the alteration affects the usability of or access to an area containing a primary function, then the path of travel to the altered area, and the restrooms, telephones and drinking fountains serving the altered area would also have to be made accessible, to the maximum extent feasible, although these alterations are required only if they are not disproportionate in cost and scope to the overall alterations.

Section 208(b) provides that key stations in rapid, commuter, and light rail systems must be made readily accessible to and usable by individuals with disabilities as soon as practicable, but in no event later than three years after the date of the enactment of the Act. This period may be extended by the Secretary up to a 30-year period for extraordinarily expensive structural changes to, or replacement of, existing facilities, provided that two-thirds of these stations requiring extraordinarily expensive structural changes have been made accessible by the end of 20 years from the date of the enactment of this Act. The Committee intends that the stations completed during this initial 20-year period be widely located throughout the service area of the fixed route operator.

The Committee intends that the criteria established by the Secretary for determining key stations include characteristics such as high ridership, transfer points (including "feeder" points of transfer from other fixed route systems), and high ridership, end-of-the-line stations. When high ridership is the sole factor in determining a key station, consideration should be given to the proximity of that station to other key stations. Each of several closely grouped, high volume stations need not be designated a key station solely due to a high volume of ridership.

The Committee finds special merit in local settlement agreements (such as those negotiated in New York and Philadelphia) regarding the identification of key stations, when they have been negotiated in good faith by public entities and representatives of the disability community. The Committee expects the criteria established by the Secretary to find that these local agreements fully meet the requirements of this subsection.

SECTION 209. PUBLIC TRANSPORTATION PROGRAMS AND ACTIVITIES IN EXISTING FACILITIES AND ONE CAR PER TRAIN RULE

Subsection (a) of this section requires public transportation programs and activities to be accessible, when viewed in their entirety, other than those conducted in key stations which have not yet been made accessible in accordance with section 208(b).

Section 209(b) requires that at least one car per train on intercity, light, rapid, and commuter rail trains of at least two vehicles in length be accessible to individuals with disabilities within five years of the date of the enactment of the Act. The Committee specifically exempted one-car trains, such as streetcars, from the requirements of this subsection.

SECTION 210. REGULATIONS

This section requires the Attorney General and the Secretary of Transportation to issue regulations in an accessible format implementing the legislation within one year of the date of the enactment of the Act. The regulations issued under this section and section 204 by the Secretary must include standards applicable to facilities and vehicles which are consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504 of the Act.

With regard to developing standards for wheelchair lifts, wheelchair restraint devices, and other devices necessary to facilitate the use of transit vehicles and facilities by individuals with disabilities, the Committee directs the Secretary to consult with, at a minimum, representatives from the disability community, transit operators, vehicle manufacturers, and wheelchair manufacturers.

The regulations issued pursuant to this section must include a requirement that wheelchair lifts and other boarding assistance devices be maintained in working order and that, when operational and when needed, they be deployed at the request of an individual with a disability.

SECTION 211. ENFORCEMENT

This section provides that the remedies, procedures and rights set forth in Section 505 of the Rehabilitation Act of 1973 shall be available with respect to any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of this title, including the regulations issued under this title.

SECTION 212. EFFECTIVE DATE

This section provides that the paratransit requirement for operators of fixed route systems take effect 18 months after the date of the enactment of the Act. In general, accessible vehicle purchase requirements take effect 30 days after the date of enactment.

SECTION 213. COMMUTER RAIL SYSTEMS

Subsection (a) of this section provides a partial exemption to the accessible commuter rail vehicle purchase and remanufacturing requirements under section 203 as long as (1) the one car per train requirement under section 209 is met, (2) clear, concise, and adequate notice is provided identifying accessible vehicles and their location on a train, and (3) reasonable provision is made to ensure that additional services provided on nonaccessible vehicles are provided to individuals with disabilities traveling on accessible vehicles.

Section 213(b) requires that additional accessible vehicles must be provided if one accessible car per train is insufficient to meet actual continuing demand for accessible service.

In interpreting "continuing demand", the Committee intends that the demand be regular and consistent. If a given train's accessible car is filled daily to capacity and on any given day or days of the week an additional person in a wheelchair regularly waits for a ride and is not accommodated, that train does not meet continuing demand. A given train need not operate over capacity seven days a week to trigger the additional vehicle provisions, so long as the demand is regular or predictable. For instance, a person may have a part-time job and only ride a train three days a week. A student may ride to attend classes twice a week. A person may travel to the hospital once a week. In all cases, if the demand is continuing yet a train's accessible vehicle is sometimes filled to capacity, an additional accessible vehicle must be provided.

Regarding one-time special events which cause a sharp increase in wheelchair ridership, the Committee recognizes that all wheelchair users attending such events may not be successfully accommodated. However, if special events which occur on a regular, scheduled basis, such as sporting events or concerts, are found to attract increased ridership by individuals with disabilities, increased accessible capacity must be provided. In both cases (determining continuous demand and special events demand), the determination of whether such demand exists and what steps consistent with this subsection must be taken to meet the demand shall be made by the fixed route operator in close and good faith consultation with the disability community in the market area served by the operator. The operator must consult with individuals with disabilities, the majority of which must be individuals with disabilities who use wheelchairs. This consultation, in addition to conductors' reports on the adequacy of accessible capacity, will provide a means for the disability community to alert the operator to new, continuing demand for accessible service.

When it is determined that continuing demand cannot be met by one accessible car per train, section 213 states that the public entity must use such additional accessible cars per train as may be necessary to meet such demand. It is the Committee's intent that the rail operator do so promptly. Usually providing an additional car is a matter of operational adjustments—such as rail yard changes—to place an additional accessible car on a given train. These operational changes can and should be made promptly after a finding of unmet continucing demand is made.

Nothing in Section 213(b) is intended to preclude an operator from meeting continuing demand for accessible service by first taking reasonable steps to increase the number of wheelchair locations available in accessible cars before adding additional cars. The maximum number of wheelchair locations per car would be decided in conjunction with the advisory committee.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

SECTION 301. DEFINITIONS

Section 301 defines the terms "commerce," "demand responsive system," "fixed route system," "over-the-road bus," "potential places of employment," "private entity," "public accommodation," "public transportation," and "readily achievable" for purposes of the title.

Consistent with the exemption established in Title II for "public school transportation," the Committee does not intend for the provisions of this title to apply to the transportation of school children to and from a private elementary or secondary school and school-related activities, provided that the school is a recipient of Federal assistance, subject to the provisions of section 504 of the Rehabilitation Act of 1973, and is providing bus service to children with disabilities equivalent to that provided to children without disabilities.

The term "over-the-road bus" is defined as a bus characterized by an elevated passenger deck located over a baggage compartment. The term includes most of the buses typically used in intercity, charter, or tour service.

The term "public transportation" is defined as transportation by bus or rail, or by any other conveyance (other than by aircraft) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

The Committee excluded transportation by aircraft because of the existence of the Air Carrier Access Act of 1986 (P.L. 99-435). However, the term public transportation does include shuttle service operations operated by commercial airlines. Title III does not apply to volunteer-driven commuter ridership arrangements.

Section 301(7) of the legislation sets forth the definition of the term "public accommodation" and lists examples of entities to be included under this definition. The list includes restaurants, hotels, movie theaters, stadiums, grocery stores, professional offices, terminals used for public transportation, museums, zoos, homeless shelters and recreational facilities. An example of an entity excluded from this list, and therefore not considered a public accommodation, would be a construction job site—which is often in a constant state of transition—such as one used in the construction of a new public transportation facility. Religious institutions or entities controlled by religious institutions are also not covered by the legislation.

SECTION 302. PROHIBITION OF DISCRIMINATION BY PUBLIC ACCOMMODATIONS

Section 302(a) specifies the genreal rule that no individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation.

Section 302(b)(1) states that it is discriminatory to subject an individual or class or individuals, directly or indirectly, on the basis of disability, to any of the following:

> denying the opportunity to participate in, or benefit from, goods, services, facilities, privileges, advantages, and accommodations;
>
> affording an opportunity that is not equal to that afforded others;
>
> providng an opportunity that is different or separate, unless such action is necessary to provide the individuals with an opportunity that is as effective as that provided to others; however, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different.

Section 302(b)(2)(A) is a non-inclusive list of examples of what constitutes "discrimination." These include: imposition or application of eligibility criteria that screen out individuals with disabilities; failure to make reasonable modifications in policies, practices and procedures, failure to take such steps as may be necessary to ensure that no individual with a disability is excluded or treated differently because of the absense of auxiliary aids and services unless it would fundamentally alter the nature of the activity or would result in an undue burden; failure to remove architectural barriers, and communication barriers that are structural in nature, in existing facilities, and transportation barriers in existing vehicles used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehcles by the installation of a hydraulic or other lift), where such removal is readily achievable; where an entity can demonstrate that the removal of a barrier is not readily achievable, a failure to make such goods, services, facilities, privileges, advantages, and accommodations available through alternative methods if such methods are readily achieveable. With respect to a facility that is altered in a manner that affects the usability of the facility, the failure to make the alterations is a manner so that, to the maximum extent feasible, the altered portion is readily accessible to and usable by individuals with disabilities. With regard to an alteration that affects the usability of an area containing a primary function, the path of travel to the altered area, and bathrooms, telephones, and drinking fountains serving the remodeled area must also be made readily accessible to and usable by individuals with disabilities, to the extent that these alterations are not disproportionate in cost and scope to the overall alterations.

Section 302(b)(2) also includes specified provisions relating to prigate entities not primarily engaged in the business of transporting people which operate transportation systems. Operations covered by the requirements include, but are not limited to: hotel and motel airport shuttle services, customer and employee shuttle but services operate by private companies and shopping centers, and shuttle operations of recreational facilities such as stadium, zoos, amusement parks and ski resorts.

Provisions in section 302(b)(2) do not apply to private entities primarily engaged in the business of transporting people—which are covered in section 304—or to over-the-road bus operations.

Section 302(b)(2)(B)(i) applies to private entities operating fixed route systems using vehicles with a seating capacity in excess of 16 passengers (including the driver). These entities must purchase or lease new vehicles for use on such systems which are readily accessible to and usable by individals with disabilities whenever a solicitation is made for such vehicles 30 days after the date of the enactment of the Act.

Section 302(b)(2)(B)(ii) applies to fixed route systems using vehicles with a seating capacity of 16 passengers or less (including the driver). If a private entity purchases or leases a new vehicle which is not accessible for use on such system, the entity must operate the system so that, when viewed in its entirety, the system ensures a level of service to individuals with disabilities equivalent to the level of service provided to individuals without disabilities. The standard of a system viewed in its entirety providing an equivalent level of service is met when an operator has, or has access to, a vehicle (including a vehicle operated in conjunction with a portable boarding assistance device) which is readily accessile to and usable by individuals with disabilities to meet the needs of such individuals on an "on-call" basis. Essentially, when all aspects of the system are analyzed, an individual with a disability must have an equivalent opportunity to use the system.

For example, if a hotel near an airport provides fixed route shuttle service to the airport, the hotel need not purchase new vehicles with a seating capacity of 16 or less that are accessible so long as it makes alternative equivalent arrangements for transporting people with disabilities who cannot board the inaccessible vehicles. In addition to the hotel owning an accessible vehicles itself, the hotel may make arrangement with another hotel that has an accessible vehicles that can be made available to provide equivalent shuttle service or may use a portable boarding assistance device in concert with an otherwise inaccessible vehicle to meet the requirement of this cause of the legislation.

Section 302(b)(2)(C) specifies requirements for private entities which operate demand responsive systems. Section 302(b)(2)(C)(i) applies to operators of demand responsible systems which use vehicles with a seating capacity of 16 passengers or less (including the driver). These systems must operate, so that, when viewed in their entirety, the system ensures a level of service to individuals with disabilities equivalent to the level of service provided to individuals without disabilities.

Section 302(b)(2)(C)(ii) provides that vehicles seating more than 16 passengers must be accessible if a solicitation is made more than 30 days after the date of the enactment of the Act, unless the operator's system, when viewed in its entirety, provides an equivalent level of service to individuals with or without, disabilities.

Section 302(b)(2)(D)(i) specifies that the requirements in subparagraphs (B) and (C) relating to private entities not primarily engaged in the business of transporting people do not apply to over-the-road buses. Over-the-road buses must meet the vehicle and system requirements specified in sections 304 and 306 regardless of whether the private entity operating them is primarily, or not primarily, in the business of transporting people.

Section 302(b)(2)(D)(ii) states that over-the road buses used to provide transportation of individuals by a private entity not primarily engaged in the business of transporting people must comply with the regulations issued under section 306(a)(2).

SECTION 303. NEW CONSTRUCTION IN PUBLIC ACCOMMODATIONS AND POTENTIAL PLACES OF EMPLOYMENT

Section 303 specifies that discrimination includes a failure to design and construct facilities for first occupancy later than 30 months after the date of the enactment of the Act readily accessible to and usable by individuals with disabilities except where an entity can demonstrate that it is structurally impracticable to do so.

SECTION 304. PROHIBITION OF DISCRIMINATION IN PUBLIC TRANSPORTATION SERVICES PROVIDED BY PRIVATE ENTITIES

Section 304(a) states the general rule that prohibits discrimination on the basis of disability in the full and equal enjoyment of transportation services provided by a private entity that is primarily engaged in the business of transporting people and whose operations affect commerce.

Section 304(b)(1) specifies that the term "discriminated against" includes the imposition or application of eligibility criteria that screen out or tend to screen out persons with disabilities from fully enjoying public transportation services, unless such criteria can be shown to be necessary for the provision of such services.

304(b)(2) lists further examples of discrimination, including: a failure such entity to make reasonable modifications consistent with those required under section 302(b)(2)(A)(ii); a failure to provide auxiliary aids and services consistent with the requirements of section 302(b)(2)(A)(iii); and a failure to remove barriers consistent with the requirements of section 302(b)(2)(A)(iv), (v), and (vi).

The examples of discrimination contained in section 304(b) are intended to address situations that are not covered in the specific vehicle and system requirements for private entities primarily engaged in the business of transporting people included in sections 304(b)(3), 304(b)(4), 304(b)(5) and 306. The general rule contained in paragraph (a) and the examples of discrimination contained in paragraph (b) are not intended to override the specific requirements contained in the sections referenced in the previous sentence. For example, an individual with a disability could not make a successful claim under section 304(a) that he or she had been discriminated against in the full and equal enjoyment of public transportation services on the grounds that an over-the-road bus was not wheechair lift-equipped, if a lift was not required under 304(b)(4) or 306(a)(2).

Section 304(b)(3) requires private entities primarily engaged in the business of transporting people to purchase new vehicles (other than automobiles, vans with seating capacities of less than 8 passengers, including the driver, or over-the-road buses) that are to be used on a fixed route system which are readily accessible to and usable by individuals with disabilities when solicitations are made 30 days after the date of the enactment of the Act. If such vehicles are to be used solely on a demand responsive system, they need not be accessible if an entity can demonstrate that its system, when viewed in its entirety, provides an equivalent level of service to individuals with disabilities as that provided to the general public.

Section 304(b)(4) requires over-the-road buses to comply with the regulations issued under section 306(a)(2) and makes it discrimination to purchase or lease an over-the-road bus which does not meet those requirements. Two sets of regulations will be issued by the Department of Transportation under section 306(a)(2) which include vehicle-specific requirements for over-the-road buses The content of these regulations is discussed in detail under section 306 of this report.

Section 304(b)(5) requires a van with a seating capacity of less than 8 passengers, including the driver, to be purchased or leased by a private entity so that it is readily accessible to an usable by an individual with a disability, unless the entity can demonstrate that the system for which the van is being purchased or leased, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the level of service provided to the general public. Under this subsection, minivans are treated the same whether they are operated in a fixed route system or a demand responsive system. Owning, or having access to, an accessible minivan or a portable boarding assistance device which can be used in concert with an otherwise inaccessible minivan that will meet the needs of disabled passengers on an on-call basis is required under this subsection.

Regardless of vehicle requirements, anyone in the business of providing taxi service shall not discriminate on the basis of disability in the delivery of that service. For example, it would be discrimination under the Act to refuse to pick up a person on the basis of that person's disability. A taxicab driver could not refuse to pick up someone in a wheelchair because he or she believes that the person could not get out of their chair or because he or she does not want to lift the wheelchair into the trunk or back seat of the taxi.

SECTION 305. STUDY

Section 305(a) directs the Office of Technology Assessment (OTA) to conduct a study to determine (1) the access needs of individuals with disabilities to over-the-road buses and to over-the-road bus service; and (2) the most-cost effective methods for providing access to over-the-road buses and over-the-road bus service to individuals with disabilities through all forms of boarding options.

During its hearings on the legislation, the Committee heard conflicting testimony on the cost and reliability of wheelchair lifts or other boarding assistance devices with regard to their use on over-the-road buses. Therefore, before mandating these or any other boarding options in this Act, a thorough study of the access needs of individuals with disabilities to these buses and the cost-effectiveness of different methods of providing such access is required by the Act.

Section 305(b) specifies which issues must be analyzed by the study, but is not intended to be all-inclusive. The analysis required by the legislation includes a review of accessibility issues relating to vehicle-specific aspects of over-the-road buses, as well as to system-wide aspects of over-the-road bus service. Both aspects of over-the-road bus accessibility are included so that neither is favored over the other in the organization of the study.

The contents of the study must include, at a minimum, an analysis of the following:

(1) The anticipated demand by individuals with disabilities for accessible over-the-road buses and over-the-road bus service;

(2) The degree to which such buses and service, including any service required under sections 304(b)(4) and 306(a)(2), are readily accessible to and usable by individuals with disabilities;

(3) The effectiveness of various methods of providing accessibility to such buses and service to individuals with disabilities. All types of methods (including the use of boarding chairs, ramps, wheelchair lifts, and other boarding assistance devices) which may, or may not, involve the physical lifting of a boarding assistance device should be analyzed in terms of their effectiveness.

(4) The cost of providing accessible over-the-road buses and bus service to individuals and disabilities, including consideration of recent technological and cost saving developments in equipment and devices. All types of methods should be analyzed in terms of their cost.

(5) Possible design changes in over-the-road buses that could enhance accessibility, including the installation of accessible restrooms which do not result in a loss of seating capacity. The study should analyze the potential for changes in bus design to better accommodate accessibility equipment. The study should also analyze whether an accessible restroom could be added to an over-the-road bus without resulting in a loss of seating capacity. "Seating capacity" means a reduction in the number of seats on a bus in which passengers can ride comfortably. For example, if a seat were reduced in size in order to accommodate an accessible restroom, the seat would have to be capable of carrying a passenger as comfortably as an existing full seat in order to avoid a finding of a loss in seating capacity.

(6) The impact of accessibility requirements on the continuation of over-the-road bus service, with particular consideration of the impact of such requirements on service to rural communities. This provision recognizes that the intercity bus industry serves approximately 9500 communities that are not served by any other form of intercity public transportation. For the reason, the study must look at the impact various

methods of providing accessibility will have on the industry's ability to continue service (particularly to rural communities) given its economic history, passenger demographics, pressure from competitors, and future economic projections.

Section 305(c) requires the OTA to establish an advisory committee for the purposes of conducting the study and specifies the committee's membership, in terms of number and representation. There are to be equal numbers of members from among (1) private operators and manufacturers of over-the-road buses and (2) individuals with disabilities who are potential riders of such buses. A third group of members are to be selected for their technical expertise on issues included in the study, including manufacturers of boarding assistance equipment and devices. The total number of members from groups (1) and (2) must exceed the number of members from the third group.

Section 305(d) requires the study and OTA's recommendations, including any policy options for legislative action, to be submitted to the President and Congress within 36 months after the date of the enactment of the act. The President must extend each of the deadlines for compliance with the regulations in section 306(a)(2)(B) for one year if the President determines that such compliance will result in a significant reduction in intercity over-the-road bus service.

Section 305(e) requires OTA to provide a preliminary draft of the study to the Architectural and Transportation Barriers Compliance Board (ATBCB), to give the Board an opportunity to comment on the draft study, and to incorporate written comments from the Board received by the OTA within 120 days of the Board's receipt of the draft study as part of the final study.

SECTION 306. REGULATIONS

Section 306(a)(1) requires the Secretary of Transportation to issue regulations in an accessible format to carry out sections 302(b)(2) (B) and (C) and 304 (other than subsection (b)(4)). These regulations will apply to all providers of transportation under title III of the Act and will include all requirements for the provision of such transportation except for the vehicle-specific requirements for over-the-road buses included in section 304(b)(4).

With regard to over-the-road buses, the legislation gives the Secretary rulemaking authority under section 306(a)(1) to implement section 304 only to the extent that any regulations issued under parargaph (1) are not inconsistent with the vehicle-specific requirements for over-the-road buses contained in section 306(a)(2). An example of a general, rather than a vehicle-specific, requirement permitted under section 306(a)(1) which could be applied to over-the-road bus transportation would be a requirement that an indivual with a disability be allowed to board an over-the-road bus in spite of the fact that the bus was not readily accessible to and usable by an individual with a disability.

Section 306(a)(2) requires the Secretary of Transportation to issue regulations for providing access to over-the-road buses in two separate rulemakings.

Section 306(a)(2)(A) specifies the interim requirements for over-the-road buses, to be issued not later than one year after the date of the enactment of the Act to carry out sections 304(b)(4) and 302(b)(2)(D)(ii). Such regulations will require each private entity which uses an over-the-road bus to provide accessibility to such bus; except that such regulations shall not require any structural changes in over-the-road buses in order to provide access for individuals who use wheelchairs during the effective period of such regulations and shall not require the purchase of boarding assistance devices to provide access to such individuals. These interim requirements will be effective until the effective date of the final regulations issued under 306(a)(2)(B).

While these interim requirements are in effect, it will not be considered discrimination for a private entity to purchase or lease an over-the-road bus which is not wheelchair lift-equipped or to which a boarding chair and/or ramp is not provided to board such bus. However, nothing in the legislation prevents an operator from using lifts, boarding chairs, ramps or other boarding assistance devices during the interim period. The regulations in effect during this period may require additions to an over-the-road bus to aid accessibility which do not require structural changes or boarding assistance devices, such as the installation of non-skid strips on stairs. The failure to equip buses with these types of aids, if required by regulations, would subject an operator to a claim of discrimination under section 304(b)(4).

Section 306(a)(2)(B) requires the Secretary of Transportation to review the OTA study and issue final regulations not later than one year after the submission of the study to the Secretary. The regulations shall require, taking into account the purposes of the study under section 305 and any recommendations resulting from such study, each private entity which uses an over-the-road bus to provide transportation to individuals to provide accessibility to such bus to individuals with disabilities. These regulations will be effective 7 years after date of enactment for small providers, as defined by the Secretary, and 6 years after date of enactment for other providers.

The Secretary may define small providers using current ICC class definitions. The extra year for compliance for these providers acknowledges the increased burden that implementation of some accessibility requirements could have on operators with relatively small fleets.

Section 306(a)(2)(C) states that no regulations may require the installation of accessible restrooms in over-the-road buses if such installation would result in a loss of seating capacity. The term "seating capacity" has the same meaning discussed under section 305—a reduction in the number of seats in which passengers can ride comfortably.

Section 306(a)(3) requires that the regulations issued shall include standards applicable to facilitaties and vehicles covered by sections 302(b)(2) and 304.

Section 306(b) specifies that no later than one year after the date of the enactment of the Act, the Attorney General must issue regulations in an accessible format to carry out the remaining provisions of this title not referred to in subsection (a) that include standards applicable to facilities and vehicles covered under section 302.

Section 306(c) states that standards included in regulations issued under subsections (a) and (b) shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504 of this Act. Section 504 of the Act requires ATBCB, within 6 months after the enactment of this Act, to issue minimum guidelines to supplement the existing Minimum Guidelines and Requirements for Accessible Design for purposes of title II and III. The guidelines shall establish additional requirements, consistent with this Act, to ensure that buildings, facilities, and vehicles are accessible, in terms of architecture and design, transportation, and communications, to individuals with disabilities.

The regulations issued pursuant to this section must include a requirement that wheelchair lifts and other boarding assistance devices be maintained in working order and that, when operational and when needed, they be deployed at the request of an individual with a disability.

SECTION 307. EXEMPTIONS FOR PRIVATE CLUBS AND RELIGIOUS ORGANIZATIONS

This section exempts private clubs and religious organizations from coverage under the Act.

SECTION 308. ENFORCEMENT

This section provides that the remedies and procedures of title II of the Civil Rights Act of 1964 are available under this title and provides for enforcement by the Attorney General.

SECTION 309. EFFECTIVE DATE

This section provides that, unless specifically provided otherwise, the provisions of the Act take effect 18 months after the date of enactment of the Act.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICES

SECTION 401. TELECOMMUNICATIONS SERVICES FOR HEARING IMPAIRED AND SPEECH IMPAIRED INDIVIDUALS

This section specifies that a common carrier that offers telephone services to the general public must also provide interstate or intrastate telecommunication relay services so that such services provide individuals who use non-voice terminal devices because of their disabilities opportunities for communication that are equivalent to those provided to their customers who are able to use voice telephone services.

TITLE V—MISCELLANEOUS PROVISIONS

SECTION 501. CONSTRUCTION

This section explains the relationship between section 504 of the Rehabilitation Act of 1973 and this Act and the relationship between this Act and State laws that provide greater protection for the rights of individuals with disabilities. This Act shall not be construed as regulating the underwriting, classifying or administering of insurance risks.

SECTION 502. PROHIBITION AGAINST RETALIATION AND COERCION

This section includes an anti-retaliation provision and a prohibition against interference, coercion or intimidation.

SECTION 503. STATE IMMUNITY

This section makes it clear that States are not immune under the 11th Amendment for violations of the Act.

SECTION 504. GUIDELINES BY ATBCB

This section directs the Architectural and Transportation Barriers Compliance Board (ATBCB) to issue minimum guidelines consistent with the Act.

SECTION 505. ATTORNEY'S FEES

This section specifies that in any action or administrative proceeding commenced under the Act, the court, or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

SECTION 506. TECHNICAL ASSISTANCE

This section includes a technical assistance provision which directs the Attorney General, in consultation with the Chairman of the Equal Employment Opportunity Commission, the Secretary of Transportation, the National Council on Disability, the Chairperson of the Architectural and Transportation Barriers Compliance Board, and the Chairman of the Federal Communications Commission to develop a plan to assist entities covered under the Act, along with other executive agencies and commissions, to understand their responsibilities under the Act.

SECTION 507. FEDERAL WILDERNESS AREAS

This section requires a study on wilderness designations and wilderness land management practices with regard to the use of wilderness areas by individuals with disabilities.

SECTION 508. TRANSVESTITES

This section states that the term "disability" shall not apply to an individual solely on the basis of transvestitism.

SECTION 509. MANDATING THE COVERAGE OF CONGRESS

This section mandates the coverage of Congress under the Act.

SECTION 510. ILLEGAL DRUG USE

This section makes it clear that current users of illegal drugs are not protected from actions based on their current use of illegal drugs.

SECTION 511. DEFINITIONS

This section states that under the Act, the term "disability" does not include "homosexuality", "bisexuality", "transvestitism", "pedophilia", "transsexualism", "exhibitionism", "voyeurism", "compulsive gambling", "kleptomania", "pyromania", "gender identity disorders", "current psychoactive substance use disorders", "current psychoactive substance-induced organic mental disorders", as defined by DSM-III-R which are not the result of medical treatment, or other sexual behavior disorders.

SECTION 512. AMENDMENTS TO THE REHABILITATION ACT

This section includes provisions clarifying actions permitted or prohibited with regard to individuals using alcohol or illegal drugs.

SECTION 513. SEVERABILITY

This section provides severability protection for the various provisions of the Act.

COMPLIANCE WITH CLAUSE 2(l) OF RULE XI OF THE RULES OF THE HOUSE OF REPRESENTATIVES

(1) With reference to clause 2(l)(3)(A) of Rule XI of the Rules of the House of Representatives, no separate findings or recommendations have been formally issued on the subject matter of this legislation by the Subcommittee on Investigations and Oversight. The Subcommittee on Surface Transportation held hearings on the subject matter which resulted in Titles II and III of the reported bill.

(2) With respect to Clause 2(l)(3)(B) of Rule XI of the Rules of the House of Representatives, the bill, as reported, does not provide new budget authority or increased tax expenditures. Accordingly, a statement pursuant to section 308(a) of the Congressional Budget Act is not required.

(3) Pursuant to Clause 2(l)(3)(D) of Rule XI of the Rules of the House of Representatives, no report has been submitted by the Committee on Government Operations pertaining to this subject matter.

(4) With respect to clause 2(l)(3)(C) of Rule XI of the Rules of the House of Representatives, the Committee has received the following report prepared by the Congressional Budget Office under section 403 of the Congressional Budget Act.

The report is as follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, April 24, 1990.

Hon. GLENN M. ANDERSON,
Chairman, Committee on Public Works and Transportation,
House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the attached cost estimate of H.R. 2273, the Americans with Disabilities Act of 1990, as ordered reported by the Committee on Public Works and Transportation on April 3, 1990.

If you wish further details on this estimate, we will be pleased to provide them.

Sincerely,

Robert D. Reischauer.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill number: H.R. 2273.
2. Bill title: Americans with Disabilities Act of 1990.
3. Bill status: As orderd reported by the House Committee on Public Worls and Transportation on April 3, 1990.
4. Bill purpose: To prohibit discrimination against people with disabilities in areas such as employment practices, public accommodations and services, transportation services and telecommunication services.
5. Estimated cost to the Federal Government:

[By fiscal years, in millions of dollars]

	1991	1992	1993	1994	1995
Estimated authorization level	5	6	19	31	31
Estimated outlays	5	6	19	31	31

Basis of estimate

Equal Employment Opportunities Commission (EEOC). Title I—Employment—would prohibit discrimination by employers against qualified individuals with disabilities. H.R. 2273 would require the EEOC to issue regulations to carry out Title I and to provide for enforcement of the provisions. Although no specific authorization level is stated in the bill, CBO estimates the cost of these activities would be $1 million in fiscal year 1991, $2 million in fiscal year 1992, $15 million in fiscal year 1993, and $27 million annually in fiscal years 1994-95. This estimate is based on the EEOC's past experience with enforcing civil rights standards and assumes that approximately 259 additional full-time equivalent employees would be needed for the Commission's 50 field offices and that approximately 58 additional staff would be needed for the EEOC headquarters.

Department of Transportation. H.R. 2273 would direct the Secretary of Transportation to issue regulations including standards applicable to the facilities and vehicles covered by these provisions. CBO estimates that the cost to the federal government of developing these regulations would be about $0.5 million in fiscal year 1991. In addition, the federal goverment might bear some part of the costs of making transit services accessible to the handicapped, which are discussed below. The capital and operating costs of most mass transit systems are heavily subsidized by the federal government through grant by the Urban Mass Transportation Administration. We cannot predict the extent to which these grants might be increased to compensate for the additional costs attributable to H.R. 2273.

Architectural and Transportation Barriers Compliance Board. H.R. 2273 would require the board to issue minimum guidelines that would supplement existing minimum guidelines for accessible design of buildings, facilities and vehicles. Although no specific authorization level is stated in the bill, CBO estimates the cost of these guidelines would be $0.2 million in fiscal year 1991. This estimate assumes salaries and expense costs of $104,000 and research contract costs of $80,000. Although the bill does not state specifically that the guidelines should be maintained, the board currently maintains the existing guidelines and most likely would maintain the new guidelines. CBO estimates the cost of maintaining the guidelines would be $0.2 million every other year beginning in fiscal year 1992.

Office of Technology Assessment (OTA). The OTA would be required to undertake a study to determine (1) the needs of individuals with disabilities with regard to buses and (2) a cost-effective method for making buses accessible and usable by those with disabilities. In conjunction with this study, the OTA is directed to establish an advisory committee to assist with and review the study. Although no specific authorization level is stated in the bill, CBO estimates the cost of the study and advisory committee would be $0.2 million in fiscal year 1991, $0.3 million in 1992, and $0.1 million in 1993. This estimate is based upon the assumption that the OTA will not have to conduct significant additional field research.

Department of Justice. H.R. 2273 also would require the Attorney General to develop regulations to prohibit discrimination in public services and to investigate alleged violations of public accommodation provisions, which would include undertaking periodic reviews of compliance of covered entities under Title III. These regulations would ensure that a qualified individual with a disability would not be excluded from participation in, or denied benefits by a department, agency, special purpose district or other instrumentality of a state or local government. We estimate the cost of these activities would be $3 million in fiscal year 1991 and $4 million annually in fiscal years 1992–1995.

Federal Communications Commission (FCC). H.R. 2273 requires the FCC to prescribe and enforce regulations with regard to telecommunications relay services. These regulations include: (1) establishing functional regulations, guidelines and operations for telecommunications relay services, (2) establishing minimum standards that shall be met by common carriers, and (3) ensuring that users of telecommunications relay services pay rates no greater than rates paid for functionally equivalent voice communication services with respect to duration of call, the time of day, and the distance from point of origination to point of termination. While no authorization level is stated, CBO estimates the cost of.developing and enforcing these regulations to be $0.1 million in fiscal year 1991, negligible in fiscal year 1992, $0.2 million in 1993, $0.2 million in 1994, and $0.1 million in 1995. The FCC anticipates a lull in fiscal year 1992 because the states would be designing telecommunication relay systems and there wouldn't be much FCC involvement. During fiscal years 1993 and 1994 the certification and evaluation of state programs would occur.

National Council on Disability. H.R. 2273 would require the council to conduct a study on the effect that wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System. Although no authorization level is stated, CBO estimates the cost of this study would be $0.2 million in fiscal year 1991 and $0.1 million in fiscal year 1992.

Other Possible Effects. In addition to the federal costs of establishing and enforcing new regulations, H.R. 2273 could also affect the federal budget indirectly through changes in employment and earnings. If employment patterns and earnings were to change, both federal spending and federal revenues could be affected. There is, however, insufficient data to estimate these secondary effects on the federal budget.

6. Estimated cost to State and local governments: Enactment of H.R. 2273 would result in substantial costs for state and local governments, but CBO cannot estimate the total impact with any certainty. Most of these costs would involve actions required to make public transit systems accessible to the handicapped. In addition, some local governments might incur additional costs to make newly-constructed public buildings accessible, as required by this bill, but most already face similar requirements.

Public Buildings. H.R. 2273 would mandate that newly constructed state and local public buildings be made accessible to the handicapped. All states currently mandate accessibility in newly-constructed, state-owned public buildings and therefore would incur little or no costs if this bill were to be enacted. It is possible, however, in rare cases, for some local governments not to have such law. These municipalities would incur additional costs for making newly-constructed, locally-owned public buildings accessible if this bill were to become law. According to a study conducted by the Department of Housing and Urban Development in 1978, the cost of making a building accessible to the handicapped is less than one percent of total construction costs if the accessibility features are included in the original building design. Otherwise, the costs could be much higher.

Public Transit. CBO cannot provide a comprehensive analysis of the impact of H.R. 2273 on mass transit costs of state and local governments. The scope of the bill's requirements in this area is very broad, many provisions are subject to interpretation, and the potential effects on transit systems are significant and complex. While we have attempted to discuss the major potential areas of cost, we cannot assign a total dollar figure to these costs.

H.R. 2273 would require that all new buses and rail vehicles be accessible to handicapped individuals, including those who use wheelchairs, and that public transit operators offer paratransit services as a supplement to fixed route public transportation. In addition, the bill includes a number of requirements relating to the accessibility of mass transportation facilities. Specifically, all new facilities, alterations to existing facilities, intercity rail stations, and key stations in rapid rail, commuter rail, and light rail systems would have to be accessible to handicapped persons.

Bus and Paratransit Services—CBO estimates that it would cost between $20 million and $30 million a year over the next several years to purchase additional lift-equipped buses as required by H.R. 2273. Additional maintenance costs would increase each year as lift-equipped buses are acquired and would reach $15 million by 1995. The required paratransit systems would add to those costs.

Based on the size of the current fleet and on projections of the American Public Transit Association (APTA), CBO expects that public transit operators will purchase about 4,300 buses per year, on average, over the next five years. About 38 percent of the existing fleet of buses is currently equipped with lifts to make them accessible to handicapped individuals and, based on APTA projections, we estimate that an average of 55 percent to 60 percent of future bus purchases will be lift-equipped in the absence of new legislation. Therefore, this bill would require additional annual purchases of about 1,800 lift-equipped buses. Assuming that the added cost per bus for a lift will be $10,000 to $15,000 at 1990 prices, operators would have to spend from $20 million to $30 million per year, on average, for bus acquisitions as a result of this bill.

Maintenance and operating costs of lifts have varied widely in different cities. Assuming that additional annual costs per bus average $1,500, we estimate that it would cost about $2 million in 1991, increasing to $15 million in 1995, to maintain and operate the additional lift-equipped buses required by H.R. 2273.

In addition, bus fleets may have to be expanded to make up for the loss in seating capacity and the increase in boarding time needed to accommodate handicapped persons. The cost of expanding bus fleets is uncertain since the extent to which fleets would need to be expanded depends on the degree to which handicapped persons would use the new lift-equipped buses. If such use increases significantly, added costs could be substantial.

These costs are sensitive to the number of bus purchases each year, which may vary considerably. In addition, these estimates reflect total costs for all transit operators, regardless of size. Costs may fall disproportionately on smaller operators, who are currently more likely to choose options other than lift-equipped buses to achieve handicapped access.

The bill also requires transit operators to offer paratransit or other special transportation services providing a level of service comparable to their fixed route public transportation to the extent that such services would not impose an "undue financial burden." Because we cannot predict how this provision will be implemented, and because the demand for paratransit services is very uncertain, we cannot estimate the potential cost of the paratransit requirement, but it could be significant. The demand for paratransit services probably would be reduced by the greater availability of lift-equipped buses.

New regulations recently proposed by the Department of Transportation concerning bus and paratransit services include requirements much the same as those in H.R. 2273. Should these proposed rules become final in their current form, the mandates of the bill would have much less effect.

Transit Facilities—We expect that the cost of compliance with the provisions concerning key stations would be significant for a number of transit systems, and could total several hundred million dollars (at 1990 prices) over 30 years. The precise level of these costs would depend on future interpretations of the bill's requirements and on the specific options chosen by transit systems to achieve accessibility. The costs properly attributable to this bill would also depend on the degree to which transit operators will take steps to achieve accessibility in the absence of new legislation.

In 1979, CBO published a study, (Urban Transportation for Handicapped Persons: Alternative Federal Approaches, November 1979), that outlined the possible costs of adapting rail systems for handicapped persons. In that study, CBO estimated that the capital costs of adapting key subway, commuter and light rail stations and vehicles for wheelchair users would be $1.1 billion to $1.7 billion, while the additional annual operating and maintenance costs would be $14 million to $21 million.

Based on a 1981 survey of transit operators, the Department of Transportation has estimated that adapting existing key stations and transit vehicles would require additional capital expenditures of $2.5 billion over 30 years and would result in additional annual operating costs averaging $57 million (in 1979 dollars) over that period. Many groups representing the handicapped asserted that the assumptions and methodology used by the transit operators in this survey tended to overstate these costs severely. The department estimated that the cumulative impact of using the assumptions put forth by these groups could lower the total 30-year costs to below $1 billion.

CBO believes that the figures in both these studies significantly overstate the cost of the requirements of H.R. 2273, because, in the intervening years, several of the major rail systems have begun to take steps to adapt a number of their existing stations for handicapped access. In addition, it seems likely that the number of stations that would be defined as "key" under this bill would be much lower than that assumed in either of those studies. Furthermore, the Metropolitan Transit Authority in New York and the Southeastern Pennsylvania Transportation Authority in Philadelphia, two large rail systems, have entered into settlement agreements with handicapped groups that include plans for adaptation of key stations. These plans would probably satisfy the bill's requirement for accessibility of key stations. Other rail systems are also taking steps to make existing stations accessible. Therefore, we expect that the cost of the bill's requirements concerning key stations would probably not be greater than $1 billion (in 1990 dollars) and might be considerably less.

7. Estimate comparison: None.

8. Previous CBO estimate: CBO prepared an estimate of S. 933, Americans with Disabilities Act of 1989, as ordered reported by the Senate Committee on Labor and Human Resources on August 2, 1989. We prepared an estimate of H.R. 2273, Americans with Disabilities Act of 1989, as ordered reported by the Committee on Education and Labor on November 14, 1989. We also prepared an estimate of H.R. 2273, Americans with Disabilities Act of 1990, as ordered reported by the House Committee on Energy and Commerce on March 13, 1990. The estimates in this bill are similar to those of the Education and Labor and Energy and Commerce versions of H.R. 2273 and are substantially different from those in the Senate bill.

9. Estimate prepared by: Cory Leach and Marjorie Miller.

10. Estimate approved by: C.G. Nuckols (for James L. Blum, Assistant Director for Budget Analysis).

COST OF LEGISLATION

In accordance with rule XIII(7) of the Rules of the House of Representatives, the cost to the United States in carrying out H.R. 2273, as reported, in fiscal year 1990, and in each of the five following fiscal years, is estimated by the Committee to be costs which appear in the report of the Congressional Budget Office.

VOTE

The Committee ordered the bill reported by a vote of 45 ayes and 5 noes.

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3 of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

COMMUNICATIONS ACT OF 1934

* * * * * * *

APPLICATION OF ACT

Sec. 2. (a) * * *

(b) Except as provided in [section 224] *sections 223, 224, and 225 and subject to the provisons of section 301 and title VI, nothing in this Act shall be construed to apply or to give the Commission jurisdiction with respect to (1) charges, classifications, practices, services, facilities, or regulations for or in connection with intrastate communication service by wire or radio of any carrier, or (2) any carrier engaged in interstate or foreign communication solely through physical connection with the facilities of another carrier not directly or indirectly controlling or controlled by, or under direct or indirect common control with such carrier, or (3) any carrier engaged in interstate or foreign communication solely through connection by radio, or by wire and radio, with facilities, located in an adjoining State or in Canada or Mexico (where they adjoin the State in which the carrier is doing business), of another carrier not directly or indirectly controlling or controlled by, or under direct or indirect common control with such carrier, or (4) any carrier to which clause (2) or clause (3) would be applicable except for furnishing interstate mobile radio communication service or radio communication service to mobile stations on land vehicles in Canada or Mexico; except that sections 201 through 205 of this Act, both inclusive, shall, except as otherwise provided therein, apply to carriers described in clauses (2), (3), and (4).*

* * * * * * *

TITLE II— COMMON CARRIERS

* * * * * * *

SPECIAL PROVISIONS RELATING TO TELEPHONE COMPANIES

SEC. 221. (a) * * *

(b) Subject to the provisions of [section 301] *sections 225 and 301*, nothing in this Act shall be construed to apply, or give the Commission jurisdiction, with respect to charges, classifications, practices, services, facilities, or regulations for or in connection with wire, mobile, or point-to-point radio telephone exchange service, or any combination thereof even though a portion of such exchange service constitutes interstate or foreign communication, in any case where such matters are subject to regulation by a State commission or by local governmental authority.

* * * * * * *

SEC. 225. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

(a) DEFINITIONS.—As used in this section—

(1) COMMON CARRIER OR CARRIER.—The term "common carrier" or "carrier" includes any common carrier engaged in interstate communication by wire or radio as defined in section 3(h), any common carrier engaged in intrastate communication by wire or radio, and any common carrier engaged in both interstate and intrastate communication, notwithstanding sections 2(b) and 221(b).

(2) TDD.—The term "TDD" means a Telecommunications Device for the Deaf, which is a machine that employs graphic communication in the transmission of coded signals through a wire or radio communication system.

(3) TELECOMMUNICATIONS RELAY SERVICE.—The term "telecommunications relay services" means telephone transmission services that provide the ability for an individual who has a hearing impairment or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses a TDD or other nonvoice terminal device and an individual who does not use such a device.

(b) AVAILABILITY OF TELECOMMUNICATIONS RELAY SERVICE.—

(1) IN GENERAL.—In order to carry out the purposes established under section 1, to make available to all individuals in the United States a rapid, efficient nationwide communication service, and to increase the utility of the telephone system of the Nation, the Commission shall ensure that interstate and intrastate telecommunications relay services are available, to the extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals in the United States.

(2) REMEDIES.—For purposes of this section, the same remedies, procedures, rights, and obligations under this Act that are applicable to common carriers engaged in interstate communi-

cation by wire or radio are also applicable to common carriers engaged in intrastate communication by wire or radio and common carriers engaged in both interstate and intrastate communication by wire or radio.

(c) PROVISION OF SERVICE.—Each common carrier providing telephone voice transmission services shall provide telecommunications relay services individually, through designees, or in concert with other carriers not later than 3 years after the date of enactment of this section.

(d) REGULATIONS.—

(1) IN GENERAL.—The Commission shall, not later than 1 year after the date of enactment of this section, prescribe regulations to implement this section, including regulations that—

(A) establish functional requirements, guidelines, and operations procedures for telecommunications relay services;

(B) establish minimum standards that shall be met by common carriers in carrying out subsection (c);

(C) require that telecommunications relay services operate every day for 24 hours per day;

(D) require that users of telecommunications relay services pay rates no greater than the rates paid for functionally equivalent voice communication services with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination;

(E) prohibit relay operators from refusing calls or limiting the length of calls that use telecommunications relay services;

(F) prohibit relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of the call; and

(G) prohibit relay operators from intentionally altering a relayed conversation.

(2) TECHNOLOGY.—The Commission shall ensure that regulations prescribed to implement this section encourage the use of existing technology and do not discourage or impair the development of improved technology.

(3) JURISDICTIONAL SEPARATION OF COSTS.—

(A) IN GENERAL.—The Commission shall prescribe regulations governing the jurisdictional separation of costs for the services provided pursuant to this section.

(B) RECOVERING COSTS.—Such regulations shall generally provide that costs caused by interstate telecommunications relay services shall be recovered from the interstate jurisdiction and costs caused by intrastate telecommunications relay services shall be recovered from the intrastate jurisdiction.

(C) JOINT PROVISION OF SERVICES.—To the extent interstate and intrastate common carriers jointly provide telecommunications relay services, the procedures established in section 410 shall be followed, as applicable.

(4) FIXED MONTHLY CHARGE.—The Commission shall not permit carriers to impose a fixed monthly charge on residential

customers to recover the costs of providing interstate telecommunication relay services.

(5) Undue burden.—If the Commission finds that full compliance with the requirements of this section would unduly burden one or more common carriers, the Commission may extend the date for full compliance by such carrier for a period not to exceed 1 additional year.

(e) Enforcement.—

(1) In general.—Subject to subsections (f) and (g), the Commission shall enforce this section.

(2) Complaint.—The Commission shall resolve, by final order, a complaint alleging a violation of this section within 180 days after the date such complaint is filed.

(f) Certification.—

(1) State documentation.—Each State may submit documentation to the Commission that describes the program of such State for implementing intrastate telecommunications relay services.

(2) Requirements for certification.—After review of such documentation, the Commission shall certify the State program if the Commission determines that the program makes available to hearing-impaired and speech-impaired individuals either directly, through designees, or through regulation of intrastate common carriers, intrastate telecommunications relay services in such State in a manner that meets the requirements of regulations prescribed by the Commission under subsection (d).

(3) Method of funding.—Except as provided in subsection (d), the Commission shall not refuse to certify a State program based solely on the method such State will implement for funding intrastate telecommunication relay services.

(4) Suspension or revocation of certification.—The Commission may suspend or revoke such certification if, after notice and opportunity for hearing, the Commission determines that such certification is no longer warranted.

(g) Complaint.—

(1) Referral of complaint.—If a complaint to the Commission alleges a violation of this section with respect to intrastate telecommunications relay services within a State and certification of the program of such State under subsection (f) is in effect, the Commission shall refer such complaint to such State.

(2) Jurisdiction of commission.—After referring a complaint to a State under paragraph (1), the Commission shall exercise jurisdiction over such complaint only if—

(A) final action under such State program has not been taken on such complaint by such State—

(i) within 180 days after the complaint is filed with such State; or

(ii) within a shorter period as prescribed by the regulations of such State; or

(B) the Commission determines that such State program is no longer qualified for certification under subsection (f).

REHABILITATION ACT OF 1973

* * * * * * *

DEFINITIONS

SEC. 7. For the purposes of this Act:
(1) * * *

* * * * * * *

(8)(A) * * *

(B) [Subject to the second sentence of this subparagraph, the] *The* term "individual with handicaps" means, for purposes of titles IV and V of this Act, any person who (i) has a physical or mental impairment which substantially limits one or more of such person's major life activities, (ii) has a record of such an impairment, or (iii) is regarded as having such an impairment. [For purposes of sections 503 and 504 as such sections relate to employment, such term does not include any individual who is an alcoholic or drug abuser whose current use of alcohol or drugs prevents such individual from performing the duties of the job in question or whose employment, by reason of such current alcohol or drug abuse, would constitute a direct threat to property or the safety of others.] *Notwithstanding any other provision of law, but subject to subparagraph (D) with respect to programs and activities providing education and the last sentence of this paragraph, the term "individual with a handicap" does not include any individual who currently uses illegal drugs, except that an individual who is otherwise handicapped shall not be excluded from the protections of this Act if such individual also uses or is also addicted to drugs. For purposes of programs and activities providing medical services, an individual who currently uses illegal drugs shall not be denied the benefits of such programs or activities on the basis of his or her current use of illegal drugs if he or she is otherwise entitled to such services.*

* * * * * * *

(D) For purposes of programs and activities providing educational services, local educational agencies may take disciplinary action pertaining to the use or possession of illegal drugs or alcohol against any handicapped student who currently uses drugs or alcohol to the same extent that such disciplinary action is taken against nonhandicapped students. Furthermore, the due process procedures at 34 CFR 104.36 shall not apply to such disciplinary actions.

(E) For purposes of section 503 and 504 of this Act as such sections relate to employment, the term "individual with handicaps" does not include any individual who is an alcoholic whose current use of alcohol prevents such individual from performing the duties of the job in question or whose employeemnt, by reason of such current alcohol abuse, would constitute a direct threat to property or the safety of others.

(22) The term "illegal drugs" means controlled substances, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812), the possession or distribution of which is unlawful under such Act. The term "illegal drugs" does not mean the use of a controlled substance pursuant to a valid prescription or

other uses authorized by the Controlled Substances Act or other provisions of Federal law.

ADDITIONAL VIEWS OF MR. JOHN PAUL HAMMERSCHMIDT, MR. ARLAN STANGELAND, MR. WILLIAM F. CLINGER, JR., MR. JIM LIGHTFOOT, MR. DENNIS HASTERT, MR. JAMES M. INHOFE, MR. CASS BALLENGER, MR. BILL EMERSON, MR. JOHN J. DUNCAN, JR., MR. BILL GRANT AND MS. SUSAN MOLINARI

Legislation opening doors to opportunity and independence for millions of Americans has received its long-awaited and deserved attention in the halls of the 101st Congress. The Public Works and Transportation Committee has had a significant role in the effort, and after many months of deliberations, it is with a sense of pride and purpose that we have been able to vote in favor of reporting H.R. 2273, as amended, the Americans with Disabilities Act, to the House of Representatives.

Transportation holds the key to opportunity for millions of disabled Americans. No longer will the problem of "how to get there" prevent the disabled from participating in recreational activities, running errands, visiting friends, and most of all, taking pride in a job well done. Our avenues, subways, railways and waterways will carry the disabled all across this great nation so that they can live normal and productive lives.

The legislation we have reported represents a great effort to achieve these goals. We have worked long and hard to balance the needs of the disabled with the impacts on providers. We have tried to keep the objectives of mobility first and foremost in our minds in considering the issues raised before us. Many significant provisions of the legislation, particularly those regarding private transportation, have met those goals, and it is these provisions for which we have registered our full support. However, in the legislative process, we know that to arrive at consensus, we sometimes must forgeo all that we would like to achieve, and unfortunately, it is for certain other provisions in the bill, as well as omissions, that we must express our concerns.

The objective of the Americans with Disabilities Act is to provide mobility for all disabled Americans. The legislation, however, does not guarantee the best mobility for all the disabled. Those disabled Americans who live in smaller or rural areas may find that the Americans with Disabilities Act brings them less mobility, not more.

The bill mandates lifts on every new public transit bus. It also mandates comparable paratransit, except that with regard to response time, the service must be comparable to the extent practicable. The impact of both of these requirements, particularly on smaller transit systems, will be significant. In addition, in smaller areas, the disabled population does not exist in numbers great enough to justify the capital expenditure of lifts. Even in large metropolitan areas where disabled populations are higher, the ridership figures are low. Seattle, Washington, quotes the highest ridership: one lift use per bus every other day. Significant barriers to lift use exist in every city, whether it be the lack of curb cuts, hilly terrain, sheer distance from the nearest bus stop, or severe weather conditions. Very simply, an adequate paratransit system often provides better mobility to the disabled, particularly in less populated areas, than a lift-equipped fixed route system. It came as no surprise that many disabled across our country prefer it.

We are concerned that the bill makes no allowance for flexibility so that local communities can decide what method of accessibility works best for them. We believe a Federal mandate requiring one solution for all communities is long on theory and short on reality.

A significant amount of paratransit service is currently provided by social service agencies and private non-profit entities. The Department of Health and Human Services alone estimates that transportation represents approximately $1 billion of its total program budgets. The bill puts the legal responsibility for paratransit service on the public transit authority. We are concerned that this linkage will provide a great incentive for other paratransit providers to discontinue their service and devote their limited resources to their basis program offerings rather than transportation service. After all, the ADA lays the burden at someone else's doorstep. In fact, this has already happened to some degree under the existing 504 law and regulations. Transit agencies simply cannot feasibly pick up all of the service that is currently provided, so, once again, some unfortunate disabled Americans will find that the ADA brings them less mobility, not more.

Another concern relates to the bill's effective dates. In the public transportation title, the Department of Transportation is given 12 months to issue complex regulations governing the provision of paratransit service. The law's requirements go into effect 18 months after enactment. What will likely occur is that the effective date will arrive without the issuance of final regulations, leaving transit authorities in the dark regarding their specific responsibilities and subject to discrimination claims. Handicapped rulemakings in the Department of Transportation are traditionally handled through the administrative procedure of a regulatory negotiation rather than the normal notice and comment rulemaking process. Regulatory negotiation involves bringing all affected parties together and negotiating what the regulations should entail. The process is favored by the disability community because there is an enhanced opportunity to express views through this process. By the very nature of the process, however, more time is taken to arrive at conclusions. With the range and complexity of issues that must be addressed in a regulation governing paratransit service, and because of the desired use of a regulatory negotiation, we do not believe 12 months is a reasonable amount of time for the Department to act. The bill will penalize transit authorities for agency delay and result in unnecessary litigation, increased transit costs and less mobility and service. We do not believe this was the intent of the ADA.

A concern with the entire bill is its underlying vagueness and confusing new legal terms which will inevitably cause the law to be interpreted by the courts. With legislation that is this significant, it is unfortunate that major provisions will be decided in the judicial forum rather than by the Congress. For example, provision of paratransit service is limited by the concept of "undue financial burden". The Department of Transportation must issue regulations to determine what constitutes an undue financial burden with very little statutory guidance from the Congress. Invariably, regulations will be challenged and different courts will issue conflicting decisions. This causes even more significant compliance burdens for those attempting to comply with law that is ever changing. We believe this is an unfortunate outcome for such an important piece of legislation.

The bill contains a well reasoned approach to accessibility with the private over-the-road bus industry which we believe represents a full and fair balance of the needs of the disabled and the impacts on the provider. In the spirit of cooperation and compromise, we were able to work out a solution amenable to all parties, which we fully support.

Despite its flaws, the Americans with Disabilities Act is indeed landmark legislation. It is our hope that it will not only open doors and mainstream those who have waited too long, but will serve to topple the true divider amongst ourselves, the disabled attitudes in those of us deemed "abled".

MINORITY VIEWS OF MR. BUD SHUSTER, MR. BOB McEWEN, MR. RON PACKARD, MR. MEL HANCOCK, AND MR. CHRISTOPHER COX

We strongly support increased mobility for disabled Americans, but believe the mandates and requirements found in titles II and III of this bill will have detrimental effects on transportation of all Americans, able-bodied and disabled.

This legislation will result in the loss of service to residents of small towns and rural areas as transit agencies seek to cope with the onerous financial burdens imposed upon them by the ADA, not to mention the increased costs that will be borne by all transit riders for equipment and facilities that will be used rarely or not at all. This bill will impact most adversely upon the elderly population that will grow steadily larger as the median age increases. They will be denied needed transportation services because of their ineligibility under the legislation.

We have never opposed civil rights for disabled Americans. Rather, we have supported and attempted to work for a balanced, rational approach to meeting the access needs of all Americans, disabled and able-bodied. During hearings on this legislation we sought to examine the access needs of the disabled and the shortfalls of our existing transportation systems. Testimony during the hearings brought out very real needs for disabled Americans, but it also demonstrated a commitment among many transit agencies to meet those needs without further government interference and mandates. For example, the City of St. Cloud, Minnesota is meeting the needs of their disabled population through a comprehensive paratransit service developed by the transit authority and disabled community. They testified that the ADA will require them to cut their paratransit service and install lift-equipped buses that the disabled community doesn't want.

At the mark-up of this bill several amendments were offered to address these important problems with the bill. Unfortunately, few of the issues raised in the hearings were resolved. As such, we have major concerns about this legislation which are detailed below.

TITLE II, PUBLIC SERVICES

Title II extends a general prohibition of discrimination to public services. It further requires in Section 203, that every new transit bus purchased for public use be accessible to the disabled (lift equipment). Because rural and small cities generally experience lower ridership figures and have lesser resources to draw upon than their larger cousins, this mandate wil have a negative impact on transit entities and service in these areas.

The cost of a new transit bus is approximately $150,000-$175,000. For a transit agency to equip that bus with a wheelchair lift will require an additional outlay of between $12,000-$15,000 with its attendant average annual maintenance costs of $2000, amounting to a 10 percent surcharge per bus to the transit agency. Total aggregate annual cost to transit authorities to implement the lift mandate will amount to approximately $30 million a year, when federal transit assistance has been cut 50 percent in real dollar terms in the last 10 years.

When we examine ridership figures for lift-equipped bus fleets we find that they are startlingly low. In Seattle, Washington, for example, the city with the highest reported disabled ridership figures in the nation (their fleet is 80 percent lift equipped), use of lifts averaged .6 lift use per lift-equipped bus per day. Milwaukee, Wisconsin had 50 percent of its fleet accessible and over a three year period experienced disabled ridership figures of .008 lift use per bus per day. They found that fewer than 15 different people used the accessible buses during the three year period. (Milwaukee's estimated wheelchair-bound population is estimated at 7000). New York City has the nation's largest bus fleet with 4200 buses and is nearly 100 percent lift-equipped. The city reports average disabled ridership figures of one lift use per every 19 buses; less than Seattle.

What transit authorities need is the flexibility to meet the access needs of the disabled in their community. Flexibility, rather than an absolute mandate as contained in this legislation would permit local communities—who generally know their ridership needs better than the federal government—the ability of developing a transportation system that provides accessibility to the disabled in the form they want it. A lift-equipped fixed route bus fleet does not result in mobility for all disabled Americans in all areas.

Many disabled and elderly individuals cannot travel to and from a bus stop because of distance, lack of curb cuts, hilly terrain or adverse weather conditions. This legislation, however, would exclude them from eligibility from their only transportation alternative, paratransit service. Only if a disabled person (the elderly population is excluded) cannot actually board, ride or disembark from a lift-equipped bus are they eligible for the door-to-door paratransit service. Their ability to get to the bus stop is not considered a factor.

A limited waiver for small towns and rural areas under 200,000 in population would allow areas that will be hardest hit by this legislation to have the flexibility they need to meet the access needs of the disabled and elderly without disruption and cuts in service. A waiver of this scope would be very narrow. Transit operators in urbanized areas under 200,000 in poulation represent only 2.2 percent of all transit passenger miles. In addition, a waiver would have the added benefit of requiring consultation with the disabled in the community assuring a local, acceptable approach for all parties.

Section 204 of the legislation contains a requirement that any public entity that operates a fixed route system must also provide paratransit service to eligible disabled persons. This section is one of the most important transportation provisions of the bill because there will always be those disabled that cannot use a fixed route system, even if that system is fully accessible. In fact, in many situations, paratransit meets the mobility needs of the disabled better than a lift on each and every transit bus. However, the paratransit provision contained in the ADA requires that paratransit services provided to the disabled community be comparable, except for response time, which is comparable to the extent practicable.

To require paratransit service to be truly comparable to a regular fixed-route bus service is of major concern to us. Truly comparable service is a very high standard, one which can hardly be met by the existing resources of transit authorities. No transit authority in the country will be able to meet this utopian level of service. A transit authority would have to offer paratransit service that is virtually equivalent to the regular fixed route service.

The cost of providing paratransit service at a comparable level to fixed-route service is unable to be quantified. The Congressional Budget Office and the General Accounting Office, after a request to estimate the cost of such service, reported back to the Congress that they were unable to even come up with an estimate of the cost such service would entail. We find it astounding that we are mandating requirements in the legislation for which costs are unknown. The limitation of "undue financial burden" contained in Section 204 will only result in continuous and quite likely successful suits against the transit agency to require paratransit service above their ability to provide. Moreover, the relief valve of "undue financial burden" will come into play increasingly often as transit authorities, faced with an absolute mandate of equipping every bus with a lift, attempt to shift already scarce resources from paratransit service to wheelchair lifts.

We must understand that paratransit service is not a civil right. It is a service provided to the disabled above and beyond anything an able-bodied person can receive. This service is more like an entitlement, much along the lines of the food stamp program. An able-bodied person that could not get to the bus has no right to this services, a service beyond the scope of a civil rights bill.

Recognizing that this should still be an integral part of a transit authority's commitment to service for those unable to use the fixed-route service, the addition of legislative language in the bill to limit an authority's standard of service to "comparable to the extent practicable" would certainly go far toward insuring that reasonable levels of service would be provided to those that need paratransit. While recognizing the tight fiscal constraints of many transit authorities.

Of additional concern to us is the lack of legislative language in Section 204 that would protect the transit authority, legally responsible to provide paratransit service under the ADA, from having to provide service for a discontinued private provider of paratransit services. The legal requirement that the transit authority be solely responsible for providing service, as in this legislation, places an incentive on the private provider to dump their service onto the transit authority.

In an age of tightening budgets, agencies are already looking to the local transit authorities to provide transportation for their beneficiaries so they can extend the reach of the budgets for basic programs. The result to which this dumping could potentially lead is staggering. Transportation services provided by the Department of Health and Human Services alone are estimated to approach $1 billion annually. The Urban Mass Transportation Administration's 16(b)(2) program for comparison, which provides grants to private non-profit organizations serving the elderly and disabled, has a budget of only $35 million annually with which they provide over 20,000 special service vans for 3,500 non-profit agencies.

It is clear that some remedy must be extended to transit authorities or they will be faced with requirements for service, impossible for them to meet with their current limited resources. This situation is already occurring under the Rehabilitation Act of 1973.

Of less obvious concern, but none-the-less objectionable to us, are the effective dates of the ADA. The effective dates contained in the ADA generally require that the Department of Transportation issue regulations governing implementation of specific provisions within twelve months of enactment and sets the effective date for compliance with those regulations to 18 months after enactment.

An immediate problem arises under this requirement if the provisions of the ADA become effective 18 months after the date of enactment and the Department of Transportation has not yet issued the regulation governing their implementation. The transportation authorities will be forced to comply with the legislation without the benefit of regulatory guidance, leading, obviously, to lawsuits. Considering that these regulations will be extremely complex, especially those implementing the paratransit sections, the transit authority will need a minumum of six months after the regulations are issued in order to implement the requirements. Furthermore, since the regulations will most likley be done in a regulatory negotiation that brings all parties together at the table to develop the regulations and involves considerable more time than the normal rulemaking, there is simply not enough time in the bill language for DOT to complete the regulations.

A much more reasonable approach and one which we advocate is for DOT to be subject to a citizens suit that allows a person affected by the regulations—disabled or transit agency—to file suit in the federal district court against DOT if DOT fails to issue the required regulations on time. A provision such as this would give the district court the authority to issue an order requiring DOT to issue the regulations. This approach makes more sense as it penalizes the appropriate party (DOT) rather than the transit agency which has no control over the issuance of the regulations.

TITLE III

Of interest to us in title III of the bill are the provisions relating to private entities operating over-the-road buses. The bill requires that the Office of Technology Assessment undertake a three-year study to determine the access needs of disabled individuals as they relate to over-the-road buses and the most cost-effective methods of achieving accessibility to over-the-road buses. Following the completion of the study, the Secretary of DOT will issue regulations, taking into account the findings of the OTA study, relating to the accessibility for over-the-road buses. Large providers of service will have six years and small providers seven years from the date of enactment of the legislation to comply with the regulations.

The over-the-road bus provisions of this bill represent a compromise agreement developed by many different parties, including the disabled community and the over-the-road bus industry. This final version has been accepted by everyone and is an example of what can be accomplished by a bipartisan negotiating process. We strongly support this language.

BUD SHUSTER.

101st Congress | HOUSE OF REPRESENTATIVES | Rept. 101-485
2d Session | | Part 2

AMERICANS WITH DISABILITIES ACT OF 1990

May 15, 1990.—Ordered to be printed

Mr. Hawkins, from the Committee on Education and Labor, submitted the following

REPORT

together with

MINORITY VIEWS

[To accompany H.R. 2273 which on May 9, 1989, was referred jointly to the Committee on Education and Labor, the Committee on Energy and Commerce, the Committee on Public Works and Transportation, and the Committee on the Judiciary]

[Including cost estimate of the Congressional Budget Office]

The Committee on Education and Labor, to whom was referred the bill (H.R. 2273) to establish a clear and comprehensive prohibition of discrimination on the basis of disability, having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) Short Title.—This Act may be cited as the "Americans with Disabilities Act of 1989".

(b) Table of Contents.—The table of contents is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Findings and purposes.
Sec. 3. Definitions.

TITLE I—EMPLOYMENT

Sec. 101. Definitions.
Sec. 102. Discrimination.
Sec. 103. Defenses.
Sec. 104. Illegal drugs and alcohol.
Sec. 105. Posting notices.
Sec. 106. Regulations.
Sec. 107. Enforcement.
Sec. 108. Effective date.

39-081

TITLE II—PUBLIC SERVICES

Sec. 201. Definition.
Sec. 202. Discrimination.
Sec. 203. Actions applicable to public transportation provided by public entities considered discriminatory.
Sec. 204. Regulations.
Sec. 205. Enforcement.
Sec. 206. Effective date.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

Sec. 301. Definitions.
Sec. 302. Prohibition of discrimination by public accommodations.
Sec. 303. New construction in public accommodations and commercial facilities.
Sec. 304. Prohibition of discrimination in public transportation services provided by private entities.
Sec. 305. Study.
Sec. 306. Regulations.
Sec. 307. Exemptions for private clubs and religious organizations.
Sec. 308. Enforcement.
Sec. 309. Effective date.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICES

Sec. 401. Telecommunication services for hearing-impaired and speech-impaired individuals.

TITLE V—MISCELLANEOUS PROVISIONS

Sec. 501. Construction.
Sec. 502. Prohibition against retaliation and coercion.
Sec. 503. State immunity.
Sec. 504. Regulations by the Architectural and Transportation Barriers Compliance Board.
Sec. 505. Attorney's fees.
Sec. 506. Technical assistance.
Sec. 507. Federal wilderness areas.
Sec. 508. Transvestites.
Sec. 509. Congressional inclusion.
Sec. 510. Illegal drug use.
Sec. 511. Definitions.
Sec. 512. Amendments to the Rehabilitation Act.
Sec. 513. Severability.

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) some 43,000,000 Americans have one or more physical or mental disabilities, and this number is increasing as the population as a whole is growing older;

(2) historically, society has tended to isolate and segregate individuals with disabilities, and, despite some improvements, such forms of discrimination against individuals with disabilities continue to be a serious and pervasive social problem;

(3) discrimination against individuals with disabilities persists in such critical areas as employment, housing, public accommodations, education, transportation, communication, recreation, institutionalization, health services, voting, and access to public services;

(4) unlike individuals who have experienced discrimination on the basis of race, sex, national origin, religion, or age, individuals who have experienced discrimination on the basis of disability have often had no legal recourse to redress such discrimination;

(5) individuals with disabilities continually encounter various forms of discrimination, including outright intentional exclusion, the discriminatory effects of architectural, transportation, and communication barriers, overprotective rules and policies, failure to make modifications to existing facilities and practices, exclusionary qualification standards and criteria, segregation, and relegation to lesser services, programs, activities, benefits, jobs, or other opportunities;

(6) census data, national polls, and other studies have documented that people with disabilities, as a group, occupy an inferior status in our society, and are severely disadvantaged socially, vocationally, economically, and educationally;

(7) individuals with disabilities are a discrete and insular minority who have been faced with restrictions and limitations, subjected to a history of purposeful unequal treatment, and relegated to a position of political powerlessness in our society, based on characteristics that are beyond the control of such individuals and resulting from stereotypic assumptions not truly indicative of the individual ability of such individuals to participate in, and contribute to, society;

(8) the Nation's proper goals regarding individuals with disabilities are to assure equality of opportunity, full participation, independent living, and economic self-sufficiency for such individuals; and

(9) the continuing existence of unfair and unnecessary discrimination and prejudice denies people with disabilities the opportunity to compete on an equal

basis and to pursue those opportunities for which our free society is justifiably famous, and costs the United States billions of dollars in unnecessary expenses resulting from dependency and nonproductivity.

(b) PURPOSE.—It is the purpose of this Act—

(1) to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities;

(2) to provide clear, strong, consistent, enforceable standards addressing discrimination against individuals with disabilities;

(3) to ensure that the Federal Government plays a central role in enforcing the standards established in this Act on behalf of individuals with disabilities; and

(4) to invoke the sweep of congressional authority, including its power to enforce the fourteenth amendment and to regulate commerce, in order to address the major areas of discrimination faced day-to-day by people with disabilities.

SEC. 3. DEFINITIONS.

As used in this Act:

(1) AUXILIARY AIDS AND SERVICES.—The term "auxiliary aids and services" includes—

(A) qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments;

(B) qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments;

(C) acquisition or modification of equipment or devices; and

(D) other similar services and actions.

(2) DISABILITY.—The term "disability" means, with respect to an individual—

(A) a physical or mental impairment that substantially limits one or more of the major life activities of such individual;

(B) a record of such an impairment; or

(C) being regarded as having such an impairment.

(3) STATE.—The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

TITLE I—EMPLOYMENT

SEC. 101. DEFINITIONS.

As used in this title:

(1) COMMISSION.—The term "Commission" means the Equal Employment Opportunity Commission established by section 705 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–4).

(2) COVERED ENTITY.—The term "covered entity" means an employer, employment agency, labor organization, or joint labor-management committee.

(3) EMPLOYEE.—The term "employee" means an individual employed by an employer.

(4) EMPLOYER.—

(A) The term "employer" means a person engaged in an industry affecting commerce who has 15 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding calendar year, and any agent of such person, except that, for two years following the effective date of this title, an employer means a person engaged in an industry affecting commerce who has 25 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding year, and any agent of such person.

(B) EXCEPTIONS.—The term "employer" does not include—

(i) the United States, a corporation wholly owned by the government of the United States, or an Indian tribe; or

(ii) a bona fide private membership club (other than a labor organization) that is exempt from taxation under section 501(c) of the Internal Revenue Code of 1986.

(5) ILLEGAL DRUG.—The term "illegal drug" means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812), the possession or distribution of which is unlawful under such Act. The term "illegal drug" does not mean the use of a controlled substance

taken under supervision by a licensed health care professional or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

(6) Person, etc.—The terms "person", "labor organization", "employment agency", "commerce", and "industry affecting commerce", shall have the same meaning given such terms in section 701 of the Civil Rights Act of 1964 (42 U.S.C. 2000e).

(7) Qualified individual with a disability.—The term "qualified individual with a disability" means an individual with a disability who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires.

(8) Reasonable accommodation.—The term "reasonable accommodation" may include—

(A) making existing facilities used by employees readily accessible to and usable by individuals with disabilities; and

(B) job restructuring, part-time or modified work schedules, reassignment to a vacant position, acquisition or modification of equipment or devices, appropriate adjustment or modifications of examinations, training materials or policies, the provision of qualified readers or interpreters, and other similar accommodations for individuals with disabilities.

(9) Undue hardship.—

(A) In general.—The term "undue hardship" means an action requiring significant difficulty or expense.

(B) Determination.—In determining whether an accommodation would impose an undue hardship on a covered entity, factors to be considered include—

(i) the overall size of the business of a covered entity with respect to the number of its employees; the number, type, and location of its facilities; the overall financial resources of the entity and the financial resources of its facility or facilities involved in the provision of the reasonable accommodation;

(ii) the type of operation or operations of the covered entity, including the composition and structure of the workforce, in terms of such factors as functions of the workforce, geographic separateness, and administrative relationship, to the extent that such factors contribute to a reasonable determination of undue hardship; and

(iii) the nature and cost of the accommodation needed under this Act.

SEC. 102. DISCRIMINATION.

(a) General Rule.—No covered entity shall discriminate against a qualified individual with a disability because of the disability of such individual in regard to job application procedures, the hiring, advancement, or discharge of employees, employee compensation, job training, and other terms, conditions, and privileges of employment.

(b) Construction.—As used in subsection (a), the term "discriminate" includes—

(1) limiting, segregating, or classifying a job applicant or employee in a way that adversely affects the opportunities or status of such applicant or employee because of the disability of such applicant or employee;

(2) participating in a contractual or other arrangement or relationship that has the effect of subjecting a covered entity's qualified applicant or employee with a disability to the discrimination prohibited by this title (such relationship includes a relationship with an employment or referral agency, labor union, an organization providing fringe benefits to an employee of the covered entity, or an organization providing training and apprenticeship programs);

(3) utilizing standards, criteria, or methods of administration—

(A) that have the effect of discrimination on the basis of disability; or

(B) that perpetuate the discrimination of others who are subject to common administrative control;

(4) excluding or otherwise denying equal jobs or benefits to a qualified individual because of the known disability of an individual with whom the qualified individual is known to have a relationship or association;

(5) Reasonable accommodation.—

(a) not making reasonable accommodations to the known physical or mental limitations of an otherwise qualified individual who is an applicant or employee, unless such covered entity can demonstrate that the accommodation would impose an undue hardship on the operation of the business of such covered entity; or

(b) denying employment opportunities to a job applicant or employee who is an otherwise qualified individual with a disability, if such denial is based on the need of such covered entity to make reasonable accommodation to the physical or mental impairments of the employee or applicant;

(6) using qualification standards, employment tests or other selection criteria that screen out or tend to screen out an individual with a disability or a class of individuals with disabilities unless the test or other selection criteria, as used by the covered entity, is shown to be job-related for the position in question and is consistent with business necessity; and

(7) failing to select and administer tests concerning employment in the most effective manner to ensure that, when such test is administered to a job applicant or employee who has a disability that impairs sensory, manual, or speaking skills, such test results accurately reflect the skills, aptitude, or whatever other factor of such applicant or employee that such test purports to measure, rather than reflecting the impaired sensory, manual, or speaking skills of such employee or applicant (except where such skills are the factors that the test purports to measure).

(c) Medical Examinations and Inquiries.—

(1) In general.—The prohibition against discrimination as referred to in subsection (a) shall include medical examinations and inquiries.

(2) Preemployment.—

(A) Prohibited examination or inquiry.—Except as provided in paragraph (3), a covered entity shall not conduct a medical examination or make inquiries of a job applicant or employee as to whether such applicant or employee is an individual with a disability or as to the nature or severity of such disability.

(B) Acceptable inquiry.—A covered entity may make preemployment inquiries into the ability of an applicant to perform job-related functions.

(3) Employment entrance examination.—A covered entity may require a medical examination after an offer of employment has been made to a job applicant and prior to the commencement of the employment duties of such applicant, and may condition an offer of employment on the results of such examination, if—

(A) all entering employees are subjected to such an examination regardless of disability;

(B) information obtained regarding the medical condition or history of the applicant is collected and maintained on separate forms and in separate medical files and is treated as a confidential medical record, except that—

(i) supervisors and managers may be informed regarding necessary restrictions on the work or duties of the employee and necessary accommodations;

(ii) first aid and safety personnel may be informed, when appropriate, if the disability might require emergency treatment; and

(iii) government officials investigating compliance with this Act shall be provided relevant information on request; and

(C) the results of such physical examination are used only in accordance with this title.

(4) Examination and inquiry.—

(A) Prohibited examinations and inquiries.—A covered entity shall not conduct or require a medical examination and shall not make inquiries of an employee as to whether such employee is an individual with a disability or as to the nature or severity of the disability, unless such examination or inquiry is shown to be job-related and consistent with business necessity.

(B) Acceptable inquiries.—A covered entity may make inquiries into the ability of an employee to perform job-related functions.

SEC. 103. DEFENSES.

(a) In General.—It may be a defense to a charge of discrimination under this Act that an alleged application of qualification standards, tests, or selection criteria that screen out or tend to screen out or otherwise deny a job or benefit to an individual with a disability has been shown to be job-related and consistent with business necessity, and such performance cannot be accomplished by reasonable accommodation, as required under this title.

(b) Qualification Standards.—The term "qualification standards" may include a requirement that an individual with a currently contagious disease or infection shall not pose a direct threat to the health or safety of other individuals in the workplace.

(c) Religious Entities.—

(1) In general.—This title shall not prohibit a religious corporation, association, educational institution, or society from giving preference in employment to individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its activities.

(2) Qualification standard.—Under this title, a religious organization may require, as a qualification standard to employment, that all applicants and employees conform to the religious tenets of such organization.

SEC. 104. ILLEGAL DRUGS AND ALCOHOL.

(a) Qualified Individual With a Disability.—For purposes of this title, the term "qualified individual with a disability" shall not include any employee or applicant who is a current user of illegal drugs, when the covered entity acts on the basis of such use.

(b) Nothing in subsection (a) shall be construed to exclude as an individual with a disability an individual who (i) has successfully completed a supervised drug rehabilitation program and is no longer using illegal drugs, or has otherwise been rehabilitated successfully and is no longer using illegal drugs, or (ii) is participating in a supervised rehabilitation program and is no longer using illegal drugs, or (iii) is erroneously regarded as being an illegal drug user but is not using illegal drugs. Provided that it shall not be a violation of this Act for a covered entity to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual defined in this paragraph is no longer using illegal drugs.

(c) Authority of Covered Entity.—A covered entity—

(1) may prohibit the use of alcohol or illegal drugs at the workplace by all employees;

(2) may require that employees shall not be under the influence of alcohol or illegal drugs at the workplace;

(3) may require that employees behave in conformance with the requirements established under the Drug-Free Workplace of 1988 (41 U.S.C. 701 et seq.);

(4) may hold an employee who is a drug user or alcoholic to the same qualification standards for employment or job performance and behavior that such entity holds other employees, even if any unsatisfactory performance or behavior is related to the drug use or alcoholism of such employee; and

(5) may require employees in sensitive positions, as defined by the Department of Transportation regulations regarding alcohol and drug use, the Department of Defense drug-free workplace regulations, and the Nuclear Regulatory Commission regulations regarding alcohol and drug use, to comply with the standards established by such regulations.

(d) Drug Testing.—

(1) In general.—For purposes of this title, a test to determine the use of illegal drugs shall not be considered a medical examination.

(2) Construction.—Nothing in this title shall be construed to encourage, prohibit, or authorize the conducting of drug testing for illegal drugs of job applicants or employees or making employment decisions based on such test results.

SEC. 105. POSTING NOTICES.

Every employer, employment agency, labor organization, or joint labor-management committee covered under this title shall post notices in an accessible format to applicants, employees, and members describing the applicable provisions of this Act, in the manner prescribed by section 711 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–10).

SEC. 106. REGULATIONS.

Not later than 1 year after the date of enactment of this Act, the Commission shall issue regulations in an accessible format to carry out this title in accordance with subchapter II of chapter 5 of title 5, United States Code.

SEC. 107. ENFORCEMENT.

(a) The remedies and procedures set forth in sections 706, 707, 709, and 710 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–5, 2000e–6, 2000e–8, and 2000e–9) shall be available, with respect to the Commission, the Attorney General, or any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of any provisions of this Act, or regulations promulgated under section 106, concerning employment.

(b) The agencies with enforcement authority for actions which allege employment discrimination under this title and under the Rehabilitation Act of 1973 shall develop procedures to ensure that administrative complaints filed under this title and under the Rehabilitation Act of 1973 are dealt with in a manner that avoids duplication of effort and prevents imposition of inconsistent or conflicting standards for the same requirements under this title and the Rehabilitation Act of 1973. Such agencies shall establish such coordinating mechanisms in the regulations implementing this title and the Rehabilitation Act of 1973.

SEC. 108. EFFECTIVE DATE.

This title shall become effective 24 months after the date of enactment.

TITLE II—PUBLIC SERVICES

SEC. 201. DEFINITION.

As used in this title, the term "qualified individual with a disability" means an individual with a disability who, with or without reasonable modifications to rules, policies, and practices, the removal of architectural, communication, and transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a department, agency, special purpose district, or other instrumentality of a State or a local government.

SEC. 202. DISCRIMINATION.

No qualified individual with a disability shall, by reason of such disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination by a department, agency, special purpose district, or other instrumentality of a State or a local government.

SEC. 203. ACTIONS APPLICABLE TO PUBLIC TRANSPORTATION PROVIDED BY PUBLIC ENTITIES CONSIDERED DISCRIMINATORY.

(a) DEFINITION.—As used in this title, the term "public transportation" means transportation by bus or rail, or by any other conveyance (other than air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

(b) VEHICLES.—

(1) NEW BUSES, RAIL VEHICLES, AND OTHER FIXED ROUTE VEHICLES.—It shall be considered discrimination for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity to purchase or lease a new fixed route bus of any size, a new intercity rail vehicle, a new commuter rail vehicle, a new rapid rail vehicle, a new light rail vehicle to be used for public transportation, or any other new fixed route vehicle to be used for public transportation and for which a solicitation is made later than 30 days after the date of enactment of this Act, if such bus, rail, or other vehicle is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) USED VEHICLES.—If a public entity purchases or leases a used vehicle to be used for public transportation after the date of enactment of this Act, such individual or entity shall make demonstrated good faith efforts to purchase or lease such a used vehicle that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(3) REMANUFACTURED VEHICLES.—If a public entity remanufactures a vehicle, or purchases or leases a remanufactured vehicle to be used for public transportation, so as to extend its usable life for 5 years or more, the vehicle shall, to the maximum extent feasible, be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(c) PARATRANSIT AS A SUPPLEMENT TO FIXED ROUTE PUBLIC TRANSPORTATION SYSTEM.—

(1) IN GENERAL.—If a public entity operates a fixed route public transportation system to provide public transportation, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public transit entity that is responsible for providing public transportation to fail to provide paratransit or other special transportation services sufficient to provide a comparable level of services as is provided to individuals using fixed route public transportation to individuals with disabilities, including individuals who use wheelchairs, who cannot otherwise use fixed route public transportation and to other individuals associated with such individuals with disabilities in accordance with service criteria established under regulations promulgated by the Secretary of Transportation unless the public

transit entity can demonstrate that the provision of paratransit or other special transportation services would impose an undue financial burden on the public transit entity.

(2) Undue financial burden.—If the provision of comparable paratransit or other special transportation services would impose an undue financial burden on the public transit entity, such entity must provide paratransit and other special transportation services to the extent that providing such services would not impose an undue financial burden on such entity.

(3) Regulations.—

(A) Formula.—Regulations promulgated by the Secretary of Transportation to determine what constitutes an undue financial burden, for purposes of this subsection, may include a flexible numerical formula that incorporates appropriate local characteristics such as population.

(B) Additional paratransit services.—Notwithstanding paragraphs (1) and (2), the Secretary may require, at the discretion of the Secretary, a public transit authority to provide paratransit services beyond the amount determined by such formula.

(d) Community Operating Demand Responsive Systems for the General Public.—If a public entity operates a demand responsive system that is used to provide public transportation for the general public, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such individual or entity to purchase or lease a new vehicle, for which a solicitation is made later than 30 days after the date of enactment of this Act, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to that provided to the general public.

(e) Temporary Relief Where Lifts Are Unavailable.—With respect to the purchase of new buses, a public entity may apply for, and the Secretary of Transportation may temporarily relieve such public entity from the obligation to purchase new buses of any size that are readily accessible to and usable by individuals with disabilities if such public entity demonstrates—

(1) that the initial solicitation for new buses made by the public entity specified that all new buses were to be lift-equipped and were to be otherwise accessible to and usable by individuals with disabilities;

(2) the unavailability from any qualified manufacturer of hydraulic, electromechanical, or other lifts for such new buses;

(3) that the public entity seeking temporary relief has made good faith efforts to locate a qualified manufacturer to supply the lifts to the manufacturer of such buses in sufficient time to comply with such solicitation; and

(4) that any further delay in purchasing new buses necessary to obtain such lifts would significantly impair transportation services in the community served by the public entity.

(f) Construction.—

(1) In general.—Any relief granted under subsection (e) shall be limited in duration by a specified date and the appropriate committees of the Congress shall be notified of any such relief granted.

(2) Fraudulent application.—If, at any time, the Secretary of Transportation has reasonable cause to believe that such relief was fraudulently applied for, the Secretary of Transportation shall—

(A) cancel such relief, if such relief is still in effect; and

(B) take other steps that the Secretary of Transportation considers appropriate.

(g) New Facilities.—For purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to build a new facility that will be used to provide public transportation services, including bus service, intercity rail service, rapid rail service, commuter rail service, light rail service, and other service used for public transportation that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(h) Alterations of Existing Facilities.—With respect to a facility or any part thereof that is used for public transportation and that is altered by, on behalf of, or for the use of a public entity in a manner that affects or could affect the usability of the facility or part thereof, it shall be considered discrimination, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such individual or entity to fail to make the alterations in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. If such public entity is undertaking major structural alterations that affect or could affect the usability of the facility (as defined under criteria established by the Secretary of Transportation), such public entity shall also make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving such area, are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(i) Existing Facilities, Intercity Rail, Rapid Rail, Light Rail, and Commuter Rail Systems, and Key Stations.—

(1) Existing facilities.—Except as provided in paragraph (3), with respect to existing facilities used for public transportation, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public entity to fail to operate such public transportation program or activity conducted in such facilities so that, when viewed in the entirety, it is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) Intercity, rapid, light, and commuter rail systems.—With respect to vehicles operated by intercity, light, rapid, and commuter rail systems, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to have at least one car per train that is accessible to individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in any event in no less than 5 years.

(3) Key stations.—

(A) In general.—For purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to make stations in intercity rail systems and key stations in rapid rail, commuter rail, and light rail systems readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(B) Rapid rail, commuter rail, and light rail systems.—Key stations in rapid rail, commuter rail, and light rail systems shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than 3 years after the date of enactment of this Act, except that the time limit may be extended by the Secretary of Transportation up to 20 years for extraordinarily expensive structural changes to, or replacement of, existing facilities necessary to achieve accessibility.

(C) Intercity rail systems.—All stations in intercity rail systems shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable, but in no event later than 20 years after the date of enactment of this Act.

(D) Plans and milestones.—The Secretary of Transportation shall require the appropriate public entity to develop a plan for compliance with this paragraph that reflects consultation with individuals with disabilities affected by such plan and that establishes milestones for achievement of the requirements of this paragraph.

SEC. 204. REGULATIONS.

(a) Attorney General.—Not later than 1 year after the date of enactment of this Act, the Attorney General shall promulgate regulations in an accessible format that implement this title (other than section 203), and such regulations shall be consistent with this title and with the coordination regulations under part 41 of title 28, Code of Federal Regulations (as promulgated by the Department of Health, Education, and Welfare on January 13, 1978), applicable to recipients of Federal financial assistance under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) except, with respect to "program accessibility, existing facilities", and "communications", such regulations shall be consistent with regulations and analysis as in part 39 of title 28 of the Code of Federal Regulations, applicable to federally conducted activities under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

(b) Secretary of Transportation.—

(1) In general.—Not later than 1 year after the date of enactment of this Act, the Secretary of Transportation shall promulgate regulations in an accessible format that include standards applicable to facilities and vehicles covered under section 203 of this title.

(2) Conformance of standards.—Such standards shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504.

SEC. 205. ENFORCEMENT.

The remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be available with respect to any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of this Act, or regulations promulgated under section 204, concerning public services.

SEC. 206. EFFECTIVE DATE.

(a) In General.—Except as provided in subsection (b), this title shall become effective 18 months after the date of enactment of this Act.

(b) Fixed Route Vehicles.—Section 203(b)(1), as regarding new fixed route vehicles, shall become effective on the date of enactment of this Act.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

SEC. 301. DEFINITIONS.

As used in this title:

(1) Commerce.—The term "commerce" means travel, trade, traffic, commerce, transportation, or communication—

(A) among the several States;

(B) between any foreign country or any territory or possession and any State; or

(C) between points in the same State but through another State or foreign country.

(2) Commercial facilities.—The term "commercial facilities" means facilities—

(A) that are intended for nonresidential use; and

(B) whose operations will affect commerce.

Such term shall not include facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968 (42 U.S.C. 3601 et seq.).

(3) Public accommodation.—The following privately operated entities are considered public accommodations for purposes of this title, if the operations of such entities affect commerce—

(A) an inn, hotel, motel, or other similar place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor;

(B) a restaurant, bar, or other establishment serving food or drink;

(C) a motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment;

(D) an auditorium, convention center, or lecture hall;

(E) a bakery, grocery store, clothing store, hardware store, shopping center, or other similar retail sales establishment;

(F) a laundromat, dry-cleaners, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other similar service establishment;

(G) a terminal used for public transportation;

(H) a museum, library, gallery, and other similar place of public display or collection;

(I) a park or zoo;

(J) a nursery, elementary, secondary, undergraduate, or postgraduate private school;

(K) a day care center, senior citizen center, homeless shelter, food bank, adoption program, or other similar social service center; and

(L) a gymnasium, health spa, bowling alley, golf course, or other similar place of exercise or recreation.

(4) Public transportation.—The term "public transportation" means transportation by bus or rail, or by any other conveyance (other than by air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

(5) Readily achievable.—

(A) In general.—The term "readily achievable" means easily accomplishable and able to be carried out without much difficulty or expense.

(B) Determination.—In determining whether an action is readily achievable, factors to be considered include—

(i) the overall size of the business of a covered entity with respect to the number of its employees; the number, type, and location of its facilities; the overall financial resources of the entity and the financial resources of its facility or facilities involved in the removal of the barrier;

(ii) the type of operation or operations maintained by a covered entity, including the composition and structure of the workforce, in terms of such factors as functions of the workforce, geographic separateness, and administrative relationship to the extent that such factors contribute to a reasonable determination of readily achievable; and

(iii) the nature and cost of the action needed.

SEC. 302. PROHIBITION OF DISCRIMINATION BY PUBLIC ACCOMMODATIONS.

(a) General Rule.—No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation.

(b) Construction.—

(1) General prohibition.—

(A) Activities.—

(i) Denial of participation.—It shall be discriminatory to subject an individual or class of individuals on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements, to a denial of the opportunity of the individual or class to participate in or benefit from the goods, services, facilities, privileges, advantages, and accommodations of an entity.

(ii) Participation in unequal benefit.—It shall be discriminatory to afford an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements with the opportunity to participate in or benefit from a good, service, facility, privilege, advantage, and accommodation that is not equal to that afforded to other individuals.

(iii) Separate benefit.—It shall be discriminatory to provide an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements with a good, service, facility, privilege, advantage, or accommodation that is different or separate from that provided to other individuals, unless such action is necessary to provide the individual or class of individuals with a good, service, facility, privilege, advantage, or accommodation, or other opportunity that is as effective as that provided to others.

(iv) For purposes of sec. 302(b)(1)(A)(i)-(iii), the term "individual or class of individuals" refers to the clients or customers of the covered public accommodation that enters into the contractual, licensing or other arrangement.

(B) Integrated settings.—Goods, facilities, privileges, advantages, accommodations, and services shall be afforded to an individual with a disability in the most integrated setting appropriate to the needs of the individual.

(C) Opportunity to participate.—Notwithstanding the existence of separate or different programs or activities provided in accordance with this section, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different.

(D) Administrative methods.—An individual or entity shall not, directly or through contractual or other arrangements, utilize standards or criteria or methods of administration—

(i) that have the effect of discriminating on the basis of disability; or

(ii) that perpetuate the discrimination of others who are subject to common administrative control.

(E) Association.—It shall be discriminatory to exclude or otherwise deny equal goods, services, facilities, privileges, advantages, and accommodations, or other opportunities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association.

(2) SPECIFIC PROHIBITIONS.—

(A) DISCRIMINATION.—As used in subsection (a), the term "discrimination" shall include—

(i) the imposition or application of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any goods, services, facilities, privileges, advantages, and accommodations, unless such criteria can be shown to be necessary for the provision of the goods, services, facilities, privileges, advantages, or accommodations being offered;

(ii) a failure to make reasonable modifications in policies, practices, procedures, when such modifications are necessary to afford such goods, services, facilities, privileges, advantages, and accommodations to individuals with disabilities, unless the entity can demonstrate that making such modifications would fundamentally alter the nature of such goods, services, facilities, privileges, advantages, and accommodations;

(iii) a failure to take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the entity can demonstrate that taking such steps would fundamentally alter the nature of the good, service, facility, privilege, advantage, or accommodation being offered or would result in undue burden;

(iv) a failure to remove architectural barriers, and communication barriers that are structural in nature, in existing facilities, and transportation barriers in existing vehicles used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles by the installation of a hydraulic or other lift), where such removal is readily achievable;

(v) where an entity can demonstrate that the removal of a barrier under clause (iv) is not readily achievable, a failure to make such goods, services, facilities, privileges, advantages, and accommodations available through alternative methods if such methods are readily achievable;

(vi) with respect to a facility or part thereof that is altered by, on behalf of, or for the use of an establishment in a manner that affects or could affect the usability of the facility or part thereof, a failure to make alterations in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, and where the entity is undertaking an alteration that affects or could affect usability of or access to an area of the facility containing a primary function, the entity shall also make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General), except that this paragraph shall not be construed to require the installation of an elevator for facilities that are less than three stories or that have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

(B) FIXED ROUTE SYSTEM.—

(i) ACCESSIBILITY.—It shall be considered discrimination for an entity that uses a vehicle for a fixed route system to transport individuals not covered under section 203 or 304, to purchase or lease a bus or a vehicle that is capable of carrying in excess of 16 passengers, for which solicitations are made later than 30 days after the effective date of this Act, that is not readily accessible to and usable by individuals with disabilities (including individuals who use wheelchairs), except that over-the-road buses shall be subject to section 304(b)(4) and section 305.

(ii) EQUIVALENT SERVICE.—If such entity purchases or leases a vehicle carrying 16 or less passengers after the effective date of this title that is not readily accessible to or usable by individuals with disabilities, it shall be discriminatory for such entity to fail to operate a system that, when viewed in its entirety, ensures a level of service to individuals with disabilities, including individuals who use wheelchairs, equivalent to the level of service provided to the general public.

(C) DEMAND RESPONSIVE SYSTEM.—As used in subsection (a), the term "discrimination" shall include, in the case of a covered entity that uses vehicles in a demand responsive system to transport individuals not covered under section 203 or 304, an incident in which—

(i) such entity purchases or leases a vehicle carrying 16 or less passengers after the effective date of this title, a failure to operate a system that, when viewed in its entirety, ensures a level of service to individuals with disabilities, including individuals who use wheelchairs, equivalent to the level of service provided to the general public; and

(ii) such entity purchases or leases a bus or a vehicle that can carry in excess of 16 passengers for which solicitations are made later than 30 days after the effective date of this Act, that is not readily accessible to and usable by individuals with disabilities (including individuals who use wheelchairs) unless such entity can demonstrate that such system, when viewed in its entirety, already provides a level of service to individuals with disabilities equivalent to that provided to the general public, except that over-the-road buses shall be subject to section 304(b)(4) and section 305.

SEC. 303. NEW CONSTRUCTION IN PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES.

(a) APPLICATION OF TERM.—Except as provided in subsection (b), as applied to a—

(1) public accommodation; and

(2) commercial facilities;

the term "discrimination" as used in section 302(a) shall mean a failure to design and construct facilities for first occupancy later than 30 months after the date of enactment of this Act that are readily accessible to and usable by individuals with disabilities, except where an entity can demonstrate that it is structurally impracticable to meet the requirements of such subsection in accordance with standards set forth or incorporated by reference in regulations issued under this title.

(b) ELEVATOR.—Subsection (a) shall not be construed to require the installation of an elevator for facilities that are less than three stories or have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

SEC. 304. PROHIBITION OF DISCRIMINATION IN PUBLIC TRANSPORTATION SERVICES PROVIDED BY PRIVATE ENTITIES.

(a) GENERAL RULE.—No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of public transportation services provided by a privately operated entity that is primarily engaged in the business of transporting people, but is not in the principal business of providing air transportation, and whose operations affect commerce.

(b) CONSTRUCTION.—As used in subsection (a), the term "discrimination against" includes—

(1) the imposition or application by an entity of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully enjoying the public transportation services provided by the entity;

(2) the failure of an entity to—

(A) make reasonable modifications consistent with those required under section 302(b)(2)(A)(ii);

(B) provide auxiliary aids and services consistent with the requirements of section 302(b)(2)(A)(iii); and

(C) remove barriers consistent with the requirements of section 302(b)(2)(A) (iv), (v), and (vi);

(3) the purchase or lease of a new vehicle (other than an automobile or an over-the-road bus) that is to be used to provide public transportation services, and for which a solicitation is made later than 30 days after the date of enact-

ment of this Act, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs (except in the case of a vehicle used in a demand response system, in which case the new vehicle need not be readily accessible to and usable by individuals with disabilities if the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the level of service provided to the general public); and

(4) the purchase or lease of a new over-the-road bus that is used to provide public transportation services and for which a solicitation is made later than 7 years after the date of enactment of this Act for small providers (as defined by the Secretary of Transportation) and 6 years for other providers, except as provided in section 305(d), that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

SEC. 305. STUDY.

(a) Purpose.—The Office of Technology Assessment shall undertake a study to determine—

(1) the access needs of individuals with disabilities to over-the-road buses; and

(2) the most cost effective methods for making over-the-road buses readily accessible to and usable by individuals with disabilities, particularly individuals who use wheelchairs.

(b) Content.—The study shall analyze issues, including—

(1) the anticipated demand by individuals with disabilities for accessible over-the-road buses;

(2) the degree to which over-the road buses are readily accessible to and usable by individuals with disabilities;

(3) the cost of providing accessibility to over-the-road buses to individuals with disabilities, including recent technological and cost saving developments in equipment and devices providing such accessibility;

(4) possible design changes in over-the-road buses that could enhance such accessibility; and

(5) the impact of accessibility requirements on the continuation of inter-city bus service by over-the-road buses, with particular consideration of impact on rural service.

(c) Advisory Committee.—In conducting the study required by subsection (a), the Office of Technology Assessment shall establish an advisory committee, which shall consist of—

(1) members selected from among private operators using over-the-road buses, bus manufacturers, and lift manufacturers;

(2) members selected from among individuals with disabilities, particularly individuals who use wheelchairs, who are potential riders of such buses; and

(3) members selected for their technical expertise on issues included in the study.

The number of members selected under each of paragraphs (1) and (2) shall be equal, and the total number of members selected under paragraphs (1) and (2) shall exceed the number of members selected under paragraph (3).

(d) Deadline.—The study required by subsection (a), along with recommendations by the Office of Technology Assessment, including any policy options for legislative action, shall be submitted to the President and the Congress within 36 months after the date of enactment of this Act. If the President, after reviewing the study, determines that compliance with the requirements of section 304(a) on or before the applicable deadlines specified in section 304(b)(4) will result in a significant reduction in intercity bus service, each such deadline shall be extended by one additional year.

(e) Review.—In developing the study required by subsection (a), the Office of Technology Assessment shall provide a preliminary draft of such study to the Architectural and Transportation Barriers Compliance Board established under section 502 of the Rehabilitation Act of 1973 (29 U.S.C. 792). The Board shall have an opportunity to comment on such draft study, and any such comments by the Board made in writing within 120 days after the Board's receipt of the draft study shall be incorporated as part of the final study required to be submitted under subsection (d).

SEC. 306. REGULATIONS.

(a) Accessibility Standards.—Not later than 1 year after the date of enactment of this Act, the Secretary of Transportation shall issue regulations in an accessible format that shall include standards applicable to facilities and vehicles covered under section 302(b)(2) (B) and (C) and section 304.

(b) Other Provisions.—Not later than 1 year after the date of enactment of this Act, the Attorney General shall issue regulations in an accessible format to carry out the remaining provisions of this title not referred to in subsection (a) that include standards applicable to facilities and vehicles covered under section 302.

(c) Standards.—Standards included in regulations issued under subsections (a) and (b) shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504.

(d) Interim Accessibility Standards.—Prior to the issuance of final regulations under this section, compliance with the current Uniform Federal Accessibility Standards shall suffice to satisfy the requirements that facilities be readily accessible to and usable by persons with disabilities as required under sections 302(b)(2)(A)(vi) and 303, except that, if such final regulations have not been issued one year after the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines required under section 306(a), compliance with such supplemental minimum guidelines shall be necessary to satisfy the requirement that facilities be readily accessible to and usable by persons with disabilities prior to issuance of the final regulations.

SEC. 307. EXEMPTIONS FOR PRIVATE CLUBS AND RELIGIOUS ORGANIZATIONS.

The provisions of this title shall not apply to private clubs or establishments exempted from coverage under title II of the Civil Rights Act of 1964 (42 U.S.C. 2000-a(e)) or to religious organizations or entities controlled by religious organizations, including places of worship.

SEC. 308. ENFORCEMENT.

(a) In General.—

(1) Availability of remedies and procedures.—The remedies and procedures set forth in section 204 of the Civil Rights Act of 1964 (42 U.S.C. sec. 2000a-3(a)) shall be available to any individual who is being or has reasonable grounds for believing that he or she is about to be subjected to discrimination on the basis of disability in violation of this title.

(2) Injunctive relief.—In the case of violations of section 302(b)(2)(A)(iv) and (vi) and section 303(a), injunctive relief shall include an order to alter facilities to make such facilities readily accessible to and usable by individuals with disabilities to the extent required by this title. Where appropriate, injunctive relief shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by this title.

(b) Enforcement by the Attorney General.—

(1) Denial of rights.—

(A) Duty to investigate.—

(i) In general.—The Attorney General shall investigate alleged violations of this title, which shall include undertaking periodic reviews of compliance of covered entities under this title.

(ii) Attorney general certification.—On the application of a state or local government, the Attorney General may, in consultation with the Architectural and Transportation Barriers Compliance Board, and after prior notice and a public hearing at which individuals with disabilities are provided an opportunity to testify against such certification, certify that a state law or local building code or similar ordinance that establishes accessibility requirements meets or exceeds the minimum requirements of the Act for the accessibility and usability of covered facilities under this title. At any enforcement proceeding under this section, such certification by the Attorney General shall be rebuttable evidence that such state law or local ordinance does meet or exceed the minimum requirements of the Act.

(B) Potential violation.—If the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of resistance to the full enjoyment of any of the rights granted by this title or that any person or group of persons has been denied any of the rights granted by such title, and such denial raises an issue of general public importance, the Attorney General may commence a civil action in any appropriate United States district court.

(2) Authority of court.—In a civil action under paragraph (1), the court—

(A) may grant any equitable relief that such court considers to be appropriate, including granting temporary, preliminary, or permanent relief, providing an auxiliary aid or service, modification of policy or alternative method, or making facilities readily accessible to and usable by individuals with disabilities, to the extent required by this title;

(B) may award such other relief as the court considers to be appropriate, including monetary damages to persons aggrieved when requested by the Attorney General; and

(C) may, to vindicate the public interest, assess a civil penalty against the entity in an amount—

(i) not exceeding $50,000 for a first violation; and

(ii) not exceeding $100,000 for any subsequent violation.

(3) In counting the number of previous determinations of violations for purposes of determining whether a "first" or "subsequent" violation has occurred, determinations in the same trial on liability that the covered entity has engaged in more than one discriminatory act are to be counted as a single violation.

(4) PUNITIVE DAMAGES.—For purposes of subsection (b)(2)(B), the term "monetary damages" and "such other relief" does not include punitive damages.

(5) JUDICIAL CONSIDERATION.—In a civil action under paragraph (1), the court, when considering what amount of civil penalty, if any, is appropriate, shall give consideration to any good faith effort or attempt to comply with this Act by the entity. In evaluating good faith, the court shall consider, among other factors it deems relevant, whether the entity could have reasonably anticipated the need for an appropriate type of auxiliary aid needed to accommodate the unique needs of a particular individual with a disability.

SEC. 309. EFFECTIVE DATE.

This title shall become effective 18 months after the date of enactment of this Act.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICES

SEC. 401. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

(a) TELECOMMUNICATIONS.—Title II of the Communications Act of 1934 (47 U.S.C. 201 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 225. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

"(a) DEFINITIONS.—As used in this section—

"(1) COMMON CARRIER OR CARRIER.—The term 'common carrier' or 'carrier' includes any common carrier engaged in interstate communication by wire or radio as defined in section 3(h), any common carrier engaged in intrastate communication by wire or radio, and any common carrier engaged in both interstate and intrastate communication, notwithstanding sections 2(b) and 221(b).

"(2) TDD.—The term 'TDD' means a Telecommunications Device for the Deaf, which is a machine that employs graphic communication in the transmission of coded signals through a wire or radio communication system.

"(3) TELECOMMUNICATIONS RELAY SERVICES.—The term 'telecommunications relay services' means telephone transmission services that provide the ability for an individual who has a hearing impairment or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses a TDD or other nonvoice terminal device and an individual who does not use such a device.

"(b) AVAILABILITY OF TELECOMMUNICATIONS RELAY SERVICES.—

"(1) IN GENERAL.—In order to carry out the purposes established under section 1, to make available to all individuals in the United States a rapid, efficient nationwide communication service, and to increase the utility of the telephone system of the Nation, the Commission shall ensure that interstate and intrastate telecommunications relay services are available, to the extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals in the United States.

"(2) REMEDIES.—For purposes of this section, the same remedies, procedures, rights, and obligations under this Act that are applicable to common carriers engaged in interstate communication by wire or radio are also applicable to common carriers engaged in intrastate communication by wire or radio and common carriers engaged in both interstate and intrastate communication by wire or radio.

"(c) Provision of Services.—Each common carrier providing telephone voice transmission services shall provide telecommunications relay services individually, through designees, or in concert with other carriers not later than 3 years after the date of enactment of this section.

"(d) Regulations.—

"(1) In general.—The Commission shall, not later than 1 year after the date of enactment of this section, prescribe regulations to implement this section, including regulations that—

"(A) establish functional requirements, guidelines, and operations procedures for telecommunications relay services;

"(B) establish minimum standards that shall be met by common carriers in carrying out subsection (c);

"(C) require that telecommunications relay services operate every day for 24 hours per day;

"(D) require that users of telecommunications relay services pay rates no greater than the rates paid for functionally equivalent voice communication services with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination;

"(E) prohibit relay operators from refusing calls or limiting the length of calls that use telecommunications relay services;

"(F) prohibit relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of the call; and

"(G) prohibit relay operators from intentionally altering a relayed conversation.

"(2) Technology.—The Commission shall ensure that regulations prescribed to implement this section encourage the use of existing technology and do not discourage or impair the development of improved technology.

"(3) Jurisdictional separation of costs.—

"(A) In general.—The Commission shall prescribe regulations governing the jurisdictional separation of costs for the services provided pursuant to this section.

"(B) Recovering costs.—Such regulations shall generally provide that costs caused by interstate telecommunications relay services shall be recovered from the interstate jurisdiction and costs caused by intrastate telecommunications relay services shall be recovered from the intrastate jurisdiction.

"(C) Joint provision of services.—To the extent interstate and intrastate common carriers jointly provide telecommunications relay services, the procedures established in section 410 shall be followed, as applicable.

"(4) Fixed monthly charge.—The Commission shall not permit carriers to impose a fixed monthly charge on residential customers to recover the costs of providing interstate telecommunication relay services.

"(5) Undue burden.—If the Commission finds that full compliance with the requirements of this section would unduly burden one or more common carriers, the Commission may extend the date for full compliance by such carrier for a period not to exceed 1 additional year.

"(e) Enforcement.—

"(1) In general.—Subject to subsections (f) and (g), the Commission shall enforce this section.

"(2) Complaint.—The Commission shall resolve, by final order, a complaint alleging a violation of this section within 180 days after the date such complaint is filed.

"(f) Certification.—

"(1) State documentation.—Each State may submit documentation to the Commission that describes the program of such State for implementing intrastate telecommunications relay services.

"(2) Requirements for certification.—After review of such documentation, the Commission shall certify the State program if the Commission determines that the program makes available to hearing-impaired and speech-impaired individuals either directly, through designees, or through regulation of intrastate common carriers, intrastate telecommunications relay services in such State in a manner that meets the requirements of regulations prescribed by the Commission under subsection (d).

"(3) Method of funding.—Except as provided in subsection (d), the Commission shall not refuse to certify a State program based solely on the method such State will implement for funding intrastate telecommunication relay services.

"(4) **Suspension or revocation of certification.**—The Commission may suspend or revoke such certification if, after notice and opportunity for hearing, the Commission determines that such certification is no longer warranted.

"(g) **Complaint.**—

"(1) **Referral of complaint.**—If a complaint to the Commission alleges a violation of this section with respect to intrastate telecommunications relay services within a State and certification of the program of such State under subsection (f) is in effect, the Commission shall refer such complaint to such State.

"(2) **Jurisdiction of commission.**—After referring a complaint to a State under paragraph (1), the Commission shall exercise jurisdiction over such complaint only if—

"(A) final action under such State program has not been taken on such complaint by such State—

"(i) within 180 days after the complaint is filed with such State; or

"(ii) within a shorter period as prescribed by the regulations of such State; or

"(B) the Commission determines that such State program is no longer qualified for certification under subsection (f).".

(b) **Conforming Amendments.**—The Communications Act of 1934 (47 U.S.C. 151 et seq.) is amended—

(1) in section 2(b) (47 U.S.C. 152(b)), by striking "section 223 or 224" and inserting "sections 223, 224, and 225"; and

(2) in section 221(b) (47 U.S.C. 221(b)), by striking "section 301" and inserting "sections 225 and 301".

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. CONSTRUCTION.

(a) **Rehabilitation Act of 1973.**—Nothing in this Act shall be construed to reduce the scope of coverage or apply a lesser standard than the coverage required or the standards applied under title V of the Rehabilitation Act of 1973 (29 U.S.C. 790 et seq.) or the regulations issued by Federal agencies pursuant to such title.

(b) **Other Laws.**—Nothing in this Act shall be construed to invalidate or limit any other Federal law or law of any State or political subdivision of any State or jurisdiction that provides greater or equal protection for the rights of individuals with disabilities than are afforded by this Act.

(c) **Insurance.**—Titles I through IV of this Act shall not be construed to prohibit or restrict—

(1) an insurer, hospital or medical service company, health maintenance organization, or any agent, or entity that administers benefit plans, or similar organizations from underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

(2) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that are based on underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law;

(3) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that is not subject to State laws that regulate insurance:

Provided, That paragraphs (1), (2), and (3) are not used as a subterfuge to evade the purposes of title I and III.

SEC. 502. PROHIBITION AGAINST RETALIATION AND COERCION.

(a) **Retaliation.**—No individual shall discriminate against any other individual because such other individual has opposed any act or practice made unlawful by this Act or because such other individual made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this Act.

(b) **Interference, Coercion, or Intimidation.**—It shall be unlawful to coerce, intimidate, threaten, or interfere with any person in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other person in the exercise or enjoyment of, any right granted or protected by this Act.

(c) **Remedies and Procedures.**—The remedies and procedures available under sections 107, 205, and 308 of this Act shall be available to aggrieved persons for violations of subsections (a) and (b).

SEC. 503. STATE IMMUNITY.

A State shall not be immune under the eleventh amendment to the Constitution of the United States from an action in Federal court for a violation of this Act. In any action against a State for a violation of the requirements of this Act, remedies (including remedies both at law and in equity) are available for such a violation to the same extent as such remedies are available for such a violation in an action against any public or private entity other than a State.

SEC. 504. REGULATIONS BY THE ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD.

(a) ISSUANCE OF GUIDELINES.—Not later than 6 months after the date of enactment of this Act, the Architectural and Transportation Barriers Compliance Board shall issue minimum guidelines that shall supplement the existing Minimum Guidelines and Requirements for Accessible Design for purposes of titles II and III.

(b) CONTENTS OF GUIDELINES.—The guidelines issued under subsection (a) shall establish additional requirements, consistent with this Act, to ensure that buildings, facilities, and vehicles are accessible, in terms of architecture and design, transportation, and communication, to individuals with disabilities.

(c) QUALIFIED HISTORIC PROPERTIES.—(i) The guidelines issued under subsection (a) shall include guidelines and requirements for alterations that will threaten or destroy the historic significance of qualified historic buildings and facilities as defined in the Uniform Federal Accessibility Standards 4. 1. 7(1)(a).

(ii) Regarding alterations of buildings or facilities that are covered by the requirements of Section 106 of the National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470 and 36 CFR Part 800, the guidelines issued under paragraph (i) shall, at a minimum, maintain the procedures and standards established in the Uniform Federal Accessibility Standards 4. 1. 7(1) and (2).

(iii) Regarding alterations of qualified historic buildings designated as historic under a statute of the appropriate state or local government body, the guidelines issued under paragraph (i) shall establish procedures equivalent to those established by the Uniform Federal Accessibility Standards 4. 1. 7(1)(b) and (c), and shall require, at a minimum, compliance with the minimum requirements established in Uniform Federal Accessibility Standards 4. 1. 7(2).

SEC. 505. ATTORNEY'S FEES.

In any action or administrative proceeding commenced pursuant to this Act, the court or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

SEC. 506. TECHNICAL ASSISTANCE.

(a) PLAN FOR ASSISTANCE.—

(1) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Attorney General, in consultation with the Chairman of the Equal Employment Opportunity Commission, the Secretary of Transportation, the National Council on Disability, the Chairperson of the Architectural and Transportation Barriers Compliance Board, and the Chairman of Federal Communications Commission, shall develop a plan to assist entities covered under this Act, along with other executive agencies and commissions, in understanding the responsibility of such entities, agencies, and commissions under this Act.

(2) PUBLICATION OF PLAN.—The Attorney General shall publish the plan referred to in paragraph (1) for public comment in accordance with the Administrative Procedure Act (5 U.S.C. 551 et seq.).

(b) AGENCY AND PUBLIC ASSISTANCE.—The Attorney General is authorized to obtain the assistance of other Federal agencies in carrying out subsection (a), including the National Council on Disability, the President's Committee on Employment of People with Disabilities, the Small Business Administration, and the Department of Commerce.

(c) IMPLEMENTATION.—

(1) AUTHORITY TO CONTRACT.—Each department or agency that has responsibility for implementing this Act may render technical assistance to individuals and institutions that have rights or responsibilities under this Act.

(2) IMPLEMENTATION OF TITLES.—

(A) TITLE I.—The Equal Employment Opportunity Commission and the Attorney General shall implement the plan for assistance, as described in subsection (a), for title I.

(B) TITLE II.—

(i) In general.—Except as provided for in clause (ii), the Attorney General shall implement such plan for assistance for title II.

(ii) Exception.—The Secretary of Transportation shall implement such plan for assistance for section 203.

(C) Title III.—The Attorney General, in coordination with the Secretary of Transportation and the Chairperson of the Architectural Transportation Barriers Compliance Board, shall implement such plan for assistance for title III.

(D) Title IV.—The Chairman of the Federal Communications Commission, in coordination with the Attorney General, shall implement such plan for assistance for title IV.

(3) Technical assistance manuals.—Each department or agency as part of its implementation responsibilities, shall ensure the availability and provision of appropriate technical assistance manuals to individuals or entities with rights or responsibilities under this Act, no later than six months after applicable final regulations are published for titles I, II, III, and IV of this Act.

(d) Grants and Contracts.—

(1) In general.—Each department and agency having responsibility for implementing this Act may make grants or enter into contracts with individuals, profit institutions, and nonprofit institutions, including educational institutions and groups or associations representing individuals who have rights or duties under this Act, to effectuate the purposes of this Act.

(2) Dissemination of information.—Such grants and contracts, among other uses, may be designed to ensure wide dissemination of information about the rights and duties established by this Act and to provide information and technical assistance about techniques for effective compliance with this Act.

(e) Failure to Receive Assistance.—An employer, public accommodation, or other entity covered under this Act shall not be excused from meeting the requirements of this Act because of any failure to receive technical assistance under this section, including any failure in the development or dissemination of any technical assistance manual authorized by this section.

SEC. 507. FEDERAL WILDERNESS AREAS.

(a) Study.—The National Council on Disability shall conduct a study and report on the effect that wilderness designations and wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System as established under the Wilderness Act (16 U.S.C. 1131 et seq.).

(b) Submission of Report.—Not later than 1 year after the enactment of this Act, the National Council on Disability shall submit the report required under subsection (a) to Congress.

SEC. 508. TRANSVESTITES.

For the purposes of this Act, the term "disabled" or "disability" shall not apply to an individual solely because that individual is a transvestite.

SEC. 509. CONGRESSIONAL INCLUSION.

(a) In General.—Notwithstanding any other provision of this Act or of law, the provisions of this Act shall, subject to subsection (b), apply in their entirety to the Senate, the House of Representatives, and all the instrumentalities of the Congress, or either House thereof.

(b) House Employees.—

(1) In general.—The rights and protections under this Act shall apply with respect to any employee in an employment position in the House of Representatives and any employing authority of the House of Representatives.

(2) Administration.—In the administration of this subsection, the remedies and procedures under the Fair Employment Practices Resolution shall be applied. As used in this paragraph, the term "Fair Employment Practices Resolution" means House Resolution 558, One Hundredth Congress, agreed to October 4, 1988, as continued in effect by House Resolution 15, One Hundred First Congress, agreed to January 3, 1989.

SEC. 510. ILLEGAL DRUG USE.

(a) For purposes of this Act, an individual with a disability does not include an individual who is a current user of illegal drugs, when the covered entity acts on the basis of such use.

(b) Nothing in subsection (a) shall be construed to exclude as an individual with a disability an individual who (i) has successfully completed a supervised drug rehabilitation program and is no longer using illegal drugs, or has otherwise been rehabilitated successfully and is no longer using illegal drugs, or (ii) is participating in a supervised rehabilitation program and is no longer using illegal drugs, or (iii) is erroneously regarded as being an illegal drug user but is not using illegal drugs. Provided that it shall not be a violation of this Act for a covered entity to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual defined in this paragraph is no longer using illegal drugs.

(c) Notwithstanding subsection (a) and section 511(d), an individual shall not be denied health or social services on the basis of his or her current use of illegal drugs if he or she is otherwise entitled to such services.

SEC. 511. DEFINITIONS.

Under this Act, the term "disability" does not include—

(a) homosexuality or bisexuality;

(b) transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments or other sexual behavior disorders;

(c) compulsive gambling, kleptomania, or pyromania; or

(d) psychoactive substance use disorders resulting from current use of illegal drugs.

SEC. 512. AMENDMENTS TO THE REHABILITATION ACT.

(a) Definition of Handicapped Individual.—Section 7(8) of the Rehabilitation Act of 1973 (29 U.S.C. 706(8)) is amended by redesignating subparagraph (C) as subparagraph (D), and by inserting after subparagraph (B) the following subparagraph:

"(C)(i) For purposes of title V, the term 'individual with handicaps' does not include an individual who is a current user of illegal drugs, when a recipient acts on the basis of such use.

"(ii) Nothing in clause (i) shall be construed to exclude as an individual with handicaps an individual who—

"(I) has successfully completed a supervised drug rehabilitation program and is no longer using illegal drugs, or has otherwise been rehabilitated successfully and is no longer using illegal drugs;

"(II) is participating in a supervised rehabilitation program and is no longer using illegal drugs; or

"(III) is erroneously regarded as being an illegal drug user but is not using illegal drugs;

except that it shall not be a violation of this Act for a recipient to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual with handicaps is no longer using illegal drugs.

"(iii) Notwithstanding clause (i), for purposes of programs and activities providing health services and services provided under titles I, II and III, an individual shall not be excluded from the benefits of such programs or activities on the basis of his or her current use of illegal drugs if he or she is otherwise entitled to such services.

"(iv) For purposes of programs and activities providing educational services, local educational agencies may take disciplinary action pertaining to the use or possession of illegal drugs or alcohol against any handicapped student who currently uses illegal drugs or alcohol to the same extent that such disciplinary action is taken against nonhandicapped students. Furthermore, the due process procedures at 34 CFR 104.36 shall not apply to such disciplinary actions.

"(v) For purposes of sections 503 and 504 as such sections relate to employment, the term 'individual with handicaps' does not include any individual who is an alcoholic whose current use of alcohol prevents such individual from performing the duties of the job in question or whose employment, by reason of such current alcohol abuse, would constitute a direct threat to property or the safety of others.".

(b) Definition of Illegal Drugs.—Section 7 of the Rehabilitation Act of 1973 (29 U.S.C. 706) is amended by adding at the end the following new paragraph:

"(22) The term 'illegal drugs' means controlled substances, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812), the possession or distribution of which is unlawful under such Act. Such term does not mean the use of a controlled substance taken under supervision by a licensed health professional or other uses authorized by the Controlled Substances Act or other provisions of Federal law.".

(c) Conforming Amendments.—Section 7(8)(B) of the Rehabilitation Act of 1973 (29 U.S.C. 706(8)(B)) is amended—

(1) in the first sentence, by striking "Subject to the second sentence of this subparagraph," and inserting "Subject to subparagraphs (C) and (D),"; and

(2) by striking the second sentence.

SEC. 513. SEVERABILITY.

Should any provision in this Act be found to be unconstitutional by a court of law, such provision shall be severed from the remainder of the Act, and such action shall not affect the enforceability of the remaining provisions of the Act.

I. INTRODUCTION

On November 14, 1989, the Committee on Education and Labor, by a vote of 35–0, ordered favorably reported H.R. 2273, the Americans with Disabilities Act of 1989 (the ADA), with an amendment in the nature of a substitute.

The bill is sponsored by former Congressman Tony Coelho and cosponsored by Representatives Hoyer, Fish, Hawkins, Conte, Owens of New York, Ackerman, Atkins, Beilenson, Bennett, Borski, Bosco, Boxer, Campbell of California, Cardin, Clay, Crockett, de Lugo, Donnelly, Dwyer, Dymally, Edwards of California, Fazio, Feighan, Frank, Frost, Fuster, Gejdenson, Gordon, Hayes of Illinois, Hutto, Jacobs, Jontz, Kastenmeier, Kleczka, Levin, Lewis of Georgia, Manton, Matsui, McCloskey, McDermott, McHugh, Mfume, Miller of California, Mineta, Morella, Oberstar, Pallone, Pelosi, Richardson, Rowland of Connecticut, Schneider, Shays, Smith of Vermont, Solarz, Studds, Traxler, Udall, Vento, Waxman, Weiss, Wise, Wolpe, Florio, Williams, Roybal, Morrison of Connecticut, Brown of California, Dellums, Sabo, Espy, Dixon, Miller of Washington, Young of Alaska, Foglietta, Rangel, Garcia, Saiki, Martinez, Mavroules, Conyers, Markey, Visclosky, Kildee, Collins, Towns, Kennelly, Gray, Wheat, Gephardt, Levine, Ford of Tennessee, Rahall, Akaka, Moakley, Lantos, Sawyer, McNulty, Brennan, Downey, Guarini, Yates, Gilman, Lehman, Frenzel, Unsoeld, Bryant, Boehlert, Owens of Utah, Dicks, Machtley, Schroeder, Bonior, Carper, Kennedy, Lehman of California, Durbin, Coyne, Walgren, Horton, Kolter, Berman, Bilbray, Boucher, Gonzalez, Engel, AuCoin, Fauntroy, Mrazek, Ford of Michigan, Stokes, Boggs, Lipinski, Bustamante, Hall of Ohio, Dorgan, Volkmer, Walsh, Kaptur, Poshard, Neal of Massachusetts, Roe, Derrick, Jones of Georgia, Savage, Bates, Hertel, Torricelli, Jones of North Carolina, Panetta, Ravenel, Traficant, Oakar, DeFazio, Fascell, Payne of New Jersey, Ridge, Sikorski, Stark, Torres, Hughes, Byron, Smith of Florida, Hochbrueckner, Wilson, Leland, Slaughter of New York, Costello, Evans, Darden, Skaggs, Yatron, Sangmeister, Jenkins, Johnson of South Dakota, Green, Dyson, Clement, Slattery, Kostmayer, Nowak, Scheuer, Carr, Hamilton, McMillen, Swift, Flake, Hubbard, Coleman of Texas, Chapman, Eckart, Regula, Long, Early, Rose, Tallon, Bevill, Lowey, Gibbons, Wyden, Neal of North Carolina, Sharp, Campbell of Colorado, Hoagland, Andrews, Annunzio, Aspin, Murphy, Glickman, Perkins, Skelton, Weber, Johnson of Connecticut, Rowland of Georgia, Price, Gunderson, Staggers, Porter, Leach, Anderson, Nagle, Pickle, Davis, Spratt, Bruce, Hyde, Leath of Texas, Mollohan, and Nelson of Florida.

II. SUMMARY OF THE LEGISLATION

The purpose of the ADA is to provide a clear and comprehensive national mandate to end discrimination against individuals with disabilities and to bring persons with disabilities into the economic and social mainstream of American life; to provide enforceable standards addressing discrimination against individuals with disabilities, and to ensure that the Federal government plays a central role in enforcing these standards on behalf of individuals with disabilities.

The ADA defines "disability" to mean, with respect to an individual: a physical or mental impairment that substantially limits one or more of the major life activities of such individual, a record of such an impairment, or being regarded as having such an impairment.

Title I of the ADA specifies that an employer, employment agency, labor organization, or joint labor-management committee may not discriminate against any qualified individual with a disability in regard to any term, condition or privilege of employment. The ADA incorporates many of the standards of discrimination set out in regulations implementing section 504 of the Rehabilitation Act of 1973, including the obligation to provide reasonable accommodations unless it would result in an undue hardship on the operation of the business.

The ADA incorporates by reference the enforcement provisions under title VII of the Civil Rights Act of 1964 (including injunctive relief and back pay). Title I goes into effect two years after the date of enactment. For the first two years after the effective date, employers with 25 or more employees are covered. Thereafter, employers with 15 or more employees are covered.

Title II of the ADA specifies that no qualified individual with a disability may be discriminated against by a department, agency, special purpose district, or other instrumentality of a State or a local government. In addition to a general prohibition against discrimination, title II includes specific requirements applicable to public transportation provided by public transit authorities. Finally, title II incorporates by reference the enforcement provisions in section 505 of the Rehabilitation Act of 1973.

With respect to public transportation, all new fixed routine buses must be made accessible unless a transit authority can demonstrate that no lifts are available from qualified manufacturers. A public transit authority must also provide paratransit for those individuals who cannot use mainline accessible transportation up to the point where the provision of such supplementary services would pose an undue financial burden on a transit authority.

Title II takes effect 18 months after the date of enactment, with the exception of the obligation to ensure that new public buses are accessible, which takes effect for solicitations made 30 days after the date of enactment.

Title III of the ADA specifies that no individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation operated by a private entity. Public accommodations include: restaurants, hotels, doctors' offices, pharmacies, grocery stores, shopping centers, and other similar establishments.

Existing facilities must be made accessible if the changes are "readily achievable", i.e., easily accomplishable without much difficulty or expense. Auxiliary aids and services must be provided unless such provision would fundamentally alter the nature of the program or cause an undue burden. New construction and major renovations must be designed and constructed to be readily accessible to and usable by people with disabilities. Elevators need not be installed if the building has less than three stories or has less than 3,000 square feet per floor except if the building is a shopping center, shopping mall, offices for health care providers or if the Attorney General decides that other categories of buildings require the installation of elevators.

Title III also includes specific prohibitions on discrimination in public transportation services provided by private entities, including the failure to make new over-the-road buses accessible six years from the date of enactment for large providers and seven years for small providers.

The provisions of title III become effective 18 months after the date of enactment. Title III incorporates enforcement provisions in private actions comparable to the applicable enforcement provisions in title II of the Civil Rights Act of 1964 (injunctive relief) and provides for pattern and practice cases by the Attorney General, including authority to seek monetary damages and civil penalties.

Title IV of the ADA specifies that telephone services offered to the general public must include interstate and intrastate telecommunication relay services so that such services provide individuals who use nonvoice terminal devices because of disabilities (such as deaf persons) with opportunities for communications that are equivalent to those provided to individuals able to use voice telephone services.

Title V of the ADA includes miscellaneous provisions, including a construction clause explaining the relationship between the provisions in the ADA and the provisions in other Federal and State laws; a construction clause explaining that the ADA does not disrupt the current nature of insurance underwriting when based on valid classification of risk; a prohibition against retaliation; a clear statement that States are not immune from actions in Federal court for a violation of the ADA; a directive to the Architectural and Transportation Barriers Compliance Board to issue guidelines; authority to award attorney's fees, litigation expenses and costs; a requirement for the provision of technical assistance from the Federal agencies responsible for the different sections of this Act; a provision for a study of the effect of Federal wilderness designations on the usage of such areas by persons with disabilities; certain limitations on the definition of disability; an amendment to the Rehabilitation Act of 1973; provisions concerning illegal drug use; and the application of the protections of this Act to the Congress and all of its instrumentalities.

III. HEARINGS

Hearings were held before the Subcommittee on Select Education and the Subcommittee on Employment Opportunities on legislation to establish a clear and comprehensive prohibition of discrimination on the basis of disability on September 27 and October 24, 1988, and July 18, August 28, September 13, and October 6, 1989.

Hearing witnesses whose names are listed henceforth with no designated affiliation are people with disabilities.

On September 27, 1988, a joint hearing was held in Washington, D.C., before the Subcommittee on Select Education and the Senate Subcommittee on the Handicapped on H.R. 4498 and S. 2345, the Americans with Disabilities Act of 1988. Among the witnesses testifying were: Sandra Parrino, Chairperson, National Council on the Handicapped; Admiral James Watkins, Chairperson, President's Commission on the Human Immunodeficiency Virus Epidemic; Mary Linden of Morton Grove, Illinois who lived in an institution; Dan Piper, an 18 year old with Down Syndrome and Sylvia Piper of Ankeny, Iowa; Jade Calegory, a 12 year old movie actor with Spina Bifida from Corona Del Mar, California; and Lakisha Griffin from Talladega, Alabama, who attends the Alabama School for the Blind.

Also testifying were: Judith Heumann, World Institute on Disability, Berkeley, California; Gregory Hlibok, student body president of Gallaudet University, Washington, D.C.; Belinda Mason from Tobinsport, Indiana who has AIDS; and W. Mitchell from Denver, Colorado, who uses a wheelchair and who was severely burned.

David Saks, on behalf of the Organization for Use of the Telephone, Baltimore, Maryland, also provided testimony.

On October 24, 1988, at the Lafayette Hotel in Boston, Massachusetts, the Subcommittee on Select Education held a hearing on H.R. 4498, the Americans with Disabilities Act of 1989. The Subcommittee heard testimony from the following witnesses from six New England states: Ray Atkinson, Center for Independent Living and Working; Elmer Bartels, Commissioner, Massachusetts Rehabilitation Commission; Robert E. Baton, Greater Hartford Advocates for Change; Lelia Batten, Portland Coalition for Psychiatrically Labeled; Ken Beachman.

Also testifying were: Nancy Blackmoor, Harvard Dyslexia Society; Eleanor Blake, Sarah Bloor; James Broks, Disability Law Center; Philip Campbell, Association for Retarded Citizens of Massachusetts; Joseph Caudre, AIDS Advisory Board, State of Massachusetts; William Cavanaugh, Ad Lib, Inc.; Matthew Chao, Bay State Council for the Blind; Stephen Cohen; Charles Crawford, Massachusetts Commission for the Blind.

Also testifying were: Justin W. Dart, Jr., Chairperson, Task Force on the Rights and Empowerment of Americans with Disabilities; Speed Davis, Massachusetts Office of Handicapped Affairs; Patricia Deegan, Northeast Independent Living Center; Virginia Domini, Independence Unlimited; Bill Dorfer; Susan Downie; Ilona Durkin; Nancy Durkin, CILSC; Neil Eichorn; Larry Espling; Eugenia Evans; William Fennessee; Tim Foley; Sandy Gorski.

Also testifying were: Eric Griffin, vice president, external affairs, National Council on Independent Living; Lind Hanscom, Americans Disabled for Accessible Public Transportation; Edith Harris, Volunteers Disabilities Network of Eastern Connecticut, Inc.; Jen Healy, Deaf-Blind Contact Center; Lynda Hoffman; Eileen Healy Horndt, Independence Northwest; Nancy Husted-Jensen, Governor's Commission on the Handicapped; Barbara Johnson.

Also testifying were: Jerry Johnson, Names Project New England; Philip Johnston, Massachusetts Office of Human Services; Cindy Kappe; Denise Karuth, Massachusetts Coalition of Citizens with Disabilities; Ted Kennedy, Jr.; Bill Knight, Greater Waterbury Consumer Action Forum; Stanley Koslowski, Connecticut Office of Protection and Advocacy; Janet Kyricos; Shellie Lemelin; Marilyn Levin, Massachusetts Department of Mental Health; Donald Levine, Barry Independent Living Association; Ruth Long, Vermont Center for Independent Living.

Also testifying were: Lisa Lyons; Joseph Mallen; Cathie Marshall; Melissa Marshall, Disabilities Network of Eastern Connecticut; Mary McCarthy, Massachusetts Department of Mental Retardation; Cindy Miller; Linda Mills, Kathleen Mulligan; Peter Myette, Mayor's Commission on People with Disabilities, Boston; John Nelson; Emeka Nwojke, Northeast Independent Living Program; Bonnie O'Day, Independence Center of Hampton Roads, VA; Michael Oestreicher, Challenges Unlimited; Patrick Palotto, Bridgeport Telegram; Linda Pelletier; Ed Preneta, Connecticut Developmental Disabilities Office.

Also testifying were: Marilyn Price-Spivack, National Head Injury Foundation; Julie Reisken, Connecticut Coalition of Citizens with Disabilities; Judy Rogers; Marcie Roth, We Care; Charles Sabatier; Eleanor Smith; Robert St. Larent; Rima Sutton, National Multiple Sclerosis Society; Shelley Teed-Wargo, Connecticut Union of Disability Action Groups; Ellen Telker; Larry Urban, Renaissance Club; Diana Viet, Massachusetts Office of Handicapped Affairs; Barbara Waters; Alan Wein; Bill Williams; Laurie Williams; Barbara Wood-Johnson, Massachusetts Commission for the Deaf and Hard of Hearing; Paul Zapan, Independence Unlimited.

On July 18, 1989, in Washington, D.C., the Subcommittee on Select Education and the Subcommittee on Employment Opportunities heard testimony from: the Reverend Jesse Jackson; Representative Donald M. Payne, testifying for the Congressional Black Caucus; Justin Dart, Jr., Chairman, Task Force on the Rights and Empowerment of Americans with Disabilities; Joseph Rauh and Chai R. Feldblum, Leadership Conference on Civil Rights; Sandra Parrino, Chairperson, National Council on Disability; Brother Philip Nelan, National Restaurant Association.

On August 28, 1989, at the Metropolitan Multiservice Center, Houston, Texas, the Subcommittee on Select Education heard testimony from: Kathryn J. Whitmire, Mayor, City of Houston; Nikki Van Hightower, Treasurer, Harris County; Melody Ellis, President, Board of Education, Houston Independent School District; Judith Comfort, Division Manager, External Affairs, Southwestern Bell Telephone Company; Robert C. Lanier, Chairman Metropolitan Transit Authority of Harris County and President, Landar Corporation; Howard Wolf, Chairman of the Board of Trustees of the Institute for Rehabilitation and Research, Houston, Texas, and partner, Fulbright & Jaworski; Honorable Ashley Smith, Texas House of Representatives; Honorable Chet Brooks, Texas State Senate.

On September 13, 1989, in Washington, D.C., the Subcommittee on Select Education and the Subcommittee on Employment Opportunities heard testimony from: Evan Kemp, Commissioner, Equal Employment Opportunities Commission; Jay Rochlin, Executive Director, President's Committee on Employment of People with Disabilities; Arlene Mayerson, Directing Attorney, Disability Rights Education and Defense Fund; Mark Donovan, Manager, Community Employment and Training Programs, Marriott Corporation; Duane Rasmussen, President, Sell Publishing Company; Paul Wharen, Project Manager, Thomas P. Harkins, Inc.

On October 6, 1989, at University Place Conference Center, Indianapolis, Indiana, the Subcommittee on Select Education heard testimony from: Greg Fehribach, Chairman, Indiana Governor's Council on People with Disabilities and attorney, Timmons, Endsley, Chavis, Baker and Lewis; Barry Chambers, Commissioner, Indiana Department of Human Services; Deanna Durrett for Joseph Reum, Indiana Department of Mental Health; Muriel Lee, Governor's Planning Council for Persons with Disabilities; Jack Lewis, Professor of Sociology and Social Work, Anderson University, Indiana; David Reynolds, Indiana School for the Deaf, Janna Shishler, law clerk for United States Magistrate John Paul Godich.

Also testifying were Nanette Bowling, Staff Liaison to the Mayor's Advisory Council for Handicapped Individuals, Office of Mayor Bob Sargent, Kokomo, Indiana; John Turney, Member, Mayor's Advisory Council for Handicapped Individuals, Kokomo, Indiana; Michael Williams, Vice President for Ancillary Services, St. Joseph's Hospital, Kokomo, Indiana, Kokomo Employer of the Year; Rick Edwards, Program Consultant, Indiana Office of Vocational Rehabilitation; Jeff Myers, former Police Officer, Indianapolis; Marchell Hunt, Chairperson, Common Concerns, the Disability Advocacy Organization; David Scott, Indianapolis Resource Center for Independent Living; Gary May, Commissioner, Indiana Department of Veterans' Affairs.

In order to gather information on the extent and nature of disability discrimination in America, Major R. Owens, Chairman of the Subcommittee on Select Education established the Task Force on the Rights and Empowerment of Americans with Disabilities in May, 1988, appointing Justin Dart, Jr. as Chair. Elizabeth Boggs, cofounder, Association for Retarded Citizens of the United States was appointed as Co-Chairperson. Appointed as Coordinator was Lex Frieden, currently Executive Director of the Institute for Rehabilitation Research and former Executive Director of the National Council on the Handicapped at the time the Council recommended the enactment of ADA and drafted the initial bill.

Mr. Dart chaired 63 Task Force public forums involving people with disabilities, advocates, service providers, government officials in all 50 states, the District of Columbia and the territories. In all, an estimated 8,000 individuals attended these forums. The Task Force submitted a report to the Congress outlining its findings and recommendations.

The other distinguished members of the Task Force, who were selected in order to ensure its representativeness, were: Elmer Bartels, Massachusetts Rehabilitation Commission, Wade Blank, Atlantis Community; David Bodenstein, National Association of People with AIDS; Frank Bowe, Hofstra University; Marca Bristo Kettlewell, National Council on Independent Living; Dale Brown, President's Committee on Employment of People with Disabilities; Philip Calkins, President's Committee on Employment of People with Disabilities; David Capozzi, Project ACTION; Julie Clay, University of Montana; Susan Daniels, President's Committee on Employment of People with Disabilities; James DeJong, Illinois Coalition of Citizens with Disabilities; Eliot Dober, Office of Protection and Advocacy for Handicapped and Developmentally Disabled Persons; Don Galloway, Keith Gann, P.W. Alive; James Havel, National Alliance for the Mentally Ill; I. King Jordan, Gallaudet University; Paul Marchand, Association for Retarded Citizens; Connie Martinez, California State Council on Developmental Disabilities; Celane McWhorter, The Association for Persons with Severe Handicaps; Oral Miller, American Council of the Blind; Gary Olsen, National Association of the Deaf; Mary Jane Owen, Disability Focus; Sandra Parrino, National Council on Disability; Ed Roberts, World Institute on Disability; Joseph Rogers, National Mental Health Consumers Association; Liz Savage, Epilepsy Foundation of America; William A. Spencer, The Institute for Rehabilitation and Research; Marilyn Price Spivack, National Head Injury Foundation; Ann Vinup, Association for Children and Adults with Learning Disabilities; Sylvia Walker, Howard University; Patrisha Wright, Disability Rights Education and Defense Fund, Inc.; and Tony Young, Fairfax Opportunities Unlimited. The Committee would like also to recognize the special contributions of the volunteer support staff which included Douglas Burleigh, Yoshiko Dart, Tsuneka Gozu, Marcia Lee Nelson, Gwyneth Rochlin, Marnie Sweet, and Hisako Takei.

IV. Need for the Legislation

The Committee, after extensive review and analysis over a number of Congressional sessions, concludes that there exists a compelling need to establish a clear and comprehensive Federal prohibition of discrimination on the basis of disability in the areas of employment in the private sector, public accommodations, public services, transportation, and telecommunications.

NATURE AND EXTENT OF DISCRIMINATION ON THE BASIS OF DISABILITY IN GENERAL

Testimony presented to the Subcommittees on Select Education and Employment Opportunities, two recent reports by the National Council on Disability (*Toward Independence* (1986) and *On the Threshold of Independence* (1988)), a report by the U.S. Civil Rights Commission (*Accommodating the Spectrum of Individual Abilities* (1983)), polls taken by Louis Harris and Associates (*The ICD Survey of Disabled Americans: Bringing Disabled Americans into the Mainstream*" (March, 1986) and *The ICD Survey II: Employing Disabled Americans* (1987)), a report of the Presidential Commission on the Human Immunodeficiency Virus Epidenic (1988), and the report by the Task Force on the Rights and Empowerment of Americans with Disabilities all reach the same fundamental conclusions:

(1) historically, individuals with disabilities have been isolated and subjected to discrimination and such isolation and discrimination is still pervasive in our society;

(2) discrimination still persists in such critical areas as employment in the private sector, public accommodations, public services, transportation, and telecommunications;

(3) current Federal and State laws are inadequate to address the discrimination faced by people with disabilities in these critical areas;

(4) people with disabilities as a group occupy an inferior status socially, economically, vocationally, and educationally; and

(5) discrimination denies people with disabilities the opportunity to compete on an equal basis with others and costs the United States, State and local governments, and the private sector billions of dollars in unnecessary expenses resulting from dependency and non-productivity.

Discrimination against people with disabilities includes segregation, exclusion, or other denial of benefits, services, or opportunities to people with disabilities that are as effective and meaningful as those provided to others.

Discrimination against people with disabilities results from actions or inactions that discriminate by effect as well as by intent or design. Discrimination also includes harms resulting from the construction of transportation, architectural, and communication barriers or the adoption or application of standards, criteria, practices or procedures that are based on thoughtlessness or indifference—that discrimination resulting from benign neglect.

The testimony presented by Judith Heumann, World Institute on Disability, illustrates several of these forms of discrimination:

> When I was 5 my mother proudly pushed my wheelchair to our local public school, where I was promptly refused admission because the principal ruled that I was a fire hazard. I was forced to go into home instruction, receiving one hour of education twice a week for 3½ years. My entrance into mainstream society was blocked by discrimination and segregation. Segregation was not only on an institutional level but also acted as an obstruction to social integration. As a teenager, I could not travel with my friends on the bus because it was not accessible. At my graduation from high school, the principal attempted to prevent me from accepting an award in a ceremony on stage simply because I was in a wheelchair.
>
> When I was 19, the house mother of my college dormitory refused me admission into the dorm because I was in a wheelchair and needed assistance. When I was 21 years old, I was denied an elementary school teaching credential because of "paralysis of both lower extremities sequelae of poliomyelitis." At the time, I did not know what sequelae meant. I went to the dictionary and looked it up and found out that it was "because of." So it was obviously because of my disability that I was discriminated against.
>
> At the age of 25, I was told to leave a plane on my return trip to my job here in the U.S. Senate because I was flying without an attendant. In 1981, an attempt was made to forcibly remove me and another disabled friend

> from an auction house because we were "disgusting to look at." In 1983, a manager at a movie theater attempted to keep my disabled friend and myself out of his theater because we could not transfer out of our wheelchair.
>
> These are only a few examples of discrimination I have faced in my 40-year life. I successfully fought all of these attempted actions of discrimination through immediate aggressive confrontation or litigation. But this stigma scars for life. (Testimony before House Committee on Education and Labor and Senate Committee on Labor and Human Resources, September 27, 1988, pp. 74–75.)

Discrimination against people with disabilities also includes adverse actions taken against individuals with histories of a disability, and adverse actions taken against those regarded by others as having a disability. It also includes discrimination against persons associated with individuals with disabilities. Such discrimination often results from false presumptions, generalizations, misperceptions, patronizing attitudes, ignorance, irrational fears, and pernicious mythologies.

Discrimination also includes the effects a person's disability may have on others. For example, in March, 1988, the *Washington Post* reported the story of a New Jersey zoo keeper who refused to admit children with Down's Syndrome because he feared they would upset the chimpanzees. The Supreme Court in *Alexander* v. *Choate*, 469 U.S. 287 (1985) cited as an example of improper discrimination on the basis of handicap a case in which "a court ruled that a cerebral palsied child, who was not a physical threat and was academically competitive, should be excluded from public school, because his teacher claimed his physical appearance 'produced a nauseating effect' on his classmates." 117 Cong. Rec. 45974 (1971).

The Supreme Court in *School Board of Nassau County* v. *Arline*, 480 U.S. 273 (1987) cited remarks of Senator Mondale describing a case in which a woman "crippled by arthritis" was denied a job not because she could not do the work but because "college trustees [thought] 'normal students shouldn't see her.' " 118 Cong. Rec. 36761 (1972), quoted in *Arline*, 480 U.S. at 283 n. 9.

The Committee heard testimony about a woman from Kentucky who was fired from the job she had held for a number of years because the employer found out that her son, who had become ill with AIDS, had moved into her house so she could care for him. In that case, the women was discriminated against simply because of her association with a person with a disability. Testimony before House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, pp. 76–77.

With respect to the pervasiveness of discrimination in our nation, the National Council on Disability explained:

> A major obstacle to achieving the societal goals of equal opportunity and full participation of individuals with disabilities is the problem of discrimination . . . The severity and pervasiveness of discrimination against people with disabilities is well documented. (Appendix to *Toward Independence*, a report to the President and Congress of the

> United States by the National Council on Disability, February, 1986, p. A-3.)

The U.S. Commission on Civil Rights recently concluded, with respect to people with disabilities, that:

> Despite some improvements . . . [discrimination] persists in such critical areas as education, employment, institutionalization, medical treatment, involuntary sterilization, architectural barriers, and transportation. (U.S. Commission on Civil Rights, *Accommodating the Spectrum of Individual Abilities*, p. 159.)

The Commission further observed that "discriminatory treatment of handicapped people can occur in almost every aspect of their lives." Ibid., p. 40.

The Louis Harris polls found that:

> By almost any definition, Americans with disabilities are uniquely underprivileged and disadvantaged. They are much poorer, much less well educated and have much less social life, have fewer amenities and have a lower level of self-satisfaction than other Americans. (Testimony before Senate Subcommittee on the Handicapped by Humphrey Taylor, Louis Harris and Associates, S. Hrng. 100-166, part 2, April 28, 1987, p. 9.)

Admiral James Watkins, former chairperson of the President's Commission on the Human Immunodeficiency Virus Epidemic, testified that after 45 days of public hearings and site visits, the Commission concluded that discrimination against individuals with HIV infection is widespread and has serious repercussions for both the individual who experiences it and for this nation's efforts to control the epidemic. The Report concludes:

> As long as discrimination occurs, and no strong national policy with rapid and effective remedies against discrimination is established, individuals who are infected with HIV will be reluctant to come forward for testing, counseling, and care. This fear of potential discrimination . . . will undermine our efforts to contain the HEV epidemic and will leave HIV-infected individuals isolated and alone. (Testimony before House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, p. 40.)

Justin Dart, the chairperson of the Task Force on the Rights and Empowerment of Americans with Disabilities, testified that after 63 public forums he chaired in every state, there is overwhelming evidence that:

> Although America has recorded great progress in the area of disability during the past few decades, our society is still infected by the ancient, now almost subconscious assumption that people with disabilities are less than fully human and therefore are not fully eligible for the opportunities, services, and support systems which are available to other people as a matter of right. The result is massive, so-

ciety-wide discrimination. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-37, July 18, 1989, p. 62.)

The U.S. Attorney General, Dick Thornburgh, on behalf of President Bush has testified that:

> Despite the best efforts of all levels of government and the private sector and the tireless efforts of concerned citizens and advocates everywhere, many persons with disabilities in this Nation still lead their lives in an intolerable state of isolation and dependence. (Testimony before House Subcommittee on Civil and Constitutional Rights, Ser. No. 58, October 11, 1989, p. 191.)

EMPLOYMENT

Individuals with disabilities experience staggering levels of unemployment and poverty. According to a recent Louis Harris poll "not working" is perhaps the truest definition of what it means to be disabled in America. Two-thirds of all disabled Americans between the age of 16 and 64 are met working at all; yet, a large majority of those not working say that they want to work. Sixty-six percent of working-age disabled persons, who are not working, say that they would like to have a job. *The ICD Survey of Disabled Americans: Bringing Disabled Americans into the Mainstream*, p. 50. Translated into absolute terms, this means that about 8.2 million people with disabilities want to work but cannot find a job. *The ICD Survey of Disabled Americans: Bringing Disabled Americans into the Maintream*, pp. 47–50.

Despite the enactment of Federal legislation such as the Education for all Handicapped Children Act of 1975 and the Rehabilitation Act of 1973, a U.S. Census Bureau Report issued in July, 1989 reported the following findings:

(A) The percentage of men with a work disability working full time fell 7 percent from 20 percent in 1981 to 23 percent in 1988. U.S. Department of Commerce, Bureau of the Census, *Labor Force Status and other Characteristics of Persons with Work Disabilities: 1981-1988.* Current Population Reports, Special Studies Series P-23, No. 160, Table C, p. 4.

(B) The income of workers with disabilities dropped sharply compared to other workers. In 1980, men with disabilities earned 23 percent less than men with no work disability, and by 1988 this had dropped to 36 percent less than their counterparts. In 1980, women with disabilities earned 30 percent less than women with no disabilities, and by 1988 this had dropped to 38 percent less than their counterparts. Ibid., Table D, p. 5.

Forty percent of all adults with disabilities did not finish high school—three times more than non-disabled individuals. In 1984, fifty percent of all adults with disabilities had household incomes of $15,000 or less. Among non-disabled persons, only twenty-five percent had household incomes in this wage bracket. Ibid., p. 2.

President Bush has stated:

> The statistics consistently demonstrate that disabled people are the poorest, least educated and largest minority

> in America. (Statement of Vice President George Bush on Disabled Americans, March 31, 1988, p. 2.)

According to the Louis Harris poll, the majority of those individual with disabilities not working and out of the labor force must depend on insurance payments or government benefits for support.

Louis Harris' poll also found that large majorities of top managers (72 percent), equal opportunity officers (76 percent), and department heads/line managers (80 percent) believe that individuals with disabilities often encounter job discrimination from employers and that discrimination by employers remains an inexcusable barrier to increased employment of disabled people. *The ICD Survey II: Employing Disabled Americans*, p. 23.

According to testimony presented to the Subcommittees by Arlene Mayerson of the Disabilities Rights Education and Defense Fund, the major categories of job discrimination faced by people with disabilities include: use of standards and criteria that have the effect of denying such individuals equal job opportunities; failure to provide or make available reasonable accommodations; refusal to hire based on presumptions, stereotypes and myths about job performance, safety, insurance costs, absenteeism, and acceptance by others; placement into dead-end jobs; under-employment and lack of promotion opportunities; and use of application forms and other pre-employment inquiries that inquire about the existence of a disability rather than about the ability to perform the essential functions of a job. Testimony before the House Subcommittees on Select Education and Employment Opportunities, September 13, 1989, No. 101-51, pp. 53-73.

Several witnesses also explained that title I of the ADA (employment discrimination) is modeled after regulations implementing the Rehabilitation Act of 1973, which prohibits discrimination by recipients of Federal assistance and requires affirmative action by Federal contractors and that compliance with these laws has not been onerous.

Reasonable accommodation is a key requirement of the Rehabilitation Act and of this Act. These accommodations will be more or less expensive, depending on the need of the individual and the job.

Jay Rochlin, Executive Director of the President's Committee on Employment of People With Disabilities, testified that a 1982 study showed that a majority of accommodations provided by Federal contractors involved little or no cost. Testimony before the House Subcommittees on Select Education and Employment Opportunities, September 13, 1989, No. 101-51, p. 35. According to the President's Committee, which operates the Job Accommodation Network, some typical accommodations include:

> A timer with an indicator light which allowed a medical technican who was deaf to perform the laboratory tests required for her job;
>
> A light probe which allowed a receptionist who was visually impaired to determine which lines on a telephone were ringing, on hold, or in use at her company;
>
> A headset for a phone which allowed an insurance salesperson with cerebral palsy to write while talking.

Witnesses also explained that there will be a need for more expensive accommodations as well, including readers for blind persons, interpreters for deaf persons, and physical accommodations for those with mobility impairments. But even costs for these accommodations are frequently exaggerated. Evan Kemp, Commissioner of the Equal Employment Opportunity Commission, explained to the Committee:

> Sears and Roebuck made their whole national headquarters accessible for $7,600 with TTY's, ramps, this and that and the other thing. It is hard to believe that they could do it for that cheap a price. But if a person wants disabled people, the accommodations really don't become a burden. If they don't, they always do. (Testimony before House Subcommittees on Select Education and Employment Opportunities, September 13, 1989, No. 101-51, p. 20.)

Charles Crawford, Commissioner for the Massachusetts Commission for the Blind, stated:

> . . . I think that the application of technology for disabled persons will bring down the cost of a number of accommodations. For example, with the blind community, it is possible through microcomputer networks and braille production to produce accessible materials and with very little cost to that. (Testimony before House Subcommittee on Select Education, October 24, 1988, No. 100-109, p. 29.)

In sum, testimony indicates that the provision of various types of reasonable accommodations for individuals with various types of disabilities is essential to accomplishing the critical goal of this legislation—to allow individuals with disabilities to be part of the economic mainstream of our society.

PUBLIC ACCOMMODATIONS

Based on testimony presented at the hearings and recent national surveys and reports, it is clear that an overwhelming majority of individuals with disabilities lead isolated lives and do not frequent places of public accommodation.

The National Council on Disability summarized the findings of a recent Louis Harris poll:

> The survey results dealing with social life and leisure experiences paint a sobering picture of an isolated and secluded population of individuals with disabilities. The large majority of people with disabilities do not go to movies, do not go to the theater, do not go to see musical performances, and do not go to sports events. A substantial minority of persons with disabilities never go to a restaurant, never go to a grocery store, and never go to a church or synagogue . . . The extent of non-participation of individuals with disabilities in social and recreational activities is alarming. (National Council on Disability, *Implications for Federal Policy of the 1986 Harris Survey of Americans with Disabilities*, p. 37.)

Several witnesses addressed the obvious question: "Why don't people with disabilities frequent places of public accommodations and stores as often as other Americans?" Three major reasons were given by witnesses.

The first reason is that people with disabilities do not feel that they are welcome and can participate safely in places of public accommodation because of discriminatory actions that have occurred in the past. The second reason is fear and self-consciousness about their disabilities—also stemming from degrading and discriminatory experiences that they or their friends with disabilities have experienced in the past. The third reason is architectural, communication, and transportation barriers.

Former Senator Lowell Weicker quoted the 1986 report of the National Council on the Handicapped report *Toward Independence:*

> People with disabilities have been saying for years that their major obstacles are not inherent in their disabilities, but arise from barriers that have been imposed externally and unnecessarily. (Testimony before House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, September 27, 1988, S. Hrng. 100-926, p. 3.)

It is critical to define places of public accommodations to include all places open to the public, not simply restaurants, hotels, and places of entertainment (which are the types of establishments covered by title II of the Civil Rights Act of 1964) because discrimination against people with disabilities is not limited to specific categories of public accommodations. The Attorney General has stated that we must bring Americans with disabilities into the mainstream of society "in other words, full participation in and access to all aspects of society." Testimony before House Subcommittee on Civil and Constitutional Rights, Ser. No. 58, October 11, 1989, p. 192.

Robert Burgdorf, Jr., currently a Professor of Law at the District of Columbia School of Law, testifying on behalf of the National Easter Seal Society, has stated:

> . . . it makes no sense to bar discrimination against people with disabilities in theaters, restaurants, or places of entertainment but not in regard to such important things as doctor's offices. It makes no sense for a law to say that people with disabilities cannot be discriminated against if they want to buy a pastrami sandwich at the local deli but that they can be discriminated against next door at the pharmacy where they need to fill a prescription. There is no sense to that distinction. (Testimony before Senate Subcommittee on the Handicapped, S. Hrng. 101-156, May 10, 1989, p. 100.)

Witnesses identified the major areas of discrimination that need to be addressed. The first is lack of physical access to facilities. Witnesses recognized that it is probably not feasible to require that existing facilities be completely retrofitted to be made accessible. However, it is appropriate to require modest changes. Numerous inexpensive changes can be made to make a facility accessible, including installing a permanent or portable ramp over an entrance step; installing offset hinges to widen a doorway; relocating a vending machine to clear an accessible path; and installing signage to indicate accessible routes and features within facilities.

Several witnesses also recognized that newly constructed buildups should be fully accessible because the additional costs for making new facilities accessible are often nonexistent or negligible. According to Michael Oestreicher, who directs an architectural firm that designs barrier-free environments, there is absolutely no reason why new buildings constructed in America cannot be barrier-free since additional cost is not a significant factor. He testified that:

> If accessibility is part of the planning from the onset of a project, then that access costs no more or at the most marginally more than a project with no access. (Testimony before House Subcommittee on Select Education, Ser. No. 100–109, October 24, 1988, p. 99.)

The lack of training provided for designers in our country on how to design for children, older people and people with disabilities, plus the lack of strong, specific, enforceable legislation requiring accessibility, are major impediments to accomplishing barrier free environments, according to witnesses. Oestreicher states that:

> With good common sense, solid design precepts, and most importantly, strong input from disabled people, we can create barrier-free environments. (Testimony before House Subcommittee on Select Education, Ser. No. 100–109, October 24, 1988, p. 100.)

Evan Kemp noted that there is a cost to businesses of lost sales revenues from potential disabled customers who cannot make purchases because of inaccessible premises or practices. Joseph Rauh testified that:

> Accessible design does not cost more money—the human costs of inaccessible design are tremendous. Our society must open its doors to all. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101–37, July 18, 1989, p. 49.)

Additional areas of discrimination that witnesses identified include: the imposition or application of standards or criteria that limit or exclude people with disabilities; the failure to make reasonable modifications in policies to allow participation, and a failure to provide auxiliary aids and services.

William Cavanaugh provided the Committee with an example of discriminatory practice when he described "the time a friend of mine, Michael, whose disability is cerebral palsy, attempted to go to a movie with me only to be denied admittance by the theater manager who said that Michael presented a liability risk." Testimony before House Subcommittee on Select Education, Ser. No. 100–109, October 24, 1988, p. 38.

Another example was provided by Greg Hlibok of Gallaudet University who testified about the need for places of public accommodations to take steps to enhance safety for persons with hearing impairments.

PUBLIC SERVICES

Currently, Title V of the Rehabilitation Act of 1973 prohibits recipients of Federal assistance from discriminating against individuals with disabilities. Many agencies of State and local government receive Federal aid and thus are currently prohibited from engaging in discrimination on the basis of disability. However, where there is no state law prohibiting discriminatory practices, two programs that are exactly alike, except for funding sources, can treat people with disabilities completely differently than others who don't have disabilities. The resulting inconsistent treatment of people with disabilities by different State or local government agencies is both inequitable and illogical for a society committed to full access for people with disabilities.

TRANSPORTATION

Transportation is the linchpin which enables people with disabilities to be integrated and mainstreamed into society. The National Council on Disability has declared that "accessible transportation is a critical component of a national policy that promotes the self-reliance and self-sufficiency of people with disabilities. People who cannot get to work or to the voting place cannot exercise their rights and obligations as citizens. Accessible transportation will become increasingly important in coming decades as the baby-boom population grows older and experiences the increased transportation handicaps associated with aging." *Toward Independence*, National Council on the Handicapped, February, 1986, p. 33.

Jay Rochlin, Executive Director of the President's Committee on Employment of People with Disabilities, made the same point when he stated:

> It makes little sense to protect an individual from discrimination in employment if, for example, they have less than adequate accessible public transportation services. We have conducted surveys in 45 communities over the last seven years, and, consistently, inaccessible transportation has been identified the major barrier, second only to discriminatory attitudes. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-51, p. 29.)

Speed Davis, Assistant Director of the Massachusetts Office of Handicapped Affairs, said:

> We regularly talk to individuals who have been forced to turn down job offers or have been fired or have otherwise left jobs because they could not arrange reliable transportation. (Testimony before House Subcommittee on Select Education, Ser. No. 100-109, October 24, 1988, p. 222.)

Witnesses testified about the need to pursue a multi-modal approach to ensuring access for people with disabilities which provides that all new vehicles used for fixed routes are accessible and paratransit is made available for those who cannot use the fixed route accessible vehicles.

Robert Lanier, Chairman of the transit authority serving Houston, Texas, when asked if federal legislation should require all transit systems in the country to provide both paratransit and mainline bus accessibility, said:

> I think you need to provide both . . . because if you do not, there will be an equally significant segment of the handicapped community . . . for whom the lifts are not appropriate. (Testimony before House Subcommittee on Select Education, Ser. No. 101-56, August 28, 1989, pp. 77-78.)

For some people with disabilities who lead or would like to lead spontaneous, independent lives integrated into the community, paratransit is often inadequate or inappropriate for the following reasons, among others: the need to make reservations in advance often conflicts with one's work schedule or interests in going out to restaurants and the like; the cost of rides when used frequently is often exorbitant; limitations on time of day and the number of days that the paratransit operates; waiting time; restrictions on use by guests and nondisabled companions who are excluded from accompanying the person with a disability; the expense to the public agency; and restrictions on eligibility placed on use by social service agencies.

Marchell Hunt, Chairperson of an Indianapolis disability organization, prefers to use the city's buses but was forced to rely on its paratransit services because the city had only six lift-equipped buses:

> The day I was released from the hospital, Metro called to say that they could not pick me up even though I had scheduled my ride three weeks in advance. Currently, there are more than 100 persons on a waiting list to utilize this very limited form of accessible public transportation. (Testimony before House Subcommittee on Select Education, Ser. No. 101-57, October 6, 1989, p. 71.)

However, witnesses also stressed that there are some people with disabilities who are so severely disabled that they cannot use accessible mainline transit and thus there is a need to have a paratransit system for these people.

Several communities which have committed to achieving mainline accessibility have done so with the full involvement of people with disabilities both within and outside transit authorities. The results they have attained are impressive and serve to illustrate that reasons commonly provided as to why mainline accessibility cannot be accomplished reflect myths.

Cambria County Transit Authority in Johnstown, Pennsylvania is 100 percent accessible and operates without problems, notwithstanding hilly terrain and inclement weather, including snow, flooding, and significant extremes in temperatures.

When the decision was intitially made to make the fleet 100 percent accessible there was fear and reluctance on the part of the disability community, the drivers, and the general public. That fear and reluctance has now disappeared. The General Manager of the Cambria County Transit Authority concludes that mainline access works in his community because of the commitment of everyone to make it work. This includes a need to train and educate top management, drivers and the general public as well as the local disability community.

The new generation of lifts are not having the maintenance problems experienced in the past and they can operate in inclement weather. The Architectural Transportation Barriers Compliance Board has reported that currently most problems with lift operation are the direct result of driver error and that lift maintenance is but one facet of a good maintenance program. Thus, transit, authorities reporting problems with lifts are generally those that also report problems with general maintenance.

With respect to intercity transportation, the Committee learned about reasonably priced lifts that can be installed on buses which will enable people using wheelchairs to have access to these buses. This is particularly critical in rural areas where these buses are often the only mode of transportation that is available.

TELECOMMUNICATIONS

Gregory Hlibok, President of the Student Body Government at Gallaudet University, described some of the obstacles to daily living faced by hearing impaired people:

> Many of us confront discrimination every day. We have experienced the disappointment of being turned down for a job or promotion because we were told the communication barriers were too great. My own deaf brother was told he had to pay for his own interpreter on his job. We have tried to call the police for help using our telecommunications devices for the deaf, but the police hang up on us, because they had no TDD's. I remember when I was fifteen I left school without money to take the bus home. I had no way to call my parents or the police. I had to walk the 3 miles home in the snow. (Testimony before House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, p. 80.)

Mr. Hlibok concluded that accessible communications systems are necessary for deaf and hearing impaired people to participate equally and effectively in society.

Currently, 19 States have intrastate TDD relay systems in place which enable hearing impaired and communication impaired persons who use telecommunication devices for the deaf (TDD's) to make calls to and receive calls from individuals using voice telephones. Ten more states are scheduled to begin intrastate service within the next year. The requirement for nationwide intrastate and interstate relay services will enable deaf and hearing impaired people who use TDD's to make calls to and receive calls from individuals using voice telephones in any part of the United States, which enhance both their personal lives and employment opportunities.

ENFORCEMENT

Several witnesses emphasized that the rights guaranteed by the ADA are meaningless without effective enforcement provisions. Elmer Bartels, Commissioner of the Massachusetts Rehabilitation Commission, stated "We know that any law is not self enforcing and that continued efforts to educate and press for policy implementation and support will be necessary." Testimony before House Subcommittee on Select Education, Ser. No. 100-109, October 24, 1988, p. 24.

Sandy Parrino related her personal experiences as the mother of two disabled children in lamenting the poor enforcement of existing federal disability rights legislation requiring school buildings to be accessible:

> There is not enough compliance. The village I live in, in Westchester County (N.Y.), Briar Cliff Manor . . . could not see fit to put a ramp in until just this year. Therefore . . . physically disabled people were never able to get into that town hall. That is just one example that has certainly irritated me for many years . . . There has not been enough compliance with the 504 regulations . . . It is not enough to just have it down on the books . . . Many schools do not have the elevators or the accessibilities, to this day, 13 years after the bill was enacted. They still are not accessible and the classrooms are not accessible. (Testimony before House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, p. 38.)

Howard Wolf, Chairman of the Board of The Institute of Rehabilitation and Research and a practicing attorney in Houston, Texas, stated that successful attempts to weaken the remedies available under the ADA would make the ADA an "empty promise of equality." Testimony before House Subcommittee on Select Education, Ser. No. 101-56, August 28, 1989, p. 64.

SUMMARY

As the summary of the testimony before the Committee demonstrates, the unfortunate truth is that individuals with disabilities are a discrete, specific minority who have been insulated in many respects from the general public. Such individuals have been faced with a range of restrictions and limitations in their lives. Further, they have been subjected to unequal and discriminatory treatment in a range of areas, based on characteristics that are beyond the control of such individuals and resulting from stereotypical assumptions, fears and myths not truly indicative of the ability of such individuals to participate in and contribute to society. Finally, such individuals have often not had the political power and muscle to demand the protections that are rightfully theirs. The simple fact that this Act has taken this long to pass Congress, twenty-five years after other civil rights legislation has been passed, is a testament to that fact. This Act will finally set in place the necessary civil rights protections for people with disabilities.

THE EFFECTS OF DISCRIMINATION ON INDIVIDUALS WITH DISABILITIES

Discrimination has many different effects on individuals with disabilities. Arlene Mayerson of the Disability Rights Education and Defense Fund testified about the nature of discrimination against people with disabilities:

> The discriminatory nature of policies and practices that exclude and segregate disabled people has been obscured by the unchallenged equation of disability with incapacity and by the gloss of "good intentions." The innate biological and physical 'inferiority' of disabled people is considered self-evident. This "self-evident" proposition has served to justify the exclusion and segregation of disabled people from all aspects of life. The social consequences that have attached to being disabled often bear no relationship to the physical or mental limitations imposed by the disability. For example, being paralyzed has meant far more than being unable to walk—it has meant being excluded from public schools, being denied employment opportunities, and being deemed an "unfit parent." These injustices coexist with an atmosphere of charity and concern for disabled people. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-51, September 13, 1989, pp. 78-79.)

Sandy Parrino, Chairperson of the National Council on Disability explained that:

> Disability does not mean incompetence. The perception that persons with disabilities are dependent by nature is the result of discriminatory attitudes, not the result of disability. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-37, July 18, 1989, p. 71.)

Charles Crawford, Commissioner of the Massachusetts Commission for the Blind, explained that:

> For far too long and far too many centuries, disabled people have felt the pain of discrimination, of being held separate, at being looked at as different, as somehow being viewed as lesser . . . I personally have felt the discrimination, the isolation, the sense of helplessness and the sense of no ability to relate to other people because they have shut me out. (Testimony before House Subcommittee on Select Education, Ser. No. 100-109, October 24, 1988, p. 27.)

Charles Sabatier stated:

> Sometimes we get robbed of our dignity, our self-respect, we swallow insults on a daily basis to continue to get along in our society. (Testimony before House Subcommittee on Select Education, Ser. No. 100-109, October 24, 1988, p. 36.)

Emeka Nwojke made the same point when he said:

> It is the elimination of dignity associated with being a human being that I am talking about. (Testimony before

> House Subcommittee on Select Education, Ser. No. 100-109, October 24, 1988, p. 36.)

Judith Heumann explained that:

> In the past disability has been a cause of shame. This forced acceptance of second-class citizenship has stripped us as disabled people of pride and dignity . . . This stigma scars for life. (Testimony before House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, p. 74.)

Larry Espling stated:

> At the ethnic festival in Waltham in 1986, I wanted to buy a book on Lithuania at one of the booths. The person sitting thee said, "Why do you want this book? You can't read." Another misconception is that if a person with cerebral palsy marries, any children will have C.P. I know of two C.P. couples with normal children. It's not hereditary . . . People say things sometimes as if you can't hear them. I was on a bus and two men near me said, "He'll be put away." I've had things like that happen before. (Testimony before House Subcommittee on Select Education, Ser. No. 100-109, October 24, 1988, p. 188.)

Virginia Domini explained:

> You know the general public doesn't want to see you doing your laundry, being a case worker, a shopper, or a Mom. It is difficult to see yourself as a valuable member of society, and sometimes it is hard to see yourself as a person worthy of so much more respect than you get from the general public. (Testimony before House Subcommittee on Select Education, Ser. No. 100-109, October 24, 1988, p. 87.)

Discrimination produces fear and reluctance to participate on the part of people with disabilities. Fear of mistreatment and discrimination, and the existence of architectural, transportation, and communication barriers, are critical reasons why individuals with disabilities do not participate to the same extent as nondisabled people in public accommodations and transportation.

Ruth Long, Peer Advocate Counselor for the Vermont Center for Independent Living testified about the factors that isolate people with disabilities, and how they are amplified by the rural factor. "Nobody believes that there is really a disabled community in the State of Vermont because they are invisible," she stated. (Testimony before House Subcommittee on Select Education, Ser. No. 100-109, October 24, 1988, p. 185.)

Discrimination results in social isolation and in some cases suicide.

Justin Dart testified before the Committee about how his brother and two other family members had committed suicide because of their disabilities and about a California woman, a mother and a TV director before becoming disabled, who said to him:

> We can go just so long constantly reaching dead ends. I am broke, degraded, and angry, have attempted suicide three times. I know hundreds. Most of us try but which way and where can we go? What and who can we be? If I were understood, I would have something to live for. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-37 July 18, 1989, p. 58.)

The frustration experienced by many Americans with disabilities was expressed by Cindy Miller:

> I am tired of being tired, fighting angry, and depressed every day fighting for my rights . . . I do not want to be Rosa Parks, I just want to be Cindy Miller. (Testimony before House Subcommittee on Select Education, Ser. No. 100-109, October 24, 1989, p. 161.)

THE EFFECTS OF DISCRIMINATION ON SOCIETY

The Committee also heard testimony and reviewed reports concluding that discrimination results in dependency on social welfare programs that cost the taxpayers unnecessary billions of dollars each year. Sandy Parrino, the chairperson of the National Council on Disability, testified that discrimination places people with disabilities in chains that:

> . . . bind many of the 36 million people into a bondage of unjust, unwanted dependency on families, charity, and social welfare. Dependency that is a major and totally unnecessary contributor to public deficits and private expenditures. (Testimony before House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, p. 27.)

She added that:

> It is contrary to sound principles of fiscal responsibility to spend billions of federal tax dollars to relegate people with disabilities to positions of dependency upon public support. (Id. at p. 28.)

President Bush has stated:

> On the cost side, the National Council on the Handicapped states that current (federal) spending on disability benefits and programs exceeds $60 billion annually. Excluding the millions of disabled who want to work from the employment ranks costs society literally billions of dollars annually in support payments and lost income tax revenues. (Statement by Vice President George Bush on Disabled Americans, March 31, 1988, p. 2.)

Attorney General Thornburgh has stated that:

> We must recognize that passing comprehensive civil rights legislation protecting persons with disabilities will have direct and tangilble benefits for our country . . . Certainly, the elimination of employment discrimination and the mainstreaming of persons with disabilities will result

> in more persons with disabilities working, in increasing earnings, in less dependence on the Social Security system for financial support, in increased spending on consumer goods, and increased tax revenues. (Testimony before House Subcommittee on Civil and Constitutional Rights, Ser. No. 101-58, October 11, 1989, p. 811.)

Justin Dart testified that it is discrimination and segregation that are preventing persons with disabilities from becoming self-reliant:

> . . . and that are driving us inevitably towards an economic and moral disaster of giant, paternalistic welfare bureaucracies. We already paying unaffordable and rapidly escalating billions in public and private funds to maintain ever-increasing millions of potentially productive Americans in unjust, unwanted dependency. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-37, p. 65.)

Thus, discrimination makes people with disabilities dependent on social welare programs rather than allowing them to be taxpayers and consumers.

Discrimination also deprives our nation of a critically needed source of labor in a period where demographic and other changes in our society are creating shortages of qualified applicants in many jobs.

President Bush has stated:

> The United States is now beginning to face labor shortages as the baby boomers move through the work force. The disabled offer a pool of talented workers whom we simply cannot afford to ignore, especially in connection with the high tech growth industries of the future. (Statement of Vice President George Bush on Disabled Americans, March 31, 1988, p. 2.)

Jay Rochlin, the executive director of the President's Committee on Employment of People with Disabilities, explained why the needs of people with disabilities for employment opportunities and the needs of businesses for qualified employees make for what he calls a "win-win" situation:

> The . . . (Department of Labor's) *Opportunity 2000* concluded that businesses will be able to satisfy their labor needs only if they successfully confront . . . barriers and empower individuals presently outside the economic mainstream to take advantage of meaningful employment opportunties. ". . . While comprehensive civil rights legislation can provide protections from employment discrimination for persons with disabilities, it will also enhance the private sector's access to an additional resource of human capital—qualified individuals with disabilities." (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-51, September 13, 1989, p. 33.)

Mr. Rochlin related the story of Tina Saenger, who became quadriplegic as the result of an auto accident. She used a wheelchair but access was not a problem at her job at AT&T where whe worked as a long distance phone operator, because the office was fully accessible. The fact that Tina had limited use of her fingers might have prevented her from being able to perform her job because the office had a policy prohibiting the use of pencils by phone operators to punch in numbers. Under rights provided under section 503 of the Rehabilitation Act, however, Tina was able to have this rule modified as a reasonable accommodation to her disability. Her job performance to this day is outstanding. As Mr. Rochlin says:

> Consider the economic impact of that simple accommodation. It enables Tina to have a job which pays well. She owns both a home and a car and supports her mother in addition to herself. The alternative is no longer acceptable. We should not spend our tax dollars to support someone who is able to be an independent and productive taxpaying citizen, particularly when we can do so, so easily. (Id. at pp. 36-37.)

Justin Dart, Jr. stated:

> As a former CEO of both large and small enterprises, employing persons with severe disabilities and constructing accessible facilities, I know that ADA is affordable for business and that ADA is good business and this is not simply my personal opinion. Every significant requirement of ADA is now being implemented successfully by progressive public and private entities somewhere. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-37, July 18, 1989, p. 57.)

In the increasingly competitive international economy, our nation must adopt policies which result in a bridging of the vast gulf separating the actual from the potential contributions of people with disabilities to the health of our economy. To remove the unnecessary barriers shackling people with disabilities is to avail our society of the full range of their talents and abilities. Robert Mosbacher, Jr. stated:

> From the perspective of a private sector employer, this legislation is also extremely important. If we are to remain competitive as a nation in the international marketplace, we must have a well trained, well educated and highly motivated workforce. Millions of disabled Americans who have been denied access to the workplace are well educated and can be easily trained. What is more, they are some of the most highly motivated people in our society today. (Testimony before House Subcommittee on Select Education, Ser. No. 101-56, August 28, 1989, p. 62.)

Our nation's most precious resource is our people. To the extent that the changes in practices and attitudes brought about by implementation of the Act ultimately assist people with disabilities in becoming more productive and independent members of society, both they and our entire society benefit.

Mark Donovan, Manager of Community Employment and Training Programs for the Marriott Corporation testified:

> . . . Marriott is recognized as a leader in the area of employment of people with disabilities . . . I raise that issue because I think it's important to note why Marriott has so aggressively assumed this position. The reason is simple: it makes good, bottom line, business sense. As a corporation operating in the hospitality industry, our employees are our life blood. It is only to the degree to which we can find, attract, train, and retain able and motivated people that we will be successful . . . From our perspective, not to draw upon the resources represented by people with disabilities would be absurd. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-51, September 13, 1989, pp. 45-46.)

Discrimination also negates the billions of dollars we invest each year to educate our children and youth with disabilities and train and rehabilitate adults with disabilities Howard Wolf, Chairman of the Board of the Institute on Rehabilitation and Research, stated:

> . . . Have we accomplished enough when we educate, rehabilitate and care for people with disabilities only to ignore discrimination against them in the workforce, in transportation, in public accommodations? How many well educated and highly capable people with disabilities must sit down at home every day, not because of their lack of ability, but because of the attitudes of employers, service providers, and government officials? (Testimony before House Subcommittee on Select Education, Ser. No. 101-56, August 28, 1989, p. 67.)

Sylvia Piper, a parent of a child with developmental disabilities testified that:

> We have invested in Dan's future. And the Ankeny public school District has made an investment in Dan's future . . . Are we going to allow this investment of time, energy, and dollars, not to mention Dan's ability and quality of life, to cease when he reaches age 21? (Testimony before House Subcommittee on Select Education and Senate Subcommiteee on the Handicapped, S. Hrg. 100-926, September 27, 1988, pp. 68-69.)

Attorney General Thornburgh has made the same point:

> The continued maintenance of these barriers imposes staggering economic and social costs and inhibits our sincere and substantial Federal commitment to the education, rehabilitation, and employment of persons with disabilities. The elimination of these barriers will enable society to benefit from the skills and talents of persons with disabilities and will enable persons with disabilities to lead more productive lives. (Testimony before House Subcom-

mittee on Civil and Constitutional Rights, Ser. No. 58, October 11, 1989, p. 199.)

Apart from the economic benefits to individuals with disabilities and to the nation that this legislation is expected to bring about, its non-economic improvements in the quality of life of millions of Americans are no less important. The deaf person who can, because of the mandated nationwide TDD hookup, now spontaneously communicate with hearing friends in or out of their state; the woman who uses a wheelchair who can now accompany her children to the newly accessible museum using an accessible bus, or visit her sick mother in another state using a newly accessible intercity bus, or enter the supermakret; the blind individual who can, using newly marked elevator buttons, conveniently get to her sixth floor office appointment; the woman with cerebal palsy now allowed to enter the movie theater—the value of such benefits to individuals who seek to live a full life, free from arbitrary, confining, and humiliating treatment, cannot be calculated. The commitment to promote greater dignity and an improved quality of life for people with disabilities evinced in the provisions of the Act provide further powerful justification for its enactment.

CURRENT FEDERAL AND STATE LAWS ARE INADEQUATE; NEED FOR COMPREHENSIVE FEDERAL LEGISLATION

State laws are indaequate to address the pervasive problems of discrimination that people with disabilities are facing. As Admiral Watkins said:

> My predecessor [Sandy Parrino] here this morning said enough time has, in my opinion, been given to the States to legislate what is right. Too many States, for whatever reason, still perpetuate confusion. It is time for Federal action. (Testimony before House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, p. 39.)

The fifty State Governor's Committees, with whom the President's Committee on Employment of People with Disabilities works, report that existing state laws do not adequately counter acts of discrimination against people with disabilities.

Current Federal law is also inadequate. Currently, Federal antidiscrimination laws only address discrimination by Federal agencies, entities that have contracts with the Federal government, and recipients of Federal financial assistance. Last year, Congress amended the Fair Housing Act to prohibit discrimination against people with disabilities in the sale and rental of private housing. However, there are still no protections against discrimination by employers in the private sector, by places of public accommodation, by State and local government agencies that do not receive Federal aid, and with respect to the provision of telecommunication services. With respect to the provisions of accessible transportation services, there have been misinterpretations by executive agencies and some courts regarding the prohibition against discrimination by public entities under the Rehabilitation Act and there has been no protection from discrimination by private transportation companies not otherwise covered under federal laws.

The need to enact omnibus rights legislation for individuals with disabilities was one of the major recommendations of the National Council on Disability in its two most recent reports to Congress. In fact, H.R. 4498, the Americans With Disabilities Act of 1988, introduced during the 100th Congress, was developed by the Council.

The need for omnibus civil rights legislation was also one of the major recommendations of the Presidential Commission on the HIV Epidemic:

> Comprehensive Federal anti-discrimination legislation, which prohibits discrimination against persons with disabilities in the public and private sectors, including employment, housing, public accommodations and participation in government programs should be enacted. All persons with symptomatic or asymptomatic HIV infection should be clearly included as persons with disabilities who are covered by the anti-discrimination protections of this legislation. (*Report of the Presidential Commission on the Human Immunodeficiency Epidemic,* June, 1988, p. 123.)

Attorney General Thornburgh, on behalf of President Bush, has spoken of the importance of enacting comprehensive civil rights legislation for people with disabilities:

> One of the (the ADA bill's) most impressive strengths is its comprehensive character. Over the last 20 years, civil rights laws protecting disabled persons have been enacted in piecemeal fashion. Thus, existing Federal laws are like a patchwork quilt in need of repair. There are holes in the fabric, serious gaps in coverage that leave persons with disabilities without adequate civil rights protections. (Testimony before House Subcommittee on Civil and Constitutional Rights, Ser. No. 101-58, October 11, 1989, p. 812.)

As Jay Rochlin said:

> A break in any link in the chain that connects individuals with disabilities to the workplace or prevents them from functioning independently creates a barrier which many times cannot be bridged. (Testimony before House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-51, September 13, 1989, p. 29.)

VISION FOR THE FUTURE

Many of the witnesses described the vision of the Americans With Disabilities Act.

Sandy Parrino testified that:

> Martin Luther King had a dream. We have a vision. Dr. King dreamed of an America "where a person is judged not by the color of his skin, but by the content of his character." ADA's vision is of an America where persons are judged by their abilities and not on the basis of their disabilities. (Testimony before House Subcommittee on Select

> Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, p. 27.)

Tony Coelho shared the following observation with the Committee:

> While the charity model once represented a step forward in the treatment of person with handicaps, in today's society it is irrelevant, inappropriate and a great disservice. Our model must change. Disabled people are sometimes impatient, and sometimes angry, it for good reason—they are fed up with discrimination and exclusion, tired of denial, and are eager to seize the challenges and opportunities as quickly as the rest of us. (Testimony before House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, p. 15.)

Judith Heumann stated that:

> The passage of this monumental legislation will make it clear that our Government will no longer allow the largest minority group in the United States to be denied equal opportunity. (Testimony before the House Subcommittee on Select Education and Senate Subcommittee on the Handicapped, S. Hrng. 100-926, September 27, 1988, p. 75.)

Perry Tillman, a Vietnam veteran, has stated that:

> I did my job when I was called on by my country. Now it is your job and the job of everyone in Congress to make sure that when I lost the use of my legs I didn't lose my ability to achieve my dreams. Myself and other veterans before me fought for freedom for all Americans. But when I came home and I found out that what I fought for applied to everyone but me and other handicapped people, I couldn't stop fighting. I have fought since my injury in Vietnam to regain my rightful place in society. I ask that you now join me in ending this fight and give quick and favorable consideration to the ADA in order to allow all Americans, disabled or not, to take part equally in American life. (Testimony before Senate Subcommittee on the Handicapped, S. Hrng. 101-156, May 10, 1989, p. 454.)

Justin Dart testified:

> The economic and moral greatness of America is based on providing equal opportunity to wave after wave of previously oppressed and dependent groups. Providing such opportunity to Americans with disabilities will result in yet another period of dynamic growth in the productivity, prosperity, quality of life, and international moral leadership of this nation. (Testimony before the House Subcommittees on Select Education and Employment Opportunities, Ser. No. 101-37, July 18, 1989, p. 67.)

CONCLUSION

In conclusion, there is a compelling need to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities and for the integration of persons with disabilities into the economic and social mainstream of American life. Further, there is a need to provide clear, strong, consistent, enforceable standards addressing discrimination against individuals with disabilities. Finally, there is a need to ensure that the Federal Government plays a central role in enforcing these standards on behalf of individuals with disabilities.

The difficult task before the Committee and, indeed, before the Congress, is to establish standards that fulfill this mandate in a clear, balanced, and reasonable manner. The Committee believes that this legislation has done that. This report explains in detail how that balance has been struck.

V. Summary of Committee Action

H.R. 2273 was brought before the Education and Labor Committee for open markup on November 9, 1989. The markup was commenced but not concluded on that date. Mr. Owens offered an amendment in the nature of a substitute prior to the adjournment of the session.

The markup was resumed on November 15, 1989, at which time Mr. Owens offered an amendment in the nature of a substitute to be considered as an original bill for the purpose of amendment. Twelve amendments to this substitute were offered, all of which were defeated. The Committee voted to adopt and report H.R. 2273, as an amendment in the nature of a substitute, by a roll call vote of 35–0.

VI. Explanation of the Legislation

DEFINITION OF THE TERM "DISABILITY"

Section 3(2) of the legislation defines the term "disability" for purposes of this legislation. The definition of the term "disability" included in the bill is comparable to the definition of the term "individual with handicaps" in section 7(8)(B) of the Rehabilitation Act of 1973 and section 802(h) of the Fair Housing Act.

It is the Committee's intent that the analysis of the term "individual with handicaps" by the Department of Health, Education, and Welfare of the regulations implementing section 504 (42 Fed. Reg. 22685 et seq. (May 4, 1977)) and the analysis by the Department of Housing and Urban Development of the regulations implementing the Fair Housing Amendments Act of 1988 (54 Fed. Reg. 3232 et seq. (Jan. 23, 1989)) apply to the definition of the term "disability" included in this legislation.

The use of the term "disability" instead of "handicap" and the term "individual with a disability" instead of "individual with handicaps" represents an effort by the Committee to make use of up-to-date, currently accepted terminology. In regard to this legislation, as well as in other contexts, the Congress has been apprised of the fact that to many individuals with disabilities the terminology applied to them is a very significant and sensitive issue.

As with racial and ethnic epithets, the choice of terms to apply to a person with a disability is overlaid with stereotypes, patronizing attitudes, and other emotional connotations. Many individuals with disabilities, and organizations representing such individuals, object to the use of such terms as "handicapped person" or "the handicapped." [In recent legislation, Congress has begun to recognize this shift in terminology, e.g., by changing the name of the National Council on the Handicapped to the National Council on Disability, Public Law 100-630.]

The Committee concluded that it was important for the current legislation to use terminology most in line with the sensibilities of most Americans with disabilities. No change in definition or substance is intended nor should be attributed to this change in phraseology.

Finally, this Act is entitled the "Americans with Disabilities Act" to underscore the fact that people with disabilities are part of the tradition and heritage of this great country, and have as much of a right to equal access and opportunity in this country as all other individuals. However, the Committee wishes to emphasize that the title of the Act should not be construed to mean that only "Americans" with disabilities are protected under this Act. The Act protects all individuals with disabilities who are in this country—regardless of their ethnic or national origin and regardless of their status.

The term "disability" means, with respect to an individual—

(1) a physical or mental impairment that substantially limits one or more of the major life activities of such individual;

(2) a record of such an impairment; or

(3) being regarded as having such an impairment.

The first prong of the definition includes any individual who has a "physical or mental impairment." A physical or mental impairment means—(1) any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive, digestive; genito-urinary; hemic and lymphatic; skin; and endocrine; or (2) any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

It is not possible to include in the legislation a list of all the specific conditions, diseases, or infections that would constitute physical or mental impairments because of the difficulty of ensuring the comprehensiveness of such a list, particularly in light of the fact that new disorders may develop in the future. The term includes, however, such conditions, diseases and infections as: orthopedic, visual, speech, and hearing impairments, cerebral palsy, epilepsy, muscular dystrophy, multiple sclerosis, infection with the Human Immunodeficiency Virus, cancer, heart disease, diabetes, mental retardation, emotional illness, specific learning disabilities, drug addiction, and alcoholism.

The term "physical or mental impairment" does not include simple physical characteristics, such as blue eyes or black hair. Further, because only physical or mental impairments are included, environmental, cultural, and economic disadvantages are not in themselves covered. For example, having a prison record does not constitute having a disability. Age is not a disability, nor is homosexuality. Of course, if a person who has any of these characteristics also has a physical or mental impairment, the person may be considered as having a disability for purposes of this legislation.

A physical or mental impairment does not constitute a disability under the first prong of the definition for purposes of the ADA unless its severity is such that it results in a "substantial limitation of one or more major life activities." A "major life activity" means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, working, and participating in community activities.

For example, a person who is paraplegic will have a substantial difficulty in the major life activity of walking; a deaf person will have a substantial difficulty in hearing aural communications; and a person with lung disease will have a substantial limitation in the major life activity of breathing. As noted by the U.S. Department of Justice, "Application of Section 504 of the Rehabilitation Act to HIV-Infected Individuals," September 27, 1988, at 9–11, a person infected with the Human Immunodeficiency Virus is covered under the first prong of the definition of the term "disability" because of a substantial limitation to procreation and intimate sexual relationships.

A person with a minor, trivial impairment, such as a simple infected finger is not impaired in a major life activity. A person is considered an individual with a disability for purposes of the first prong of the definition when the individual's important life activities are restricted as to the conditions, manner, or duration under which they can be performed in comparison to most people. A person who can walk for 10 miles continuously is not substantially limited in walking merely because on the eleventh mile, he or she begins to experience pain because most people would not be able to walk eleven miles without experiencing some discomfort.

Whether a person has a disability should be assessed without regard to the availability of mitigating measures, such as reasonable accommodations or auxiliary aids. For example, a person who is hard of hearing is substantially limited in the major life activity of hearing, even though the loss may be corrected through the use of a hearing aid. Likewise, persons with impairments, such as epilepsy or diabetes, which substantially limit a major life activity are covered under the first prong of the definition of disability, even if the effects of the impairment are controlled by medication.

The second prong of the definition of the term "disability" includes an individual who has a record of such impairment, i.e., an individual who has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activities.

This provision is included in the definition in part to protect individuals who have recovered from a physical or mental impairment which previously substantially limited them in a major life activity. Discrimination on the basis of such a past impairment would be prohibited under this legislation. Frequently occurring examples of the first group (i.e., those who have a history of an impairment) are persons with histories of mental or emotional illness, heart disease, or cancer; examples of the second group (i.e., those who have been misclassified as having an impairment) are persons who have been misclassified as mentally retarded.

The third prong of the definition includes an individual who is regarded as having a covered impairment. This third prong includes an individual who has physicial or mental impairment that does not substantially limit a major life activity, but that is treated by a covered entity as constituting such a limitation. The third prong also includes an individual who has a physical or mental impairment that substantially limits a major activity only as a result of the attitudes of others toward such impairment or has no physical or mental impairment but is treated by a covered entity as having such an impairment.

The rational for this third prong was clearly articulated by the U.S. Supreme Court in *School Board of Nassua County* v. *Arline,* 480 U.S. 273 (1987). The Court noted that Congress included this third prong because it was as concerned about the effect of an impairment on others as it was about its effect on the individual. As the Court noted, the third prong of the definition is designed to protect individuals who have impairments that do not in fact substantially limit their functioning. The Court explained: "Such an impairment might not diminish a person's physical or mental capabilities, but could nevertheless substantially limit that person's ability to work as a result of the negative reactions of others to the impairment." 480 U.S. at 283.

The Court went on to conclude that:

> By amending the definition of "handicaped individual" to include not only those who are actually physically impaired but also those who are regarded as impaired and who, as a result, are substantially limited in a major life activity, Congress acknowledged that society's accumulated myths and fears about disability and diseases are as handicapping as are the physical limitations that flow from actual impairment. (Id., at 284.)

This third prong is particularly important for individuals with stigmatic conditions that are viewed as physical impairments but do not in fact result in a substantial limitation of a major life activity. For example, severe burn victims often face discrimination. In such situations, these individuals are viewed by others as having an impairment which substantially limits some major life activity (e.g., working or eating in a restaurant) and are discriminated against on that basis. Such individuals would be covered under the Act under the third prong of the definition.

A person who is excluded from any basic life activity, or is otherwise discriminated against, because of a covered entity's negative attitudes toward that person's impairment is treated as having a disability. Thus, for example, if an employer refuses to hire someone because of a fear of the "negative reactions" of others to the individual, or because of the employer's perception that the applicant has an impairment which prevents that person from working, that person is covered under the third prong of the definition of disability. See, e.g., *Arline,* 480 U.S. at 284; *Doe* v. *Centinela Hospital,* 57 U.S.L.W. 2034, No. CV-87-2514-P AR (C.D.Cal., June 30,

325

1988), *Thornhill* v. *Marsh*, 49 FEP Cases 6 (Feb. 2, 1989) (9th Cir. 1989).

TITLE I—EMPLOYMENT

Title I of the legislation sets forth prohibitions against discrimination on the basis of disability by employers, employment agencies, labor organizations, or joint labor-management committees (hereinafter referred to as "covered entities") with respect to hiring and all terms, conditions, and privileges of employment.

Scope of coverage

The bill covers employers (including governments, governmental agencies, and political subdivisions) who are engaged in an industry affecting commerce and who have 15 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding calendar year and any agent of such a person; except, for the two years following the effective date of title I, only entities with 25 or more employees are covered. Additional entities covered by title I of the legislation are employment agencies, labor organizations, and joint labor-management committees.

Consistent with title VII of the Civil Rights Act of 1964, the term "employer" under this legislation does not include (i) the United States, or an Indian tribe; or (ii) a bona fide private membership club (other than a labor organization) that is exempt from taxation under section 501(c) of the Internal Revenue Code of 1986. The United States government, of course, continues to be covered under the Rehabilitation Act of 1973.

Definitions

Several of the definitions set out in title VII of the Civil Rights Act of 1964 are adopted or are incorporated by reference in this legislation—i.e., the terms Commission, employer, person, labor organization, employment agency, commerce, and industry affecting commerce. The term "employee" means an individual employed by an employer. The exception set out in title VII of the Civil Rights Act of 1964 for elected officials and their employees and appointees has been deleted.

Several of the other items, including "reasonable accommodation" and "undue harship" are discussed in detail later in this report.

Actions covered by this legislation

Section 102(a) of the legislation specifies that no covered entity shall discriminate against any qualified individual with a disability because of such individual's disability in regard to job application procedures, the hiring or discharge of employees, employee compensation, advancement, job training, and other terms, conditions, and privileges of employment.

This section in intended to include the range of employment decisions. Consistent with regulations implementing section 504 of the Rehabilitation Act of 1973, see 45 CFR 84.11(b), the decisions covered include: (1) recruitment, advertising, and the processing of applications for employment; (2) hiring, upgrading, promotion, award of tenure, demotion, transfer, layoff, termination, right of return from layoff, and rehiring; (3) rates of pay or any other form of compensation and changes in compensation; (4) job assignment, job classification, organizational structures, position descriptions, lines of progression, and seniority lists; (5) leaves of absence, sick leave, or any other leave; (6) fringe benefits available by virtue of employment, whether or not administered by the covered entity; (7) selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, and selection for leaves of absence to pursue training; and (8) employer-sponsored activities, including social or recreational programs.

Qualified individual with a disability

The term "qualified individual with a disability" is defined in section 101(7) of the bill to mean an individual with a disability who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires.

This definition is comparable to the definition used in regulations implementing section 501 and section 504 of the Rehabilitation Act of 1973. The phrase "essential functions" means job tasks that are fundamental and not marginal. The point of including this phrase within the definition of a "qualified individual with a disability" is to ensure that employers can continue to require that all applicants and employees, including those with disabilities, are able to perform the essential, i.e., the non-marginal functions of the job in quesiton.

As the 1977 regulations issued by the Department of Health, Education, and Welfare pointed out "inclusion of this phrase is useful in emphasizing that handicapped persons should not be disqualified simply because they may have difficulty in performing tasks that bear only a marginal relationship to a particular job." 42 Fed. Reg. 22686 (1977). For example, many employers have a policy that, in order to qualify for a job, an employee must have a driver's license—even though the job does not involve driving. The employer may believe that someone who drives will be on time for work or may be able to do an occasional errand. This requirement, however, would be marginal and should not be used to exclude persons with disabilities who can do the esential functions of the job that do not include driving. In determining what constitutes the essential functions of the job, consideration should be given to the employer's judgment regarding what functions are essential.

The basic concept is that an employer may require that every employee be qualified to perform the essential functions of a job. The term "qualified" refers to whether the individual is qualified at the time of the job action in question; the possibility of future incapacity does not by itself render the person not qualified.

By including the phrase "qualified individual with a disability," the Committee intends to reaffirm that this legislation does not undermine an employer's ability to choose and maintain qualified workers. This legislation simply provides that employment decisions must not have the purpose or effect of subjecting a qualified individual with a disability to discrimination on the basis of his or her disability.

Thus, under this legislation an employer is still free to select applicants for reasons unrelated to the existence or consequence of a disability. For example, suppose an employer has an opening for a typist and two persons apply for the job, one being an individual with a disability who types 50 words per minute and the other being an individual without a disability who types 75 words per minute. The employer is permitted to choose the applicant with the higher typing speed, if typing speed is necessary for successful performance on the job.

On the other hand, if the two applicants are an individual with a hearing impairment who requires a telephone headset with an amplifier and an individual without a disability, both of whom have the same typing speed, the employer is not permitted to choose the individual without a disability because of the need to provide the needed reasonable accommodation to the person with the disability.

In the above example, the employer would be permitted to reject the applicant with a disability and choose the other applicant for reasons not related to the disability or to the accommodation or otherwise not prohibited by this legislation. In other words, the employer's obligation is to consider applicants and make decisions without regard to an individual's disability, or the individual's need for a reasonable accommodation. But, the employer has no obligation under this legislation to prefer applicants with disabilities over other applicants on the basis of disability.

Under this legislation an employer may still devise physical and other job criteria and tests for a job so long as the criteria or tests are job-related and consistent with business necessity. Thus, for example, an employer can adopt a physical criterion that an applicant be able to lift fifty pounds, if that ability is necessary to an individual's ability to perform the essential functions of the job in question. Or, for example, security concerns may constitute valid job criteria. For example, jewelry stores often employ security officers because of the frequency of "snatch and run" thefts. Mobility and dexterity may be essential job criteria functions in such jobs.

Moreover, even if the criteria is legitimate, the employer must still determine whether a reasonable accommodation would enable the person with the disability to perform the essential functions of the job without imposing an undue hardship on the business.

It is also acceptable to deny employment to an applicant or to fire an employee with a disability on the basis that the individual poses a direct threat to the health or safety of others or poses a direct threat to property. The determination that an individual with a disability will pose a safety threat to others must be made on a case-by-case basis and must not be based on generalizations, misperceptions, ignorance, irrational fears, patronizing attitudes, or pernicious mythologies.

The employer must identify the specific risk that the individual with a disability would pose. The standard to be used in determining whether there is a direct threat is whether the person poses a significant, risk to the safety of others or to property, not a speculative or remote risk, and that no reasonable accommodation is available that can remove the risk. See section 102(b)(5) requiring reasonable accommodation; *School Board of Nassau County* v.

Arline, 480 U.S. 273 (1987). For people with mental disabilities, the employer must identify the specific behavior on the part of the individual that would pose the anticipated direct threat. This determination must be based on the behavior of the particular disabled person, not merely on generalizations about the disability.

Making such a determination requires a fact-specific individualized inquiry resulting in a "well-informed judgment grounded in a careful and open-minded weighing of the risks and alternatives." *Hall* v. *U.S. Postal Service*, 857 F.2d 1073, 1079 (6th Cir. 1988), quoting *Arline*. See also *Mantolete* v. *Bolger*, 757 F.2d 1416 (9th Cir. 1985) and *Strathie* v. *Dept. of Transportation*, 716 F.2d 227 (3d Cir. 1983).

With respect to covered entities subject to rules promulgated by the Department of Transportation regarding physical qualifications for drivers of certain classifications of motor vehicles, it is the Committee's intent that a person with a disability applying for or currently holding a job subject to these standards must be able to satisfy any physical qualification standard that is job related and consistent with business necessity in order to be considered a qualified individual with a disability under title I of this legislation.

In light of this legislation, the Committee expects that within two years from the date of enactment (the effective date of title I of this legislation), the Secretary of Transportation will undertake a thorough review of these regulations to ascertain whether the standards conform with current knowledge about the capabilities of persons with disabilities and currently available technological aids and devices and whether such regulations are valid under this Act. The Committee expects that the agency will make any necessary changes within the two year period to bring such regulations into compliance with the law. (Of course, a non-discrimination obligation on the part of the Department of Transportation also exists currently under section 504 of the Rehabilitation Act of 1973.)

The Committee also notes that the federal government, in granting national security clearances, takes into account current or former drug or alcohol use in denying or terminating such clearances. The Committee recognizes that any function of an employment position that requires a security clearance is an essential function of the employment position.

Reasonable accommodation

The definition of "reasonable accommodation" in section 101(8) sets forth examples of types of accommodations that could ensure that a person with a disability will be able to perform the essential functions of a job. These include making existing facilities used by an employee or applicant readily accessible to and usable by an individual with a disability; job restructuring; part-time or modified work schedules; reassignment to a vacant position; acquisition or modification of equipment or devices; appropriate adjustment or modifications of examinations, training materials or policies; the provision of qualified readers or interpreters; and other similar accommodations for individuals with disabilities. As set forth in the substantive section of the Act, of course, the legal obligation of an entity to provide such an accommodation is depending on whether the accommodation would impose an undue hardship on the entity's business. See section 102(5)(A). The term "undue hardship" is defined in section 101(9) and is discussed later in this report.

Specific forms of discrimination prohibited

As explained above, section 102(a) of the bill includes a general prohibition against discrimination on the basis of disability against a qualified individual with a disability. Section 102(b) of the bill describes specific forms of discrimination that are included within the prohibition of section 102(a).

Section 102(b)(1) of the legislation specifies that the term "discrimination" includes limiting, segregating, or classifying a job applicant or employee in a way that adversely affects the opportunities or status of such applicant or employee because of the disability of such applicant or employee.

Thus, covered entities are required to make employment decisions based on facts applicable to individual applicants or employees, and not on the basis of presumptions as to what a class of individuals with disabilities can or cannot do.

The Act is premised on the obligation of employers to consider people with disabilities as individuals and to avoid prejudging what an applicant or employee can or cannot do on the basis of that individual's appearance or any other easily identifiable characteristic, or on a preconceived and often erroneous judgment about an individual's capabilities based on "labeling" of that person as having a particular kind of disability.

For example, it would be a violation of this legislation if an employer were to limit the duties of an individual with a disability based on a presumption of what was best for such individual or based on a presumption about the ability of that individual to perform certain tasks. Similarly, it would be a violation for an employer to adopt separate lines of progression for employees with disabilities based on a presumption that no individual with a disability would be interested in moving into a particular job.

Employment activities must take place in an integrated manner. Employees with disabilities must not be segregated into particular work areas. Moreover, non-work activities offered by the employer should also be integrated, such as break-rooms or lunch rooms. If a break-room is located on the second floor of an existing building which is inaccessible, comparable amenities should be made available to the worker who uses a wheelchair on the first floor, such as a coffee pot, table, chairs for co-workers, refrigerator, etc. The actual size of the alternative break room does not have to be comparable, so long as the employee who uses a wheelchair has equivalent opportunities to other workers, including the opportunity to take a break or eat lunch with a co-worker.

It would also be a violation to deny employment to an applicant based on generalized fears about the safety of the applicant or higher rates of absenteeism. By definition, such fears are based on averages and group-based predictions. This legislation requires individualized assessments which are incompatible with such an approach. Often, group-based fears are erroneous as demonstrated in a study conducted in 1973 which examined the job performance, safety record and attendance of 1,452 physically impaired employees of the E.I. du Pont de Nemours and Company. See Wolfe, "Disability is No Hardship for du Pont". Various concerns that had been anticipated (such as concerns regarding safety and absenteeism) were disproved by the study. Indeed, the study showed that disabled workers performed as well as or better than the non-disabled co-workers.

In addition, employers may not deny health insurance coverage completely to an individual based on the person's diagnosis or disability. For example, while it is permissible for an employer to offer insurance policies that limit coverage for certain procedures or treatments, e.g., only a specified number of blood transfusions per year, a hemophiliac who exceeds this treatment limit may not be denied coverage for other conditions, such as for a broken leg or for heart surgery, because of the existence of the hemophilia. A limitation may be placed on reimbursements for a procedure or the types of drugs or procedures covered, e.g., a limit on the number of x-rays or non-coverage of experimental drugs or procedures; but, that limitation must apply to persons with or without disabilities. All people with disabilities must have equal access to the health insurance coverage that is provided by the employer to all employees.

The Act does not, however, affect pre-existing condition clauses included in insurance policies offered by employers. Thus, employers may continue to offer policies that contain preexisting condition exclusions, even though such exclusions adversely affect people with disabilities, so long as such clauses are not used as a subterfuge to evade the purposes of this legislation.

For additional explanations of the treatment of insurance under this legislation, see the discussion in the report on insurance under title V of the legislation.

Section 102(b)(2) of the legislation specifies that "discrimination" includes participating in a contractual or other arrangement or relationship that has the effect of subjecting the covered entity's qualified applicants or employees with disabilities to the discrimination prohibited by this title. Such relationships include a relationship with an employment or referral agency, labor union, an organization providing fringe benefits to an employee of the covered entity, or an organization providing training and apprenticeship programs.

The phrase "the covered entity's" qualified applicants or employees was added to the Act in order to avoid any possible misunderstanding regarding this provision. This provision is intended to apply to a situation in which a covered entity enters into a contractual relationship with another entity, which has the effect of subjecting the first entity's *own* employees or applicants to discrimination. It does not apply to a situation in which a covered entity enters into a contractual relationship with another entity that is engaging in some form of discrimiantion against its own employees or applicants. The first entity has no liability in such a situation for the discrimination of the second entity. (Of course, the second entity may be separately liable to suit under this Act.)

Section 102(b)(2) further provides that a covered entity may not participate in a contractual relationship that has the effect of subjecting the covered entity's qualified applicants or employees *"to the discrimination prohibited by this title."* The basic intent of this provision is that any entity may not do through a contractual provision what it may not do directly. The type of discrimination prohibited is that "prohibited by this title"—i.e., that set forth in the substantive provisions of the bill. Thus, if the contractual relationship having the effect of discrimination occurs in any of the areas covered by the Act, for example, in hiring, training or promotion of employees, to the extent that the requirement of reasonable accommodation, and the limitation of "undue hardship," applies if the entity were acting directly, these requirements and limitations would apply as well when the entity is acting in a contractual relationship. The contractual relationship adds no new obligations in and of itself beyond the obligations imposed by the Act, nor does it reduce the obligations imposed by the Act.

For example, assume that an employer is seeking to contract with a company to provide training for the first entity's employees. Whatever responsibilities and limitations of reasonable accommodation that would apply to the employer if it provided the training itself would apply as well in the contractual situation. Thus, if the training company were planning to hold its program in a physically inaccessible location, thus making it impossible for an employee who used a wheelchair to attend the program, the employer would have a duty to consider various reasonable accommodations. These *could* include, for example, (1) asking the training company to identify other sites for the training that are accessible; (2) identifying other training companies that use accessible sites; (3) paying to have the training company train the disabled employee (either one-on-one or with other employees who may have missed the training for other reasons), or any other accommodation that might result in making the training available to the employee.

If no accommodations were available that would make the training program accessible, or if the only options that were available would impose an undue hardship on the employer, the employer would then have met its requirements under the Act. The Committee anticipates, however, that certainly some form of accommodation could be made such that the disabled employee would not be completely precluded from receiving training that the employer may consider necessary.

As a further example, assume that an employer contracts with a hotel for a conference held for the employer's employees. Under the Act, the employer has an affirmative duty to investigate the accessibility of a location that it plans to use for its own employees. Suggested approaches for determining accessibility would be for the employer to check out the hotel first-hand, if possible, or to ask a local disability group to check out the hotel. In any event, the employer can always protect itself in such situations by simply ensuring that the contract with the hotel specifies that all rooms to be used for the conference, including the exhibit and meeting rooms, be accessible in accordance with applicable standards. If the hotel breaches this accessibility provision, the hotel will be liable to the employer for the cost of any accommodation needed to provide access to the disabled individual during the conference, as well as for any other costs accrued by the employer. Placing a duty on the employer to investigate accessibility of places that it contracts for will, in all likelihood, be the impetus for ensuring that these types of contractual provisions become commonplace in our society.

Finally, as a last example, assume that a store is located in an inaccessible mall, and a disabled person wished to apply for a job in the store. The following approach would be followed. The store should take the person's application and determine if the person is qualified for the job. The question then becomes whether, with reasonable accommodation, the person can get to the job site. This reasonable accommodation, of course, has an undue hardship limitation.

Section 102(b)(2)(3) of the legislation specifies that "discrimination" includes utilizing standards, criteria, or methods of administration that have the effect of discrimination on the basis of disability or that perpetuate the discrimination of others who are subject to common administrative control.

Paragraphs 102(b)(2) and (3) of the legislation are derived from provisions that had been part of H.R. 2273 as originally introduced (which has now been superseded by the Substitute) and from general forms of discrimination that were set out in regulations implementing section 504 of the Rehabilitation Act of 1973 (see 45 CFR Part 84). The substitute, therefore, should not be construed as departing in any way from the concepts included in the original "general prohibitions" title of the ADA, as these concepts have been subsumed within the provisions of the subsequent titles of the legislation. Further, this legislation in no way is intended to diminish the continued viability of programs implementing the Javits-Wagner-O'Day Act.

Subparagraph 102(b)(3) incorporates a disparate impact standard to ensure that the legislative mandate to end discrimination does not ring hollow. This standard is consistent with the interpretation of section 504 by the U.S. Supreme Court in *Alexander* v. *Choate*, 469 U.S. 287 (1985). The Court in *Choate* explained that members of Congress made numerous statements during passage of section 504 regarding eliminating architectural barriers, providing access to transportation, and eliminating discriminatory effects of job qualification procedures. The Court then noted: "These statements would ring hollow if the resulting legislation could not rectify the harms resulting from action that discrimination by effect as well as by design." 469 U.S., at 297.

Section 102(b)(4) of the legislation specifies that "discrimination" includes excluding or otherwise denying equal jobs or benefits to a qualified individual because of the known disability of an individual with whom the qualified individual is known to have a relationship or association.

Thus, assume, for example that an applicant applies for a job and discloses to the employer that his or her spouse has a disability. The employer believes the applicant is qualified for the job. The employer, however, assuming without foundation that the applicant will have to miss work or frequently leave work early or both, in order to care for his or her spouse, declines to hire the individual for such reasons. Such a refusal is prohibited by this subparagraph.

In contrast, assume that the employer hires the applicant. If he or she violates a neutral employer policy concerning attendance or tardiness, he or she may be dismissed even if the reason for the absence or tardiness is to care for the spouse. The employer need not provide any accommodation to the nondisabled employee. The individuals covered under this section are any individuals who are discriminated against because of their known association with an individual with a disability. This protection is not limited to those who have a familial relationship with the individual. Indeed, one of the amendments defeated by the Committee was an amendment that would have limited the provision to only certain associations and relationships.

Section 102(b)(5)(a) of the legislation specifies that discrimination includes the failure by a covered entity to make reasonable accommodations to the known physical or mental limitations of an otherwise qualified individual with a disability who is an applicant or employee, unless such entity can demonstrate that the accommodation would impose an undue hardship on the operation of its business.

The duty to make reasonable accommodations applies to all employment decisions, not simply to hiring and promotion decisions. This duty has been included as a form of non-discrimination on the basis of disability for almost fifteen years under section 501 and section 504 of the Rehabilitation Act of 1973 and under the nondiscrimination section of the regulations implementing section 503 of that Act.

The term "reasonable accommodation" is defined in section 101(8) of the legislation. The definition includes illustrations of accommodations that may be required in appropriate circumstances. The list is not meant to be exhaustive; rather, it is intended to provide general guidance about the nature of the obligation. Furthermore, the list is not meant to suggest that employers must follow all of the actions listed in each particular case. Rather, the decision as to what reasonable accommodation is appropriate is one which must be determined based on the particular facts of the individual case. This fact-specific, case-by-case approach to providing reasonable accommodations is generally consistent with interpretations of this phrase under sections 501, 503, and 504 of the Rehabilitation Act of 1973.

The first illustration of a reasonable accommodation included in the legislation is making existing facilities used by an employee readily accessible to and usable by an individual with a disability.

The legislation also specifies, as examples of reasonable accommodation, job restructuring, part-time or modified work schedules and reassignment to a vacant position.

Job restructuring means modifying a job so that a person with a disability can perform the essential functions of the position. Barriers to performance may be removed by eliminating nonessential elements of the job; redelegating assignments; exchanging assignments with another employee; and redesigning procedures for task accomplishment.

Part-time or modified work schedules can provide useful accommodations. Some people with disabilities are denied employment opportunities because they cannot work a standard schedule. For example, persons who need medical treatment may benefit from flexible or adjusted work schedules. A person with epilepsy may require constant shifts rather than rotation from day to night shifts. Other persons who may require modified work schedules are persons with mobility impairments who depend on a public transportation system that is not currently fully accessible. Allowing constant shifts or modified work schedules provide ways of accommodating an individual with a disability to allow him or her to do the same job as a nondisabled individual. Reasonable accommodation may also include providing additional unpaid leave days, if such provision does not result in an undue hardship for the employer.

Reasonable accommodation may also include reassignment to a vacant position. If an employee, because of disability, can no longer perform the essential functions of the job that she or he has held, a transfer to another vacant job for which the person is qualified may prevent the employee from being out of work and employer from losing a valuable worker. Efforts should be made, however, to accommodate an employee in the position that he or she was hired to fill before reassignment is considered. The Committee also wishes to make clear the reassignment need only be to a vacant position—"bumping" another employee out of a position to create a vacancy is not required.

The section 504 regulations provide that "a recipient's obligation to comply with this subpart [employment] is not affected by any inconsistent term of any collective bargaining agreement to which it is a party." 45 CFR 84.11(c). The policy also applies to the ADA. Thus, an employer cannot use a collective bargaining agreement to accomplish what it otherwise would be prohibited from doing under this Act. For example, a collective bargaining agreement that contained physical criteria which caused a disparate impact on individuals with disabilities and were not job-related and consistent with business necessity could be challenged under this Act.

The collective bargaining agreement could be relevant, however, in determining whether a given accomodation is reasonable. For example, if a collective bargaining agreement reserves certain jobs for employees with a given amount of seniority, it may be considered as a factor in determining whether it is a reasonable accommodation to assign an employee with a disability without seniority to the job. However, the agreement would not be determinative on the issue.

In other situations, the relevant question would be whether the collective bargaining agreement articulates legitimate business criteria. For example, if the collective bargaining agreement lists job duties, such a list may be taken into account in determining whether a given task is an essential function of the job. Again, however, the agreement would not be determinative on the issue.

Conflicts between provisions of a collective bargaining agreement and an employer's duty to provide reasonable accommodations may be avoided by ensuring that agreements negotiated after the effective date of this title contain a provision permitting the employer to take all actions necessary to comply with this legislation.

Additional forms of reasonable accommodation included in the legislation are acquisition or modification of equipment or devices. The Job Accommodation Network (JAN), operated by the President's Committee on Employment of People with Disabilities, reports that it is possible to accommodate many employees with relatively simple and inexpensive assistive technology. Since the service began in 1984, the Job Accommodation Network has accumulated a total of 16,585 available solutions from which businesses may draw. It currently handles about 500 cases per month. The toll free phone number for JAN is 800-526-7234.

For blind and visually-impaired persons, reasonable accommodations may include adaptive hardware and software for computers, electronics visual aids, braille devices, talking calculators, magnifiers, audio recordings and brailled material.

For persons with hearing impairments, reasonable accommodations may include providing telephone handset amplifiers, telephones compatible with hearing aids, and telecommunication devices for deaf persons. For persons with limited physical dexterity, this may include goose neck telephone headsets, mechanical page turners, and raised or lowered furniture.

The Committee wishes to make it clear that personal use items, such as hearing aids or eyeglasses, are not included in this provision, and therefore are not required to be provided by employers as reasonable accommodations.

The legislation also lists appropriate adjustment or modifications of examinations, training materials or policies. For example, training sessions should be offered at accessible locations and materials should be made available in an accessible format.

The Committee wishes to emphasize again that this legislation does not require an employer to make any modification, adjustment, or change in a job description or policy that an employer can demonstrate would fundamentally alter the essential functions of the job in question.

The legislation also explicitly includes provision of qualified readers or interpreters as examples of reasonable accommodations. As with readers and interpreters, the provision of an attendant to assist a person with a disability during parts of the workday may be a reasonable accommodation depending on the circumstances of the individual case. Attendants may, for example, be required for traveling and other job-related functions. This issue must be dealt with on a case-by-case basis to determine whether an undue hardship is created by providing attendants.

The Committee wishes to clarify the employer's obligation to notify applicants and employees of the employer's obligation to provide a reasonable accommodation, who is entitled to an accommodation, when the duty to provide a reasonable accommodation is triggered, and the process of determining the appropriate accommodation.

First, pursuant to section 105 of the legislation, the employer must notify applicants and employees of its obligation under this legislation to make reasonable accommodations.

Second, section 102(b)(5)(a) of the legislation requires that reasonable accommodation be made for "an otherwise qualifed individual who is an applicant or employee . . ." The term "otherwise qualified" is used in this particular provision in order to clearly describe a person with a disability who meets all of an employer's job-related selection criteria except those criteria that he or she cannot meet because of a disability, but which could be met with a reasonable accommodation. See 45 CFR 84.12(a). This individual, who is "otherwise qualified" for the job, must then be offered the reasonable accommodation that will then make the individual a "qualified individual with a disability" under this title.

For example, if a law firm requires that all incoming lawyers have graduated from an accredited law school and have passed the bar examination, the law firm need not provide an accommodation to an individual with a visual impairment who has not yet met these selection criteria. That individual is not yet eligible for a reasonable accommodation because he or she is not otherwise qualifed for the position.

On the other hand, if the individual graduated from an accredited law school and passed a bar examination (assuming that these are the only selection criteria), the person is "otherwise qualified" and the law firm would be required to provide a reasonable accommodation to the employee's visual impairment, such as a reader, that would enable the employee to perform the essential functions of the job as an attorney, unless the necessary accommodation would impose an undue hardship.

If, to continue the example, a part-time reader can be provided as a reasonable accommodation that permits the individual to perform the essential functions of the attorney position without imposing an undue hardship, the person is a "qualified individual with a disability" as defined in section 101(7) of the legislation and it would be unlawful not to hire the individual because of his or her visual impairment.

Third, the legislation clearly states that employers are obligated to make reasonable accommodations only to the "known" physical or mental limitations of an otherwise qualified individual with a disability. Thus, the duty to accommodate is generally triggered by a request from an applicant for employment or an employee. Of course, if a person with a known disability is having difficulty performing his or her job, it would be permissible for the employer to discuss the possibility of a reasonable accommodation with the employee.

In the absence of a request, it would be inappropriate to provide an accommodation, especially where is could impact adversely on the individual. For example, it would be unlawful to transfer unilaterally a person with HIV infection from a job as a teacher to a job where such person has no contact with students. See, e.g., *Chalk* v. *United States District Court*, 840 F.2d 701 (9th Cir. 1988).

The Committee believes that the reasonable accommodation requirement is best understood as a process in which barriers to a particular individual's equal employment opportunity are removed. The accommodation process focuses on the needs of a particular individual in relation to problems in performance of a particular job because of a physical or mental impairment. A problem-solving approach should be used to identify the particular tasks or aspects of the work environment that limit performance and to identify possible accommodations that will result in a meaningful equal opportunity for the individual with a disability.

The Committee suggests that, after a request for an accommodation has been made, employers first will consult with and involve the individual with a disability in deciding on the appropriate accommodation. The Committee recognizes that people with disabilities may have a lifetime of experience identifying ways to accomplish tasks differently in many different circumstances. Frequently, therefore, the person with a disability will know exactly what accommodation he or she will need to perform successfully in a particular job. And, just as frequently, the employee or applicant's suggested accommodation is simpler and less expensive than the accommodation the employer might have devised, resulting in the employer and the employee mutually benefiting from the consultation.

The Committee also recognizes that there are times when the appropriate accommodation is not obvious to the employeer or applicant because such individual is not familiar in detail with the manner in which the job in question is performed and the employer is not familiar enough with the individual's disability to identify the appropriate accommodation. In such circumstances, the Committee believes the employer should consider four informal steps to identify and provide an appropriate accommodation.

The first informal step is to identify barriers to equal opportunity. This includes identifying and distinguishing between essential and nonessential job tasks and aspects of the work environment of the relevant position(s). With the cooperation of the individual with a disability, the employer must also identify the abilities and limitations of the individual with a disability for whom the accommodation is being provided. The employer then should identify job tasks or work environment that limit the individual's effectiveness or prevent performance.

Having identified the barriers to job performance caused by the disability, the second informal step is to identify possible accommodations. As noted above, the search for possible accommodations must begin with consulting the individual with a disability. Other resources to consult include the appropriate State Vocational Rehabilitation Services agency, the Job Accommodation Network operated by the President's Committee on Employment of People With Disabilities, or other employers.

Having identified one or more possible accommodations, the third informal step is to assess the reasonableness of each in terms of effectiveness and equal opportunity. A reasonable accommodation should be effective for the employee. Factors to be considered include the reliability of the accommodation and whether it can be provided in a timely manner.

The Committee believes strongly that a reasonable accommodation should provide a meaningful equal employment opportunity. Meaningful equal employment opportunity means an opportunity to attain the same level of performance as is available to nondisabled employees having similar skills and abilities.

The final informal step is to implement the accommodation that is most appropriate for the employee and the employer and that does not impose an undue hardship on the employer's operation or to permit the employee to provide his or her own accommodation if it does impose an undue hardship. In situations where there are two effective accommodations, the employer may choose the accommodation that is less expensive or easier for the employer to implement as long as the selected accommodation provides meaningful equal employment opportunity.

The expressed choice of the applicant or employee shall be given primary consideration unless another effective accommodation exists that would provide a meaningful equal employment opportunity or unless the accommodation requested would pose an undue hardship.

The Committee wishes to note that many individuals with disabilities to not require any reasonable accommodation whatsoever. The only change that needs to be made for such individuals is a change in attitude regarding employment of people with disabilities.

The term "undue hardship" is defined in section 101(9) to mean an action requiring significant difficulty or expense, i.e., an action that is unduly costly, extensive, substantial, disruptive, or that will fundamentally alter the nature of the program. In determining whether a particular accommodation would impose an undue hardship on the operation of the covered entity's business, i.e., require significant difficulty or expense, factors to be considered include: (1) the overall size of the business of the covered entity with respect to number of employees, the number, type, and location of facilities operated by the covered entity, the overall financial resources of the covered entity and the financial resources of its covered facility or facilities involved in the provision of the reasonable accommodation; (2) the type of operation or operations maintained by the covered entity, including the composition and structure of the entity's workforce, in terms of such factors as functions of the workforce, geographic separateness, and administrative relationship, to the extent that such factors contribute to a reasonable determination of undue hardship; and (3) the nature and cost of the accommodation needed under the Act.

This provision is derived from and should be applied consistently with interpretations by Federal agencies applying the term set forth in regulations implementing sections 501 and 504 of the Rehabilitation Act of 1973.

The weight given to each factor in making the determination as to whether a reasonable accommodation constitutes an "undue hardship" will vary depending on the facts of a particular situation and turns on the nature and cost of the accommodation in relation to the employer's resources and operations. In explaining the "undue hardship" provision, the Department of Health, Education, and Welfare explained in the appendix accompanying the section 504 regulations (42 Fed. Reg. 22676 et seq., May 4, 1977):

> Thus, a small day-care center might not be required to expend more than a nominal sum, such as that necessary to equip a telephone for use by a secretary with impaired hearing, but a large school district might be required to make available a teacher's aide to a blind applicant for a teaching job. Further, it might be considered reasonable to require a State welfare agency to accommodate a deaf employee by providing an interpreter, while it would constitute an undue hardship to impose that requirement on a provider of foster home care services.

The mere fact that an employer is a large entity for the purposes of factor (1), should not be construed to negate the importance of factors (2) and (3) in determining the existence of undue hardship.

The Committee wishes to make it clear that the principles enunciated by the Supreme Court in *TWA* v. *Hardison*, U.S. 63 (1977) are not applicable to this legislation. In *Hardison*, the Supreme Court concluded that under title VII of the Civil Rights Act of 1964 an employer need not accommodate persons with religious beliefs if the accommodation would require more than a *de minimus* cost for the employer. By contrast, under the ADA, reasonable accommodations must be provided unless they rise to the level of "requiring significant difficulty or expense" on the part of the employer, in light of the factors noted in the statute—i.e., a significantly higher standard than that articulated in *Hardison*. This higher standard is necessary in light of the crucial role that reasonable accommodation plays in ensuring meaningful employment opportunities for people with disabilities.

Finally, the Committee wishes to make clear that even if there is a determination that a particular reasonable accommodation will result in an undue hardship, the employer must pay for that portion of the accommodation that would not cause an undue hardship if, for example, the State Vocational Rehabilitation Agency, other similar agency, or the employee or applicant pays for the remainder of the cost of the accommodation.

The specific factors added to section 101(9)(B) reflect concerns that were raised regarding covered entities that may operate separate, local facilities across the country. The addition of these factors reflects the Committee's intent that, in determining whether a reasonable accommodation would constitute an undue hardship, courts should look at and may weigh the financial resources and operations of those local facilities that are being asked to provide an accommodation, because the financial resources of local facilities of a covered entity may vary significantly. The factors further reflect the Committee's intent that, in determining whether a reasonable accommodation would constitute an undue hardship, the financial resources of the larger covered entity, and any of those financial resources available to the local covered facility from the larger covered entity, should be looked at and may be weighed by the court as well. As a general matter, and availability of financial resources from the covered entity to the facility should be considered in light of the interrelationship between the facility and the covered entity.

The additional factors also reflect the Committee's intent that, in considering the composition and structure of a covered entity's workforce, a court should consider such factors as the functions of the workforce, geographic separateness, and administrative relationship of such workforce to the covered entity, to the extent that such factors contribute to a reasonable determination of undue hardship. The Committee expects that a court will look at the practical realities of the situation, to determine how the workforce and resources of a covered entity and the facility interrelate. For example, a court may consider what other services and resources the covered entity provides to the local facility in the area of employee benefits, services, and hiring in determining what resources are reasonably available to the facility.

The Committee also intends that the factors set forth in 101(9)(B) are not exclusive and that in appropriate circumstances courts and the administrative agencies may use other relevant factors whether or not those factors are identified in implementing regulations. For example, the number of employees or applicants potentially benefiting from an accommodation may be a relevant consideration in determining undue hardship where use by more than one person with a disability would reduce the relative financial impact of an accommodation. For example, a ramp installed for a new employee who uses a wheelchair not only benefits that employee but will also benefit mobility-impaired applicants and employees in the future. Assistive devices for hearing and visually-impaired persons may be shared by more than one employee so long as each employee is not denied a meaningful equal employment opportunity caused by limited access to the needed accommodation. On the other hand, the Committee wishes to make clear that the fact that an accommodation is used by only one employee should not be used as a negative factor counting in favor of a finding of undue hardship. By its very nature, an accommodation should respond to a particular individual's needs in relation to performance of a specific job at a specific location. It is not the Committee's intent that the individualized nature of the accommodation process be undermined when considering whether other employees may be benefited by an accommodation requested by a single individual.

A second factor the Committee believes should be considered is the availability of outside funding to pay for accommodations. Such Such funding may be available from a State vocational rehabilitation agency, or Federal, State or local tax deductions or tax credits. The Committee strongly believes that a covered entity should not be entitled to assert that the cost of an accommodation would impose an undue hardship on its business when it receives or is eligible to receive monies from an external source that would pay the entire cost of an accommodation. To the extent such monies pay or would pay for only part of the cost of an accommodation, only the non-reimbursed portion of the cost of an accommodation—the final net cost to the entity—may be considered in determining undue hardship. However, the lack of outside funding is not a defense to the obligation to provide a reasonable accommodation.

Finally, the Committee wishes to make it clear that even if there is a determination that a particular reasonable accommodation will result in an undue hardship, the employer must pay for the portion of the accommodation that would not cause an undue hardship if, for example, the applicant or employee pays for the remainder of the cost of the accommodation.

The second factor noted in subsection 101(9), for determining whether or not an accommodation would impose an undue hardship, focuses on the type of operation maintained by the entity. This would include, for example, consideration of the special circumstances incurred on certain types of temporary worksites common in the construction industry. For example, under some circumstances, it might fundamentally alter the nature of a construction site or be unduly costly to implement or maintain physical accessibility, for an applicant or employee who uses a wheelchair if, for example, the site's terrain and building structure change daily as construction progresses. The Committee recognizes that some accommodations that can easily be made in an office setting may impose an undue hardship in other settings. While the Committee believes that undue hardship standards may be developed on an industry by industry basis where particular types of operations common to an industry present special circumstances, the ultimate determination is a factual one which must be made on a case-by-case basis.

Section 102(b)(5)(b) of the legislation specifies that discrimination includes the denial of employment opportunities by a covered entity to an applicant or employee who is an otherwise qualified individual with a disability if the basis for such denial is because of the need of the individual for reasonable accommodation. This provision is derived directly from regulations issued under section 504. See 42 CFR 84.12(d).

The Section 504 regulation, and this provision, do not include the phrase "when such reasonable accommodation would not impose an undue hardship on such covered entity." However, it has always been understood under Section 504, and the Committee wishes to emphasize that this is its understanding under this Act, that the objection on the part of the covered *entity* to make a reasonable accommodation applies *only* when such accommodation would not impose an undue hardship (see section 102(b)(5)(a)). Because concerns have been raised that this provision could be misinterpreted to mean that there might be circumstances in which a covered entity would be required to provide a reasonable accommodation that *would* impose an undue hardship, the Committee wishes to emphasize that this has never been the case under Section 504 and is not the case under this Act. In addition, to eliminate any possible misunderstanding, the Committee has renumbered these provisions to read as subsets of the same provision, so that it is clear that the undue hardship limitation of 102(b)(5)(a) applies to 102(b), when the covered entity is expected to make the reasonable accommodation.

This provision, therefore should be applied just as it is applied under Section 504. That is, an employer cannot reject an applicant with a disability who requires a reasonable accommodation which, if provided by the covered entity, would not have imposed an undue hardship. In addition, even where an entity is not required under the law to pay for a reasonable accommodation, because it would have imposed an undue harship on the entity, the entity cannot refuse to hire a qualified applicant where the applicant is willing to make his or her own arrangements for the provision of such an accommodation, if the reason for the rejection is the need or the presence of the accommodation.

Section 102(b)(6) of the legislation specifies that discrimination includes using qualification standards, employment tests or other selection criteria that screen out or tend to screen out an individual with a disability or a class of individuals with disabilities unless the standard, test or other selection criteria, as used by the covered entity, is shown to be job-related for the position in question and is consistent with business necessity.

As in Section 504, the ADA adopts a framework for employment selection procedures which is designed to assure that persons with disabilities are not excluded from job opportunities unless they are actually unable to do the job. The requirement that job criteria actually measure the ability required by the job is a critical protection against discrimination based on disability. As was made strikingly clear during the hearings on the ADA, stereotypes and misconceptions about the abilities, or more correctly the inabilities, of persons with disabilities are still pervasive today. Every government and private study on the issue has shown that employers disfavor hiring persons with disabilities because of stereotypes, discomfort, misconceptions, and unfounded fears about increased costs and decreased productivity.

The three pivotal provisions to assure a fit between job criteria and an applicant's actual ability to do the job are:

(1) the requirement that individuals with disabilities not be disqualified because of their inability to perform non-essential or marginal functions of the job;

(2) the requirement that any selection criteria that screen out or tend to screen out individuals with disabilities be job-related and consistent with business necessity; and

(3) the requirement to provide reasonable accommodation to assist individuals with disabilities to meet legitimate criteria.

These three legal requirements, which are incorporated in sections 102(b)(5) and (6) of the legislation, work together to provide a high degree of protection to eliminate the current pervasive bias against employing persons with disabilities in the selection process.

The interrelationship of these requirements in the selection procedure is as follows: If a person with a disability applies for a job and meets all selection criteria except one that he or she cannot meet because of a disability, the criterion must concern an essential, non-marginal aspect of the job, and be carefully tailored to measure the person's actual ability to do this essential function of the job. If the criterion meets this test, it is nondiscriminatory on its face and it is otherwise lawful under the legislation. However, the criterion may not be used to exclude an applicant with a disability if the criterion can be satisfied by the applicant with a reasonable accommodation. A reasonable accommodation may entail adopting an alternative, less discriminatory criterion.

For example, in *Stutts* v. *Freeman*, 694 F.2d 666 (11th Cir. 1983), Mr. Stutts, who was dyslexic, was denied the job of heavy equipment operator because he could not pass a written test used by the employer for entering the training program, which was a prerequisite for the job. The written test had a disparate impact on persons with dyslexia. The legal issues presented were whether the written test for admission to the training program, and the reading requirements of the training program itself, were necessary criteria for the heavy equipment operator job. If the answers to both those questions were yes, the question then became whether a reasonable accommodation could enable the person with a disability to meet the employment criteria at issue.

In *Stutts*, the record reflected that Mr. Stutts could perform the job of heavy equipment operator. As stated by the court, "Indeed, everyone involved in this case seems to concede that Mr. Stutts would have no problems doing the job but rather may experience difficulty with the outside reading requirements of the training program. If selected, this obstacle may be overcome by Mr. Stutts obtaining the assistance of someone to act as a 'reader'. . . . [T]o eliminate Mr. Stutts without implementing an alternative test (oral) administered by outside professionals of TVA's staff or by failing to adjust the entry requirements to accommodate his dyslexia, TVA has failed to comply with the statute." 694 F.2d at 669, n. 3.

Hence, the requirement that job selection procedures be "job-related and consistent with business necessity" underscores the need to examine all selection criteria to assure that they not only provide an accurate measure of an applicant's actual ability to perform the essential functions of the job, but that even if they do provide such a measure, a disabled applicant is offered a "reasonable accommodation" to meet the criteria that relate to the functions of the job at issue. It is critical that paternalistic concerns for the disabled person's own safety not be used to disqualify an otherwise qualified applicant. As noted, these requirements are incorporated in the legislation in sections 102(b)(1)(5) and (6).

The Committee intends that the burden of proof under each of the aforementioned sections be construed in the same manner in which parallel agency provisions are construed under Section 504 of the Rehabilitation Act as of June 4, 1989. See, e.g., 45 C.F.R. 84.13 (Department of Health and Human Services); 29 C.F.R. 1613.705 (Equal Employment Opportunity Commission); 28 C.F.R. 42.512 (Department of Justice); 29 C.F.R. 32.14 (Department of Labor).

Section 102(b)(7) of the legislation specifies that discrimination includes failing to select and administer tests so as best to ensure that, when the test is administered to an applicant or employee with a disability that impairs sensory, manual, or speaking skills, the test results accurately reflect the individual's job skills, aptitude, or whatever other factor the test purports to measure, rather than reflecting the individual's impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure).

Section 102(c) of the legislation specifies that the prohibition against discrimination in section 101(a) applies to medical examinations and inquiries. Section 102(c)(2)(A) prohibits an employer from making any inquiries as to the existence or nature of an applicant's disability prior to an offer of employment. Section 102(c)(2)(B) makes it clear that an employer may make pre-employment inquiries into the ability of an applicant to perform job-related functions. Historically, employment application forms and employment interviews requested information concerning an applicant's physical or mental condition. This information was often used to exclude applicants with disabilities—particularly those with so-called hidden disabilities such as epilepsy, diabetes, emotional illness, heart disease and cancer—before their ability to perform the job was even evaluated.

In order to assure that misconceptions do not bias the employment selection process, the legislation sets forth a process which begins with a prohibition on pre-offer medical examinations or inquiries. The process established by the legislation parallels the regulations issued under section 504 of the Rehabilitation Act of 1973.

The legislation prohibits any identification of a disability by inquiry or examination at the pre-offer stage. Employers may ask questions which relate to the applicant's ability to perform job-related functions, but may not ask questions in terms of disability. For example, an employer may ask whether the applicant has a driver's license, if driving is an essential job function, but may not ask whether the applicant has a visual disability. This prohibition against inquiries regarding disability is critical to assure that bias does not enter the selection process.

The only exception to making medical inquiries is narrow. The legislation allows covered entities to require medical examinations after a conditional job offer has been made, so long as they are given to all entering employees in a particular category, the results of the examinations are kept confidential, and the results of such examinations are not used to discriminate against an individual with a disability unless such results make the individual not qualified for the job. As noted, the examinations must be given to all employees in a particular job category. For example, an entity can test all police officers rather than all city employees, or all construction workers rather than all construction company employees. This exception to the general rule meets the employer's need to discover possible disabilities that do, in fact, limit the person's ability to do the job, i.e., those that are job-related and consistent with business necessity.

A candidate, undergoing a post-offer, pre-employment medical examination may not be excluded, for example, solely on the basis of an abnormality on an x-ray. However, if the examining physician found that there was high probability of substantial harm if the candidate performed the particular functions of the job in question, the employer could reject the candidate, unless the employer could make a reasonable accommodation to the candidate's condition that would avert such harm and such accommodation would not cause an undue hardship.

However, the Committee would like to stress three important points. First, the assessment that there exists a high probability of substantial, harm must be strictly based on valid medical analyses. For example, back x-rays which reveal anomalies in asymptomatic persons usually have largely low predictive value. See Rockey, Fantel, and Omenn, *Discriminatory Aspects of Pre-employment Screening; Low Back x-ray Examination in the Railroad Industry*, 5 Am. J.L. of Med. 197, (1979). Therefore, employers should be diligent in assuring that their examining physicians make assessments based on testing measures that actually and reliably predict the substantial, imminent degree of harm required.

Second, any determination by a company physician can be challenged by evidence from the complainant's physician. Company doctors often are unfamiliar with certain disabilities and assume that there are barriers to employment which, in fact, do not exist. The complainant's own physician often has more knowledge about the effects of the disability on the individual being considered. An employer is not shielded from liability merely by a statement from the employer's physician that a threat of imminent, substantial harm exists by hiring an applicant with a particular disability.

Third, employment decisions must not be based on paternalistic views about what is best for a person with a disability. Paternalism is perhaps the most pervasive form of discrimination for people with disabilities and has been a major barrier to such individuals. A physical or mental employment criterion can be used to disqualify a person with a disability only if has a direct impact on the ability of the person to do their actual job duties without imminent, substantial threat of harm. Generalized fear about risks from the employment environment, such as exacerbation of the disability caused by stress, cannot be used by an employer to disqualify a person with a disability. See, e.g., *Bentivenga* v. *U.S. Department of Labor,* 694 F.2d 623 (1982).

The Committee wishes to note the medical information obtained in an examination pursuant to 102(c)(3) may be used by the employer as baseline data to assist the employer in measuring physical changes attributable to on-the-job exposures.

Section 102(c)(4) prohibits medical exams of employees unless job-related and consistent with business necessity. Certain jobs require periodic physicals in order to determine fitness for duty. For example, Federal safety regulations require bus and truck drivers to have a medical exam at least biennially. In certain industries, such as air transportation, physical qualifications for some employees are critical. Those employees, for example, pilots, may have to meet medical standards established by Federal, State or local law or regulation, or otherwise fulfill requirements for obtaining a medical certificate, as a prerequisite for employment. In other instances, because a particular job function may have a significant impact on public safety, e.g. flight attendants, an employee's state of health is important in establishing job qualifications, even though a medical certificate may not be required by law. The Committee does not intend for this Act to override any medical standards or requirements established by Federal, State or local law as a prerequisite for performing a particular job, if the medical standards are consistent with this Act (or in the case of federal standards, if they are consistent with section 504)—that is, if they are job-related and consistent with business necessity. See, e.g., *Strathie* v. *Department of Transportation,* 716 F.2d 227 (3d Cir. 1983).

There are other instances in which medical examinations of employees may be permitted, provided the results of those examinations are not used to limit an employee's eligibility for emplcyer-provided health insurance.

For example, several health standards promulgated pursuant to the Occupational Safety and Health Act of 1970 (29 U.S.C. 655) and the Federal Coal Mine Health and Safety Act of 1969 and the amendments thereto adopted in 1977 (30 U.S.C. 801 et seq.) require that employees exposed to certain toxic and hazardous substances be medically surveyed at specified intervals to determine if the exposures to those substances have had any negative effect on the employees.

The OSHA lead standard, for example, requires that employees exposed to lead be tested periodically to determine the lead level in the employee's blood. If the test shows that lead levels exceed the permissible norm, the employee must be transferred from the exposed workplace to another worksite until the lead level falls below the permissible level. At that point, the employee may return to the original work station. It is the Committee's intention that these OSHA standards are valid under this section.

A growing number of employers today are offering voluntary wellness programs in the workplace. These programs often include medical screening for high blood pressure, weight control, cancer detection, and the like. As long as the programs are voluntary and the medical records are maintained in a confidential manner and not used for the purpose of limiting health insurance eligibility or of preventing occupational advancement, these activities would fall within the purview of accepted activities.

Once an employee is on the job, the actual performance on the job is, of course, the best measure of the employee's ability to do the job. When a need arises to question the continued ability of a person to do the job, the employer may make inquiries, and may require medical exams that are job-related and consistent with business necessity. The concept of "job-related and consistent with business necessity" has been outlined elsewhere in the report under the discussion of section 102(b)(6) of the legislation.

An inquiry or medical examination that is not job-related serves no legitimate employer purpose, but simply serves to stigmatize the person with a disability. For example, if an employee starts to lose a significant amount of hair, the employer should not be able to require the person to be tested for cancer unless such testing is job-related. Testimony before the Committee indicated there still exists widespread irrational prejudice against persons with cancer. While the employer might argue that it does not intend to penalize the individual, the individual with cancer may object merely to being identified, independent of the consequences. As was made abundantly clear before the Committee, being identified as disabled often carries both blatant and subtle stigma. An employer's legitimate needs will be met by allowing those medical inquiries and examinations which are job-related and consistent with business necessity.

Consistent with the section in the legislation pertaining to pre-employment inquiries, it is the Committee's intent that a covered entity may invite applicants for employment to indicate voluntarily whether and to what extent they have a disability under the following circumstances only: (1) when a covered entity is taking remedial action to correct the effects of past discrimination, (2) when a recipient is taking voluntary action to overcome the effects of conditions that resulted in limited employment opportunities, or (3) when a recipient is taking affirmative action pursuant to section 503 of the Rehabilitation Act of 1973, provided that:

(a) the covered entity states clearly on any written questionnaire used for this purpose or makes clear orally (if no written questionnaire is used) that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary or affirmative action efforts, and

(b) The covered entity states clearly that the information is being requested on a voluntary basis, that it will be kept confidential, that refusal to provide it will not subject the applicant or employee to any adverse treatment, and that it will be used only in accordance with this title.

Defenses

Section 103(a) of the legislation specifies that, in general, it may be a defense to a charge of discrimination that an alleged application of qualification standards, tests, or selection criteria that screen out or tend to screen out or otherwise deny a job or benefit to an individual with a disability has been shown to be job-related and consistent with business necessity, and such performance cannot be accomplished by reasonable accommodation as required under this title. The Committee has added the phrase "as required under this title," following the term "reasonable accommodation," to eliminate any possible misunderstanding that an entity might be required to provide a reasonable accommodation even if it imposed an undue hardship. The phrase "under this title," therefore, refers to a reasonable accommodation that would not impose an undue hardship on the covered entity, if the covered entity provided the accommodation, or a reasonable accommodation that the applicant or employee provided on his or her own, if the provision of such an accommodation would have imposed an undue hardship on the covered entity.

With respect to contagious diseases or infections, section 103(b) of the legislation specifies that the term "qualification standards" may include a requirement that an individual with a currently contagious disease or infection shall not pose a direct threat to the health or safety of other individuals in the workplace. Under this qualification standard, for a person with a currently contagious disease or infection to constitute a direct threat to the health or safety or others, the person must pose a significant risk of transmitting the infection to others in the workplace which cannot be eliminated by reasonable accommodation. See *School Board of Nassau County* v. *Arline*, 480 U.S. 273, 287, note 16. Thus, the term "direct threat" is meant to conncte the full standard set forth in the *Arline* decision.

With respect to religious entities, section 103(c)(1) of the legislation specifies that title I does not prohibit a religious corporation, association, educational institution, or society from giving preference in employment to individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its activities. Thus, assume that a Mormon organization wishes to hire only Mormons to perform certain jobs. If a person with a disability applies for the job, but is not a Mormon, the organization can refuse to hire him or her. However, if two Mormons apply for a job, one with a disability and one without a disability, the organization cannot discriminate against the applicant with the disability because of that person's disability.

Because title I of this legislation incorporates by reference the definition of the term "employer" and "employee" used in title VII of the Civil Rights Act of 1964 and because of the similarity between the "religious preference" provisions in title VII and the ADA, it is the Committee's intent that title I of the ADA be interpreted in a manner consistent with title VII of the Civil Rights Act of 1964 as it applies to the employment relationship between a religious organization and those who minister on its behalf.

In addition, section 103(c)(2) of the legislation includes a provision not included in title VII of the Civil Rights Act of 1964. This provision specifies that a religious organization may require that all applicants and employees conform to the religious tenets of such organization. This exemption is modeled after the provision in title IX of the Education Amendments of 1972. Thus, it is the Committee's intent that the terms "religious organizations" and "religious tenets" be interpreted consistent with the Department of Education's regulations under title IX.

The inclusion of a "religious tenents" defense is not intended to affect in any way the scope given to section 702 of title VII of the Civil Rights Act of 1964.

Section 104 deals with employment of individuals who use illegal drugs or alcohol. Section 104(a) provides that a "qualified individual with a disability" does not include an employee or applicant who is a current user of illegal drugs, when the covered entity acts on the basis of such use. The phrase "when the covered entity acts on the basis of such use" is intended to make clear that if an adverse action is taken against a current user of illegal drugs who is otherwise disabled, to the extent the adverse action is taken on the basis of the disability still covered by the Act, the covered entity must comply with the Act and may not unjustly discriminate. However, if the action is taken on the basis of the current use of illegal drugs, the disabled person does not have protection simply by virtue of his or her disability. The Committee understands that this was the intent of the Senate in passing its version of section 104(a). See September 15, 1989, 135 Cong. Rec. S. 11224-5 (Statement by Senator Tom Harkin).

Section 104(b) provides that rehabilitated individuals and those in treatment who no longer use illegal drugs and individuals who are erroneously regarded as illegal drug users are not excluded from the definition of "individual with a disabiliity." In removing protection for persons who currently use illegal drugs, the Committee does not intend to affect coverage for individuals who have a past drug problem or are erroneously perceived as having a current drug problem. Coverage for these groups is, therefore, made explicit in section 104(b) because, under the standard Rehabilitation Act analysis, an individual with a past or perceived disability is protected only if the actual physical or mental condition at issue is itself a disability. Because the condition of current drug use is no longer a disabiliity for purposes of this Act, it is necessary to state that nothing in the exclusion of illegal drug use or addiction from the definition of disabiliity shall be construed to mean that persons with past or perceived illegal drug dependence conditions are necessarily denied coverage under the Act. Of course, as with all other disabilities, such plaintiffs must prove that they have a record of a disability, or are regarded as having a disability, as "disability" has been defined under section 504 and this Act (i.e., a physical or mental impairment that substantially limits a major life activity).

Section 104(b) also permits employers to conduct drug tests or take reasonable actions to ensure that an individual is no longer using illegal drugs. This provision grants employers the same right as provided in section 104(d) to conduct drug tests on applicants and employees without violating this Act, but does not requires such testing. An employer may use other means to ensure that a person is no longer using drugs as long as those measures are reasonable. (See also the discussion on drug testing under section 104(d)).

Section 104(c) provides that a covered entity:

(1) may prohibit the use of alcohol or illegal drugs at the workplace by all employees;

(2) may require that employees not be under the influence of alcohol or illegal drugs at the workplace;

(3) may require that employees conform their behavior to requirements established pursuant to the Drug-Free Workplace Act of 1988;

(4) may hold a drug user or alcoholic to the same qualification standards for employment or job performance and behavior to which it holds other individuals, even if any unsatisfactory performance or behavior is related to the drug use or alcoholism of such individual; and

(5) may require employees in sensitive positions, as defined by the Department of Transportation regulations regarding alcohol and drug use, the Department of Defense drug-free workplace regulations, and the Nuclear Regulatory Commission regulations regarding alcohol and drug use, to comply with the standards established by such regulations.

With respect to the defense that transportation employers may require that transportation employees meet requirements established by the Secretary of Transportation pursuant to and consistent with Federal law, the Committee wishes to make the following clarifications.

First, licensing of motor carrier drivers and railroad engineers, and certification of airplane pilots involves consideration of drunk and drug-related driving convictions, as recorded by individual States and made available to employers through the National Drivers Register at the Department of Transportation. In addition, records of other drug or alcohol related violations of State or Federal law may be considered as indicators of "fitness for duty" for safety-sensitive transportation positions.

Second, this defense applies to violations of Department of Transportation regulations concerning drug and alcohol use outside the workplace, e.g., an air crew member who, in violation of Federal Aviation Administration rules, drinks alcohol within 8 hours of going on duty.

Third, this defense applies to actions based on an individual's failure to pass DOT mandated drug and alcohol tests when administered in accordance with Federal and State laws, e.g., a truck driver who tests positive for illegal drugs and the failure or refusal to take a drug test mandated by Department of Transportation regulations.

The Committee has expanded the provision of section 104(c) beyond transportation employees because of concerns regarding employees in sensitive positions. The Committee has therefore added a new provision, section 104(c)(5), providing that a covered entity may require employees in sensitive positions, as defined by the Department of Transportation regulations regarding alcohol and drug use, the Department of Defense drug-free workplace regulations, and the Nuclear Regulatory Commission regulations regarding alcohol and drug use, to comply with the standards established by such regulations.

Section 104(d)(1) provides that a test to determine the use of illegal drugs is not considered a medical examination. The term "illegal drugs" is defined in section 101(5) and does not include drugs taken under supervision by a licensed health care professional. The exempted category includes, for example, experimental drugs taken under supervision. Many people with disabilities, such as people with epilepsy, AIDS, and mental illness, take a variety of drugs, including experimental drugs, under supervision by a health care professional. Discrimination on the basis of use of such drugs would not be allowed. Section 104(d)(2) further sepcifies that nothing in this title shall be construed to encourage, prohibit, or authorize conducting drug testing of job applicants or employees or making employment decisions based on such test results. Thus, nothing in this Act prohibits an employer from giving a test to any applicant or employee to determine the presence of illegal drugs and from refusing to hire the applicant or taking action against the employee if the test accurately detects the presence of illegal drugs. This is the case even if the applicant or employee who tests positive states that he or she recently stopped being a current drug user. The provision regarding drug testing for illegal drugs stands as an independent provision from the provision removing protection from individuals who are current users of illegal drugs.

The Committee believes that test results should be accurate and encourages covered entities to follow the Mandatory Guidelines on Federal Workplace Testing as issued by the Department of Health and Human Services. In any event, testing must comply with applicable Federal, State, or local laws or regulations regarding permitted testing, quality control, confidentiality, and rehabilitation; provided that, with respect to employees, as define by Department of Transportation, Department of Defense, and Nuclear Regulatory Commission regulations, if testing is undertaken, it must be done in compliance with applicable Federal laws and regulations.

Under section 104(d), applicants may be required to take a drug test before a conditional offer of employment has been given, and employees may be required to take a drug test without a showing that the test is job-related and consistent with business necessity, as is required under Section 102(c)(2-4) for other medical examinations. The Committee intends, however, that the application of this provision should not conflict with the right of individuals who take drugs under medical supevision not to disclose their medical condition before a conditional offer of employment has been given. See Sections 102(c)(2) and (3). Employers often use drug tests that detect the presence of a wide range of drugs, not simply illegal drugs. In addition, many legally prescribed medications taken under the supervision of a health care professional may register on a test as illegal drugs.

As noted above, however, section 102(c) prohibits the administration of a drug test, prior to a conditional offer of employment, which would identify prescription drugs taken for disability. Section 102(c) is designed to ensure that, for example, a person who take dilantin is not identified as a person with epilepsy at early stages of the selection process.

In order to clarify what type of tests are allowed, therefore, the Committee has added the word "illegal" before the word "drugs" in section 104(d)(1), to provide that: "(A) test to determine the use of *illegal* drugs shall not be considered a medical examination." (The bill passed by the Senate stated that a test "to determine the use of drugs shall not be considered a medical examination.") Thus, if employers wish to conduct drug tests before a conditional offer of employment is made, they must be sure that the test is designed to accurately identify "illegal drugs," as defined under this Act.

Even if employers limit their tests to those that accurately identify illegal drugs, if the employer takes adverse action against an individual who tests positive on such a test, the individual can challenge the action on the grounds that the positive result was caused by medication taken under medical supervision. Individuals who take medication under medical supervision and those who are erroneously regarded as illegal drug users are protected against discrimination. See sections 101(1) and 104(b).

Employers may, of course, avoid some of these difficulties by giving the drug test after a conditional offer of employment. Because individuals who are current users of illegal drugs are not protected under this Act, if the test accurately detects the presence of illegal drugs, the employer can then withdraw the conditional offer of employment with no liability under the Act. Moreover, drug tests after conditional offers of employment will better conserve employers' financial resources by limiting the number of individuals undergoing such costly exams.

Under section 104, employers are permitted, but certainly are not required, to discipline or discharge employees who are current users of illegal drugs. Many employers have instituted employee assistance programs and give employees who have drug problems an opportunity to obtain assistance before being disciplined or terminated. Although the reasonable accommodation provision in section 102(b)(5) of this title does not require that a covered entity provide a rehabilitation program or an opportunity for rehabilitation for current users of illegal drugs (because current users of illegal drugs are not covered under the Act), employers have often found that it is more cost effective to rehabilitate qualified employees than to terminate them and hire new employees. The Committee endorses these efforts and strongly encourages employers to continue to offer or to initiate such rehabilitation programs rather than to terminate qualified employees with a current drug problem.

As noted, under section 104, employers may discipline or discharge employees who are current users of illegal drugs. Such employees are not protected under the ADA. The professional sports leagues have developed drug policies to deal with players who have current drug problems. The Committee has reviewed those policies because the leagues have raised questions as to whether such policies comply with the Act.

The Committee believes that the leagues' policies are in compliance with the requirements of this Act. The National Football

League permits its players to test positive on drug tests to enter a treatment program and not be disciplined on the first occasion. Players who test positive on a second occasion are permitted to receive treatment but are suspended for a 30-day period or until later deemed fit to return. After a third positive drug test a player is banned from play and is ineligible for reinstatement for at least one year. This policy is consistent with the Act.

The National Basketball Association permits players who voluntarily seek treatment for a current drug problem to obtain treatment without cost to the player on the first occasion without suffering any discipline. Players who are using drugs and do not seek treatment voluntarily and are subsequently detected are terminated for a minimum period of two years. Players who relapse and seek treatment on a second occasion are suspended but permitted to receive treatment and return when deemed fit. Players who relapse for a second time are dismissed and cannot seek reinstatement for at least two years. The decision to reinstate players in both the NBA and the NFL is based on an individualized determination that takes into consideration the player's satisfactory completion of a treatment program, conduct following the dismissal, including completion of any suspension period. This policy is consistent with the Act.

Finally, major league baseball gives players who use drugs and those who test positive on a drug test an opportunity to obtain treatment before being disciplined. Players who relapse are disciplined but are permitted to obtain treatment on a second occasion. This policy is consistent with the Act.

As noted, these drug policies are entirely consistent with the nondiscrimination provisions of the Act. The Committee recognizes the right of these and other sports leagues to maintain the integrity of professional sports through disciplinary procedures, including dismissal, and recognizes that these three leagues have established reasonable policies that provide a means for players to receive rehabilitation, and for appropriate discipline including termination.

In addition, it is consistent with the Act for leagues that wish to do so to dismiss players who illegally use drugs or who relapse again after an opportunity to obtain treatment, while providing an opportunity to petition for discretionary reinstatement after a specified time period, upon a showing of rehabilitiaton, which includes abstinence from the use of illegal drugs to the satisfaction of the appropriate league authority, as one factor in the overall circumstances.

The National Hockey League has adopted a different policy that is also consistent with the Act. The National Hockey League suspends players who are involved with illegal drugs and provides an opportunity for reinstatement within a year based on a showing of positive rehabilitative conduct.

The Act is not intended to disturb the legitimate and reasonable disciplinary rules and procedures established and enforced by professional sport leagues as described above that have been entered into between league management and its players' association.

Posting notices

Section 105 of the legislation specifies that every employer, employment agency, labor organization, or joint labor-management committee covered under this title must post notices in an accessible format to applicants, employees, and members describing the applicable provisions of this Act, in the manner prescribed by section 711 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–10).

Regulations

Section 106 of the legislation specifies that not later than one year after the date of enactment of this Act, the Equal Employment Opportunity Commission must issue regulations in an accessible format to carry out this title in accordance with subchapter II of chapter 5 of title 5, United States Code.

It is the Committee's intent that these regulations will be drafted so as to be a self-contained document. The regulations should not incorporate by reference other laws or regulations. The Commission's regulations will have the force and effect of law.

This format will increase the likelihood of voluntary compliance on the part of covered entities and should minimize the need to hire a battery of lawyers to ascertain the obligations created by this legislation.

Enforcement

Section 107(a) of the legislation specifies that the remedies and procedures set forth in sections 706, 707, 709, and 710 of the Civil Rights Act of 1964 shall be available with respect to the Commission, the Attorney General, or any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of any provisions of this legislation, or regulations promulgated under section 106 concerning employment. As has been the case under title VII of the Civil Rights Act of 1964, the Attorney General will continue to have pattern or practice authority with respect to State and local governments.

This provision reflects a change from the original H.R. 2273, which had provided as well the remedies available under section 1981 of the Civil Rights Act of 1866. An agreement was made that people with disabilities should have the same remedies available to all other minorities under Title VII of the Civil Rights Act of 1964.

Section 205 of H.R. 2273, as originally introduced, provided protection to individuals who believe that they are being or who are "about to be subjected to discrimination." This provision has been deleted because the Committee determined that the case law under title VII of the Civil Rights Act of 1964 already provides protection against discrimination in those circumstances with which the Committee had concerns, and thus, a specific provision in this title was unnecessary.

The Supreme Court has enumerated the "futile gesture" doctrine under title VII in *International Brotherhood of Teamsters* v. *United States,* 431 U.S. 324, 365–67: "When a person's desire for a job is not translated into a formal application solely because of his unwillingness to engage in a futile gesture he is as much a victim of discrimination as is he who goes through the motions of submitting an application." The Committee intends for this doctrine to apply to this title.

The term "is being subjected to discrimination" also includes the situation where the employee discovers that the employer is redesigning office space in such a way that it will become inaccessible to disabled employees or is restructuring its operations in a manner that is adverse to disabled employees. In these situations, an employee is allowed to bring a suit to stop the illegal construction or restructuring before it begins.

The Committee recognizes that this legislation's requirements are substantially different from the other statutes governing private sector employment that are enforced by the Commission. The fact that most of the Commission's current professional employees are unfamiliar with disability nondiscrimination requirements will necessitate that the Commission provide extensive training for staff.

The Committee expects the Commission will establish and implement employer training programs and otherwise provide technical assistance to employers seeking to comply with the legislation's requirements. The Act expressly provides that technical assistance shall be afforded to those with rights and responsibilities under this Act. (See Section 506.)

Sec. 107(b) provides that the agencies with enforcement authority for actions which allege employment discrimination under this title and under the Rehabilitation Act of 1973 shall develop procedures to ensure that administrative complaints filed under this title and under the Rehabilitation Act of 1973 are dealt with in a manner that avoids duplication of effort and prevents imposition of inconsistent or conflicting standards for the same requiremetns under this title and the Rehabilitation Act of 1973. Section 107(b) further provides that such agencies shall establish such coordinating mechanisms in the regulations implementing this title and the Rehabilitation Act of 1973. The Committee added this provision specifically to address concerns raised by entities that will be covered under section 503 of the Rehabilitation Act (by virtue of receiving federal contracts in excess of $2,500) or under section 504 (by virtue of receiving federal financial assistance), as well as under this title. This provision is designed to ensure that such entities are not subject to a duplication of effort as they go through administrative and judicial proceedings, and are not subject in those proceedings to inconsistent or conflicting standards for the same requirements under this title and under the Rehabilitation Act.

Effective date

Section 108 of the legislation specifies that title I shall become effective 24 months after the date of enactment.

TITLE II—PUBLIC SERVICES

Title II of the legislation has two purposes. The first purpose is to make applicable the prohibition against discrimination on the basis of disability, currently set out in regulations implementing section 504 of the Rehabilitation Act of 1973, to all programs, activities, and services provided or made available by state and local governments or instrumentalities or agencies thereto, regardless of whether or not such entities receive Federal financial assistance. Currently, section 504 prohibits discrimination only by recipients of Federal financial assistance.

The second purpose is to clarify the requirements of section 504 for public transportation entities that receive Federal aid, and to extend coverage to all public entities that provide public transportation, whether or not such entities receive Federal aid.

Extending a Federal prohibition against discrimination on the basis of disability to all State and local governmental entities

Section 202 of the legislation extends the nondiscrimination policy in section 504 of the Rehabilitation Act of 1973 to cover all State and local governmental entities. Specifically, section 202 provides that no qualified individual with a disability shall, by reason of such disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination by a department, agency, special purpose district, or other instrumentality of a State or a local government.

The Committee has chosen not to list all the types of actions that are included within the term "discrimination", as was done in titles I and III, because this title essentially simply extends the anti-discrimination prohibition embodied in section 504 to all actions of state and local governments. The Committee intends, however, that the forms of discrimination prohibited by section 202 be identical to those set out in the applicable provisions of titles I and III of this legislation. Thus, for example, the construction of "discrimination" set forth in section 102 (b) and (c) and section 302(b) should be incorporated in the regulations implementing this title. In addition, however, section 204 also requires that regulations issued to implement this section be consistent with regulations issued under section 504. Thus, the requirements of those regulations apply as well, including any requirements such as program access that go beyond titles I and III. In addition, activities which do not fit into the employment or public accommodations context are governed by the analogous section 504 regulations. For example, under this title, local and state governments are required to provide curb cuts on public streets. The employment, transportation, and public accommodation sections of this Act would be meaningless if people who use wheelchairs were not afforded the opportunity to travel on and between the streets. Finally, it is also the Committee's intent that section 202 also be interpreted consistent with *Alexander* v. *Choate*, 469 U.S. 287 (1985).

Issues regarding communication also arise under this title. Throughout the United States, state and local governments provide for emergency telephone number systems. These systems enable individuals to seek immediate assistance from police, fire, ambulance, and other emergency services. In the event of an emergency, the ability to access an emergency system directly—often accessible by dialing 911—can mean the difference between life and death. Unfortunately, most of these systems nationwide remain inaccessible to hearing impaired and speech impaired individuals who use telecommunication devices for the deaf (TDD) to communicate by telephone. The result is both dangerous and alarming. For example, in one case in San Diego, California, a deaf woman died of a heart attack because the police did not respond when her husband tried to use his TDD to call 911. As part of its prohibition against discrimination in local and state programs and services, Title II will require local governments to ensure that these telephone emergency number systems are equipped with technology that will give hearing impaired and speech impaired individuals a direct line to these emergency services. While initially this will mean installation of a TDD or compatible ASCII or Baudot computer modems by programs operating these services, future technological advances—such as speech to text services—may offer other means of affording direct and equally effective access for these individuals.

The Committee recognizes that the phrasing of section 202 in this legislation differs from section 504 by virtue of the fact that the phrase "solely by reason of his or her handicap" has been deleted. The deletion of this phrase is supported by the experience of the executive agencies charged with implementing section 504. The regulations issued by most executive agencies use the exact language set out in section 202 in lieu of the language included in the section 504 statute.

A literal reliance on the phrase "solely by reason of his or her handicap" leads to absurd results. For example, assume that an employee is black and has a disability and that he needs a reasonable accommodation that, if provided, will enable him to perform the job for which he is applying. He is a qualified applicant. Nevertheless, the employer rejects the applicant because he is black and because he has a disability.

In this case, the employer did not refuse to hire the individual solely on the basis of his disability—the employer refused to hire him because of his disability and because he was black. Although the applicant might have a claim of race discrimination under title VII of the Civil Rights Act, it could be argued that he would not have a claim under section 504 because the failure to hire was not based solely on his disability and as a result he would not be entitled to a reasonable accommodation.

The Committee, by adopting the language used in regulations issued by the executive agencies, rejects the result described above. Court cases interpreting section 504 have also rejected such reasoning. As the Tenth Circuit explained in *Pushkin* v. *Regents of University of Colorado,* 658 F.2d 1372, the fact that the covered entity lists a number of factors for the rejection, in addition to the disability, is not dispositive. In *Pushkin,* the University states that Dr. Pushkin was rejected because of low interview scores. The court stated that "it is not possible to extricate the mean ratings from the reactions to the handicap itself." 658 F.2d at 1386.

Moreover, the interview ratings "as a general practice are not necessarily controlling in the selection process." Id. at 1386. The

357

question was whether "the reasons articulated for the rejection other than handicap encompass unjustified consideration of the handicap itself" Id. at 1387. As stated by the court, the "issue is whether rejecting Dr. Pushkin after expressly weighing the implication of his handicap was justified." Id. at 1386.

In sum, the existence of non-disability related factors in the rejection decision does not immunize employers. The entire selection procedure must be reviewed to determine if the disability was improperly considered.

As used in this title, the term "qualified individual with a disability" means an individual with a disability who, with or without reasonable modification to rules, policies and practices, the removal of architectural, communication, and transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services of the participation in programs or activities provided by a department, agency, special purpose district, or other instrumentality of a State or a local government.

The term "instrumentality of a state and local government" includes public transit authorities.

With regard to school bus operations by public entities, such operations shall be treated as demand-responsive operations. Agencies of a State, or a political subdivision of a State, that provide school bus transportation are required to provide bus service to children with disabilities equivalent to that provided to children without disabilities (whether provided directly or by contract or other arrangement with a private entity).

The school bus transportation provided to children with disabilities must be provided in the most integrated setting possible. This means that when a child with a disability requires transportation, the school bus that serves his/her route should be accessible. This does not mean that all school buses need to be accessible; it means that equal nonsegregated opportunities must be provided to all children. However, the lack of an accessible bus may never be used to limit the placement options of a student with a disability. For example, a student with a disability may not be precluded from attending the most integrated school because of the lack of transportation.

School bus operations, as defined in 49 CFR 605.3(b) and the associated revisions established in Highway Safety Program Standard No. 17, means transportation by Type I and II school bus vehicles of school children, personnel, and equipment to and from school or school-related activities.

Actions applicable to public transportation considered discriminatory

Definition

As used in title II, the term "public transportation" means transportation by bus or rail, or by any other conveyance (other than air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis, including service contracted through a private sector entity.

As used in title II, the term "public entity" includes the National Railroad Passenger Corporation.

The Committee excluded transportation by air because the Congress recently passed the Air Carrier Access Act, which was designed to address the problem of discrimination by air carriers and it is the Committee's expectation that regulations will be issued that reflect congressional intent. However, this title applies to the public entities' fixed facilities use in air travel, such as airport terminals, and to related services, such as ground transportation, provided by public entities.

It is not the Committee's intent to make the vehicle accessibility provisions of this title applicable to vehicles donated to a public entity. The Committee understands that it is not usual to donate vehicles to a public entity. However, there could be instances where someone could conceivably donate a bus to a public transit operator in a will. In such a case, the transit operators should not be prevented from accepting the gift.

The Committee does not intend that this limited exemption for donated vehicles be used to circumvent the intent of the ADA. For example, local transit authority could not arrange to be the recipient of donated inaccessible buses. This would be a violation of the ADA.

As a general rule, all requirements for nondiscrimination apply not only to the design of vehicles and facilities but to their operation as well. Thus, new fixed route buses must have lifts, and new and key stations must have elevators or other means to ensure accessibility as necessary components for a transit authority to be in compliance with the provisions of this title of the legislation. Merely installing the access equipment is never sufficient by itself, however; the lifts and elevators must also operate, be in good working order, and be available when needed for access in order for an entity to be in compliance with the law.

The Committee believes that a strong commitment from a transit authority's management team will ensure nondiscrimination in the provision of transportation to people with disabilities. This includes adequate training of maintenance personnel and bus operators, sensitivity training of all personnel which stresses the importance of providing transportation, and creative marketing strategies.

New buses, rail vehicles, and other fixed route vehicles

Section 203(b)(1) of the legislation specifies that it shall be considered discrimination, for purposes of this Act and for purposes of section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public entity to purchase or lease a new fixed route bus of any size, a new intercity rail vehicle, a new light rail vehicle to be used for public transportation, or any other new fixed route vehicle to be used for public transportation and for which a solicitation by such individual or entity is made later than 30 days after the date of enactment of this Act, if such bus, rail, or other vehicle is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

This requirement is included to ensure that an accessible transportation system is phased-in as new vehicles are purchased. It makes no sense, at this point in time, to perpetuate continued inaccessibility and to exclude persons with disabilities from the opportunity to use a key public service—transportation. Inaccessible vehicles affect more than just individuals with disabilities' ability to travel independently. It affects their ability to gain employment. When such individuals are able to depend on an accessible transportation system, one major barrier is removed which could prevent them from joining the work force. This ability ultimately affects our society as a whole. Accessible transportation also allows individuals with disabilities to enjoy cultural, recreational, commercial and other benefits that society has to offer.

Transportation affects virtually every aspect of American life. Mainline services are geared to moving people to and from work, school, stores, and other activities on schedules that reflect most people's daily routines. It is false and discriminatory to suggest that people with disabilities—who have the same needs as other community residents—are not as interested in or worthy of using transit services as people without disabilities.

The term "fixed route" means a bus system that operates on a continuing and regular basis on a fixed pattern and schedule.

The term "new" means buses which are offered for first sale or lease after manufacture without any prior use. Buses for which a solicitation is made within 30 days after enactment of this legislation are not subject to the accessibility requirement and thus are not required to have wheelchair lift equipment. However, buses that are solicited for after 30 days from enactment of this legislation are covered by the accessibility provision and would have to comply with the requirement that all newly purchased vehicles be accessible to people with disabilities including wheelchair users.

The phrase "for which a solicitation by such individual or entity is made" means when a public entity asks for bids from manufacturers to build buses or begins to offer to purchase or bid for the purchase of new buses 30 days after enactment of this legislation.

The term "readily accessible to and usable by" is a term of art that means the ability of individuals with disabilities, including individuals using wheelchairs, to enter into and exit and safely and effectively use a vehicle used for public transportation.

Lifts or ramps and other equipment, and fold-up seats or other wheelchair spaces with appropriate securement devices are among the features necessary to make transit vehicles readily accessible to and usable by individuals with disabilities. The requirement that a vehicle is to be readily accessible obviously entails that each vehicle is to have some spaces for individuals using wheelchairs or other mobility aids; how many spaces per vehicle are to be made available for wheelchairs is, however, a determination that depends upon various factors, including the number of vehicles in the fleet, the seat vacancy rates, and usage of people with disabilities.

The Committee intends, consistent with these factors, that the determination of how many spaces must be available for wheelchair use should be flexible and generally left up to the provider, provided that at least some seats on each vehicle are accessible. Technical specifications and guidance regarding lifts and ramps, wheelchair spaces, and securement devices are to be provided in the minimum guidelines and regulations to be promulgated under this legislation. These minimum guidelines should be consistent with the Committee's desire for flexibility and decisionmaking by the provider.

The Committee wishes to emphasize that the legislation uses the phrase "including individuals who use wheelchairs" because of misinterpretations of the nature and extent of obligations under section 504. The obligation to provide public transportation in a nondiscriminatory fashion applies to all persons with disabilities, including people with sensory impairments and those with cognitive impairments such as mental retardation. It is the Committee's intent that the obligation to provide lift service applies, not only to people who use wheelchairs, but also to other individuals who have difficulty in walking. For example, people who use crutches, walkers or three-wheeled mobility aids should be allowed to use a lift.

A public transit authority should develop training sessions to familiarize bus operators with the services that individuals with disabilities may need. For example, assuring that people with vision impairments get off at the correct stop, training bus drivers how to use the lift in a bus, and developing a program which would assist people with mental retardation in how to use the transportation system. Transit authorities should also be required to have written materials available in a format accessible to people with vision impairments and to make TDD numbers available to persons with hearing and communication impairments.

Section 203(e) of the legislation provides temporary relief for public entities from the obligations under section 203(b) where lifts are unavailable. Specifically, with respect to the purchase of new buses, a public entity may apply for, and the Secretary of Transportation may temporarily relieve such entity from the obligation to purchase new buses of any size that are readily accessible to and usable by individuals with disabilities, if such public entity can demonstrate the existence of four factors:

(1) That the initial solicitation for new buses made by the public entity specified that all new buses were to be lift-equipped and were to be otherwise accessible to and usable by individuals with disabilities;

(2) The unavailability from any qualified manufacturer of hydraulic, electro-mechanical, or other lifts for such new buses;

(3) That the public entity seeking temporary relief has made good faith efforts to locate a qualified manufacturer to supply the lifts to the manufacturer of such buses in sufficient time to comply with such solicitation; and

(4) That any further delay in purchasing new buses necessary to obtain such lifts would significantly impair transportation services in the community served by the public entity.

Section 203(f) of the legislation makes it clear that any relief granted under subsection (e) must be limited in duration by a specified date. In addition, if, at any time, the Secretary of Transportation has reasonable cause to believe that such relief was fraudulently applied for, the Secretary of Transportation shall cancel such relief, if such relief is still in effect, and take other steps that he or she considers appropriate.

Further, the appropriate committees of the Congress must be notified of any such relief granted. The appropriate committees in the House include the Committee on Education and Labor and the Committee on Public Works and Transportation.

Used vehicles

Section 203(b)(2) of the legislation specifies that if a public entity purchases or leases a used vehicle after the date of enactment of this Act, such public entity shall make demonstrated good faith efforts to purchase or lease a used vehicle that is readily acessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The term "used vehicle" means a vehicle that was purchased before a date which is at least 30 days prior to the enactment of this legislation. Frequently small and rural communities do not purchase new buses. Many of these communities buy used buses that are less than new buses in an effort to provide transportation to individuals in these areas without expending large sums of money. Purchasers of used vehicles are required by this legislation to make "demonstrated good faith efforts" to locate accessible used vehicles.

The phrase "demonstrated good faith efforts" is intended to require a nationwide search and not a search limited to a particular region. For instance, it would not be enough for a transit operator to contact only the manufacturer where the transit authority usually does business to see if there are accessible used buses. It might involve the transit authority advertising in a trade magazine, i.e. Passenger Transport, or contacting the transit trade association, American Public Transit Association (APTA), to determine whether accessible used vehicles are available.

It is the Committee's expectation that as the number of buses with lifts increases, the burden on the transit authority to demonstrate its inability to purchase accessible vehicles despite good faith efforts will become more and more difficult to satisfy.

Remanufactured vehicles

Section 203(b)(3) of the legislation specifies that if a pubic entity remanufactures a vehicle, or purchases or leases a remanufactured vehicle, so as to extend its useful life for 5 years or more, the vehicle shall, to the maximum extent feasible, be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The phrase "remanufactures a vehicle or purchases or leases a remanufactured vehicle so as to extend its usable life for 5 years or more" means that the vehicle is stripped to its frame and is then rebuilt. It does not simply mean an engine overhaul. The additional cost to make a remanufactured vehicle accessible would be comparable to the cost of making a new vehicle accessible. Therefore, remanufactured vehicles should be treated the same as new vehicles.

The phrase "to the maximum extent feasible" is included in order to provide clarification that the Committee does not intend to require accessibility for remanufactured vehicles if it would destroy the structural integrity of the vehicle.

Paratransit as a supplement to fixed route public transportation system

Section 203(c) of the legislation specifies that if a public entity operates a fixed route public transportation system to provide public transportation, it shall be considered discrimination, for purposes of this Act and for purposes of section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public transit entity to fail to ensure the provision of paratransit or other special transportation services sufficient to provide a comparable level of services as is provided to individuals using fixed route public transportation to individuals with disabilities, including individuals who use wheelchairs, who cannot otherwise use fixed route public transportation and to other individuals associated with such individuals with disabilities in accordance with service criteria established under regulations promulgated by the Secretary of Transportation unless the public transit entity can demonstrate that the provision of paratransit or other special transportation services would impose an undue financial burden on the public transit entity.

If the provision of comparable paratransit or other special transportation services would impose an undue financial burden on the public transit entity, such entity must provide paratransit and other special transportation services to the extent that providing such services would not impose an undue financial burden on such entity.

Regulations promulgated by the Secretary of Transportation to determine what constitutes an undue financial burden may include a flexible numerical formula that incorporates appropriate local characteristics such as population. Although the legislation mentions only population as an example of local characteristics that might be reflected in such a formula, other characteristics appropriate to consider include population density, level of paratransit services currently being provided in the area, residential patterns, and the interim degree of accessibility of fixed route transit service.

Notwithstanding the above provisions, the Secretary may require, at the discretion of the Secretary, a public transit authority to provide paratransit services beyond the amount determined by such formula.

It is the Committee's intent that any criteria developed by the Secretary regarding the "undue financial burden" proviso, including the use of a formula, be consistent with that portion of the *ADAPT* v. *Skinner* decision handed down on July 24, 1989 by the Third Circuit Court of Appeals concerning the three percent "safe harbor" provision. *ADAPT* v. *Skinner*, 881 F.2d 1184 (3d Cir. 1989).

The Committee recognizes that there will always be a need for paratransit services. Paratransit services must be available to individuals who are unable to ue mainline public transportation. By "unable to use" the committee means to include those individuals who cannot gain access to the public transportation systems. The reasons for this inability to access the transit system could be because of the nature and severity of the individual's physical or mental disability or because of other factors determined by the local community, such as the lack of curb cuts which would prevent individuals with certain disabilities from traveling to a bus stop.

In developing the criteria that will be used to determine which individuals with disability are unable to use the transportation services, it is important to significantly involve organizations representing people with disabilties and individual consumers with disabilities. The Committee wishes to make it clear that criteria developed to determine eligibility for paratransit e.g., inability to use mainline transportation services shall not be used to prevent, limit, or otherwise exclude such individuals from using mainline services if they so choose.

The term "paratransit or other special transportation services" means a transportation system that is available to those individuals who are unable to use the transportation system available to other people. This has been characteristically provided by transit authorities or contracted out to private companies and uses small buses or vans. Usually, the service is demand responsive or door-to-door service.

The Committee does not intend to require a public transit authority to actually provide paratransit or other special transportation services if such services are provided by other entities serving the same geographical location as is served by the pubic transit authority providing the fixed route system. However, the Committee wishes to emphasize that the paratransit or other special transportation services provided must be consistent with the requirements set out in this legislation and a public transit entity must be ulitmately accountable for ensuring that the services are being provided in compliance with this legislation.

The following minimum service criteria should apply to special paratransit service systems that are used to supplement a fixed route accessible system:

(a) Eligibility. All persons with disabilities unable to use the fixed route vehicles and their companions shall be eligible to use the special service.

(b) Response time. The service should be provided to a person with a disability with a comparable response time that a person without a disability would receive.

(c) Restrictions or priorities based on trip purpose. There shall not be priorities or restrictions based on trip purpose on users of the special service.

(d) Fares. The fare for a trip charged to a user of the special service system shall be comparable to the fare for a trip of similar length, at a similar time of day, charged to a user of the fixed route service.

(e) Hours and days of service. The special service shall be available throughout the same hours of days as the fixed route service.

(f) Service area. The special service shall be available throughout the service area in which the fixed route service is provided. Service to points outside this service are served by extended express or commuter bus service shall be available to persons with disabilities in an accessible manner.

The term "comparable level of services" means that when all aspects of a transportation system are analyzed, equal opportunities to use the transportation system exist for all persons—individuals with and without disabilities. The essential test to meet is whether the system is providing a level of service that meets the needs of persons with and without disabilities to a comparable extent.

For instance, if a person with a disability calls for a ride on a demand response system for the general public—and an accessible bus arrives within fifteen minutes—that is equal treatment if a person without a disability has to wait for the bus for an equivalent amount of time. However, if the bus arrives and it does not have a lift and one is needed, or if a disabled person has to wait considerably more time than a non-disabled person, then equal opportunity to use the demand responsive public transportation system is not being provided.

The term "other individuals associated with such individuals with disabilities" means the companions of those individuals who canot otherwise use fixed route bus service whether they are part of the person's family, or friends of the individual with a disability. For instance, if a father wanted to take his children to the zoo and paratransit services are the only means of transportation that father is qualified for, he should be allowed to take his children on the paratransit bus. He should not be relegated to the paratransit by himself while his children are required to take fixed route public transportation.

If a man and woman were dating and the woman could not otherwise use public fixed route transportation then they should be able to use the paratransit services to and from that date. Likewise, if an individual had out of town guests and one of the out of town guests cannot use the fixed route bus system and is qualified to use the paratransit services of the state where they are visiting, then everyone in the group should be allowed to use the paratransit service to go sightseeing.

The Committee intends that during the interim period in which substantial numbers of fixed route buses are not accessible, the public transit authorities form an advisory committee to ensure the participation of individuals with disabilities in the planning, development, and implementation stages of the transportation system. One way to do this is by instituting an advisory group. Careful consideration should be given to the composition of the advisory group and every effort should be made to have adequate representation from all elements of the disability community.

This advisory group is an essential component to the development of standards which must then appear in the authorities' transit plan. Cooperation between the disability community and the transit operators is imperative during the period of time in which the system will be in transition, from an inaccessible system to an accessible one.

The transition options chosen will depend, to a certain extent, on the system involved. Some systems will require the broadest use of the existing accessible buses. For instance, it may be advantageous for a small system to require that all the accessible buses be in service during both off-peak and peak hours and at regular intervals so as to provide some service to the most people. A larger system might choose to make key lines accessible or ensure that the feeder lines are accessible. In this way, the system will be providing meaningful transportation at least to a portion of the individuals that need the access of the system.

The mainline interim service agreed upon by the advisory Committee must be available throughout the regular service area and during the normal service hours. This service, to the extent feasible, must meet a number of criteria as to convenience and comparability to regular mainline service (e.g., no restriction as to trip purpose, wait, fares and travel time).

Regardless of the mainline accessible transportation that will be available, it is important that a paratransit service be in place to ensure adequate access in those areas where accessible mainline service cannot yet be achieved. It is equally as important to realize that paratransit will always be necessary for those individuals who for legitimate reasons are unable to use mainline accessible service.

The local transit authority must be sincere in its efforts to coordinate special services in the locality to meet the service standards. The paratransit services should meet the service criteria both during the transition phase and thereafter.

Community operating demand responsive systems for the general public

Section 203(d) of the legislation specifies that if a public entity operates a demand responsive system that is used to provide public transportation for the general public, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such public entity to purchase or lease a new vehicle, for which a solicitation is made later than 30 days after the date of enactment of this Act, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the general public.

The intent of the Committee is to provide flexibility for rural and small urban communities that only have a demand responsive system for everyone. These systems are available to people without disabilities as well as to those with disabilities. The Committee intends that the time delay between a telephone call to access the demand responsive system and the pick up of the individual is not to be greater because the individual needs a lift or ramp or other accommodation to access the vehicle.

The term "demand responsive service" means service where the individual must request transportation service before it is rendered. This fact distinguishes this type of service from fixed route service.

With fixed route service, no action is needed by an individual to initiate public transportation. If an individual is at a bus stop at the time the bus is scheduled to appear then that individual will be able to access the transportation system. With demand-responsive service, an additional step must be taken by the individual before he or she can ride the bus i.e., the individual must make a telephone call. In this type of service, the transit provider will know ahead of time whether or not an accessible vehicle is necessary. Therefore, all demand responsive vehicles need not be accessible as long as the level of service provided to individuals with disabilities is equal to that provided to those without disabilities.

The phrase "when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the general public" means that when all aspects of a transportation system are analyzed, equal opportunities for each individual with a disability to use the transportation system must exist.

The Committee wishes to make it clear that the authority of the Secretary to grant temporary relief where lifts are unavailable applies to communities operating demand responsive as well as fixed route bus systems.

New facilities

Section 203(g) opf the legislation specifies that for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to build a new facility that will be used to provide public transportation services, including bus service, inter-city rail service, rapid rail service, commuter rail service, light rail service, and other service used for public transportation that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The meaning of the key phrases used in this subsection are described subsequently in the section of the report pertaining to title III of the Act.

Alterations of existing facilities

Section 703(h) of the legislation specifies that, with respect to a facility or any part thereof that is used for public transportation and that is altered by, on behalf of, or for the use of a public entity in a manner that affects or could affect the usability of the facility or part thereof, it shall be considered discrimination, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such individual or entity to fail to make the alterations in such a manner that, to the maximum extent feasible, the altered portion of the facility is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

If such public entity is undertaking major structural alterations that affect or could affect the usability of the facility (as defined under criteria established by the Secretary of Transportation) such public entity shall also make any additional alterations that are necessary to ensure that, to the maximum extent feasible, a path of travel from a primary entrance, and a reasonable number of bathrooms, telephones, and drinking fountains serving such path of travel are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The key phrases used in this subsection are described subsequently under the section of the report concerning title III of the legislation.

Existing facilities

Section 203(i)(1) of the legislation specifies that with respect to existing facilities used for public transportation, it shall be considered discrimination, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for the public entity to fail to operate such public transportation program or activity conducted in such facilities so that, when viewed in the entirety, it is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

This is the same standard that currently applies under section 504 regulations issued by the Department of Transportation.

The standards set out above do not apply to stations in intercity rail systems, and key stations in rapid rail, commuter rail and light rail systems. Such stations are governed by section 203(i)(3) of the legislation, which specifies that for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to make stations in intercity rail systems and key stations in rapid rail, commuter rail and light rail systems readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

Intercity rail systems, including the National Railroad Passenger Corporation, must be made accessible as soon as practicable, but in no event later than 20 years after the date of enactment. Key stations in rapid rail, and light rail systems must be made accessible as soon as practicable but in no event later than 3 years after the date of enactment of this Act, except that the time limit may be extended by the Secretary of Transportation up to 20 years for extraordinarily expensive structural changes to, or replacement of, existing facilities necessary to achieve accessibility.

The Committee intends that the term "key stations" shall include stations that have high ridership, and stations that serve as transfer and feeder stations. The public transit authority shall develop a plan for complying with the requirement that reflects consultation with individuals with disabilities affected by such plan and that establishes milestones for achievement of this requirement.

The phrase "key stations" includes hig ridership stations since individuals with disabilities have the same travel objectives as individuals without disabilities. Stations may have high ridership because they are located in business and employment districts, cultural, educational, recreational and entertainment centers, or are transfer points from other modes of transportation.

In addition to high ridership stations, "feeder stations" should be designated as "key" because they generally are located in suburban areas. Making these stations accessible will provide individuals with disabilities who live in these areas the ability to commute.

Exactly what stations will be determined "key" is a decision best left to the local community. The Committee does not intend to mandate a process to identify "key stations" except that—in developing the criteria that will be used to determine which stations will be "key"—it is important to significantly involve organizations representing people with disabilities and individual consumers with disabilities.

It is the Committee's understanding the settlement agreements recently reached in New York City specifying approximately 38 particular stations out of over 465 stations in the system and in

Philadelphia where 11 out of approximately 53 stations on the high speed line and 31 out of approximately 172 commuter rail stations are to be considered "key stations" are in full compliance with the criteria and procedures set out above.

The phrase "as soon as practicable" is included in order to create an obligation to attain accessibility before the specified period of time has elapsed. It is the intent of this Committee that this requirement would prohibit a transit authority from delaying the installation of an elevator, if capital funds were available and the installation could otherwise be accomplished, just because the absolute time limit is not up.

The phrase "extraordinarily expensive structural change to or replacement of existing facilities" is intended to create a narrow exemption for the facilities where the only means of creating accessibility would be to raise the entire platform of a station or to install an elevator. The costs to accomplish these structural changes can be extremely costly.

In issuing regulations for the enforcement of this section, the Secretary of Transportation may prescribe a procedure for the resolution of disputes when a local rail transit operator and representatives of the disability community are unable to reach mutual agreement.

Intercity, rapid, light, and commuter rail systems

Section 203(i)(2) of the legislation specifies that with respect to vehicles operated by intercity, light, rapid and commuter rail systems, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to have at least one car per train that is accessible to individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in any event in no less than 5 years.

It is the Committee's expectation that the regulations issued by the Secretary of Transportation will ensure that the car that is accessible stops at an approrpiate place in the station that is level with the car and that signage is included to indicate where such car will stop.

Regulations

Section 204 of the legislation specifies that not later than one year after the date of enactment of this Act, the Attorney General shall promulgate regulations in an accessible format that implement this title (other than section 203), and such regulations shall be consistent with this title and with the coordinated regulations under part 41 of title 28 Code of Federal Regulations (as promulgated by the Department of Health, Education, and Welfare on January 13, 1978), applicable to recipients of Federal financial assistance under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) except, with respect to "program accessibility", "existing facilities" and "communications", such regulations shall be consistent with applicable portions of regulations and analysis relating to Federally conducted activities under section 504 of the Rehabilitation Act of 1973 (part 39 of title 28 of the Code of Federal Regulations).

Section 204(b) of the legislation specifies that not later than one year after the date of enactment of this Act, the Secretary of Transportation shall promulgate regulations in an accessible format that includes standards applicable to facilties and vehicles covered under section 203.

Such standards shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504.

Enforcement

Section 205 of the legislation specifies that the remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be available with respect to any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of any provisions of this Act, or regulations promulgated under section 204, concerning public services.

It is the Committee's intent that administrative enforcement of section 202 of the legislation should closely parallel the Federal government's experience with section 504 of the Rehabilitation Act of 1973. The Attorney General should use section 504 enforcement procedures and the Department's coordination role under Executive Order 12250 as models for regulation in this area.

The Committee envisions that the Department of Justice will identify appropriate Federal agencies to oversee compliance activities for State and local governments. As with section 504, these Federal agencies, including the Department of Justice, will receive, investigate, and where possible, resolve complaints of discrimination. If a Federal agency is unable to resolve a complaint by voluntary means, the Federal government would use the enforcement sanctions of section 505 of the Rehabilitation Act of 1973. Because the fund termination procedures of section 505 are inapplicable to State and local government entities that do not receive Federal funds, the major enforcement sanction for the Federal government will be referral of cases by these Federal agencies to the Department of Justice.

The Department of Justice may then proceed to file suits in Federal district court. As with section 504, there is also a private right of action for persons with disabilities, which includes the full panoply of remedies. Again, consistent with section 504, it is not the Committee's intent that persons with disabilities need to exhaust Federal administrative remedies before exercising their private right of action.

Effective date

In accordance with section 206 of the legislation, title II of the bill shall become effective 18 months after the date of enactment except that the provisions of the bill applicable to the purchase of new fixed route vehicles shall become effective on the date of enactment of this Act.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

Section 504 of the Rehabilitation Act of 1973 prohibits Federal agencies and recipients of Federal financial assistance from discriminating against persons with disabilities. The purpose of title III of the legislation is to extend these general prohibitions against discrimination to privately operated public accommodations and to bring individuals with disabilities into the economic and social mainstream of American life. Title III fulfills these purposes in a clear, balanced, and reasonable manner.

Title III is not intended to govern any terms or conditions of employment by providers of public accommodations or potential places of employment; employment practices are governed by title I of this legislation.

Title III also prohibits discrimination in public transportation services provided by private entities.

Definitions

The term "commerce" is defined in section 301(1) of the legislation to mean travel, trade, traffic commerce, transportation, or communication among the several States, or between any foreign country or any territory or possession and any State, or between points in the same State but through another State or foreign country.

The term "commercial facilities" is defined as facilities that are intended for non-residential use and whose operations will affect commerce. This term is discussed later in the report.

Section 301(3) of the legislation sets forth the definition of the term "public accommodation." The following privately operated entities are considered public accommodations for purposes of title III, if the operations of such entities affect commerce:

> (1) An inn, hotel, motel, or other similar place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor;
>
> (2) A restaurant, bar, or other establishment serving food or drink;
>
> (3) A motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment;
>
> (4) An auditorium, convention center, or lecture hall;
>
> (5) A bakery, grocery store, clothing store, hardware store, shopping center, or other similar retail sales establishment;
>
> (6) A laundromat, dry-cleaner, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other similar service establishment;
>
> (7) A terminal used for public transportation;
>
> (8) A museum, library, gallery, and other similar place of public display or collection;
>
> (9) A park or zoo;

(10) A nursery, elementary, secondary, undergraduate, or postgraduate private school;

(11) A day care center, senior citizen center, homeless shelter, food bank, adoption program, or other similar social service center; and

(12) A gymnasium, health spa, bowling alley, golf course, or other similar place of exercise or recreation.

The twelve categories of entities included in the definition of the term "public accommodation" are exhaustive. However, within each of these categories, the legislation only lists a few examples and then, in most cases, adds the phrase "other similar" entities. The Committee intends that the "other similar" terminology should be construed liberally, consistent with the intent of the legislation that people with disabilities should have equal access to the array of establishments that are available to others who do not currently have disabilities.

For example, the legislation lists "golf course" as an example under the category of "place of exercise or recreation." This does not mean that only driving ranges constitute "other similar establishments." Tennis courts, basketball courts, dance halls, playgrounds, and aerobics facilities, to name a few other entities, are also included in this category. Other entities covered under this category include video arcades, swimming pools, beaches, camping areas, fishing and boating facilities, and amusement parks.

Similarly, although not expressly mentioned, bookstores, video stores, stationery stores, pet stores, computer stores, and other stores that offer merchandise for sale or rent are included as retail sales establishments.

The phrase "privately operated" is included to make it clear that establishments operated by Federal, State, or local governments are not covered by this title. Of course an establishment which is operated by a private entity and which is covered under this title, but which also receives Federal, State, or local funds is still covered by this title, as well as under any other applicable laws.

Only nonresidential facilities are covered by this title. For example, in a large hotel that has a residential apartment wing, the residential wing would be covered under the Fair Housing Act (42 U.S.C. secs. 3601 et seq., as amended), rather than by this title. The nonresidential accommodations in the rest of the hotel would be covered by this title.

Private schools, including elementary and secondary schools, are covered by this title. The Committee does not intend, however, that compliance with this legislation requires a private school to provide a free appropriate education or develop an individualized education program in accordance with regulations implementing section 504 of the Rehabilitation Act of 1973 (34 CFR Part 104) and regulations implementing part B of the Education of the Handicapped Act (34 CFR Part 300). Of course, if a private school is under contract with a public entity to provide a free appropriate public education, it must provide such education in accordance with section 504 of the Rehabilitation Act and part B regulations of the Education of the Handicapped Act.

The terms "readily achievable" and "public transportation" are discussed elsewhere in this report.

Prohibition of discrimination by public accommodations

Section 302(a) of the legislation specifies that no individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation.

"Full and equal enjoyment" does not encompass the notion that persons with disabilities must achieve the identical result or level of achievement of nondisabled persons, but does mean that persons with disabilities must be afforded equal opportunity to obtain the same result.

Section 302(b)(1) of the legislation specifies general forms of discrimination prohibited by this title. These provisions are consistent with the general prohibitions which were included in title I of H.R. 2273 as originally introduced. As explained previously in the report, the general prohibitions title has been deleted by the substitute. However, as explained above, deletion of the original title I does not indicate a rejection of the general anti-discrimination provisions. Rather, the general prohibitions of the original title I have been incorporated into the specific title.

Sections 302(b)(1)(A) (i), (ii), and (iii) of the legislation specify that it shall be discriminatory:

> To subject an individual or class of individuals on the basis of disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements, to a denial of the opportunity of the individual or class to participate in or benefit from the goods, services, facilities, privileges, advantages, and accommodations of an entity;
>
> To afford such an opportunity that is not equal to that afforded other individuals; or
>
> To provide such an opportunity that is different or separate from that provided to other individuals, unless such action is necessary to provide the individual or class of individuals with an opportunity that is as effective as that provided to others.

The intent of the contractual prohibitions of section 302(b)(1)(A) (i)-(iii) is to prohibit a public accommodation from doing indirectly through a contractual relationship, what it may not do directly. Thus, the "individual or class of individuals" referenced in section 302(b)(1)(A) (i)-(iii) has always been intended to refer to the clients and customers of the public accommodation that entered into a contractual arrangement. The section has never been intended to encompass the clients or customers of *other* entities. Thus, a public accommodation is not liable under this provision for discrimination that may be practiced by those with whom it has a contractual relationship, when that discrimination is not directed against its own clients or customers.

In order that the scope of the contractual prohibition be made clear, however, the Committee has added section 302(b)(1)(A)(iv) to the title which provides that:

> **For purposes of section 302(b)(1)(A)(i)-(iii), the term "individual or class of individuals" refers to the clients or customers of the public accommodation that enters into the contractual, licensing or other arrangement.**

This addition tracks a similar clarification in the statute which was made in title I of the Act. See section 102(b)(2).

Section 302(b)(1)(B) of the legislation specifies that goods, services, privileges, advantages, accommodations, and services shall be afforded to an individual with a disability in the most integrated setting appropriate to the need of the individual.

Section 302(b)(1)(C) of the legislation specifies that notwithstanding the exisence of separate or different programs or activities provided in accordance with this section, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different.

Taken together, these provisions are intended to prohibit exclusion and segregation of individuals with disabilities and the denial of equal opportunities enjoyed by others based on, among other things, presumptions, patronizing attitudes, fears, and stereotypes about individuals with disabilities. Consistent with these standards, public accommodations are required to make decisions based on facts applicable to individuals and not on the basis of presumptions as to what a class of individuals with disabilities can or cannot do.

The Committee wishes to emphasize that these provisions should not be construed to jeopardize in any way the continued viability of separate private schools providing special education for particular categories of children with disabilities, sheltered workshops, special recreational programs, and other similar programs.

At the same time, the Committee wishes to reaffirm that individuals with disabilities cannot be denied the opportunity to particiapte in programs that are not separate or different. This is an important and over-arching principle of the Committee's bill. Separate, special, or different programs that are designed to provide a benefit to persons with disabilities cannot be used in any way to restrict the participation of disabled persons in general, integrated activities.

For example, a blind person may wish to decline participating in a special museum tour that that allows persons to touch sculptures in an exhibit and instead tour the exhibit at his or her own pace with the museum's recorded tour. It is not the intent of this title to require the blind person to avail himself or herself of the special tour. The Committee intends that modified participation for persons with disabilities be a choice, not a requirement.

In addition, it would not be a violation of this title for an establishment to offer recreational programs specially designed for children with mobility impairments. However, it would be a violation of this title if the entity then excluded such children from other recreational services made available to nondisabled children, or required children with disabilities to attend only designated programs.

Providing services in the most integrated setting is a fundamental principle of the ADA. Historically, persons with disabilities have been relegated to separate and often inferior services. For example, seating for persons using wheelchairs is often located in the back of auditoriums. In addition to providing inferior seating, the patron in a wheelchair is forced to separate from family or friends during the performance.

At times, segregated seating is simply the result of thoughtlessness and indifference. At other times safety concerns are raised, such as requiring patrons to sit near theater exits because of perceived hazards in case of fire. The purported safety hazard is largely based on inaccurate assumptions and myths about the ability of people with disabilities to get around in such circumstances. People who use wheelchairs vary greatly (as does the general public) in their individual ability to move quickly or slowly. More "safety hazard" is created by a slow-moving ambulatory person than by a fast-moving wheelchair athlete.

A balance between the safety interest and the need to preserve a choice of seating for movie patrons who use wheelchairs has been accomplished under existing federal accessibility standards (UFAS. sec. 4.33.3) that have applied since 1984 to theaters, auditoriums and other places of assembly constructed with federal funds. These standards provide that wheelchair seating areas must be "dispersed throughout the seating area" and "located to provide lines of sight comparable to those for all viewing areas." Wheelchair areas are not restricted to areas "near an exit," but can be located in various parts of the theater so long as they "adjoin an accessible route that also serves as a means of egress in case of emergency."

The availability of a choice of seating is critical to assure that patrons with disabilities are not segregrated from family or friends. New construction must therefore provide a variety of seating options. In existing theaters, efforts should be made to increase seating options where readily achievable. If removal of seats is not readily achievable, at a minimum, the entity must modify rules and procedures to allow a non-disabled companion to sit with the person who uses a wheelchair, by providing, for example, a folding chair. Finally, it is critical that seating be available in the front of the audience for persons with hearing and vision impairments, including those who use wheelchairs.

Section 302(b)(1)(D) of the legislation specifies that an individual or entity shall not, directly, or through contractual or other arrangements, utilize standards or criteria or methods of administration that have the effect of discriminating on the basis of disability or that perpetuate the discrimination of others who are subject to common administrative control. This provision is identical to section 102(b)(3) of the bill, which was discussed previously in the report.

Section 302(b)(1)(E) of the legislation specifies that it shall be discriminatory to exclude or otherwise deny equal goods, services, privileges, advantages, and accommodations, or other opportunities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association. This provision is comparable to section 102(b)(4) of the legislation, which was discussed previously in the report. The term "entity" is included in this section because, at times, entities that provide services to, or are otherwise associated with people with disabilities, are subjected to discrimination as well.

Section 302(b)(1) includes general prohibitions restricting a public accommodation from discriminating against people with disabilities by denying them the opportunity to benefit from goods or services, by giving them unequal goods or services, or by giving them different or separate goods or services. These general prohibitions are patterned after the basic, general prohibitions that exist in other civil rights laws that prohibit discrimination on the basis of race, sex, religion, or national origin.

In order not to discriminate against people with disabilities, however, certain steps must often be taken as well in order to ensure that an opportunity for individuals with disabilities to participate in the goods or services is effective and meaningful. Thus, section 302(b)(2) includes specific prohibitions against discrimination, which refer to such requirements as providing auxiliary aids, modifying policies, or making various types of physical access changes. Certain limitations have been incorporated into these obligations: for example, a public accommodation need not provide an auxiliary aid if doing so would impose an undue burden, and physical access changes to existing facilities need be made only if they are readily achievable.

It should be noted that the specific provisions, including the limitations in these provisions, control over the general provisions to the extent that there is any apparent conflict. This interaction between the specific and general prohibitions operates with regard to the contractual prohibition as well. Thus, in situations in which there is no limiting factor (cost or otherwise) when the entity acts directly, there is similarly no limiting factor when the entity acts indirectly through a contract. Similarly, when there is a limiting "factor" when the entity acts directly (e.g., the limitation of "undue burden" in providing auxiliary aids and services or the limitation of "readily achievable" for physical access changes in existing facilities), that same limitation applies if the entity is acting indirectly through a contractual relationship.

As noted, the reference to contractual arrangements is tc make clear that an entity may not do indirectly through contractual arrangements what it is prohibited from doing directly under this Act. However, it should also be emphasized that this limitation creates no substantive requirements in and of itself. Thus, for example, a store located in an inaccessible mall or other building, which is operated by another entity, is not liable for the failure of that other entity to comply with this Act by virtue of having a lease or other contract with that entity. This is because, as noted, the store's legal obligations extends only to individuals in their status as its own clients or customers, not in their status as the clients or customers of other public accommodations. Likewise, of course, a covered entity may not use a contractual provision to reduce any of its obligations under this Act. In sum, a public accommodation's obligations are not extended or changed in any manner by virtue of its lease with the other entity. The Committee intends that implementing regulations be issued by the Attorney General that will specifically address this area.

Section 302(b)(2)(A)(i) of the legislation specifies that the term "discrimination" includes the imposition or application of eligibility criteria that screen out or tend ot screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any goods, services, facilities, privileges, advantages, and accommodations, unless such criteria can be shown to be necessary for the provision of the goods, services, facilities, privileges, advantages, or accommodations being offered.

As explained above, it is a violation of this title to exclude persons with disabilities. For example, it would be a violation for a grocery store to impose a rule that no blind persons would be allowed in the store, or for a drugstore to refuse to serve deaf people. It also would be a violation for such an establishment to invade such individuals' privacy by trying to identify unnecessarily the existence of a disability—for example, for purposes of a credit application, by a department store inquiring whether an individual has epilepsy, has ever had been hospitalized for mental illness, or has any other disability.

Similarly, it can constitute a violation to impose critria that limit the participation of people with disabilities—for example, by requiring that individuals with Down syndrome only be seated at the counter, but not in the table-seating section of a diner.

It would also be a violation of this title to adopt policies which impose additional requirements or burdens upon people with disabilities that are not applied to other persons. Thus, it would be a violation for a theater or restaurant to adopt a policy specifying that individuals who use wheelchairs must be chaperoned by an attendant.

In addition, this subsection prohibits the imposition of criteria that "tend to" screen out an individual with a disability. This concept, drawn from current regulations under Section 504 (See, e.g. 45 C.F.R. 84.13), makes it discriminatory to impose policies or criteria that, while not creating a direct bar to individuals with disabilities, diminish such individuals' chances of participation.

Such diminution of opportunity to participate can take a number of different forms. If, for example, a drugstore refuses to accept checks to pay for prescription drugs unless an individual presents a driver's license, and no other form of identification is acceptable, the store is not imposing a criterion that identifies or mentions disability. But for many individuals with visual impairments, and various other disabilities, this policy will operate to deny them access to the service available to other customers; people with disabilities will be disproportionately screened out.

A public accommodation may, however, impose neutral rules and criteria that are necessary for the safe operation of its business. For example, a height limit for certain rides at an amusement park will screen out certain adults of short stature, but may still be a legitimate safety criterion. Safety criteria, however, must be based on actual risks and not on speculation, stereotypes, or generalizations about disability.

Section 302(b)(2)(A)(ii) of the legislation specifies that discrimination includes a failure to make reasonable modifications in policies, practices, and procedures when such modifications may be necessary to afford such goods, services, facilities, privileges, advantages, or accommodations unless the entity can demonstrate that making such modifications would fundamentally alter the nature of such goods, services, facilities, privileges, advantages, or accommodations.

Many physicians have developed areas of specialization. Nothing in this legislation is intended to prohibit such a physician from referring a patient with a disability to another physician if that patient is seeking treatment outside the doctor's specialization and if the doctor would make a similar referral for an individual without that disability. For example, a physician who specializes in treating burn victims could not refuse to treat the burns of a deaf individual because of that individual's deafness. However, that physician is not required to accept the deaf individual as a patient if the individual does not have burns. The physician would need only to provide other types of medical treatment to the burn victim if the physician provided such other treatments to nondisabled individuals.

Likewise, nothing in this legislation is intended to prohibit a physician from referring an individual with a disability to another physician if the physician would refer other, nondisabled individuals with the same presenting conditions to another physician, or if the disability itself creates specialized complications for the patient's health which the physician lacks the experience or knowledge to address.

Similarly, a drug rehabilitation clinic could refuse to treat a person who was not a drug addict but could not refuse to prohibit a physician from referring an individual with a disability to another physician if the physician would refer other, nondisabled individuals with the same presenting conditions to another physician, or if the disability itself creates specialized complications for the patient's health which the physician lacks the experience or knowledge to address.

Similarly, a drug rehabilitation clinic could refuse to treat a person who was not a drug addict but could not refuse to treat a person who was a drug addict simply because the patient tests positive for HIV.

A public accommodation which does not allow dogs must modify that rule for a blind person with a seeing-eye dog, a deaf person with a hearing-ear dog, or a person with some other disability who uses a service dog. Refusal to admit the dog in these circumstances is tantamount to refusing to admit the person who is in need of the dog. Moreover, a public accommodation may not require the person with the disability to be separated from the service, guide, or seeing-eye dog once inside the facility.

Section 302(b)(2)(A)(iii) of the legislation specifies that discrimination includes a failure to take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the entity can demonstrate that taking such steps would fundamentally alter the nature of the goods, services, facilities, advantages, or accommodations being offered or would result in an undue burden.

The phrase "undue burden" is the limit applied under this title upon the duty of places of public accommodation to provide auxiliary aids and services. It is analogous to the phrase "undue hardship" used in the employment title of the Act and is derived from section 504 and regulations thereunder. The determination of whether the provision of an auxiliary aid or service imposes an undue burden on a business will be made on a case-by-case basis, taking into account the same factors used for purposes of determining "undue hardship." (See previous discussion in the report.)

The fact that the provision of a particular auxiliary aid would result in a undue burden does not relieve the business from the duty to furnish an alternative auxiliary aid, if available, that would not result in such a burden.

The term "auxiliary aids and services" is defined in section 3(1) of the legislation. The definition includes illustrations of aids and services that may be provided. The list is not meant to be exhaustive; rather, it is intended to provide general guidance about the nature of the obligation.

The Committee expects that the public accommodation will consult with the individual with a disability before providing a particular auxiliary aid or service. Frequently, an individual with a disability requires a simple adjustment or aid rather than an expensive or elaborate modification often envisoned by a public accommodation.

For example, auxiliary aids and services for blind persons include both readers and the provision of brailled documents (see below). A restaurant would not be required to provide menus in braille if it provided a waiter or other person who was willing to read the menu. Similarly, a bookstore need not braille its price tags, stock brailled books, or lower all its shelves so that a person who uses a wheelchair can reach all the books. Rather, a salesperson can tell the blind person how much an item costs, make a special order of brailled books, and reach the books that are out of the reach of the person who uses a wheelchair.

The legislation specifies that auxiliary aids and services includes qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments. Other effective methods may include: telephone handset amplifiers, telephones compatible with hearing aids, telecommunication devices for the deaf, closed captions, and decoders.

For example, it would be appropriate for regulations issued by the Attorney General to require hotels of a certain size to have decoders for closed captions available or, where televisions are centrally controlled by the hotel, to have a master decoder.

It is also the Committee's expectation that regulations issued by the Attorney General will include guidelines as to when public accommodations are required to make available portable telecommunication devices for the deaf. In this regard, it is the Committee's intent that hotel and other similar establishments that offer nondisabled individuals the opportunity to make outgoing calls, on more than an incidental convenience basis, will provide a similar opportunity for hearing impaired customers and for customers with communication disorders to make such outgoing calls by making available a portable telecommunication device for the deaf.

It is not the Committee's intent that individual retail stores, doctors' offices, restaurants or similar establishments must have telecommunications devices for the deaf since people with hearing impairments will be able to make inquiries, appointments, or reservations with such establishments through the relay system established pursuant to title IV of the legislation, and the presence of a public telephone in these types of establishments for outgoing calls is incidental.

Open-captioning, for example, of feature films playing in movie theaters, is not required by this legislation. Filmmakers, are, however, encouraged to produce and distribute open-captioned versions of films, and theaters are encouraged to have at least some pre-announced screenings of a captioned version of feature films.

Places of public accommodations that provide films and slide shows to impart information are required to make such information accessible to people with disabilities.

The legislation also specifies that auxiliary aids and services include qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments. Additional examples of effective methods of making visually delivered materials available include audio recordings and the provision of brailled and large print materials.

The legislation specifies that auxiliary aids and services include the acquisition or modification of equipment or devices. For example, a museum that provides audio cassettes and cassette players for an audio-quided tour of the museum may need to add brailled adhesive labels to the buttons on a select number of the tape-players so that they can be operated by a blind person.

The Committee wishes to make it clear that technological advances can be expected to further enhance options for making meaningful and effective opportunities available to individuals with disabilities. Such advances may require public accommodations to provide auxiliary aids and services in the future which today would not be required because they would be held to impose undue burdens on such entities.

Indeed, the Committee intends that the types of accommodation and services provided to individuals with disabilities, under all of the titles of this bill, should keep pace with the rapidly changing technology of the times. This is a period of tremendous change and growth involving technology assistance and the Committee wishes to encourage this process. (See, for example, the enactment in 1988 of P.L. 100-407, the Technology Related Assistance for Individuals with Disabilities Act). Information exchange is one of the areas where there are still substantial barriers, but where great strides are being made. Access to time sensitive print information, whether in the press or in government documents (such as notices of grants and contracts in the Federal Register or the Commerce Daily) is one of the cornerstones of our free society and of equal opportunity and access. It is not coincidental that access to information was the first guarantee extended by the Bill of Rights.

For these reasons, the Committee expects the Federal agencies charged with the implementation of this Act to take special interest in being aware of the possibilities relating to information dissemination and to make special efforts to share this information through technical assistance programs. Programs such as the Newspapers for the Blind Program in Flint, Michigan, a program which has been nationally recognized and is in the process of being emulated, provide an excellent example of what can be done in this area.

Section 302(b)(2)(A)(iv) of the legislation specifies that discrimination includes a failure to remove architectural barriers and communication barriers that are structural in nature in existing facilities, and transportation barriers in existing vehicles used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles by the installation of a hydraulic or other lift), where such removal is readily achievable.

The Committee was faced with a choice in how to address the question of what actions, if any, a public accommodation should be required to take in order to remove structural barriers in existing facilities and vehicles. On the one hand, the Committee could have required retrofitting of all existing facilities and vehicles to make them fully accessible. On the other hand, the Committee could have required that no actions be taken to remove barriers in existing facilities and vehicles.

The Committee rejected both of these alternatives and instead decided to adopt a modest requirement that public accommodations make structural changes or adopt alternative methods that are "readily achievable."

The phrase "readily achievable" is defined in section 301(5) to mean actions that are easily accomplishable and able to be carried out without much difficulty or expense. In determining whether an action is readily achievable, factors to be considered include:

(1) The overall size of the business of a covered entity with respect to number of employees; the number, type, and location of its facilities; the overall financial resource of the entity and the financial resources of its facility or facilities involved in the removal of the barrier;

(2) The type of operation or operations maintained by a covered entity, including the composition and structure of the workforce, in terms of such factors as functions of the workforce, geographic separateness and administrative relationship to the extent that such factors contribute to a reasonable determination of readily achievable; and

(3) The nature and cost of the action needed.

As in the employment title, the specific factors added to section 302(5) reflect concerns that were raised regarding public accommodations that may operate separate, local facilities across the country. The Committee's discussion in title I regarding the addition of these factors applies to this title as well.

It is important to note that readily achievable is a significantly lesser or lower standard than the "undue burden" standard used in this title and the "undue hardship" standard used in title I of this legislation. Any changes that are not easily accomplishable and are not able to be carried out without much difficulty or expense when the preceding factors are weighed are not required under the readily achievable standard, even if they do not impose an undue burden.

The concept of readily achievable should not be confused with the term "readily accessible" used in regard to accessibility requirements for alterations (section 302(b)(2)(A)(vi)) and new construction (section 303). While the word "readily" appears in both phrases and has roughly the same meaning in each context—i.e., easily, without much difficulty—the concepts of "readily achievable" and '"readily accessible" are sharply distinguishable and represent almost polar opposites in focus.

The phrase "readily accessible to and usable by individuals with disabilities" focuses on the person with a disability and addresses the degree of ease with which an individual with a disability can enter and use a facility; it is access and usability which must be "ready."

"Readily achievable," on the other hand, focuses on the business operator and addresses the degree of ease of difficulty of the business operator in removing a barrier; if barrier-removal cannot be accomplished readily, then it is not required.

What the "readily achievable" standard will mean in any particular public accommodiation will depend on the circumstances, considering the factors listed previously. The kind of barrier removal which is envisioned, however, includes the addition of grab bars, the simple ramping of a few steps, the lowering of telephones, the addition of raised letter and braille markings on elevator control buttons, the addition of flashing alarm lights, and similar modest adjustments.

This section may require the removal of physical barriers, including those created by the arrangement of location of such temporary or movable structures as furniture, equipment, and display racks. For example, a restaurant may need to rearrange tables and chairs, or a department store may need to adjust its layout of display racks and shelves, in order to permit access to individuals who use wheelchairs, where these actions can be carried out without much difficulty or expense.

The purpose of this provision is to provide individuals with disabilities access to a representative selection of merchandise available in a department. The Committee does not intend that a department store separate each and every display fixture in order to provide wheelchair clearance maneuverability. It is sufficient if a customer who uses a wheelchair is able to determine, once in a department, that the store offers, for example, black leather jackets. Once that is determined, the customer can rely upon a salesperson to retrieve a black leather jacket in the cutomer's size.

A public accommodation would not be required to provide physical access if there is a flight of steps which would require extensive ramping or an elevator. The readily achievable standard only requires physical access that can be achieved without extensive restructuring or burdensome expense.

In small facilities like single-entrance stores or restaurants, "readily achievable" changes could involve small ramps, the installation of grab bars in restrooms in various sections and other such minor adjustments and additions.

Section 302(b)(2)(A)(v) of the legislation specifies that where an entity can demonstrate that removal of a barrier is not readily achievable, discrimination includes a failure to make such goods, services, facilities, privileges, advantages, or accommodations available through alternative methods if such methods are readily achievable.

With respect to the adoption of alternative methods, examples of "readily achievable" include: coming to the door to receive or return dry cleaning; allowing a disabled patron to be served beverages at a table even though nondisabled persons having only drinks are required to drink at the inaccessible bar; providing assistance to retrieve items in an inaccessible location; and rotating movies between the first floor accessible theater and a comparable second floor inaccessible theater and notifying the public of the movie's location in any advertisements.

Section 302(b)(2)(A)(vi) of the legislation specifies that discrimination includes, with respect to a facility or part thereof that is altered by, on behalf of, for the use of an establishment in a manner that affects or could affect the usability of the facility or part thereof, a failure to make the alterations in such a manner that, to the maximum extent feasible, the altered portion of the facility is readily accessible to and usable by individual with disabilities.

Where the entity is undertaking an alteration that affects or could affect the usability of or access to an area of the facility containing a primary function, the entity must also make the alternations in such manner that, to the maximum extent feasible, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the remodeled area, are readily accessible to and usable by individuals with disabilities, where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under the criteria established by the Attorney General).

Under the language of section 302(b)(2)(A)(vi), an "alteration that affects or could affect usability of or access to an area of the facility containing a primary function" triggers an obligation to provide an accessible path of travel to the altered area, and to make bathrooms, telephones, and drinking fountains serving the altered area accessible. That such alternations must or could affect usability means that minor changes such as painting or papering walls, replacing ceiling tiles, and similar alterations that do not affect usability or access do not trigger the requirement that the altered areas must be made accessible or that the path of travel and bathrooms and other facilities must be made accessible.

Changes to floors may or may not affect accessibility or usability, depending upon the nature of the change involved. Routine maintenance, reparing and sanding floors, and other minor changes to floor surfaces would generally not affect usability and accessibility. Likewise, laying carpets or linoleum would ordinarily not affect usability and access. Such changes to floor surface would affect accessibility, however, if they were done in such a manner or made use of such materials as to result in a surface that is too slippery, spongy, uneven, not securely fastened down, having too-deep or too-wide channels, or otherwise creating a hazard or barrier to access by persons who use wheelchairs or have other mobility, visual or medical impairments. Laying of carpets and other floor coverings may not be done in such a manner as to make an otherwise accessible area inaccessible.

Other changes to floors, such as totally replacing a floor or installing a brick or stone floor, may be so substantial an undertaking and so connected to usability and accessibility as to trigger the requirement that the altered area be made accessible and that the path of travel and bathrooms be made accessible if they occur in "an area of the facility containing a primary function." Under the statutory language, the latter obligations will occur only to the extent that they are not disproportionate to the overall alterations in terms of cost and scope.

Areas containing primary functions refer to those portions of a place of public accommodations where significant goods, services, facilities, privileges, advantages, or accommodations are provided. It is analogous to the concept in existing Uniform Federal Accessibility Standards (UFAS) of "the rooms or spaces in a building or facility that house the major activities" (UFAS 3.5). A mechanical room, boiler room, supply storage room, or janitorial closet is clearly not an area containing a primary function; the customer services lobby of a bank, the dining area of a cafeteria, the meeting rooms in a conference center, and the viewing galleries of a museum are areas containing a primary function.

The statute requires that when primary functional areas or places of public accommodation are altered in a manner that affects or could affect the usability or accessibility of the area, an accessibility path of travel and restrooms, telephones, and drinking fountains serving the altered area must be made accessible, if doing so would not be "disproportionate in terms of cost and scope to the overall alteration." This language sets out an expectation that an accessible path of travel and accessible facilities should generally be included when alternations are done to primary functional areas, unless achieving such accessibility would be out or proportion to the overall alteration being undertaken.

The disproportionality concept recognzies that, in some circumstances, achieving an accessible path of travel and accessible restrooms, telephones, and drinking fountains may be sufficiently significant in terms of cost or scope in comparison to the remainder to the alteration being undertaken as to render this requirement unreasonable. In such cases, where the tail (path of travel, accessible restrooms, etc.) would be wagging the dog (the overall alteration), the accessible path of travel and related accessibility features are not required.

Of course, a place of public accommodation may not evade the path of travel, accessible restrooms, etc., requirements by performing a series of small alterations which it would otherwise have performed as a single undertaking. The Committee notes that in Pennsylvania, a state statute requires that any series of alteration projects on a facility conducted within three years is combined as if they were a single alteration for purposes of determining the extent of accessibility requirements (71 Purdon's Pa. Stats. Ann. sec. 1455.1c (1989 Cum. Supp.)). Likewise, under the ADA, if a public accommodation has completed an alteration without incorporating an accessible path of travel and accessible restrooms, etc., the total costs of the alterations both past and future which are proximate in time may appropriately be considered in determining whether providing an accessible path of travel, restrooms, etc. is disproportionate.

If the aggregate cost of an accessible path of travel, restrooms, telephones, and drinking fountains would be disproportionate to the overall alteration cost, the place of public accommodation is not relieved of the obligation to provide a subset of such features that is not disproportionate. The goal is to provide a maximum degree of accessibility in such features without exceeding the disproportionality limit. If a selection must be made between accessibility features, those which provide the greatest use of the facility should be selected. For example, an accessible entrance would generally be the most important path of travel feature, since without it the facility will be totally unusable by many persons with disabilities. An accessible restroom would have greater priority than an accessible drinking fountain.

If there is no way to provide an accessible path of travel to an altered area because of the disproportionality limit, making restrooms, etc. serving the area accessible is still required if it is not disproportionate. It is incorrect to assume that if a building entrance has steps, there is no reason to make the restrooms and other features accessible. Some individuals with disabilities can negotiate steps but still need accessibility features in the restroom, drinking fountains, etc. If those contemplating alterations to places of public accommodation are unsure how to rank such accessibility features in particular circumstances, they would be well-advised to consult with local organizations representing persons with disabilities.

The parameters of the concept of disproportionality will be established in the minimum guidelines issued by the Architectural and Transportation Barriers Compliance Board and in the alteration project. For example, it would clearly be disproportionate to require a public accommodation to double the cost of a planned alteration. Indeed, the Committee believes that, in almost all circumstances, it would be disproportionate to increase the cost of an alteration by more than 50% to incorporate an accessible path of travel and related accessibility features. The Committee notes that Pennsylvania statutes incorporate a formula under which an accessible path of travel is mandated whenever an alteration projects costs between 30 percent and 50 percent of the worth of the building, and the entire building must be made accessible if the remodeling exceeds 50 percent of the building's value (71 Purdon's Pa. Stats. Ann. sec. 1455.1c(b)(1) (1989 Cum. Supp.)). This approach differs somewhat from that in the ADA, in that the latter compares the proportionality of the accessibility costs to the overall planned alteration rather than to the underlying value of the building. The Committee believes, however, that it would be consistent with the ADA approach for the minimum guidelines or regulations to establish a specific standard, such as 30% of the alteration costs, for determining the disproportionality of the accessible path of travel and related accessibility features required under Sec. 302(b)(2)(A)(vi).

The "path of travel" to an altered area means a continuous, unobstructed way of pedestrian passage by means of which that area may be approached, entered, used, and exited; and which connects that area with an exterior approach (including sidewalks, streets, and parking areas), an entrance to the facility, and other parts of the facility. An accessible path of travel may consist of walks and sidewalks; curb ramps and other interior or exterior pedestrian ramps; clear floor paths through lobbies, corridors, rooms, and other improved areas; parking access aisles; elevators and lifts; or a combination of such elements. An accessible path of travel is analogous to the "accessible route" and "circulation path" concepts in the existing Uniform Federal Accessibility Standards (UFAS sec. 3.5).

The legislation includes an exception regarding the installation of elevators, which specifies that the obligation to make a facility readily accessible to and usable by individuals with disabilities shall not be construed to require the installation of an elevator for facilities that are less than three stories or that have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

The Committee wishes to make it clear that the exception regarding elevators does not obviate or limit in any way the obligation to comply with the other accessibility requirements established by this legislation, including requirements applicable to floors which, pursuant to the exception, are not served by an elevator. And, in the event a facility which meets the criteria for the exception nonetheless has an elevator installed, then such elevator shall be required to meet accessibility standards.

The Committee intends that the term "facility" means all or any portion of buildings, structures, sites, complexes, equipment, roads, walks, passageways, parking lots, or other real or personal property or interest in such property, including the site where the building, property, structure or equipment is located. This definition is consistent with the definitions used under current Federal regulations and standards and thus includes both indoor areas and outdoor areas where human-constructed improvements, structures, equipment, or property have been added to the natural environment. For example, curb cuts are required to provide access to the facility from the street or parking lot.

The phrase "readily accessible to and usable by individuals with disabilities" is a term of art which is explained in the section of the report concerning new construction.

The phrase "to the maximum extent feasible" has been included to allow for the occasional case in which the nature of an existing facility is such as to make it virtually impossible to renovate the building in a manner that results in its being entirely accessible to and usable by individuals with disabilities. In all such cases, however, the alteration should provide the maximum amount of physical accessibility feasible.

As noted above, a public accommodation violates this title by discriminating against an individual on the basis of disability regarding "goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation." Where a place of public accommodation is operated in premises that are rented or leased, either the landlord or the tenant may have legal control over the making of alterations, depending upon the terms of the lease or rental agreement they have entered into and state and local legal requirements regarding such contracts. Under some rental agreements, the tenant may be permitted to make certain alterations upon the premises, which may or may not be subject to a requirement of prior approval from the landlord. In other circumstances, the contractual agreement between the parties may prohibit the tenant from making any alterations. In most cases, the landlord will have full control over public and common areas a facilities.

Legal responsiblity for making alterations under this title will depend upon who has the legal authority to make such alterations, generally determined by the contractual agreement between the landlord and tenant. The obligation to remove architectural and communication barriers in existing buildings where such barrier removal is readily achievable (sec. 302(b)(2)(A)(iv)) and to include accessibility when making alterations (sec. 302(b)(2)(A)(vi)) are both stated in terms that make a "failure" to take such actions unlawful discrimination. The responsibility under this title for such a "failure" rests with the party—either the landlord or the tenant, depending upon their arrangement—who had the legal authority to make the changes required under the Act.

For example, if readily achievable modifications are needed on the premises of a place of public accommodation, and the lease gives the tenant the right to make such changes, then the tenant is responsible under this title to make such modifications. On the other hand, if a lease reserves all authority for making alterations to a landlord of premises in which a public accommodation is located, then the landlord is responsible for making the accessibility modifications called for in the Act.

In regard to the obligation in the cases of alterations that trigger the requirements that the altered area be accessible and, in some cases, that a path of travel and facilities be made accessible as well, this obligations stated in terms requiring an entity to "make the alterations in such a manner that" accessibility requirements are met (sec. 302(b)(2)(A)(vi)). Obviously, this langauge applies only to the entity that is making the alterations—the entity that has responsibility for otherwise undertaking the renovations or alteration.

Consequently, if a tenant is making alterations upon its premises pursuant to terms of a lease that grant it the authority to do so (even if they constitute alterations that trigger the path of travel requirement), and the landlord is not doing alterations to other parts of the facility then the alterations by the tenant on its own premises does not trigger a pathway of travel or bathrooms, etc. obligation upon the landlord in areas of the facility under its authority and not otherwise being altered.

Section 302(b)(2)(B) of the legislation includes policies applicable to fixed route vehicles used by entities that are not in the principal business of transporting people. First, it is considered discrimination for an entity to purchase or lease a bus or a vehicle that is capable of carrying in excess of 16 passengers, for which solicitations are made later than 30 days after the effective date of this Act that are not readily accessible to and usable by individuals with disabilities except that over-the-road buses shall be subject to section 304(b)(4) (which delays the effective date for 6 years for small operators and 5 years for other operates) and section 305 (which provides for a study of how to make the impact of making such buses accessible).

If an entity not in the principal business of transporting people purchases or leases a vehicle carrying 16 or fewer passengers after the effective date of title III that is not readily accessible to or usable by indviduals with disabilities, it is discriminatory for such an entity to fail to operate a system that, when viewed in its entirety, ensures a level of service to individuals with disabilities equivalent to the level of service provided to the general public.

Section 302(b)(2)(C) includes provisions applicable to vehicles used in demand responsive systems by entities that are not in the principal business of transporting people. The provisions applicable to such vehicles are the same as those applicable to fixed route vehicles except that the entity need not ensure that all new vehicles carryng more than 16 passengers are accessible if it can demonstrate that the system, when viewed in its entirety, already provides a level of service to individuals with disabilities equivalent to that provided to the general public.

For example, where a hotel at an airport provides free shuttle service, the hotel need not purchase new vehicles that are accessible so long as it makes alternative equivalent arangements for transporting people with disabilities who cannot ride the inaccessible vehicles. This might be accomplished through the use of a portable lift or by making arrangements with another entity that has an accessible vehicle that can be made available to provide equivalent shuttle service.

New construction

Section 303 of the legislation sets forth obligations with respect to the construction of new facilities. This section is applicable to public accommodations and commercial facilities.

Recipients of federal financial assistance currently must ensure that all newly constructed facilities are readily accessible to and usable by people with disabilities. The Section 504 regulations, which govern these recipients, use the Uniform Federal Accessibility Standards (UFAS) and the American National Standard for Building and Facilities (ANSI), which are based on model guidelines developed by the Architectural and Transportation Barriers Compliance Board.

Under UFAS, the areas of a new building which must be accessible are those "for which the intended use will require public access or which may result in the employment of physically handicapped persons." Thus, both areas that will be used by patrons and areas that will be used by employees, are covered under these standards.

The intent of this title is to extend this obligation to all ewly constructed commercial establishments. In many situations, the new construction will be covered as a "public accommodation," because in many situations it will already be known for what business the facility will be used. The Act also includes, however, the phrase "commercial facilities," to ensure that *all* newly constructed commercial facilities will be constructed in an accessible manner. That is, the use of the term "commercial facilities" is designed to cover those structures that are not included within the specific definition of "public accommodation." In either case, however, the standard governing the construction is that the facility must be "readily accessible to and usable by" people with disabilities.

The phrase "commercial facilities" has been substituted for the phrase "potential places of employment" of H.R. 2273 in order to eliminate any possible confusion between coverage of title III, concerning new construction, and coverage of title I, concerning employmnent practices. Obviously, there is an intended conceptual connection between the two titles. To the extent that new facilities are built in a manner that make them accessible to all individuals, including potential employees, there will be less of a need for individual employers to engage in reasonable accommodations for particular employees. The legal requirements of the two titles, however, are separate and independent.

The term "commercial facilities," retains the same definition as that given to "potential places of employment" in the Senate bill (S. 933). The new term therefore, is designed solely to eliminate any unnecessary confusion regarding coverage of employers; it is not intended to reduce the scope of the definition (i.e., any facility intended for non-residential use). Further, the term is not intended to be defined by dictionary or common industry definitions. Rather, "commercial facility", which is to be interpreted consistently with "potential places of employment", is defined as in S. 933, broadly to include any facility that is intended for nondresidential use and whose operations will affect commerce. Thus, for example, office buildings, factories, and other places in which employment will occur, come within this definition. The phrase, "whose operations affect commerce," is intended to include the full scope of coverage under federal constitutional commerce clause doctrine.

Section 303(a) of the legislation specifies that it is unlawful discrimination for a public accommodation or commercial facility to fail to design and construct facilities for first occupancy later than 30 months after the date of enactment of this Act that are readily accessible to and usable by individuals with disabilities, except where an entity can demonstrate that it is structurally impracticable to do so, in accordance with standards set forth or incorporated by reference in regulations issued under title III.

Section 303(b) of the legislation exempts entities from installing elevators under the same circumstances applicable to alternations (see section 302(b)(2)(A)(vi) and the accompanying clarifications in the report).

The phrase "readily accessible to or usable by" is a term of art which, in slightly varied formulations, has been applied in the Architectural Barriers Act of 1968 ("ready access to, and use of"), the Fair Housing Act of 1968, as amended ("readily accessible to and usable by"), and the regulations implementing section 504 of the Rehabilitation Act of 1973 ("readily accessible to and usable by") and is included in standards used by Federal agencies and private industry, e.g., the Uniform Federal Accessibility Standards (UFAS) ("ready access to and use of") and the American National Standard for Buildings and Facilities—Providing Accessibility and Usability for Physically Handicapped People (ANSI A117.1) (readily accessible to, and usable by).

The term is intended to enable people with disabilities (including mobility, sensory, and cognitive impairments) to get to, enter and use a facility. While the term does not necessarily require the accessibility of every part of every area of a facility, the term contemplates a high degree of convenient accessibility, entailing accessibility of parking areas, accessible routes to and from the facility, accessible entrances, usable bathrooms and water fountains, accessibility of public and common use areas, and access to the goods, services, programs, facilities, accommodations and work areas available at the facility.

The term is not intended to require that all parking spaces, bathrooms, stalls within bathrooms, etc. are accessible; only a reasonable number must be accessible, depending on such factors as their use, location and number. However, when the facilities involved do not serve identical functions, each facility must be accessible. For example, to provide equal service, all check-out lanes in a supermarket should be built sufficiently wide to allow passage by individuals who use wheelchairs. Likewise, meeting rooms at a conference center may be used for different purposes at any given time and therefore all must be accessible. Accessibility elements for each particular type of facility should assure both ready access to the facility and usability of its features and equipment and of the goods, services, and programs available therein.

For a hotel, "readily accessible to and usable by" includes, but is not limited to, providing full access to the public use and common use portions of the hotel; requiring all doors and doorways designed to allow passage into and within all hotel rooms and bathrooms to be sufficiently wide to allow passage by individuals who use wheelchairs; making a percentage of each class of hotel rooms fully accessible (e.g., including grab bars in bath and at the toilet, accessible counters in bathrooms); audio loops in meeting areas; signage, emergency flashing lights or alarms; braille or raised letter words and numbers on elevators; and handrails on stairs and ramps.

Of course, if a person with a disability needing a fully accessible room makes an advance registration without informing the hotel of the need for such a room and the person arrives on the date of the reservation and no fully accessible room is available, the hotel has not violated the Act. Moreover, a hotel is not required to forego renting fully accessible rooms to nondisabled persons if to do so would cause the hotel to lose a rental. However, the hotel must make efforts to afford the person who uses a wheelchair the accessible room, short of losing the rental.

In a physician's office, "readily accessible to and usable by" would include ready access to the waiting areas, a bathroom, and a percentage of the examining rooms.

Historically, particularized guidance and specifications regarding the meaning of the phrase "readily accessible to and usable by" for various types of facilities have been provided by MGRAD, UFAS, and the ANSI standards. Under this legislation, such specificity will be provided by the expanded Minimum Guidelines and Requirements for Accessible Design (MGRAD) standards to be issued by the Architectural and Transportation Barriers Compliance Board and by the regulations issued by the Attorney General, both of which are discussed subsequently in this report.

It is the expectation of the Committee that the regulations issued by the executive branch could utilize appropriate portions of MGRAD.

It is also the Committee's intent that the regulations will include language providing that departures from particular technical and scoping requirements, as revised, will be permitted so long as the alternative methods used will provide substantially equivalent or greater access to and utilization of the facility. Allowing these departures will provide public accommodations and commercial facilities with necessary flexibility to design for special circumstances and will facilitate the application of new technologies.

As noted above, the standard of "readily accessible to and usable by" applies not only to areas that will be used by patrons, but also to areas that may be used by disabled employees. The parameters of the standard as it applies to patrons has been set forth above. The same basic approach applies in employment areas for both public accommodations and commercial facilities. Thus, access into and out of the rooms is required. In addition, there must be an accessible path of travel in and around the employment area. The basic objective is that a person with a disability must be able to get to the employment area. These design standards do not cover unusual spaces such as catwalks and fan rooms.

The standard does not require, however, that individual workstations be constructed accessible or be outfitted with fixtures that make it accessible to a person with a disability. Such modifications will come into play in the form of reasonable accommodations when a person with a disability applies for a specific job and is governed by the undue hardship standard. If the builder builds fixtures and equipment to service a worksite (e.g., racks, shelves), the fixtures and shelves do not have to be made accessible. If a qualified person with a disability applies, whether such fixtures and equipment can be modified to allow the person to do the job would be an issue of reasonable accommodation.

Two items regarding the placement of fixtures and equipment should be noted. As have often been pointed out, it is always less expensive to build something new in an accessible manner than it is to retrofit an existing facility to make it accessible. That concept applies as well in the building and placement of fixtures and equipment. Thus, if it would not affect usability or enjoyment by members of the general public, consideration should be given in new construction to placing fixtures and equipment at a convenient height for accessibility. In addition, if they are commercially available, and it would not affect usability or enjoyment by the general public, an effort should be made to purchase new fixtures and equipment that are adjustable so that reasonable accommodations in the future may not pose undue hardships.

The Committee decided not to limit this provision to commercial facilities of 15 or more employees because of the desire to establish a uniform requirement of accessibility in new construction, because of the ease with which such a requirement can be accomplished in the design and construction stages, and because future expansion of a business or sale or lease of the property to a larger employer or to a business that is open to the public is always a possibility.

The phrase "commercial facilities" is not intended to make an establishment that is not a public accommodation subject to the other provisions of this title, e.g., the obligation to provide auxiliary aids or services.

The phrase "structurally impracticable" is a narrow exception that will apply only in rare and unusual circumstances where unique characteristics of terrain make accessibility unusually difficult. Such limitations for topographical problems are analogous to an acknowledged limitation in the application of the accessibility requirements of the Fair Housing Amendments Act of 1988. In the House Committee Report accompanying the Act, the House Committee on the Judiciary noted:

> Certain natural terrain may pose unique building problems. For example, in areas which flood frequently, such as waterfronts or marshlands, housing traditionally may be built on stilts. The Committee does not intend to require that the accessibility requirements of this Act override the need to protect the physical integrity of multifamily housing that may be built on such sites. (Cite.)

By incorporating the phrase "structurally impracticable," thi title explicitly recognizes an exception analogous to the "physica integrity" exception for peculiarities of terrain recognized implicit ly in statutory language and expressly in the House Committe Report accompanying the Fair Housing Amendments Act. A under the Fair Housing Amendments Act, this is intended to be narrow exception to the requirement of accessibility. It means tha only where unique characteristics of terrain prevent the incorpora tion of accessibility features and would destroy the physical integri ty of a facility is it acceptable to deviate from accessibility require ments. Buildings that must be built on stilts because of their loca tion in marshlands or over water are one of the few situations in which the structurally impracticable exception would apply.

Neither under this title nor under the Fair Housing Amendments Act should an exception to accessibility requirements be applied to situations in which a facility is located in "hilly" terrain or on a plot of land upon which there are steep grades; in such circumstances, accessibility can be achieved without destroying the physical integrity of a structure, and ought to be required in the construction of new facilities.

In those circumstances in which it is structurally impracticable to achieve full compliance with accessibility requirements under the ADA, public accommodations and commercial facilities should still be designed and constructed to incorporate accessibility features to the extent that they are structurally practicable. The accessibility requirements should not be viewed as an all-or-nothing proposition in such circumstances.

If it is structurally practicable for a facility in its entirety to be readily accessible to and usable by people with disabilities, then those portions which can be made accessible should be. If a building cannot comply with the full range of accessibility requirements because of structural impracticability, then it should still be required to incorporate those features which are structurally practicable. And if it is structurally impracticable to make a particular facility accessible to persons who have particular types of disabilities, it is still appropriate to require it to be made accessible to persons with other types of disabilities.

If, for example, a facility which is of necessity built on stilts cannot be made accessible to persons who use wheelchairs because itis structurally impracticable to do so, this is no reason for the facility not to be accessible for individuals with vision or hearing impairments or other kinds of disabilities.

Prohibition of discrimination in public transportation services provided by private entities

Section 304(a) of the legislation specifies that no individual shall be discriminated against on the basis of disability in the full and equal enjoyment of public transportation services provided by a privately operated entity that is primary engaged in the business of transporting people, but is not in the principal business of providing air transporation, and whose operations affect commerce.

The term "public transportation" is defined in section 301(4) of the legislatiion to mean transportation by bus or rail, or by any other conveyance (other than by air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

The Committee wishes to make it clear that the provisions of title III do not apply to public entities such as public transit authorities and school districts. Public entities providing transportation services are generally subject to the provisions of title II of this legislation and school bus operations are generally covered by regulations implementing section 504 of the Rehabilitation Act of 1973 issued by agencies providing Federal financial assistance to school districts.

The Committee also wishes to make it clear that title III does not apply to volunteer-driven commuter ridership arrangements.

The Committee excluded transportation by air because the Congress recently passed the Air Carriers Access Act, which was designed to address the problem of discrimination by air carriers and it is the Committee's expectation that regulations will be issued that reflect congressional intent.

Section 304(b) of the legislation includes specific applications of the general prohibition set out in section 303(a). As used in subsection (a), the term "discrimination against" includes:

(1) The imposition or application by an entity of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully enjoying the public transportation services provided by the entity;

(2) The failure of an entity to:

(A) Make reasonable modifications consistent with those required under section 302(b)(2)(A)(ii);

(B) Provide auxiliary aids and services consistent with the requirements of section 302(b)(2)(A)(iii); and

(C) Remove barriers consistent with the requirements of section 302(b)(2)(A)(iv), (v), and (vi); and

(3) The purchase or lease of a new vehicle (other than an automobile or over-the-road bus) that is to be used to provide

public transportation services, and for which a solicitation is made later than 30 days after the effective date of this Act, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

The bill includes a special exception for vehicles used in a demand responsive system. In the case of a vehicle used in a demand-response system, the new vehicle need not be readily accessible to and usable by individuals with disabilities if the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the level of service provided to the general public.

With respect to the purchase of new over-the-road buses, it is considered discrimination to purchase or lease a new over-the-road bus that is used to provide public transportation services and for which a solicitation is made later than 7 years after the date of enactment of this Act for small providers (as defined by the Secretary of Transportation) and 6 years for other providers, that is not readily accessible to and usable by individuals with disabilities.

The term "readily accessible to and usable by" means, with respect to vehicles used for public transportation, able to be entered into and exited from and safely and effectively used by individuals with disabilities, including individuals who use wheelchairs.

Currently, technology may not exist that will enable an individual who uses a wheelchair to access restrooms in over-the-road buses without resulting in the significant loss of current seating capacity. Since this legislation is future driven, the Committee intends that the Department of Transportation develop regulations which require that accessible restrooms be installed on intercity coaches when technologically feasible.

Lifts or ramps, and fold-up seats or other wheelchair spaces with appropriate securement devices are among the current features necessary to make transit vehicles readily accessible to and usable by individuals with disabilities. The requirement that a vehicle is to be readily accessible obviously entails that each vehicle is to have some spaces for individuals who use wheelchairs or three-wheeled mobility aids; how many spaces per vehicle are to be made available for wheelchairs is, however, a determination that depends on various factors, including the number of vehicles in the fleet, seat vacancy rates, and usage by people with disabilities.

The Committee intends that, consistent with these general factors, the determination of how many spaces must be available should be flexible and generally left up to the provider; provided that at least some spaces on each vehicle are accessible. Technical specifications and guidance regarding lifts and ramps, wheelchair spaces, and securement devices are to be provided in the minimum guidelines and regulations to be issued under this legislation.

The Committee intends that during the interim period prior to the date when over-the-road buses must be readily accessible to and usable by individuals with disabilities that regulations specify that providers modify their policies so that individuals who use wheelchairs may get on and off such buses without having to bring their own attendant to help them get on and off the bus. Further, policies should be modified to require the on-board storage of batteries for battery operated wheelchairs.

Section 305 of the legislation directs the Office of Technology Assessment to undertake a study to determine the access needs of individuals with disabilities to over-the-road buses and the most cost effective methods for making over-the-road buses readily accessible to and usable by individuals with disabilities.

In determining the most cost-effective methods for making over-the-road buses readily accessible to and usable by persons with disabilities, particularly individuals who use wheelchairs, the legislation specifies that the study should analyze the cost of providing accessibility, recent technological and cost saving developments in equipment and devices, and possible design changes.

Thus, the Committee is interested in having this study include a review of current technology such as lifts that enable persons with mobility impairments, particularly those individuals who use wheelchairs, to get on an off buses without being carried; alternative designs to the current lifts; as well as alternative technologies and modifications to the design of buses that may be developed that will also enable such individuals to get on and off over-the-road buses without being carried.

It is also expected that the study will review alternative design modifications that will enable an individual using the over-the-road bus to have access to the restroom and at the same time permitting the provider to retain approximately the same seating capacity.

The study must also assess the impact of accessibility requirements on the continuation of inter-city bus service by over-the-road buses, with particular consideration of impact on rural service in light of the economic pressures on the bus industry that have lead to a reduction of service, particularly in rural America. According to an analysis by the Interstate Commerce Commission staff, 3,400 communities lost all intercity bus service between 1982 and 1986. Of these nine-tenths were areas with populations of under 10,000.

Thus, this study should analyze how the private bus operators can comply with the requirement in section 304 of the legislation that over-the-road buses be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, without contributing to the deterioration of rural bus service.

It is the Committee's expectation that the study will also review current policies that impede the shared use by private companies providing tours and charter services of public buses that are currently accessible. Another component of the study may be to seek ways to link local providers of accessible transportation services with intercity bus service in hub areas. This may necessitate expansion of service by local providers to match intercity and intermodal schedules in order to help ensure effective development of such a feeder service relationship.

The Committee recognizes that after deregulations of the airline and rail industries, safety net programs were implemented to assist States in preserving efficient air and rail transportation, primarily between smaller cities and communities threatened by the loss of service. No similar Federal program was established to assist the private bus industry. The Committee expects that the study will consider whether and, if deemed appropriate, identify policy alternatives that might assist private bus companies meet the mandates in this legislation.

The legislation calls for the establishment of an Advisory Committee to advise the O.T.A. in the conduct of the study. The Committee shall be composed of: private operators using over-the-road buses, bus manufacturers, and lift manufacturers; individuals with disabilities, including potential users of such buses; and individuals with expertise. The Committee shall have equal numbers of members from the first two groups designated above, with more than 50% of the total membership being from those groups. Additionally, the section sets out a process for review of the draft report on the study by the Architectural and Transportation Barriers Compliance Board, with written comments received from the ATBCB incorporated in the final report. Finally, the section states that if the President, after reviewing the report, determines that application of the timelines in section 304(b)(4) will result in significant reduction in intercity bus service, such deadline shall be extended by one additional year.

Anyone in the business of providing taxi service shall not discriminate on the basis of disability in the delivery of that service. For example, it would be illegal under the Act to refuse to pick up a person on the basis of that person's disability. A taxi cab driver could not refuse to pick up someone in a wheelchair because he or she believes that the person could not get out of their chair or because he or she did not want to lift the wheelchair into the trunk of the taxi or put it in the back seat. Likewise a taxi driver cannot refuse to serve a person with a disability who uses an assistive dog.

Regulations

Section 306(a) of the legislation specifies that not later than one year after the date of enactment of this Act, the Secretary of Transportation shall issue regulations in an accessible format that shall include standards applicable to facilities and vehicles covered under section 302(b)(2)(B) and (C) and section 304.

With respect to section 304(b)(4) of the legislation, the Committee recognizes the apparent anomaly in requiring the promulgation of regulations while a needs and impact assessment is in progress and two years prior to the submission of the study and its recommendations to the President and the Congress. This timing, however, should not be construed as calling into question the importance or necessity of empirical data and technological information to this rulemaking process. Rather, the Committee believed it wise that, with respect to over-the-road buses, regulations be in place well in advance of the compliance dates of the Act.

The Committee fully expects that, following submission of the needs and impact assessment, the study and its recommendations will be expeditiously and carefully reviewed to determine if, or to what extent, the regulations promulgated pursuant to this section of the legislation need to be revised or amended.

Section 306(b) of the legislation specifies that not later than one year after the date of enactment of this Act, the Attorney General shall issue regulations in an accessible format to carry out the remaining provisions of this title not referred to in subsection (a) that include standards applicable to facilities and vehicles covered under section 302.

Standards included in regulations issued under subsections (a) and (b) shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504.

The Committee also included a new provision of interim accessibility standards. The Committee fully expects that the final regulations implementing this section will be issued within one year, as mandated by the Act. However, in the unlikely event that the regulations have not been issued, this provision sets forth the approach that entities covered under the Act can use so as to ensure that they are in compliance with the Act. Under this provision, if final regulations have not been issued, compliance with the current Uniform Federal Accessibility Standards will suffice to satisfy the requirement that facilities be readily accessible to and usable by persons with disabilities. In addition, this approach provides that if the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines it is required to issue under this Act, and those guidelines have been available for one year, a compliance with those guidelines will then be necessary to satisfy the Act's requirement that facilities be built in an accessible manner.

Exemptions for private clubs and religious organizations

Section 307 of the legislation specifies that the provisions of title III do not apply to private clubs or establishments exempted from coverage under title II of the Civil Rights Act of 1964 or to religious organizations or to entities controlled by religious organizations. Places of worship and schools controlled by religious organizations are among those organizations and entities which fall within this exemption.

The reference to "entities controlled by a religious organization" is modeled after the provisions in title IX of the Education Amendments of 1972. Thus, it is the Committee's intent that the term "controlled by a religious organization" be interpreted consistently with the Attachment which accompanied the Assurance of Compliance with title IX required by the U.S. Department of Education. Of course, the Committee recognizes that unlike the title IX exemption, this provision applies to entities that are not educational institutions. The term "religious organization" has the same meaning as the term "religious organization" in the phrase "entities controlled by a religious organization."

Activities conducted by a religious organization or an entity controlled by a religious organization on its own property which are open to nonmembers of that organization or entity are included in this exemption.

Enforcement

Section 308 of the legislation sets forth the scheme for enforcing the rights provided for in title III. Section 308(a)(1) provides a private right of section for any individual who is being or has reasonable grounds for believing that he or she is about to be subjected to discrimination on the basis of disability in violation of title III. The

Committee added the term "has reasonable grounds" to make the provision consistent with title II of the Civil Rights Act of 1964. This subsection makes available to an individual aggrieved under this title the remedies and procedures set forth in section 204a-3(a) of the Civil Rights Act of 1964 (preventive relief, including an application for a permanent or temporary injunction, restraining order, or other order).

Section 308(a)(2) of the legislation makes it clear that in the case of violations of section 302(b)(2)(A)(iv) pertaining to removal of barriers in existing facilities, section 302(b)(2)(A)(iv) pertaining to alternations of existing facilities, and section 303(a) pertaining to new construction, injunctive relief shall include an order to alter facilities to make such facilities readily accessible to and usable by individuals with disabilities as required by title III.

Where appropriate, injunctive relief shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by this title.

Section 308(b) of the legislation specifies the enforcement scheme for the Attorney General. First, the Attorney General shall investigate alleged violations of title III, which shall include undertaking periodic reviews of compliance of public accommodations and commercial facilities.

The Committee added a new provision, section 308(b)(1)(A)(ii), regarding certification by the Attorney General. Upon the application of a state or local government, the Attorney General, in consultation with the Architectural and Transportation Barriers Compliance Board, may certify that a state law or building code, or similar ordinance which establishes accessibility requirements, meets or exceeds the minimum requirements of this Act for the accessibility and usability of covered facilities under this title. Such certification can occur only after public notice of such a request has been given and after a public hearing has been held in which individual with disabilities, and organizations representing such individuals, have been provided an opportunity to testify against such certification if they so wish.

This provision is intended simply to allow builders and architects to use codes and laws with which they are familiar, if those laws, *in fact*, meet or exceed the requirements of this Act. This provision is not intended in any way to allow entities to avoid the purposes and goals of this Act. Thus, the Committee expects that the Attorney General will carefully scrutinize any such requests for certification and seriously consider any objections raised by individuals with disabilities to such certification, if such objections are made.

At any enforcement proceeding under this section, any certification granted by the Attorney General shall be rebuttable evidence that such state law or ordinance does meet or exceed the minimum requirements of this Act. That is, the certification may be presented as evidence, but it can then be rebutted by the plaintiff.

It is expected that, if the Attorney General proposes to grant certification for a particular law, code, or ordinance, a notice shall be issued in the Federal Register and an informal hearing shall be held before a Department of Justice official (not an Administrative Law Judge), at which interested prsons would have an opprtunity to express their comments. Certification is not to be considered rulemaking for purposes of the Administrative Procedure Act, 5 U.S.C. 551 et seq. The Attorney General may establish priorities for considering certifications (e.g., priority could be given to State documents before local documents, or to those that incorporated acceptable model building codes). The Attorney General may also establish procedures for revoking certification and establish the circumstances in which such action would be appropriate.

If the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of resistance to the full enjoyment of any of the rights granted by title III or that any person or group of persons has been denied any of the rights granted by title III and such denial raises an issue of general public importance, the Attorney General may commence a civil action in any appropriate United States district court.

In a civil action brought by the Attorney General, the court may grant any equitable relief it considers to be appropriate, including granting temporary, preliminary, or permanent relief, providing an auxiliary aid or service, modification of policy or alternative method, or making facilities readily accessible to and usable by individuals with disabilities, to the extent required by title III. In addition, a court may award such other relief as the court considers to be appropriate, including monetary damages to persons aggrieved, when requested by the Attorney General.

Furthermore, the court may vindicate the public interest by assessing a civil penalty against the covered entity in an amount not exceeding $50,000 for a first violation and not exceeding $100,000 for any subsequent violation. Section 308(b)(3) makes it clear that, in counting the number of previous determinations of violations for determining whether a "first" or "subsequent" violation has occurred, determinations in the same trial on liability that the covered entity has engaged in more than one discriminatory act are to be counted as a single violation. In other words, assume that the Attorney General brings a pattern or practice case against a public accommodation, and the court determines that the accommodation has engaged in a series of violations of the Act. All of these violations together would count as the "first violation" for purposes of assessing a civil penalty. This would be the case regardless of how the case was dealt with—for example, by trial, settlement, or consent decree. A "second violation" would not accrue to that public accommodation until the Attorney General brought another suit against the accommodation and the accommodation was again held in violation. Again, all of the violations on the second suit would be cumulatively considered as a "subsequent violation."

Section 308(b)(4) clarifies that the term "monetary damages" and "other relief" in section 308(b)(2) does not include punitive damages. It does include, however, all forms of compensatory damages, including out-of-pocket expenses and damages for pain and suffering. The Attorney General has discretion regarding the type of damages he or she seeks on behalf of aggrieved persons, if he or she chooses to seek such monetary damages.

Section 308(b)(2)(C) provides that, "to vindicate the public interest," a court may assess a civil penalty against the entity that has been found to be in violation of the Act in suits brought by the Attorney General. In addition, the Act further provides that, in considering what amount of civil penalty, if any, is appropriate, the court should give consideration to "any good faith effort or attempt to comply with this Act." In evaluating such good faith, the court should consider "among other factors it deems relevant, whether the entity could have reasonably anticipated the need for an appropriate type of auxiliary aid needed to accommodate the unique needs of a particular individual with a disability."

The "good faith" standard referred to in this section is not intended to imply a willful or intentional standard—that is, an entity cannot demonstrate good faith simply by showing that it did not willfully, intentionally, or recklessly disregard the law. At the same time, the absence of such a course of conduct would be a factor a court should weigh in determining the existence of good faith.

The "good faith" standard is a standard that should be seriously applied to protect from the assessment of civil penalties, as well as from the assessment of maximum civil penalties, those entities that have honestly and reasonably attempted to comply with the law. For example, a public accommodation is not required to anticipate all of the auxiliary aids that might be necessary to accommodate an individual with a unique disability. While, of course, a public accommodation is expected to anticipate such disabilities as visual, speech, hearing and mobility impairments, the Committee does not, as reflected in the statutory language, expect that civil penalties will be assessed against entities that reasonably and honestly could not have anticipated the unique needs of individuals with certain types of unusual disabilities and therefore may not have had some appropriate auxiliary aid at hand. Of course, once an individual has identified and requested a specific auxiliary aid, the public accommodation cannot subsequently claim that the aid could not have been reasonably anticipated. The public accommodation, of course, would still not have to provide the aid if it would impose an undue burden.

In sum, an honest effort to comply with the law should be a basic factor taken into account by the court in assessing whether any civil penalties, or the highest levels of those penalties, should apply against a public accommodation. As an additional example, assume that a public accommodation provided an auxiliary aid to a person with a disability, which the public accommodation reasonably believed would enable the person to effectively enjoy the goods and services provided by the accommodation. Assume further that a court ultimately determined that the auxiliary aid was not adequate for the person with a disability and therefore that the accommodation was in violation of the requirements of the Act. Assuming further that this action (or actions) somehow rose to the level of a case brought by the Attorney General, a court's assessment that the public accommodation had made a reasonable and honest effort to provide the auxiliary aid should obviously be taken into account by the court in determining good faith for the purposes of assessing any civil penalty.

Effective date

In accordance with section 309 of the legislation, title III of the legislation shall become effective 18 months after the date of enactment of this legislation.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICES

Title IV of the legislation, as reported, will help to further the statutory goals of universal service as mandated in the Communications Act of 1934. It will provide to hearing- and speech-impaired individuals telephone services that are functionally equivalent to those provided to hearing individuals.

Background

There are over 24 million hearing-impaired and 2.8 million speech-impaired individuals in the United States, yet inadequate attention has been paid to their special needs with respect to accessing the Nation's telephone system. Given the pervasiveness of the telephone for both commercial and personal matters, the inability to utilize the telephone system fully has enormous impact on an individual's ability to integrate effectively in today's society.

The Communications Act of 1934 mandates that communications services be "[made] available, so far as possible, to all the people of the United States. * * * ". (Section 1, emphasis added). This goal of universal service has governed the development of the nation's telephone system for over fifty years. The inability of over 26 million Americans to access fully the Nation's telephone system poses a serious threat to the full attainment of the goal of universal service.

In order to realize this goal more fully, Title IV of this legislation amends Title II of the Communications Act of 1934, as amended, by adding a new section 225. This new section imposes on all common carriers providing interstate or intrastate telephone service, an obligation to provide to hearing and speech-impaired individuals telecommunications services that enable them to communicate with hearing individuals. These services must be functionally equivalent to telephone service provided to hearing individuals. Carriers are granted the flexibility to determine whether such services are provided by the carrier alone, in concert with other carriers, or through a designee. Hereinafter, this part of the Report will be referring to this new section 225 and not to sections in S. 933, The Americans with Disabilities Act of 1989.

Currently, individuals with hearing and speech impairments can communicate with each other over the telephone network with the aid of Telecommunications Devices for the Deaf (TDDs). TDDs use a typewriter-style device equipped with a message display (screen and/or printer) to send a coded signal through the telephone network. However, users of TDDs can communicate only with other users of TDDs. This creates serious hardships for Americans with hearing and/or speech impairments, since access to the community at large is significantly limited.

The Commitee intends that section 225 better serve to incorporate the hearing- and speech-impaired communities into the telecommunications mainstream by requiring that telephone services be provided to hearing and/or speech impaired individuals in a manner that is functionally equivalent to telephone services offered to those who do not have these impairments. This requirement will serve to bridge the gap between the communications-impaired telephone user and the community at large. To participate actively in society, one must have the ability to call friends, family, businesses and employers.

Current technology allows for communications between a TDD user and a voice telephone user by employing a type of relay system. Such systems include a third party operator who completes the connection between the two parties and who transmits messages back and forth between the TDD user and the hearing individual. The originator of the call communicates to the operator either by voice or TDD. The operator then uses a video display system to translate the typed or voice message simultaneously from one medium to the other.

Although the Committee notes that relay systems represent the current state-of-the-art, this legislation is not intended to discourage innovation regarding telecommunications services to individuals with hearing and speech impairments. The hearing- and speech-impaired communities should be allowed to benefit from advancing technology. As such, the provisions of this section do not seek to entrench current technology but rather to allow for new, more advanced, and more efficient technology.

The Committee intends that the FCC have sufficient enforcement authority to ensure that telecommunications relay services are provided nationwide and that certain minimum federal standards are met by all providers of such services. The FCC's authority over the provision of intrastate telecommunications relay services, however, is expressly limited by certification procedures required to be established under this section whereby a state retains jurisdiction over the intrastate provision of telecommunication relay services.

The Committee finds it necessary to grant the FCC such residual authority in this instance to ensure universal service to the hearing- and speech-impaired community. Although a number of states have mandated statewide relay systems, the majority of states have not done so. Moreover, the systems that do exist vary greatly in quality and accessibility. The Committee finds that to ensure universal service to the population of users, service must be made uniformly available on a local, intrastate, and interstate basis. It is the Committee's hope and expectation, however, that all states will seek certification in a timely manner and that the FCC will not find it necessary to exercise its enforcement authority. It is essential to this population's well-being, self-sufficiency and full integration into society to be able to access the telecommunications network and place calls nationwide without regard to geographic location.

Attaining meaningful universal service for this population also requires that some level of minimum federal standards for service, service quality, and functional equivalency to voice telephone services be established and maintained. The FCC is therefore required to establish certain minimum federal standards that all telecommunications relay service providers must meet.

By requiring telecommunications relay services to be provided throughout the United States, this section takes a major step towards enabling individuals with hearing and speech impairments to achieve the level of independence in employment, public accommodations and public services sought by other sections of the Americans with Disabilities Act. The Committee concludes that expanding the FCC's authority in this instance will both promote interstate commerce and be of benefit to all Americans.

The grant of jurisdiction to the FCC is limited, however, by the state certification procedures required to be established under this section. It is the Committee's intention that these procedures operate to preserve initiatives by a state or group of states to implement a telecommunications relay services program within that state or within a region either through the state itself, through designees, or through regulation of intrastate common carriers. As such, the section provides that any state may regulate intrastate telecommunications relay services provided by intrastate carriers once the state is granted certification by the FCC. The FCC is to establish clearly defined procedures for requesting certification and a review process to ensure that a state program, however it is provided, satisfies the minimum standards promulgated under this section. The certification procedures and review process should afford the least possible intrusion into state jurisdiction consistent with the goals of this section to have nationwide universal service for hearing- and speech-impaired individuals.

The Committee intends that telecommunications relay services be governed by minimum federal standards that will ensure that telephone service for hearing and speech impaired individuals is functionally equivalent to telephone services offered to hearing individuals. Such standards, however, should not have the effect of freezing technology or thwarting the introduction of a superior or more efficient technology.

Cost recovery for telecommunications relay services will be determined by the FCC in the case of interstate telecommunications relay services and by certified states in the case of intrastate telecommunications relay services. While states are granted the maximum latitude to determine the methods of cost recovery for intrastate relay services provided under their jurisdiction, the FCC is specifically prohibited from allowing the imposition of a flat monthly charge on residential end users to recover the costs of providing interstate telecommunications relay services. It is the Committee's expectation that the costs of providing telecommunications relay services will be considered a legitimate cost of doing business and therefore a recoverable expense through the regulatory ratemaking process.

Definitions

Section 225(a) defines: (1) "Common Carrier or Carrier" to include interstate carriers and intrastate carriers for purposes of this section only; (2) "TDD" to mean a machine that may be used by a variety of disabled individuals such as deaf, hard of hearing, deaf-blind, or speech impaired individuals and that employs graphic communications through the transmission of coded signals over telephone wires; and (3) "Telecommunications relay services" to mean telephone transmission services that allow a hearing- and/or speech-impaired individual to communicate in a manner that is functionally equivalent to voice communications services offered to hearing individuals. The term includes, but is not limited to, TDD relay services.

Availability of telecommunication relay services

Section 225(b) states that in furtherance of the goals of universal service, the FCC must ensure that interstate and intrastate telecommunications relay services are provided to the greatest extent possible and in the most efficient manner.

Section 225(b)(2) extends the remedies, procedures, rights and obligations applicable to interstate carriers under the Communications Act of 1934, as amended, to intrastate carriers for the limited purpose of implementing and enforcing the requirements of this section.

Provision of services

Section (c) requires that carriers providing telephone voice transmission services provide telecommunications relay services within two years after the date of enactment of this section. Carriers are to offer to hearing- and speech-impaired individuals services which are functionally equivalent to telephone services provided to hearing individuals including providing services with the same geographic radius that they offer to hearing individuals. Carriers are granted the flexibility to provide such services either individually, in concert with other carriers, or through designees. In exercising this flexibility to appoint designees, however, carriers must ensure that all requirements of this section are complied with.

Regulations

Section (d) requires the FCC to prescribe the necessary rules and regulations to carry out the requirements of this section with one year of its enactment.

Also, given the unique and specialized needs of the population that will be utilizing telecommunications relay services, the FCC should pay particular attention to input from representatives of the hearing and speech-impaired community. It is recommended that this input be obtained in a formal manner such as through an advisory committee that would represent not only telecommunications relay service consumers but also carriers and other interested parties. The Committee notes that the FCC has already issued several notices on the creation of an interstate relay system and the most efficient way such a system could be provided. While the FCC is afforded a significant amount of flexibility in implementing the goals of this section, subsection (d) requires that the FCC establish certain minimum standards, practices and criteria applicable to all telecommunications relay services and service providers as follows:

Section (d)(1)(A) requires the FCC to establish functional requirements, guidelines, and operational procedures for the provision of telecommunications relay services. One of these requirements shall be that all carriers subject to this section shall provide telecommunications relay services on a non-discriminatory basis to all users within their serving area. The FCC should pursue means in which the goals of this section may be met in the most efficient manner. In addition, the Commission should include specific language requiring that operators be sufficiently trained so as to effectively meet the specialized communications needs of individuals with hearing and speech impairments, including sufficient skills in typing, grammar and spelling.

Section (d)(1)(B) requires the FCC to establish minimum federal standards to be met by all providers of intrastate and interstate telecommunications relay services including technical standards, quality of service standards, and the standards that will define functional equivalence between telecommunications relay services and voice telephone transmission services. Telecommunications relay services are to be governed by standards that ensure that telephone service for hearing- and speech-impaired individuals is functionally equivalent to voice services offered to hearing individuals. In determining factors necessary to establish functional equivalency, the FCC should include, for example, the requirement that telecommunications relay services transmit messages between the TDD and voice caller in real time, as well as the requirement that blockage rates for telecommunications relay services be no greater than standard industry blockage rates for voice telephone services. Other factors that should be included are the opportunity for telecommunications relay service users to choose an interstate carrier whenever possible. The FCC should enumerate other such measurable standards to ensure that hearing and non-hearing individuals have equivalent access to the Nation's telephone networks.

Section (d)(1)(C) requires that such telecommunications relay services operate 24 hours a day, seven days a week.

Section (d)(1)(D) requires that users of telecommunication relay services pay rates no greater than the rates paid for functionally equivalent voice communication with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination. Although the Committee commends states that have chosen to implement a discount, this section is not intended to mandate a rate discount with respect to all duration.

Section (d)(1)(E) prohibits relay operators from refusing calls or limiting the length of calls that use such relay services.

Section (d)(1)(F) prohibits relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of that call. The Committee recognizes that printed records of such calls may be necessary to complete the call however, this requirement is to ensure that records are not kept after termination of the conversation. In addition, the Committee recognizes that it may be technically impossible today to relay recorded messages in their entirety because TDDs can only transmit messages at a give speed. In these situations, a hearing- or speech-impaired individual should be given the option to have the message summarized.

Section (d)(1)(G) prohibits relay operators from intentionally altering any relayed conversation.

Section (d)(2) requires that the FCC ensure that regulations prescribed to implement this section encourage the use of state-of-the-art technology. Such regulations should not have the effect of freezing technology or thwarting the introduction of a superior or more efficient technolgy.

Section (d)(3) states that the Commission should issue regulations to govern the separation of costs for the services provided pursuant to this section. No change to the procedures for allocating joint costs between the interstate and intrastate jurisdictions as set forth elsewhere in the Communications Act of 1934 is intended.

Section (d)(4) prohibits the Commission from allowing the imposition of a fixed monthly charge on residential customers to recover the costs of providing interstate telecommunications relay services. However, the manner in which the costs of providing intrastate telecommunications relay services are recovered is left to the discretion of certified states. It is the Committee's expectation that the costs of providing such services will be considered a legitimate cost of doing business and therefore a recoverable expense through the regulatory ratemaking process.

Section (d)(5) grants the FCC flexibility to extend the date of full compliance with the requirements of this Section by one year for any carrier or group of carriers that it finds will be unduly burdened. Interested parties should be given an opportunity to comment on any such request for an extension and such requests should not be granted without compelling justification.

Enforcement

Section (e)(1) requires that the Commission enforce the requirements of this section subject to subsections (f) and (g). The Committee intends that the FCC have sufficient enforcement authority to ensure that telecommunications relay services are provided nationwide and that certain minimum federal standards are met by all providers of the service. The FCC's authority over the provision of intrastate telecommunications relay services, however, is expressly limited by certification procedures required to be established under subsection (f) whereby a state retains jurisdiction over the intrastate provision of telecommunications relay services.

Section (e)(2) requires that the Commission resolve any complaint by final order within 180 days after that complaint has been filed.

Certification

Sections (f)(1) and (2) describe the state certification procedure whereby states may apply to reassert jurisdiction over the provision of intrastate telecommunications relay services. The FCC may grant certification upon a showing that such services are being made available in the state and that they comply with the federal guidelines and standards promulgated pursuant to section (d). A state plan may make service available through the state itself, through designees or through regulation of intrastate carriers.

Section (f)(3) states that, except for reasons affecting rules promulgated pursuant to section (d), the FCC may not deny certification to a state based solely on its chosen method of funding the provision of intrastate telecommunications relay services. Section (d), however, would require that a state program not include cost recovery mechanisms that would have the effect of requiring users of telecommunications relay services to pay effectively higher rates than those paid for functionally equivalent voice communications services. Additionally, the Committee urges that because this service is of benefit to all society that any funding mechanism not be labeled so as to unduly prejudice the hearing- and speech-impaired community.

Section (f)(4) allows for the Commission to revoke such certification, if after notice and opportunity for hearing, the Commission determines that certification is no longer warranted.

Complaint

Section (g)(1) states that when a complaint is filed with the Commission that alleges a violation of this section with respect to the provision of intrastate telecommunication relay services, the Commission shall refer such complaint to the appropriate State commission if that State has been duly certified by the FCC pursuant to section (f). If the appropriate State has not been duly certified, then the Commission will handle the complaint pursuant to sections (e) (1) and (2).

Once a complaint has been properly referred to a State Commission, subsection (g)(2) permits the FCC to exercise its jurisdiction over such a complaint only if final action has not been taken within 180 days after the complaint is filed with the State, or within a shorter period as prescribed by the regulations of such State, or if the Commission determines that a State program no longer qualifies for certification under section (f).

TITLE V—MISCELLANEOUS PROVISIONS

Construction

Section 501 of the legislation specifies the relationship between this legislation and the Rehabilitation Act of 1973 and other Federal, State or local laws. Section 501 also specifies the relationship between this legislation and the regulation of insurance.

With respect to the Rehabilitation Act of 1973, section 501(a) of the legislation specifies that nothing in this legislation should be construed to reduce the scope of coverage or apply a lesser standard than the coverage required or the standards applied under title V of the Rehabilitation Act of 1973 (29 U.S.C. 790 et seq.) or the regulations issued by the Federal agencies pursuant to such title.

With respect to other laws, section 501(b) of the legislation specifies that nothing in this legislation should be construed to invalidate or limit any other federal law or law of any State or political subdivision of any State or jurisdiction that provides greater or equal protection for the rights of individuals with disabilities that are afforded by this legislation. In other words, all of the rights, remedies and procedures that are available to people with disabilities under other federal laws or other state laws (including state common law) are not preempted by this Act. This approach is consistent with that taken in other civil rights laws. The basic principle underlying this provision is that Congress does not intend to displace any of the rights or remedies available under other federal or state laws (including state common law) which provide greater or equal protection to individuals with disabilities. Finally, to the extent that this legislation could be construed to be in conflict with other laws governing spaces or worksites, for example OSHA requirements, the Committee expects the Attorney General to exercise coordinating authority to avoid and eliminate such conflicts.

With respect to insurance, section 501(c) of the legislation specifies that titles I, II and III of this legislation shall not be construed to prohibit or restrict—

> (1) an insurer, hospital or medical service company, health maintenance organization, or any agent, or entity that administers benefits plans, or similar organizations from underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law;
>
> (2) any person or organization covered by this Act from establishing, sponsoring or observing the terms of a bona fide benefit plan which terms are based on underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or
>
> (3) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that is not subject to State laws that regulate insurance

provided that points (1), (2), and (3) are not used as a subterfuge to evade the purposes of titles I, II and III of this legislation.

As indicated earlier in this report, the main purposes of this legislation include prohibiting discrimination in employment, public services, and places of public accommodation. The Committee does not intend that any provisions of this legislation should affect the way the insurance industry does business in accordance with the State laws and regulations under which it is regulated.

Virtually all States prohibit unfair discrimination among persons of the same class and equal expectation of life. The ADA adopts tis prohibition of discrimination. Under the ADA, a person with a disability cannot be denied insurance or be subject to different terms or conditions of insurance based on disability alone, if the disability does not pose increased risks.

Because there was some uncertainty over the possible interpretations of the language contained in titles I, II and III, as it applies to insurance, the Committee added section 501(c) to make it clear that this legislation will not disrupt the current nature of insurance underwriting or the current regulatory structure for self-insured employers or of the insurance industry in sales, underwriting, pricing, administrative and other services, claims, and similar insurance related activities based on classification of risks as regulated by the States.

However, the decision to include this section may not be used to evade the protections of title I pertaining to employment, title II pertaining to public services, and title III pertaining to public accommodations beyond the terms of points (1), (2) and (3), regardless of the date an insurance plan or employer benefit plan was adopted.

For example, an employer could not deny a qualified applicant a job because the employer's current insurance plan does not cover the person's disability or because of the increased costs of the insurance.

Moreover, while a plan which limits certain kinds of coverage based on classification of risk would be allowed under this section, the plan may not refuse to insure, or refuse to continue to insure, or limit the amount, extent, or kind of coverage available to an individual, or charge a different rate for the same coverage solely because of a physical or mental impairment, except where the refusal, limitation, or rate differential is based on sound actuarial principles or is related to actual or reasonably anticipated experience.

For example, a blind person may not be denied coverage based on blindness independent or actuarial risk classification. Likewise, with respect to group health insurance coverage, an individual with a pre-existing condition may be denied coverage for that condition for the period specified in the policy but cannot be denied coverage for illnesses or injuries unrelated to the preexisting condition.

Specifically, point (1) makes it clear that insurers may continue to sell to and underwrite individuals applying for life, health, or other insurance on an individually underwritten basis, or to serve such insurance products.

Point (2) recognizes the need for employers, and/or agents thereof, to establish and observe the terms of employee benefit plans, so long as these plans are based on underwriting or classification of risks.

Point (3) simply clarifies that self-insured plans, which are currently governed by the preemption provisions of the Employment Retirement Income Security (ERISA), are still governed by that preemption provision and are not subject to state insurance laws. Concerns had been raised that points (1) and (2) could be interpreted as affection the preemption provision of ERISA. No such implication is intended. Until the preemption provision of ERISA is modified, these self-insured plans are subject to state law only to the extent determined by the courts in their interpretation of ERISA's preemption provision. Of course, under the ADA, the provisions of these plans must conform with the requirements of ERISA, just as the provisions of other plans must be based on or not inconsistent with State law.

Point (3) provides that persons or organizations covered by the Act may continue to establish, sponsor, observe, or administer the terms of a bona fide benefit plan that is not subject to State laws that require insurance.

In all cases, points (1), (2), and (3) shall not be used as a subterfuge to evade the purposes of titles I, II and III of the legislation, regardless of the date the insurance plan or employer benefit plan was adopted.

As explained previously in this report, the Committee also wishes to clarify that in its view, as is stated by the U.S. Supreme court, in *Alexander* v. *Choate*, 469 U.S. 287 (1985), employee benefit plans should not be found to be in violation of this legislation under impact analysis simply because they do not address the special needs of every person with a disability, e.g., additional sick leave or medical coverage.

Moreover, this subsection must be read to be consistent with subsection (b) of section 501 pertaining to other Federal and State laws.

In sum, section 501(c) is intended to afford to insurers and employers the same opportunities they would enjoy in the absence of this legislation to design and administer insurance products and benefit plans in a manner that is consistent with basic principles of insurance risk classification. This legislation assures that decisions concerning the insurance of persons with disabilities which are not based on bona fide risk classification be made in conformity with non-discrimination requirements. Without such a clarification, this legislation could arguably find violative of its provisions any action taken by an insurer or employer which treats disabled persons differently under an insurance or benefit plan because they represent an increased hazard of death or illness.

The provisions recognize that benefit plans (whether insured or not) need to be able to continue business practices in the way they underwrite, classify, and administer risks, so long as they carry out those functions in accordance with accepted principles of insurance risk classification.

Prohibition against retaliation and coercion

Section 502(a) of the legislation specifies that no individual shall discriminate against any other individual because such other individual has opposed any act or practice made unlawful by this Act or because such other individual made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this Act.

Section 502(b) of the legislation specifies that it shall be unlawful to coerce, intimidate, threaten, or interfere with any person in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other person in the exercise or enjoyment of, any right granted or protected by this legislation. The Committee intends that the interpretation given by the Department of Housing and Urban Development to a similar provision in the Fair Housing Act, see 54 Fed. Reg. 3291, sec. 100.400(c)(1), be used as a basis for regulations for this section.

Section 502(c) of the legislation specifies that the remedies and procedures available under section 107, 205, and 308 shall be available to aggrieved persons for violations of subsections (a) and (b).

State immunity

Section 503 of the legislation specifies that a State shall not be immune under the Eleventh Amendment to the Constitution of the United States from an action in Federal court for a violation of this Act. In any action against a State for a violation of the requirements of this Act, remedies (including remedies both at law and in equity) are available for such a violation to the same extent as such remedies are available for such a violation in an action against any public or private entity other than a State.

This provision is included in order to comply with the standards for covering states set forth in *Atascadero State Hospital* v. *Scanlon*, 105 S. Ct. 3142 (1985).

Regulations by the Architectural and Transportation Barriers Compliance Board

Section 504 specifies that not later than 6 months after the date of enactment of this Act, the Architectural and Transportation

Barriers Compliance Board shall issue minimum guidelines that shall supplement the existing Minimum Guidelines and Requirements for Accessible Design for purposes of titles II and III.

These guidelines shall establish additional requirements, consistent with this Act, to ensure that buildings, facilities, and vehicles are accessible, in terms of architecture and design, transportation, and communication, to individuals with disabilities.

The Minimum Guidelines and Requirements for Accessible Design (MGRAD), as issued and revised by the Board have provided guidance to four Federal standard-setting agencies (the General Services Administration, the Department of Defense, the Department of Housing and Urban Development, and the U.S. Postal Service) in their regulations establishing the Uniform Federal Accessibility Standards (UFAS).

The ADA directs the Board to issue supplemental guidelines and requirements to guide two additional Federal standard-setting agencies—the Department of Transportation and the Department of Justice—in their development of regulations under this legislation.

The development of supplemental MGRAD will require the Board to complete and expand its previous guidelines and requirements. There are some areas within the Board's MGRAD authority in which it has not yet issued minimum guidelines. One such example is the area of recreation. In 1985, the Federal Government Working Group on Access to Recreation developed for the Board a technical paper titled, "Access to Outdoor Recreation Planning and Design," including technical requirements and specific guidelines, but the Board has not officially issued minimum guidelines and requirements in this area. The Committee expects the Board to take prompt action to complete the filling of such gaps in the existing MGRAD.

In issuing the supplemental minimum guidelines and requirements called for under this legislation, the Board should consider whether other revisions or improvements of the existing MGRAD (including scoping provisions) are called for to achieve consistency with the intent and the requirements of this legislation. Particular attention should be paid to providing greater guidance regarding communication accessibility.

In no event shall the minimum guidelines issued under this legislation reduce, weaken, narrow, or set less accessibility standards than those included in existing MGRAD.

This legislation also explicitly provides that the Board is to develop minimum guidelines for vehicles. The Committee intends that the Board shall issue minimum guidelines regarding various types of conveyances and means of transport that come within the gambit of titles II and III of the legislation. Such guidelines should include specifications regarding wheelchair lifts and ramps on vehicles where necessary for boarding and getting off. For example, lifts on buses must be designed to be usable in a safe manner, by persons with mobility impairments who use canes, crutches and walkers in addition to those who use wheelchairs. Therefore, lifts must have railings or other devices for safe use by persons who stand and/or walk with assistance. The Board should also review its minimum guidelines regarding stations and other places of boarding or departure from vehicles to make sure that they are coordinated with and complementary to the minimum guidelines regarding vehicles.

The Committee also added a specific provision to deal with the concerns of historic properties. Under the new provision, the guidelines issued by the Architectural and Transportation Barriers Compliance Board are required to include requirements for alterations that will threaten or destroy the historical significance of qualified historic buildings and facilities as defined in the Uniform Federal Accessibility Standards 4. 1. 7(1)(a). The provision further requires that, regarding alterations of buildings or facilities covered by the requirements of section 106 of the National Historic Preservation Act of 1966, the guidelines issued shall at a minimum maintain the procedures and standards established in the Uniform Federal Accessibility Standards 4. 1. 7(1) and (2), and that, regarding alterations of qualified historic buildings designated as historic under a statute of the appropriate state or local government body, the guidelines shall establish procedures equivalent to those established by the Uniform Federal Accessibility Standards 4. 1. 7(1)(b) and (c) and shall require, at a minimum, compliance with the minimum requirements established in Uniform Federal Accessibility Standards 4. 1. 7(2).

Attorneys' fees

Section 505 specifies that in any action or administrative proceeding commenced pursuant to this Act, the court or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual. Litigation expenses include the costs of experts and the preparation of exhibits. It is intended that the term "prevailing party" be interpreted consistently with other civil rights laws. Plaintiffs should not be assessed opponents' attorneys' fees unless a court finds the plaintiff's claim is "frivolous, unreasonable, or groundless." See *Christianburg Garment Co.* v. *EEOC*, 434 U.S. 412 (1978). The provision specifically includes "litigation expenses" under the rubric of attorneys' fees (and not under "costs") so that the expenses of experts, paralegal, etc. are governed by the *Christianburg Garment* standard regarding the assessment of such expenses against a plaintiff.

Technical assistance

Section 506 specifies that not later than 180 days after the date of enactment of this Act, the Attorney General, in consultation with the Secretary of Transportation, the Chairman of the Federal Communications Commission, and the Secretary of Commerce, shall develop and implement a plan to assist entities covered under this legislation in understanding the responsibilities of such entities under this Act. The plan shall be published for comment in accordance with the Administrative Procedure Act. Those individuals responsible for implementing this plan for each title are specified in the Act.

413

Each department or agency that has responsibility for implementing this Act may render technical assistance to individuals and institutions that have rights or responsibilities under this Act.

The Act provides that each department or agency ensure the availability and provision of appropriate technical assistance manuals to individuals or entities with rights or responsibilities under the Act no later than six months following the publication of final regulations for titles I, II, III, and IV of the Act. Each such department or agency may make grants or enter into contracts with individuals and profit and nonprofit institutions to effectuate the purposes of this Act. Such grants and contracts may be designed to ensure wide dissemination of information about the rights and duties established by the Act and to provide information and technical assistance about techniques for effective compliance with this Act.

Failure to receive technical assistance in no event excuses entities from meeting the requirements of the Act.

Federal wilderness areas

Section 507 requires the National Council on Disability to conduct a study and report on the effect that wilderness designations and wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System as established under the Wilderness Act.

Transvestites

Section 508 provides that an individual who is a transvestite is not an individual with a disability under this Act solely on the basis of being a transvestite.

Congressional inclusion

Section 509 provides that Congress is covered under all the provisions of this Act. For purposes of employment in the House of Representatives, the provision provides that the remedies and procedures of the Fair Employment Practices Resolution shall be used.

Illegal drug use

Section 510(a) and (b) provides that, for purposes of public services, public accommodations, transportation and telecommunications services, an individual who currently uses illegal drugs is not protected against discrimination if the covered entity takes action against the individual on the basis of his or her current illegal drug use. This section applies the same standard that is set forth in Section 104 of Title I and discussed in the section of this report explaining that title.

Section 510(c) provides that a person who currently uses illegal drugs cannot be denied health and social services if he or she is otherwise entitled to such services. Thus, health and mental health care providers, vocational rehabilitation and other programs that provide rehabilitation services cannot deny such services solely because an individual currently uses illegal drugs. The Committee recognizes that such services are essential to provide for the treatment of, and promote the recovery of, drug dependent persons.

Definitions

Section 511 includes a list of conditions that are not considered disabilities under this Act. Homosexuality and bisexuality were never considered impairments under this Act and therefore were never covered as disabilities. This provision simply makes the point clear in order to allay any possible concerns that have been raised. The other conditions listed are physical or mental impairments and could have been covered under this Act absent this provision. However, under this provision, the listed conditions are now excluded as disabilities. The Committee wishes to note, however, that if a person with one of the listed conditions also has another disability, which is still covered under this Act, and the person is discriminated against on the basis of the covered disability, that discriminatory act is still prohibited.

Amendments to the Rehabilitation Act

Section 512 amends the Rehabilitation Act of 1973 as it applies to individuals who currently use illegal drugs. The Rehabilitation Act presently protects these individuals against discrimination as long as they are qualified to participate in the activity at issue or are qualified to perform the job and do not present a direct threat to property or the safety of others. Section 512 amends this standard so that the treatment of persons who currently use illegal drugs is parallel to sections 104 and 510 of the ADA. Section 512, however, does not amend the existing Rehabilitation Act standard for individuals with current alcohol problems.

Severability

Section 513 provides that if any provision of this Act is found to be unconstitutional, it shall be severed from the remainder of the Act and the rest of the Act shall remain in force.

VII. OVERSIGHT FINDINGS OF THE COMMITTEE ON GOVERNMENT OPERATIONS

In compliance with clause 2(l)(3)(D) of Rule XI of the Rules of the House of Representatives, no findings or recommendations from the Committee on Government Operations were submitted to the Committee with reference to the subject matter specifically addressed by this legislation.

VIII. OVERSIGHT FINDINGS OF THE COMMITTEE

With reference to clause 2(l)(4) of Rule XI of the Rules of the House of Representatives, the Committee's oversight findings are set forth in the "Hearings" and "Need for the Legislation" sections of this report.

IX. CONGRESSIONAL BUDGET OFFICE ESTIMATE

In compliance with clause 2(l)(3)(C) of Rule XI of the Rules of the House of Representatives, the estimate prepared by the Congressional Budget Office pursuant to section 403 of the Congressional Budget Act of 1974, submitted prior to the filing of this report, is set forth as follows:

U.S. Congress,
Congressional Budget Office,
Washington, DC, December 21, 1989.

Hon. Augustus F. Hawkins,
Chairman, Committee on Education and Labor,
House of Representatives, Washington, DC.

Dear Mr. Chairman: The Congressional Budget Office has reviewed H.R. 2273, the Americans with Disabilities Act of 1989, as ordered reported by the Committee on Education and Labor on November 14, 1989. The bill would require several federal agencies to establish regulations and standards to implement the legislation. We estimate the costs of these activities to be $3 million in fiscal year 1990, $7 million in 1991, $19 million in 1992, $31 million in 1993, and $31 million in 1994, assuming appropriations of the necessary funds.

Enactment of H.R. 2273 would result in substantial costs for state and local governments, but CBO cannot estimate the total impact with any certainty. Most of these costs would involve actions required to make public transit systems accessible to the handicapped. As a result of this bill, we estimate that transit operators would have to spend $20 million to $30 million per year to purchase additional accessible buses and about $15 million per year by 1994 for additional maintenance costs. The bill would also mandate expanded paratransit service, which could result in significant costs, but uncertainties about implementation of this requirement and demand for these services makes these costs very difficult to estimate. Further, the cost of complying with the bill's requirement to make existing transit facilities accessible to the handicapped would probably reach several hundred million dollars over the next twenty years. Some local governments might incur additional costs to make newly-constructed public buildings accessible, as required by this bill, but most already face similar requirements. We could not determine how many localities would be affected by this provision.

If enacted, H.R. 2273 would prohibit discrimination against people with disabilities in areas such as employment practices, public accommodations and services, transportation services and telecommunication services. H.R. 2273 would require that the Equal Employment Opportunities Commission, the Attorney General, the Secretary of Transportation, the Architectural and Transportation Barriers Compliance Board, and the Federal Communications Commission develop and issue regulations and standards for implementation and enforcement of this act.

IMPACT ON THE FEDERAL BUDGET

Equal Employment Opportunities Commission (EEOC)

Title I—Employment—would prohibit discrimination by employers against qualified individuals with disabilities. H.R. 2273 would require the EEOC to issue regulations to carry out Title I and to provide for enforcement of the provisions. In addition, the EEOC would ensure the availability of a technical assistance manual to those entities with rights of responsibilities under this act. Although no specific authorization level is stated in the bill, CBO estimates the cost of these activities would be $0.5 million in fiscal year 1990, $2.5 million in fiscal year 1991, $14.7 million in fiscal year 1992, and $27 million annually in fiscal years 1993–94. This estimate is based on the EEOC's past experience with enforcing civil rights standards and assumes that approximately 259 additional full-time equivalent employees would be needed for the Commission's 50 field offices and that approximately 58 additional staff would be needed for the EEOC headquarters.

Department of Transportation

H.R. 2273 would direct the Secretary of Transportation to issue regulations within one year including standards applicable to the facilities and vehicles covered by these provisions. Also, the Secretary of Transportation would make available technical assistance manuals to those with rights and responsibilities under this act. CBO estimates that the cost to the federal government of developing these regulations and manuals would be about $0.5 million during fiscal years 1990 and 1991. In addition, the federal government might bear some part of the costs of making transit services accessible to the handicapped, which are discussed below. The capital and operating costs of most mass transit systems are heavily subsidized by the federal government through grants by the Urban Mass Transportation Administration. We cannot predict the extent to which these grants might be increased to compensate for the additional costs attributable to H.R. 2273.

Architectural and Transportation Barriers Compliance Board

H.R. 2273 would require the board to issue minimum guidelines that would supplement existing minimum guidelines for accessible design of buildings, facilities and vehicles. Although no specific authorization level is stated in the bill, CBO estimates the cost of these guidelines would be $0.2 million in fiscal year 1990. This estimate is based upon salaries and expense costs of $104,000 and research contracts costs of $80,000. Although the bill does not state specifically that the guidelines should be maintained, the board currently maintains the existing guidelines and most likely would maintain the new guidelines. CBO estimates the cost of maintaining the guidelines would be $0.2 million every other year beginning in fiscal year 1992.

Office of Technology Assessment (OTA)

The OTA would be required to undertake a study to determine (1) the needs of individuals with disabilities with regards to buses and (2) a cost-effective method for making buses accessible and usable by those with disabilities. In conjunction with this study, the OTA is directed to establish an advisory committee to assist with and review the study. Although no specific authorization level is stated in the bill, CBO estimates the cost of the study and advisory committee would be $0.1 million in fiscal year 1990, $0.3 million in 1991, and $0.1 million in 1992. This estimate is based upon the assumption that the OTA will not have to conduct significant additional field research.

Department of Justice

H.R. 2273 also would require the Attorney General to develop regulations to carry out sections 201 and 202 of Title II—Public Services—and to investigate alleged violations of Title III—Public Accommodations—which includes undertaking periodic reviews of compliance of covered entities under Title III. These regulations would ensure that a qualified individual with a disability would not be excluded from participation in, or denied benefits by a department, agency, special purpose district or other instrumentality of a state or local government. In addition, H.R. 2273 would require the Department of Justice to make available technical assistance manuals to those with rights and responsibilities under this act. We estimate the cost of these activities would be $2 million in fiscal year 1990 and $4 million annually in fiscal years 1991-1994.

Federal Communications Commission (FCC)

H.R. 2273 requires the FCC to prescribe and enforce regulations with regards to telecommunications relay services. These regulations include: (1) establishing functional regulations, guidelines and operations for telecommunications relay services, (2) establishing minimum standards that shall be met by common carriers, and (3) ensuring that users of telecommunications relay services pay rates no greater than rates paid for functionally equivalent voice communication services with respect to duration of call, the time of day, and the distance from point of origination to point of termination. In addition, H.R. 2273 would require the FCC to make available technical assistance manuals to those with rights and responsibilities under this act. While no authorization level is stated, CBO estimates the cost of developing and enforcing these regulations to be $0.1 million in fiscal year 1990, $0.1 million in fiscal year 1991, $0.2 million in 1992, $0.2 million in 1993, and $0.1 million in 1994.

National Council on Disability

H.R. 2273 would require the council to conduct a study on the effect that wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System. Although no authorization level is stated, CBO estimates the cost of this study would be $0.1 million in fiscal year 1990 and $0.2 million in fiscal year 1991.

COSTS TO STATE AND LOCAL GOVERNMENTS

Public buildings

H.R. 2273 would mandate that newly constructed state and local public buildings be made accessible to the handicapped. All states currently mandate accessibility in newly constructed state-owned public buildings and therefore would incur little or no costs if this bill were to be enacted. It is possible, however, that some local governments may not have such requirements. These municipalities would incur additional costs for making newly-constructed, locally-owned public buildings accessible if this bill were to become law. According to a study conducted by the Department of Housing and Urban Development in 1978, the cost of making a building accessible to the handicapped is less than one percent of total construction costs. This estimate assumes that the accessibility features are included in the original building design. Otherwise, the costs could be much higher.

Public transit

CBO cannot provide a comprehensive analysis of the impact of H.R. 2273 on mass transit of state and local governments. The scope of the bill's requirements in this area is very broad, many provisions are subject to interpretation, and the potential effects on transit systems are significant and complex. While we have attempted to discuss the major potential areas of cost, we cannot assign a total dollar figure to these costs.

H.R. 2273 would require that all new buses and rail vehicles be accessible to handicapped individuals, including those who use wheelchairs, and that public transit operators offer paratransit services as a supplement to fixed route public transportation. In addition, the bill includes a number of requirements relating to the accessibility of mass transportation facilities. Specifically, all new facilities, alterations to existing facilities, intercity rail stations, and key stations in rapid rail, commuter rail, and light rail systems would have to be acccessible to handicapped persons.

Bus and paratransit services.—CBO estimates that it would cost between $20 million and $30 million a year over the next several years to purchase additional lift-equipped buses as required by H.R. 2273. Additional maintenance costs would increase each year as lift-equipped buses are acquired, and would reach $15 million by 1994. The required paratransit systems would add to those costs.

Based on the size of the current fleet and on projections of the American Public Transit Association (APTA), CBO expects that public transit operators will purchase about 4,300 buses per year, on average, over the next five years. About 37 percent of the existing fleet of buses is currently equipped with lifts to make them accessible to handicapped individuals and, based on APTA projections, we estimate that an average of 55 percent to 60 percent of future bus purchases will be lift-equipped in the absence of new legislation. Therefore, this bill would require additional annual purchases of about 1,900 lift-equipped buses. Assuming that the added cost per bus for a lift will be $10,000 to $15,000 at 1990 prices, operators would have to spend from $20 million to $30 million per year, on average, for bus acquisitions as a result of this bill.

Maintenance and operating costs of lifts have varied widely in different cities. Assuming that additional annual costs per bus average $1,500, we estimate that it would cost about $2 million in 1990, increasing to $15 million in 1994, to maintain and operate the additional lift-equipped buses required by H.R. 2273.

In addition, bus fleets may have to be expanded to make up for the loss in seating capacity and the increase in boarding time needed to accommodate handicapped persons. The cost of expanding bus fleets is uncertain since the extent to which fleets would need to be expanded depends on the degree to which handicapped persons would utilize the new lift-equipped buses. If such use increases significantly, added costs could be substantial.

These costs are sensitive to the number of bus purchases each year, which may vary considerably. In particular, existing Environmental Protection Agency emissions regulations may result in accelerated purchases over the next two years as operators attempt to add to their fleets before much more stringent standards for new buses go into effect. Such variations in purchasing patterns would affect the costs of this bill in particular years. In addition, these estimates reflect total costs for all transit operators, regardless of their size. Costs may fall disproportionately on smaller operators, who are currently more likely to choose options other than lift-equipped buses to achieve handicapped access.

The bill also requires transit operators to offer paratransit or other special transportation services providing a level of service comparable to their fixed route public transportation to the extent that such service would not impose an "undue financial burden." Because we cannot predict how this provision will be implemented, and because the demand for paratransit services is very uncertain, we cannot estimate the potential cost of the paratransit requirement, but it could be significant. The demand for paratransit services probably would be reduced by the greater availability of lift-equipped buses.

Transit Facilities—We expect that the cost of compliance with the provisions concerning key stations would be signficant for a number of transit systems and could total several hundred million dollars (at 1990 prices) over twenty years. The precise level of these costs would depend on future interpretation of the bill's requirements and on the specific options chosen by transit systems to achieve accessibility. The costs properly attributable to this bill would also depend on the degree to which transit operators will take steps to achieve accessibility in the absence of new legislation.

In 1979, CBO published a study, "Urban Transportation for Handicapped Persons: Alternative Federal Approaches," (November 1979) that outlined the possible costs of adapting rail systems for handicapped persons. In that study, CBO estimated that the capital costs of adapting key subway, commuter and light rail stations and vehicles for wheelchair users would be $1.1 billion to $1.7 billion, while the additional annual operating and maintenance costs would be $14 million to $21 million.

Based on a 1981 survey of transit operators, the Department of Transportation has estimated that adapting existing key stations and transit vehicles would require additional capital expenditures of $2.5 billion over 30 years and would result in additional annual operating costs averaging $57 million (in 1979 dollars) over that period. Many groups representing the handicapped asserted that the assumptions and methodology used by the transit operators in this survey tended to overstate these costs severely. The department estimated that the cumulative impact of using the assumptions put forth by these groups could lower the total 30-year costs to below $1 billion.

CBO believes that the figures in both these studies significantly overstate the cost of the requirements of H.R. 2273, because, in the intervening years, several of the major rail systems have begun to take steps to adapt a number of their existing stations for handicapped access. In addition, it seems likely that the number of stations that would be defined as "key" under this bill would be much lower than that assumed in either of those studies. Furthermore, the Metropolitan Transit Authority in New York and the Southeastern Pennsylvania Transportation Authority in Philadelphia, two large rail systems, have entered into settlement agreements with handicapped groups that include plans for adaptation of key stations. These plans would probably satisfy the bill's requirement for accessibility of key stations. Other rail systems are also taking steps to make existing stations accessible. Therefore, we expect that the cost of the bill's requirements concerning key stations would probably not be greater than $1 billion (in 1990 dollars) and might be considerably less.

If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contacts are Cory Leach (226-2820) and Marjorie Miller (226-2860).

Sincerely,

Robert D. Reischauer,
Director.

X. Committee Estimate

With reference to the statement required by clause 7(a)(1) of Rule XIII of the Rules of the House of Representatives, the Committee accepts the estimate prepared by the Congressional Budget Office.

XI. Inflationary Impact Statement

Pursuant to clause 2(l)(4) of rule XI of the Rules of the House of Representatives, it is the Committee's estimate that enactment of this legislation will have no significant impact on prices and costs in the operation of the national economy. Indeed, the civil rights guaranteed under this legislation will contribute to enhanced productivity, utilization of services, and cost savings in other social programs.

XII. Section-by-Section Analysis

Section 1. Short title

This Act may be cited as the "Americans with Disabilities Act of 1989."

Section 2. Findings and purposes

The purpose of the Act is to provide a clear and comprehensive national mandate to end discrimination against individuals with disabilities; provide enforceable standards addressing discrimination against individuals with disabilities, and ensure that the Federal government plays a central role in enforcing these standards on behalf of individuals with disabilities.

Section 3. Definitions

The term "disability" is defined to mean, with respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of such individual, a record of such an impairment, or being regarded as having such an impairment. This is the same definition used for purposes of sections

501, 503 and 504 of the Rehabilitation Act of 1973 and the 1988 amendments to the Fair Housing Act.

TITLE I—EMPLOYMENT

Section 101. Definitions

The provisions in Title I of the bill use or incorporate by reference many of the definitions in Title VII of the Civil Rights Act of 1964 (employee, employer, Commission, person, labor organization, employment agency, joint labor-management committee, commerce, industry affecting commerce). For the first two years after the effective date of the Act, only employers with 25 or more employees are covered. Thereafter, employers with 15 or more employees are covered. The terms "illegal drug" and "qualified individual with a disability" are also defined. The term "undue hardship" is defined, and among the specified factors to be considered are the overall financial resources available to a covered entity and those available to its covered facility, the type of operation or operations maintained by the covered entity, including the composition and structure of the entity's workforce, and the nature and cost of a needed accommodation.

Section 102. Discrimination

Using the section 504 legal framework as the model, the bill specifies that no entity covered by the Act shall discriminate against any qualified individual with a disability because of such individual's disability in regard to application procedures, the hiring, advancement, or discharge of employees, employee compensation, job training, and other terms, conditions, and privileges of employment.

Discrimination includes, for example: limiting, segregating, or classifying a job applicant or employee in a way that adversely affects his or her opportunities or status; participating in contractual or other arrangements that have the effect of subjecting individuals with disabilities to discrimination; and using standards, criteria or methods of administration that have a discriminatory effect or perpetuate discrimination of others subject to common administrative control.

In addition, discrimination includes excluding or denying equal opportunities to a qualified nondisabled individual because of the known disability of an individual with whom the qualified individual is known to have relationship or association.

Discrimination also includes not making reasonable accommodations to the known limitations of a qualified individual with a disability unless such entity can demonstrate that the accommodation would impose an undue hardship on the operation of the business. Discrimination also includes the denial of employment opportunities because a qualified individual with a disability needs a reasonable accommodation.

The definition of the term "reasonable accommodation" included in the bill is comparable to the definition in the section 504 legal framework. The term includes: making existing facilities accessible, job restructuring, part-time or modified work schedules, reassignment to a vacant position, acquisition or modification of equipment or devices, appropriate adjustment or modifications of policies, examinations, and training materials, the provision of qualified readers and interpreters, and other similar accommodations.

Discrimination also includes the imposition or application of tests and other selection criteria that screen out or tend to screen out an individual with a disability or a class of individuals with disabilities unless the test or other selection criteria is shown to be job-related for the position in question and is consistent with business necessity.

The bill also includes the pre-employment inquiries provision from section 504 which permits employers to make preemployment inquiries into the ability of an applicant to perform job-related functions but prohibits inquiries as to whether an applicant or employee is an individual with a disability or as to the nature or severity of such disability. Employers are permitted to undertake post-offer/pre-entrance medical examinations so long as the results are kept confidential, all entering employees take the examinations, and the results are used only in accordance with the provisions of the title.

The bill also prohibits employers from requiring medical examinations and making inquiries as to whether an employee has a disability or as to the nature or severity of the disability unless such examination or inquiry is shown to be job-related and consistent with business necessity.

Section 103. Defenses

The bill also specifies several defenses to charges of discrimination under the Act. First, an employer can show that a qualification standard, test, or selection criteria that screens out or tends to screen out or otherwise deny a job or benefit to an individual with a disability is job-related and consistent with business necessity, and that such performance cannot be accomplished by reasonable accommodation as required under this title. Second, as a subset of the first defense, an employer need not hire or retain an employee who it shows has a currently contagious disease or infection that poses a direct threat to the health or safety of other individuals in the workplace.

With respect to religious entities, the bill adopts the religious preference provision from Title VII of the Civil Rights Act of 1964 and includes a religious tenet exemption which provides that a religious organization may require, as a qualification standard to employment, that all applicants and employees conform to the religious tenets of such organization.

Section 104. Illegal drugs and alcohol

Current users of illegal drugs are not considered individuals with disabilities and thus are not protected under the Act. Individuals who are in or who have completed a rehabilitation program, and who are no longer current users of illegal drugs, continue to be protected. Tests for illegal drug use are not considered medical examinations under the Act. Finally, an employer may prohibit the use of alcohol or illegal drugs at the workplace by all employees; may require that employees not be under the influence of alcohol or illegal drugs at the workplace; may require that employees conform their behavior to requirements established pursuant to the Drug-Free Workplace Act; and may hold a drug user or alcoholic to the same qualification standards for employment or job performance and behavior to which it holds other individuals, even if any unsatisfactory performance or behavior is related to the drug use or alcoholism of such individual.

Section 105. Posting notices

Consistent with title VII of the Civil Rights Act of 1964, every covered entity must post notices in an accessible format describing the applicable provisions of this Act.

Section 106. Regulations

The Commission is directed to promulgate regulations within one year in an accessible format.

Section 107. Enforcement

The bill incorporates by reference the remedies and procedures set out in sections 706, 707, 709, and section 710 of title VII of the Civil Rights Act of 1964.

Section 108. Effective date

The effective date of Title I is 24 months after the date of enactment.

TITLE II—PUBLIC SERVICES

Section 201. Definition

A "qualified individual with a disability" means an individual who, with or without reasonable modifications to rules, policies or practices, or the removal of architectural, communication, or transportation barriers or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a department, agency, special purpose district, or other instrumentality of a State or a local government.

Section 202. Discrimination

Section 504 only applies to entities receiving Federal financial assistance. Title II of the bill makes all activities of State and local governments subject to the types of prohibitions against discrimination against a qualified individual with a disability included in section 504 (nondiscrimination).

Section 203. Actions applicable to public transportation provided by public entities considered discriminatory

New fixed route buses of any size, rail vehicles and other fixed route vehicles for which a solicitation is made later than 30 days after the date of enactment of this Act must be readily accessible to and usable by individuals with disabilities. No retrofitting of existing buses is required.

Used vehicles purchased or leased after the date of enactment need not be accessible but a demonstrated good faith effort to locate a used accessible vehicle must be made.

Vehicles that are remanufactured so as to extend their usable life for five years or more must, to the maximum extent feasible, be readily accessible to and usable by individuals with disabilities.

In those communities with fixed route public transportation, there must also be a paratransit system to serve those individuals with disabilities who cannot use the fixed route public transportation and to other individuals associated with such individuals in accordance with service criteria established by the Secretary of Transportation. Communities need not make expenditures that would result in an undue financial burden.

Communities that operate a demand responsive system that is used to provide public transportation for the general public (nondisabled and disabled) must purchase new buses for which a solicitation is made 30 days after the date of enactment of the Act that are accessible unless the system can demonstrate that the system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to that provided to the general public; in which case all newly purchased vehicles need not be accessible.

All new facilities used to provide public transportation services must be readily accessible to and usable by individuals with disabilities.

When alterations are made to existing facilities that affect or could affect the usability of the facility, the alterations, the path of travel to the altered area, the bathrooms, telephones, and drinking fountains serving the remodeled area must be, to the maximum extent feasible, readily accessible to and usable by individuals with disabilities. This obligation to make the path of travel accessible only applies where the covered entity undertakes major structural modification.

All stations in intercity rail systems must be accessible within 20 years and key stations in rapid rail, commuter rail and light rail systems must be made readily accessible as soon as practicable but in no event later than 3 years after the date of enactment of this Act except that the time limit may be extended by the Secretary of Transportation up to 20 years for extraordinary expensive structural changes to, or replacement of, existing facilities necessary to achieve accessibility.

Intercity, light rail, rapid, and commuter rail systems must have at least one car per train that is accessible as soon as practicable, but in any event in no less than five years.

Section 204 Regulations

The bill directs the Attorney General to promulgate regulations within one year in an accessible format that implement the provisions generally applicable to state and local governments. These regulations must be consistent with the coordination regulations issued in 1978 that governed the regulations applicable to recipients of Federal financial assistance, except with respect to "existing facilities" and "communications," in which case the Federally conducted regulations apply.

Within one year from the date of enactment, the Secretary of Transportation is directed to issue regulations in an accessible format that include standards which are consistent with minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board.

Section 205. Enforcement

The remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 shall be available to any individual who believes he or she is being subjected to discrimination on the basis of disability in violation of this Act, or regulations promulgated under section 204, concerning public services.

Section 206. Effective date

The effective date of Title II is eighteen months from the date of enactment with the exception of the provision applicable to the purchase of new buses, which takes effect on the date of enactment.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

Section 301. Definitions

The terms "commerce", "commercial facilities", and "public transportation" are defined. The term "readily achievable" is defined to mean "easily accomplishable and able to be carried out without much difficulty or expense". Factors to be considered in considering whether an action is to be considered in considering whether an action is "readily achievable" are analogous to those listed in determining whether an action is an "undue hardship" in Title I.

The bill lists categories of establishments that are considered public accommodations. The list includes but is not limited to restaurants, hotels, doctors' offices, pharmacists, grocery stores, museums, and homeless shelters. The list does not include religious institutions or entities controlled by religious institutions.

Section 301. Prohibition of discrimination by public accommodations

The bill includes general and specific categories of discrimination prohibited by the Act. In general, it is considered discriminatory to subject an individual or class or individuals, directly or indirectly, on the basis of disability, to any of the following:

(1) Denying the opportunity to participate in or benefit from an opportunity;

(2) Affording an opportunity that is not equal to that afforded others;

(3) Providing an opportunity that is less effective than that provided to others;

(4) Providing an opportunity that is different or separate, unless such action is necessary to provide the individuals with an opportunity that is as effective as that provided to others; however, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different.

Further, an entity may not directly or indirectly use standards or criteria or methods of administration that have the effect of subjecting an individual to discrimination on the basis of disability or perpetuate discrimination by others who are subject to common administrative control or are agencies of the same State. Nor can an entity discriminate against an individual because of the known association of that individual with another individual with a disability.

Specific categories of discrimination include:

The imposition or application of eligibility criteria that screen out or tend to screen out an individual with a disability unless such criteria can be shown to be necessary for the provision of the goods or services being offered.

A failure to make reasonable modifications in rules and policies and procedures when necessary to afford meaningful opportunity unless the entity can demonstrate that the modifications would fundamentally alter the nature of the program.

A failure to provide auxiliary aids and services unless the entity can demonstrate that such services would fundamentally alter the nature of the goods or services being offered or would result in an undue burden. Auxiliary aids and services include: qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments; qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments; acquisition or modification of equipment or devices; and other similar services and actions.

A failure to remove architectural barriers and communication barriers that are structural in nature in existing facilities and transportation barriers in existing vehicles where such removal is readily achievable; and, where the entity can demonstrate that such removal is not readily achievable, a failure to make such goods, services, facilities, privileges, advantages, and accommodations available through alternative methods if such methods are readily achievable.

With respect to a facility that is altered, the failure to make the alterations in a manner that, to the maximum extent feasible, the altered portion, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the remodeled area are readily accessible to and usable by individuals with disabilities. The obligation to make the path of travel accessible only applies if the facility is making alterations to a primary function area and such changes are not disproportionate to the alterations being undertaken. Further, a covered entity need not install an elevator if the building has fewer than three stories, has fewer than 3,000 square feet per floor unless the building is a shopping mall, shopping center, or the professional office of a health care provider or the Attorney General determines that the category of usage requires an elevator.

A failure by a public accommodation to provide a level of transportation services to individuals with disabilities equivalent to that provided for the general public and a refusal to purchase or lease vehicles that carry in excess of 16 passengers for which solicitations are made later than 30 days after the effective date of the Act which are readily accessible to and usable by individuals with disabilities. Special rules apply to demand responsive systems (e.g., shuttles to and from an airport and hotel).

Section 303. New construction in public accommodations and commercial facilities

With respect to places of public accommodation and commercial facilities, the bill also specifies that discrimination includes a failure to make facilities constructed for first occupancy later than 30 months after the date of enactment readily accessible to and usable by individuals with disabilities except where an entity can demonstrate that it is structurally impracticable to do so in accordance with standards set forth or incorporated by reference in regulations. The elevator exception applicable to alterations is also applicable to new construction.

Section 304. Prohibition of discrimination in public transportation services provided by private entities

The bill includes a specific section prohibiting discrimination in public transportation services (other than air travel) provided by private entities. In general, no individual shall be discriminated against on the basis of disability in the full and equal enjoyment of public transportation services provided by a privately operated entity that is primarily engaged in the business of transporting people (but not in the principle business of providing air transportation) and whose operations affect commerce. All such newly purchased buses purchased later than 7 years after the date of enactment, or, in the case of small providers, 6 years after the date of enactment, must be readily accessible to and usable by individuals with disabilities.

Section 305. Study

A study must be completed within 3 years from the date of enactment on how best to achieve the section 304 accessibility requirements for entities using over the road coaches.

Section 306. Regulations

Not later than one year after the date of enactment, the Secretary of Transportation shall issue regulations that shall include standards applicable to fixed route systems and demand response systems and to public transportations services provided by private entities. Not later than one year after the date of enactment, the Attorney General shall issue regulations to carry out the remaining provisions of this title.

Section 307. Exemptions for private clubs and religious organizations

The provisions of this title shall not apply to private clubs or establishments exempted from coverage under title II of the Civil Rights Act of 1964 or to religious organizations or entities controlled by religious organizations, including places of worship.

Section 308. Enforcement

The bill uses the model of title II of the Civil Rights Act of 1964 (injunctive relief) and includes the pattern and practice authority (including civil penalites) from the recently enacted Fair Housing Act.

Section 309. Effective date

Title III shall become effective 18 months after the date of enactment of this Act.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICES

Section 401. Telecommunications services for hearing-impaired and speech-impaired individuals

Title IV specifies that a common carrier that offers telephone services to the general public must also provide interstate or intrastate telecommunication relay services so that such services provide individuals who use non-voice terminal devices because of their disabilities opportunities for communications that are equivalent to those provided to their customers who are able to use voice telephone services, unless such services are provided pursuant to a State relay program.

Nothing in this title is to be construed to discourage or impair the development of improved or future technology designed to improve access to telecommunications services for individuals with disabilities.

The Federal Communications Commission is directed to issue regulations establishing minimum standards and guidelines for telecommunications relay services.

TITLE V—MISCELLANEOUS PROVISIONS

Section 501. Construction

Nothing in this Act shall be construed to reduce the scope of coverage or apply a lesser standard than the coverage required or the standards applied under title V of the Rehabilitation Act of 1973. Nothing in this Act shall be construed to invalidate or limit the rights, remedies, or procedures of any other Federal law or law of any State or political subdivision of a State that provides greater or equal protection for the rights of individuals with disabilities than are afforded by this Act. This bill is not to be construed as regulating the underwriting, classifying, or administering of insurance risks.

Section 502. Prohibition against retaliation and coercion

Section 502 contains a prohibition against retaliation and coercion.

Section 503. State immunity

States are not immune under the 11th amendment of the United States Constitution for violations of the Act.

Section 504. Regulations by the Architectural and Transportation Barriers Compliance Board

This section directs the Architectural and Transportation Barriers and Compliance Board to issue minimum guidelines for titles II and III.

Section 505. Attorney's fees

In any action or administrative proceeding commenced under the Act, the court, or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

Section 506. Technical assistance

Not later than 180 days after the date of enactment of this Act, the Attorney General, in consultation with specified individuals, shall develop a plan to assist entities covered under this Act, as well as other executive agencies and commissions, in understanding the responsibility of such entities under this Act. This plan shall be published for comment in accordance with the Administrative Procedure Act. Those individuals and agencies responsible for implementing this plan for each title are specified in the Act.

Each department or agency that has responsibility for implementing this Act may render technical assistance to individuals and institutions that have rights or responsibilities under this Act.

Each department or agency shall ensure the availability and provision of appropriate technical assistance manuals to individuals or entities with rights or responsibilities under the Act no later than six months following the publication of final regulations for titles I, II, III, and IV of the Act. Each such department or agency may make grants or enter into contracts with individuals and profit and nonprofit institutions to effectuate the purposes of this Act. Such grants and contracts may be designed to ensure wide dissemination of information about the rights and duties established by the Act and to provide information and technical assistance about techniques for effective compliance with this Act.

Failure to receive technical assistance in no event excuses entities covered under this Act from meeting the requirements of the Act.

Section 507. Federal wilderness areas

The National Council on Disability shall conduct a study and report on the effect that wilderness designations and wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System, and shall issue a report to Congress within one year after the enactment of this Act.

Section 508. Transvestites

For purposes of this Act, the term "disabled" or "disability" shall not apply to an individual solely because that individual is a transvestite.

Section 509. Congressional inclusion

The provisions of this Act shall apply in their entirety to the Senate, the House of Representatives, and all the instrumentalities of the Congress, or either House thereof. The rights and protections under this Act shall apply with respect to any employee in an employment position in the House of Representatives and any employing authority of the House of Representatives. In the administration of this subsection, the remedies and procedures under the Fair Employment Practices Resolution shall be applied.

Section 510. Illegal drug use

For purposes of this Act, an individual with a disability does not include an individual who is a current user of illegal drugs when the covered entity acts on the basis of such use.

Nothing in this subsection shall be construed to exclude as an individual with a disability an individual who has successfully completed a supervised drug rehabilitation program and is no longer using illegal drugs, or an individual who is participating in such a program and no longer uses illegal drugs, or an individual who is erroneously regarded as using illegal drugs but is not using illegal drugs.

An individual shall not be denied health or social services on the basis of his or her current use of illegal drugs if he or she is otherwise entitled to such services.

Section 511. Definitions

This section lists several exclusions from the term "disability".

Section 512. Amendments to the Rehabilitation Act

Provisions summarized in description of section 510 set forth above are applied to the Rehabilitation Act of 1973.

Section 513. Severability

In the event that any provision in this Act is found to be unconstitutional by a court of law, such provision shall be severed from the remainder of the Act, and this action shall not affect the enforceability of the remaining provisions of the Act.

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3 of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows: (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

REHABILITATION ACT OF 1973

* * * * * * *

DEFINITIONS

SEC. 7. For the purposes of this Act:

(1) * * *

* * * * * * *

(8)(A) * * *

(B) [Subject to the second sentence of this subparagraph,] *Subject to subparagraphs (C) and (D),* the term "individual with handicaps" means, for purposes of titles IV and V of this Act, any person who (i) has a physical or mental impairment which substantially limits one or more of such person's major life activities, (ii) has a record of such an impairment, or (iii) is regarded as having such an impairment. [For purposes of sections 503 and 504 as such sections relate to employment, such term does not include any individual who is an alcoholic or drug abuser whose current use of alcohol or drugs prevents such individual from performing the duties of the job in question or whose employment, by reason of such current alcohol or drug abuse, would constitute a direct threat to property or the safety of others.]

(C)(i) For purposes of title V, the term "individual with handicaps" does not include an individual who is a current user of illegal drugs, when a recipient acts on the basis of such use.

(ii) Nothing in clause (i) shall be construed to exclude as an individual with handicaps an individual who—

(I) has successfully completed a supervised drug rehabiliation program and is no longer using illegal drugs, or has otherwise been rehabilitated successfully and is no longer using illegal drugs;

(II) is participating in a supervised rehabilitation program and is no longer using illegal drugs; or

(III) is erroneously regarded as being an illegal drug user but is not using illegal drugs;

except that it shall not be a violation of this Act for a recipient to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual with handicaps is no longer using illegal drugs.

(iii) Notwithstanding clause (i), for purposes of programs and activities providing health services and services provided under titles I, II, and III, an individual shall not be excluded from the benefits of such programs or activities on the basis of his or her current use of illegal drugs if he or she is otherwise entitled to such services.

(iv) For purposes of programs and activities providing educational services, local educational agencies may take disciplinary action pertaining to the use or possession of illegal drugs or alcohol against any handicapped student who currently uses illegal drugs or alcohol to the same extent that such disciplinary action is taken against nonhandicapped students. Furthermore, the due process procedures at 34 CFR 104.36 shall not apply to such disciplinary actions.

(v) For purposes of sections 503 and 504 as such sections relate to employment, the term "individual with handicaps" does not include any individual who is an alcoholic whose current use of alcohol prevents such individual from performing the duties of the job in question or whose employment, by reason of such current alcohol abuse, would constitute a direct threat to property or the safety of others.

[(C)] *(D)* For the purpose of sections 503 and 504, as such sections relate to employment, such term does not include an individual who has a currently contagious disease or infection and who, by reason of such disease or infection, would constitute a direct threat to the health or safety of other individuals or who, by reason of the currently contagious disease of infection, is unable to perform the duties of the job.

* * * * * * *

(22) The term "illegal drugs" means controlled substances, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812), the possession or distribution of which is unlawful under such Act. Such term does not mean the use of a controlled substance taken under supervision by a licensed health professional or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

* * * * * * *

COMMUNICATIONS ACT OF 1934

* * * * * * *

APPLICATION OF ACT

SEC. 2. (a) * * *

(b) Except as provided in [section 223 or 224] *sections 223, 224, and 225* and subject to the provisions of section 301 and title VI, nothing in this Act shall be construed to apply or to give the Commission jurisdiction with respect to (1) charges, classifications, practices, services, facilities, or regulations for or in connection with intrastate communication service by wire or radio of any carrier, or (2) any carrier engaged in interstate or foreign communication solely through physical connection with the facilities of another carrier not directly or indirectly controlling or controlled by, or under direct or indirect common control with such carrier, or (3) any carrier engaged in interstate or foreign communication solely through connection by radio, or by wire and radio, with facilities, located in an adjoining State or in Canada or Mexico (where they adjoin the State in which the carrier is doing business), of another carrier not directly or indirectly controlling or controlled by, or under direct or indirect common control with such carrier, or (4) any carrier to which clause (2) or clause (3) would be applicable except for furnishing interstate mobile radio communication service or radio communication service to mobile stations on land vehicles in Canada or Mexico; except that sections 201 through 205 of this Act, both inclusive, shall, except as otherwise provided therein, apply to carriers described in clauses (2), (3), and (4).

* * * * * * *

TITLE II—COMMON CARRIERS

* * * * * * *

SPECIAL PROVISIONS RELATING TO TELEPHONE COMPANIES

SEC. 221. (a) * * *

(b) Subject to the provisions of [section 301] *sections 225 and 301,* nothing in this Act shall be construed to apply, or to give the Commission jurisdiction, with respect to charges, classifications, practices, services, facilities, or regulations for or in connection with wire, mobile, or point-to-point radio telephone exchange service, or any combination thereof even though a portion of such exchange service constitutes interstate or foreign communication, in any case where such matters are subject to regulation by a State commission or by local governmental authority.

* * * * * * *

TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS

SEC. 225. (a) DEFINITIONS.—As used in this section—

(1) COMMON CARRIER OR CARRIER.—The term "common carrier" or "carrier" includes any common carrier engaged in interstate communication by wire or radio as defined in section 3(h), any common carrier engaged in intrastate communication by wire or radio, and any common carrier engaged in both interstate and intrastate communication, notwithstanding sections 2(b) and 221(b).

(2) TDD.—The term "TDD" means a Telecommunications Device for the Deaf, which is a machine that employs graphic communication in the transmission of coded signals through a wire or radio communication system.

(3) TELECOMMUNICATIONS RELAY SERVICES.—The term "telecommunications relay services" means telephone transmission services that provide the ability for an individual who has a hearing impairment or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses TDD or other nonvoice terminal device and an individual who does not use such a device.

(b) AVAILABILITY OF TELECOMMUNICATIONS RELAY SERVICES.—

(1) IN GENERAL.—In order to carry out the purposes established under section 1, to make available to all individuals in the United States a rapid, efficient nationwide communication service, and to increase the utility of the telephone system of the Nation, the Commission shall ensure that interstate and intrastate telecommunications relay services are available, to the extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals in the United States.

(2) REMEDIES.—For purposes of this section, the same remedies, procedures, rights, and obligations under this Act that are applicable to common carriers engaged in interstate communication by wire or radio are also applicable to common carriers engaged in intrastate communication by wire or radio and common carriers engaged in both interstate and intrastate communication by wire or radio.

(c) PROVISION OF SERVICES.—Each common carrier providing telephone voice transmission services shall provide telecommunications relay services individually, through designees, or in concert with other carriers not later than 3 years after the date of enactment of this section.

(d) REGULATIONS.—

(1) In general.—The Commission shall, not later than 1 year after the date of enactment of this section, prescribe regulations to implement this section, including regulations that—

(A) establish functional requirements, guidelines, and operations procedures for telecommunications relay services;

(B) establish minimum standards that shall be met by common carriers in carrying out subsection (c);

(C) require that telecommunications relay services operate every day for 24 hours per day;

(D) require that users of telecommunications relay services pay rates no greater than the rates paid for functionally equivalent voice communication services with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination;

(E) prohibit relay operators from refusing calls or limiting the length of calls that use telecommunications relay services;

(F) prohibit relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of the call; and

(G) prohibit relay operators from intentionally altering a relayed conversation.

(2) Technology.—The Commission shall ensure that regulations prescribed to implement this section encourage the use of existing technology and do not discourage or impair the development of improved technology.

(3) Jurisdictional separation of costs.—

(A) In general.—The Commission shall prescribe regulations governing the jurisdictional separation of costs for the services provided pursuant to this section.

(B) Recovering costs.—Such regulations shall generally provide that costs caused by interstate telecommunications relay services shall be recovered from the interstate jurisdiction and costs caused by intrastate telecommunications relay services shall be recovered from the intrastate jurisdiction.

(C) Joint provision of services.—To the extent interstate and intrastate common carriers jointly provide telecommunications relay services, the procedures established in section 410 shall be followed, as applicable.

(4) Fixed monthly charge.—The Commission shall not permit carriers to impose a fixed monthly charge on residential customers to recover the costs of providing interstate telecommunications relay services.

(5) Undue burden.—If the Commission finds that full compliance with the requirements of this section would unduly burden one or more common carriers, the Commission may extend the date for full compliance by such carrier for a period not to exceed 1 additional year.

(e) Enforcement.—

(1) In general.—Subject to subsections (f) and (g), the Commission shall enforce this section.

(2) Complaint.—The Commission shall resolve, by final order, a complaint alleging violation of this section within 180 days after the date such complaint is filed.

(f) Certification.—

(1) State documentation.—Each State may submit documentation to the Commission that describes the program of such State for implementing intrastate telecommunications relay services.

(2) Requirements for certification.—After review of such documentation, the Commission shall certify the State program if the Commission determines that the program makes available to hearing-impaired and speech-impaired individuals either directly, through designees, or through regulation of intrastate common carriers, intrastate telecommunications relay services in such State in a manner that meets the requirements of regulations prescribed by the Commission under subsection (d).

(3) Method of funding.—Except as provided in subsection (d), the Commission shall not refuse to certify a State program based solely on the method such State will implement for funding intrastate telecommunication relay services.

(4) Suspension or revocation of certification.—The Commission may suspend or revoke such certification if, after notice and opportunity for hearing, the Commission determines that such certification is no longer warranted.

(g) Complaint.—

(1) Referral of complaint.—If a complaint to the Commission alleges a violation of this section with respect to intrastate telecommunications relay services within a State and certification of the program of such State under subsection (f) is in effect, the Commission shall refer such complaint to such State.

(2) Jurisdiction of commission.—After referring a complaint to a State under paragraph (1), the Commission shall exercise jurisdiction over such complaint only if—

(A) final action under such State program has not been taken on such complaint by such State—

(i) within 180 days after the complaint is filed with such State; or

(ii) within a shorter period as prescribed by the regulations of such State; or

(B) the Commission determines that such State program is no longer qualified for certification under subsection (f).

MINORITY VIEWS

I

On September 7, 1989, the Senate passed S. 933, the Americans with Disabilities Act, by the vote of 76–8. That bill, endorsed by President Bush, was essentially a product of negotiations between the Administration and the bill's proponents and constituted a complete rewrite of the original version of S. 933 as introduced on May 9, 1989. The major improvements in the bill, concerning employment requirements, can be summarized as follows:

ENFORCEMENT/DAMAGES

An unrestricted private cause of action with allowance for punitive and compensatory damages was eliminated. In lieu thereof, the enforcement procedures under Title VII of the 1964 Civil Rights Act were adopted. Under these procedures, a plantiff must first file a charge with the EEOC before, after receiving a right to sue letter, proceeding to Federal court. Relief is limited to lost backpay and benefits and injunctive relief; there is no provision for punitive and compensatory damages.

SCOPE

A phase-in of coverage was adopted. The first two years, employers with 25 or more employees will be covered; thereafter, those with 15 or more.

CONFUSING OVERLAP BETWEEN TITLE I (GENERAL PROHIBITION AGAINST DISCRIMINATION) AND TITLE II (EMPLOYMENT)

Title I of the bill was eliminated. All employer requirements are now contained in a new Title I.

ANTICIPATORY DISCRIMINATION

The language which would have allowed a plaintiff to sue if he or she believed that he or she was "about to be subjected to discrimination" was eliminated from the employment section.

II

On November 9 and 14, 1989, the House Education and Labor Committee considered the ADA. A substitute was offered and adopted at the markup which was comprised of the Senate-passed version of the bill and numerous changes negotiated prior to markup in both the employment and public accommodations sections. These improvements were as follows:

DRUGS

The substitute includes provisions that would clearly exclude current users of illegal drugs from protection under the ADA and under the Rehabilitation Act of 1973. An employer could act on the basis of a positive drug test and could administer such tests without fear of liability under the ADA.

CONTRACT LIABILITY

The substitute clarifies the extent of liability of a covered entity in contractual situations. Thus, a covered entity is only liable for discrimination against its own employees caused through a contract, not the effect of the contractor's action on other employees. This concept has also been clarified in the public accommodation title.

UNDUE HARDSHIP

The Committee added consideration of site specific factors when determining whether the provision of a reasonable accommodation represents an undue hardship. For example, if a grocery store that is part of a chain failed to reasonably accommodate an employee with a disability because the accommodation would constitute an undue hardship, a court could consider the financial resources of that store, and other store-based factors, as well as the financial resources of the chain, in determining whether the accommodation sought was an undue hardship. A similar principle was included in the public accommodation title under the provision, "readily achievable", the standard with which those engaged in public accommodations must comply in removing barriers.

The linkage between reasonable accommodation and undue hardship was also clarified so that any duty of reasonable accommodation is limited by the concept of undue hardship.

THRESHOLD ON ALTERATIONS

The substitute includes clarifications of when an alteration to a facility would require making the alteration accessible to and usable by those with disabilities.

DAMAGES

In the substitute a clarification was added concerning the Attorney General's authority to ask a court for monetary damages for an aggrieved party in a pattern and practice case under the public accommodation title. Such authority would not include punitive damages.

POTENTIAL PLACES OF EMPLOYMENT

Deleted the phrase and inserted "commercial facilities" to clarify that new construction, under the public accommodations title, must be accessible but not individual work stations.

GOOD FAITH

In the same type of pattern and practice case, the substitute would direct the court, when considering the good faith of the defendant, to consider whether he or she could have reasonably anticipated the appropriate auxiliary aid to accommodate the unique needs of the individual or individuals with disabilities involved in the pattern and practice case.

COORDINATION AND TECHNICAL ASSISTANCE

To encourage coordination across agencies with responsibility to enforce the ADA, the Committee added a provision to require such agencies to develop procedures in implementing regulations to ensure that complaints are handled in a manner to avoid duplication and maximize consistency in interpretation of common terms in the ADA and the Rehabilitation Act. Also, the substitute requires agencies with enforcement authority to develop technical assistance manuals on the ADA to assist businesses in complying with the act. Such manuals must be developed within six months after the issuance of regulations for any title of the ADA.

REASONABLE GROUNDS

The substitute clarifies that when filing suits based on anticipatory claims under the public accommodations title, plaintiffs must have reasonable grounds to sue.

ATTORNEY GENERAL CERTIFICATION

Allows, but does not require, State and local governments to gain certification from the Department of Justice, that State or local codes, etc., meet the accessibility requirements of the Act. Such certification would create a rebuttable presumption of compliance.

QUALIFIED HISTORICAL PROPERTIES

Allows flexibility in applying requirements of the Act to qualified historical buildings when such requirements may threaten or destroy the historical significance of such buildings.

III

While these changes to the Senate bill were significant, individual Minority Members of the Committee offered further improving amendments at the Committee markup. For example, one amendment would have deleted the requirement that medical examinations can be given only upon demonstrating that such exams were consistent with business necessity; another would have limited relief under the public accommodations section of ADA to that provided under Title II of the 1964 Civil Rights Act (injunctive relief); a third postponed the effective date of the employment and public accommodation section until after final regulations would be issued; a fourth allowed for a tax credit for costs incurred by small business under the legislation; a fifth limited the scope of the "association" provision to relationships based on blood, marriage, or situations involving significant assistance; a sixth extended coverage of the legislation to Congress. Others were also offered. These amendments were defeated.

In sum, Americans with Disabilities Act has undergone, from the time of its introduction to its passage by the Committee, many changes and many improvements. As such, it is a reasonable attempt to address a difficult social problem. Nevertheless, it is far from a perfect piece of legislation and the Minority Members of the Committee hope that an extensive Floor debate on the bill, allowing for full consideration of further improving amendments, will be allowed.

A final, important note. The Minority Members of this Committee supported this bill on the assumption that the agreement as struck in the Senate, as discussed above, with regard to remedies would be adhered to. That agreement, again, was to delete punitive and compensatory damages from the bill and to adopt current Title VII remedies of injunctive relief and lost backpay and benefits. Unfortunately, the legislation implemented this agreement through simply incorporating, by reference, the existing relevant provisions of Title VII. The Committee is now considering the Civil Rights Act of 1990, which among many other things, would amend Title VII remedies to included punitive and compensatory damages. These proposed changes to Title VII, in the view of the Minority Members, would thus, by fiat, undermine and reverse the underlying agreement which led to the passage of the ADA by the Senate. Employers, in short, are now facing the prospect of punitive and compensatory damages under a new statute imposing many novel requirements unfamiliar to most businesses in the private sector. This prospect threatens to undermine all support for this legislation and is the one issue which will result in complete opposition to the bill by the entire business community.

We strongly urge that the original agreement be adhered to and that an amendment be adopted on the House floor which would expressly adopt, in text, current Title VII remedies.

Bill Goodling.
Tom Coleman.
Tom Petri.
Marge Roukema.
Steve Gunderson.
Steve Bartlett.
Tom Tauke.
Harris W. Fawell.
Fred Grandy.
Cass Ballenger.
Peter Smith.

101st Congress
2d Session

HOUSE OF REPRESENTATIVES

Rept. 101-485
Part 3

AMERICANS WITH DISABILITIES ACT OF 1990

May 15, 1990.—Ordered to be printed

Mr. Brooks, from the Committee on the Judiciary,
submitted the following

REPORT

together with

ADDITIONAL AND DISSENTING VIEWS

[To accompany H.R. 2273 which on May 9, 1989, was referred jointly to the Committee on Education and Labor, the Committee on Energy and Commerce, the Committee on Public Works and Transportation, and the Committee on the Judiciary]

[Including cost estimate of the Congressional Budget Office]

The Committee on the Judiciary, to whom was referred the bill (H.R. 2273) to establish a clear and comprehensive prohibition of discrimination on the basis of disability, having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) Short Title.—This Act may be cited as the "Americans with Disabilities Act of 1990".

(b) Table of Contents.—The table of contents is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Findings and purposes.
Sec. 3. Definitions.

TITLE I—EMPLOYMENT

Sec. 101. Definitions.
Sec. 102. Discrimination.
Sec. 103. Defenses.
Sec. 104. Illegal use of drugs and alcohol.
Sec. 105. Posting notices.
Sec. 106. Regulations.
Sec. 107. Enforcement.
Sec. 108. Effective date.

39-081

TITLE II—PUBLIC SERVICES

Sec. 201. Definition.
Sec. 202. Discrimination.
Sec. 203. Actions applicable to public transportation provided by public entities considered discriminatory.
Sec. 204. Regulations.
Sec. 205. Enforcement.
Sec. 206. Effective date.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

Sec. 301. Definitions.
Sec. 302. Prohibition of discrimination by public accommodations.
Sec. 303. New construction in public accommodations and commercial facilities.
Sec. 304. Prohibition of discrimination in public transportation services provided by private entities.
Sec. 305. Study.
Sec. 306. Regulations.
Sec. 307. Exemptions for private clubs and religious organizations.
Sec. 308. Enforcement.
Sec. 309. Examinations and courses.
Sec. 310. Effective date.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICES

Sec. 401. Telecommunication services for hearing-impaired and speech-impaired individuals.

TITLE V—MISCELLANEOUS PROVISIONS

Sec. 501. Construction.
Sec. 502. Prohibition against retaliation and coercion.
Sec. 503. State immunity.

Sec. 514. Severability.

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) some 43,000,000 Americans have one or more physical or mental disabilities, and this number is increasing as the population as a whole is growing older;

(2) historically, society has tended to isolate and segregate individuals with disabilities, and, despite some improvements, such forms of discrimination against individuals with disabilities continue to be a serious and pervasive social problem;

(3) discrimination against individuals with disabilities persists in such critical areas as employment, housing, public accommodations, education, transportation, communication, recreation, institutionalization, health services, voting, and access to public services;

(4) unlike individuals who have experienced discrimination on the basis of race, color, sex, national origin, religion, or age, individuals who have experienced discrimination on the basis of disability have often had no legal recourse to redress such discrimination;

(5) individuals with disabilities continually encounter various forms of discrimination, including outright intentional exclusion, the discriminatory effects of architectural, transportation, and communication barriers, overprotective rules and policies, failure to make modifications to existing facilities and practices, exclusionary qualification standards and criteria, segregation, and relegation to lesser services, programs, activities, benefits, jobs, or other opportunities;

(6) census data, national polls, and other studies have documented that people with disabilities, as a group, occupy an inferior status in our society, and are severely disadvantaged socially, vocationally, economically, and educationally;

(7) individuals with disabilities are a discrete and insular minority who have been faced with restrictions and limitations, subjected to a history of purposeful unequal treatment, and relegated to a position of political powerlessness in our society, based on characteristics that are beyond the control of such individuals and resulting from stereotypic assumptions not truly indicative of the individual ability of such individuals to participate in, and contribute to, society;

(8) the Nation's proper goals regarding individuals with disabilities are to assure equality of opportunity, full participation, independent living, and economic self-sufficiency for such individuals; and

(9) the continuing existence of unfair and unnecessary discrimination and prejudice denies people with disabilities the opportunity to compete on an equal basis and to pursue those opportunities for which our free society is justifiably famous, and costs the United States billions of dollars in unnecessary expenses resulting from dependency and nonproductivity.

(b) Purpose.—It is the purpose of this Act—

(1) to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities;

(2) to provide clear, strong, consistent, enforceable standards addressing discrimination against individuals with disabilities;

(3) to ensure that the Federal Government plays a central role in enforcing the standards established in this Act on behalf of individuals with disabilities; and

(4) to invoke the sweep of congressional authority, including the power to enforce the fourteenth amendment and to regulate commerce, in order to address the major areas of discrimination faced day-to-day by people with disabilities.

SEC. 3. DEFINITIONS.

As used in this Act:

(1) Auxiliary aids and services.—The term "auxiliary aids and services" includes—

(A) qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments;

(B) qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments;

(C) acquisition or modification of equipment or devices; and

(D) other similar services and actions.

(2) Disability.—The term "disability" means, with respect to an individual—

(A) a physical or mental impairment that substantially limits one or more of the major life activities of such individual;

(B) a record of such an impairment; or

(C) being regarded as having such an impairment.

(3) State.—The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

TITLE I—EMPLOYMENT

SEC. 101. DEFINITIONS.

As used in this title:

(1) Commission.—The term "Commission" means the Equal Employment Opportunity Commission established by section 705 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-4).

(2) Covered entity.—The term "covered entity" means an employer, employment agency, labor organization, or joint labor-management committee.

(3) Employee.—The term "employee" means an individual employed by an employer.

(4) Employer.—

(A) The term "employer" means a person engaged in an industry affecting commerce who has 15 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding calendar year, and any agent of such person, except that, for two years following the effective date of this title, an employer means a person engaged in an industry affecting commerce who has 25 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding year, and any agent of such person.

(B) Exceptions.—The term "employer" does not include—

(i) the United States, a corporation wholly owned by the government of the United States, or an Indian tribe; or

(ii) a bona fide private membership club (other than a labor organization) that is exempt from taxation under section 501(c) of the Internal Revenue Code of 1986.

(5) Illegal use of drugs.—The term "drugs" means controlled substances, as defined in schedules I through V of section 202 of the Controlled Substances Act

(21 U.S.C. 812), the possession or distribution of which is unlawful under such Act. The term "illegal use of drugs" does not mean the use of controlled substances taken under supervision of a licensed health care professional or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

(6) Person, etc.—The terms "person", "labor organization", "employment agency", "commerce", and "industry affecting commerce", shall have the same meaning given such terms in section 701 of the Civil Rights Act of 1964 (42 U.S.C. 2000e).

(7) Qualified individual with a disability.—The term "qualified individual with a disability" means an individual with a disability who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires. For the purposes of this title, consideration shall be given to the employer's judgment as to what functions of a job are essential.

(8) Direct threat.—The term "direct threat" means a significant risk to the health or safety of others that cannot be eliminated by reasonable accommodation.

(9) Reasonable accommodation.—The term "reasonable accommodation" may include—

(A) making existing facilities used by employees readily accessible to and usable by individuals with disabilities; and

(B) job restructuring, part-time or modified work schedules, reassignment to a vacant position, acquisition or modification of equipment or devices, appropriate adjustment or modifications of examinations, training materials or policies, the provision of qualified readers or interpreters, and other similar accommodations for individuals with disabilities.

(10) Undue hardship.—

(A) In general.—The term "undue hardship" means an action requiring significant difficulty or expense, when considered in light of the factors set forth in subparagraph (B).

(B) Factors to be considered.—In determining whether an accommodation would impose an undue hardship on a covered entity, factors to be considered include—

(i) the nature and cost of the accommodation needed under this Act;

(ii) the overall financial resources of the facility or facilities involved in the provision of the reasonable accommodation; the number of persons employed at the facility; the effect on expenses, resources, or the impact otherwise of such accommodation upon the operation of the facility;

(iii) the overall financial resources of the covered entity; the overall size of the business of a covered entity with respect to the number of its employees, the number, type, and location of its facilities; and

(iv) the type of operation or operations of the covered entity, including the composition and structure of the workforce of such entity; the geographic separateness, administrative, and fiscal relationship of the facility or facilities in question to the covered entity.

SEC. 102. DISCRIMINATION.

(a) General Rule.—No covered entity shall discriminate against a qualified individual with a disability because of the disability of such individual in regard to job application procedures, the hiring, advancement, or discharge of employees, employee compensation, job training, and other terms, conditions, and privileges of employment.

(b) Construction.—As used in subsection (a), the term "discriminate" includes—

(1) limiting, segregating, or classifying a job applicant or employee in a way that adversely affects the opportunities or status of such applicant or employee because of the disability of such applicant or employee;

(2) participating in a contractual or other arrangement or relationship that has the effect of subjecting a covered entity's qualified applicant or employee with a disability to the discrimination prohibited by this title (such relationship includes a relationship with an employment or referral agency, labor union, an organization providing fringe benefits to an employee of the covered entity, or an organization providing training and apprenticeship programs);

(3) utilizing standards, criteria, or methods of administration—

(A) that have the effect of discrimination on the basis of disability; or

(B) that perpetuate the discrimination of others who are subject to common administrative control;

(4) excluding or otherwise denying equal jobs or benefits to a qualified individual because of the known disability of an individual with whom the qualified individual is known to have a relationship or association;

(5)(A) not making reasonable accommodations to the known physical or mental limitations of an otherwise qualified individual with a disability who is an applicant or employee, unless such covered entity can demonstrate that the accommodation would impose an undue hardship on the operation of the business of such covered entity; or

(B) denying employment opportunities to a job applicant or employee who is an otherwise qualified individual with a disability, if such denial is based on the need of such covered entity to make reasonable accommodation to the physical or mental impairments of the employee or applicant;

(6) using qualification standards, employment tests or other selection criteria that screen out or tend to screen out an individual with a disability or a class of individuals with disabilities unless the test or other selection criteria, as used by the covered entity, is shown to be job-related for the position in question and is consistent with business necessity; and

(7) failing to select and administer tests concerning employment in the most effective manner to ensure that, when such test is administered to a job applicant or employee who has a disability that impairs sensory, manual, or speaking skills, such test results accurately reflect the skills, aptitude, or whatever other factor of such applicant or employee that such test purports to measure, rather than reflecting the impaired sensory, manual, or speaking skills of such employee or applicant (except where such skills are the factors that the test purports to measure).

(c) Medical Examinations and Inquiries.—

(1) In general.—The prohibition against discrimination as referred to in subsection (a) shall include medical examinations and inquiries.

(2) Preemployment.—

(A) Prohibited examination or inquiry.—Except as provided in paragraph (3), a covered entity shall not conduct a medical examination or make inquiries of a job applicant as to whether such applicant is an individual with a disability or as to the nature or severity of such disability.

(B) Acceptable inquiry.—A covered entity may make preemployment inquiries into the ability of an applicant to perform job-related functions.

(3) Employment entrance examination.—A covered entity may require a medical examination after an offer of employment has been made to a job applicant and prior to the commencement of the employment duties of such applicant, and may condition an offer of employment on the results of such examination, if—

(A) all entering employees are subjected to such an examination regardless of disability;

(B) information obtained regarding the medical condition or history of the applicant is collected and maintained on separate forms and in separate medical files and is treated as a confidential medical record, except that—

(i) supervisors and managers may be informed regarding necessary restrictions on the work or duties of the employee and necessary accommodations;

(ii) first aid and safety personnel may be informed, when appropriate, if the disability might require emergency treatment; and

(iii) government officials investigating compliance with this Act shall be provided relevant information on request; and

(C) the results of such physical examination are used only in accordance with this title.

(4) Examination and inquiry.—

(A) Prohibited examinations and inquiries.—A covered entity shall not require a medical examination and shall not make inquiries of an employee as to whether such employee is an individual with a disability or as to the nature or severity of the disability, unless such examination or inquiry is shown to be job-related and consistent with business necessity.

(B) Acceptable examinations and inquiries.—A covered entity may conduct voluntary medical examinations, including voluntary medical histories, which are part of an employee health program available to employees at that work site. A covered entity may make inquiries into the ability of an employee to perform job-related functions.

(C) Requirement.—Information obtained under subparagraph (B) regarding the medical condition or history of any employee are subject to the requirements of subparagraphs (B) and (C) of paragraph (3).

SEC. 103. DEFENSES.

(a) In General.—It may be a defense to a charge of discrimination under this Act that an alleged application of qualification standards, tests, or selection criteria that screen out or tend to screen out or otherwise deny a job or benefit to an individual with a disability has been shown to be job-related and consistent with business necessity, and such performance cannot be accomplished by reasonable accommodation, as required under this title.

(b) Qualification Standards.—The term "qualification standards" may include a requirement that an individual shall not pose a direct threat to the health or safety of other individuals in the workplace.

(c) Religious Entities.—

(1) In general.—This title shall not prohibit a religious corporation, association, educational institution, or society from giving preference in employment to individuals of a particular religion to perform work connected with the carrying on by such corporation, association, educational institution, or society of its activities.

(2) Religious tenets requirement.—Under this title, a religious organization may require that all applicants and employees conform to the religious tenets of such organization.

SEC. 104. ILLEGAL USE OF DRUGS AND ALCOHOL.

(a) Qualified Individual With a Disability.—For purposes of this title, the term "qualified individual with a disability" shall not include any employee or applicant who is a current illegal user of drugs, when the covered entity acts on the basis of such use.

(b) Nothing in subsection (a) shall be construed to exclude as a qualified individual with a disability an individual who (i) has successfully completed a supervised drug rehabilitation program and is no longer illegally using drugs, or has otherwise been rehabilitated successfully and is no longer illegally using drugs, or (ii) is participating in a supervised rehabilitation program and is no longer illegally using drugs, or (iii) is erroneously regarded as being an illegal user of drugs but is not illegally using drugs. Provided that it shall not be a violation of this Act for a covered entity to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual defined in this paragraph is no longer illegally using drugs.

(c) Authority of Covered Entity.—A covered entity—

(1) may prohibit the use of alcohol or the illegal use of drugs at the workplace by all employees;

(2) may require that employees shall not be under the influence of alcohol or the illegal use of drugs at the workplace;

(3) may require that employees behave in conformance with the requirements established under the Drug-Free Workplace of 1988 (41 U.S.C. 701 et seq.);

(4) may hold an employee who is an illegal user of drugs or an alcoholic to the same qualification standards for employment or job performance and behavior that such entity holds other employees, even if any unsatisfactory performance or behavior is related to the use of drugs or alcohol by the employee; and

(5) may require employees in sensitive positions, as defined by the Department of Transportation regulations regarding alcohol and drug use, the Department of Defense drug-free workplace regulations, and the Nuclear Regulatory Commission regulations regarding alcohol and drug use, to comply with the standards established by such regulations.

(d) Drug Testing.—

(1) In general.—For purposes of this title, a test to determine the illegal use of drugs shall not be considered a medical examination.

(2) Construction.—Nothing in this title shall be construed to encourage, prohibit, or authorize the conducting of drug testing for illegal use of drugs of job applicants or employees or making employment decisions based on such test results.

SEC. 105. POSTING NOTICES.

Every employer, employment agency, labor organization, or joint labor-management committee covered under this title shall post notices in an accessible format to applicants, employees, and members describing the applicable provisions of this Act, in the manner prescribed by section 711 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–10).

SEC. 106. REGULATIONS.

Not later than 1 year after the date of enactment of this Act, the Commission shall issue regulations in an accessible format to carry out this title in accordance with subchapter II of chapter 5 of title 5, United States Code.

SEC. 107. ENFORCEMENT.

(a) POWERS, REMEDIES, AND PROCEDURES.—The powers, remedies, and procedures set forth in sections 705, 706, 707, 709, and 710 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-4, 2000e-5, 2000e-6, 2000e-8, and 2000e-9) shall be the powers, remedies, and procedures this title provides to the Commission, to the Attorney General, or to any person alleging discrimination on the basis of disability in violation of any provisions of this Act, or regulations promulgated under section 106, concerning employment.

(b) COORDINATION.—The agencies with enforcement authority for actions which allege employment discrimination under this title and under the Rehabilitation Act of 1973 shall develop procedures to ensure that administrative complaints filed under this title and under the Rehabilitation Act of 1973 are dealt with in a manner that avoids duplication of effort and prevents imposition of inconsistent or conflicting standards for the same requirements under this title and the Rehabilitation Act of 1973. Such agencies shall establish such coordinating mechanisms in memoranda of understanding or regulations implementing this title and the Rehabilitation Act of 1973.

SEC. 108. EFFECTIVE DATE.

This title shall become effective 24 months after the date of enactment.

TITLE II—PUBLIC SERVICES

SEC. 201. DEFINITION.

As used in this title, the term "qualified individual with a disability" means an individual with a disability who, with or without reasonable modifications to rules, policies, or practices, the removal of architectural, communication, or transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a department, agency, special purpose district, or other instrumentality of a State or a local government.

SEC. 202. DISCRIMINATION.

No qualified individual with a disability shall, by reason of such disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination by a department, agency, special purpose district, or other instrumentality of a State or a local government.

SEC. 203. ACTIONS APPLICABLE TO PUBLIC TRANSPORTATION PROVIDED BY PUBLIC ENTITIES CONSIDERED DISCRIMINATORY.

(a) DEFINITION.—As used in this title, the term "public transportation" means transportation by bus or rail, or by any other conveyance (other than air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

(b) VEHICLES.—

(1) NEW BUSES, RAIL VEHICLES, AND OTHER FIXED ROUTE VEHICLES.—It shall be considered discrimination for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a public entity to purchase or lease a new fixed route bus of any size, a new intercity rail vehicle, a new commuter rail vehicle, a new rapid rail vehicle, a new light rail vehicle to be used for public transportation, or any other new fixed route vehicle to be used for public transportation and for which a solicitation is made later than 30 days after the date of enactment of this Act, if such bus, rail, or other vehicle is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) USED VEHICLES.—If a public entity purchases or leases a used vehicle to be used for public transportation after the date of enactment of this Act, such individual or entity shall make demonstrated good faith efforts to purchase or lease such a used vehicle that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(3) Remanufactured vehicles.—If a public entity remanufactures a vehicle, or purchases or leases a remanufactured vehicle to be used for public transportation, so as to extend its usable life for 5 years or more, the vehicle shall, to the maximum extent feasible, be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(c) Paratransit as a Supplement to Fixed Route Public Transportation System.—

(1) In general.—If a public entity operates a fixed route public transportation system to provide public transportation, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public transit entity that is responsible for providing public transportation to fail to provide paratransit or other special transportation services sufficient to provide a comparable level of services as is provided to individuals using fixed route public transportation to individuals with disabilities, including individuals who use wheelchairs, who cannot otherwise use fixed route public transportation and to other individuals associated with such individuals with disabilities in accordance with service criteria established under regulations promulgated by the Secretary of Transportation unless the public transit entity can demonstrate that the provision of paratransit or other special transportation services would impose an undue financial burden on the public transit entity.

(2) Undue financial burden.—If the provision of comparable paratransit or other special transportation services would impose an undue financial burden on the public transit entity, such entity must provide paratransit and other special transportation services to the extent that providing such services would not impose an undue financial burden on such entity.

(3) Regulations.—

(A) Formula.—Regulations promulgated by the Secretary of Transportation to determine what constitutes an undue financial burden, for purposes of this subsection, may include a flexible numerical formula that incorporates appropriate local characteristics such as population.

(B) Additional paratransit services.—Notwithstanding paragraphs (1) and (2), the Secretary may require, at the discretion of the Secretary, a public transit authority to provide paratransit services beyond the amount determined by such formula.

(d) Community Operating Demand Responsive Systems for the General Public.—If a public entity operates a demand responsive system that is used to provide public transportation for the general public, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such individual or entity to purchase or lease a new vehicle, for which a solicitation is made later than 30 days after the date of enactment of this Act, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to that provided to the general public.

(e) Temporary Relief Where Lifts Are Unavailable.—With respect to the purchase of new buses, a public entity may apply for, and the Secretary of Transportation may temporarily relieve such public entity from the obligation to purchase new buses of any size that are readily accessible to and usable by individuals with disabilities if such public entity demonstrates—

(1) that the initial solicitation for new buses made by the public entity specified that all new buses were to be lift-equipped and were to be otherwise accessible to and usable by individuals with disabilities;

(2) the unavailability from any qualified manufacturer of hydraulic, electromechanical, or other lifts for such new buses;

(3) that the public entity seeking temporary relief has made good faith efforts to locate a qualified manufacturer to supply the lifts to the manufacturer of such buses in sufficient time to comply with such solicitation; and

(4) that any further delay in purchasing new buses necessary to obtain such lifts would significantly impair transportation services in the community served by the public entity.

(f) Construction.—

(1) In general.—Any relief granted under subsection (e) shall be limited in duration by a specified date and the appropriate committees of the Congress shall be notified of any such relief granted.

(2) Fraudulent application.—If, at any time, the Secretary of Transportation has reasonable cause to believe that such relief was fraudulently applied for, the Secretary of Transportation shall—

(A) cancel such relief, if such relief is still in effect; and

(B) take other steps that the Secretary of Transportation considers appropriate.

(g) New Facilities.—For purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to build a new facility that will be used to provide public transportation services, including bus service, intercity rail service, rapid rail service, commuter rail service, light rail service, and other service used for public transportation that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(h) Alterations of Existing Facilities.—With respect to a facility or any part thereof that is used for public transportation and that is altered by, on behalf of, or for the use of a public entity in a manner that affects or could affect the usability of the facility or part thereof, it shall be considered discrimination, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such individual or entity to fail to make the alterations in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. If such public entity is undertaking major structural alterations that affect or could affect the usability of the facility (as defined under criteria established by the Secretary of Transportation), such public entity shall also make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving such area, are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(i) Existing Facilities, Intercity Rail, Rapid Rail, Light Rail, and Commuter Rail Systems, and Key Stations.—

(1) Existing facilities.—Except as provided in paragraph (3), with respect to existing facilities used for public transportation, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for a public entity to fail to operate such public transportation program or activity conducted in such facilities so that, when viewed in the entirety, it is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) Intercity, rapid, light, and commuter rail systems.—With respect to vehicles operated by intercity, light, rapid, and commuter rail systems, for purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to have at least one car per train that is accessible to individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in any event in no less than 5 years.

(3) Key stations.—

(A) In general.—For purposes of this title and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for a public entity to fail to make stations in intercity rail systems and key stations in rapid rail, commuter rail, and light rail systems readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(B) Rapid rail, commuter rail, and light rail systems.—Key stations in rapid rail, commuter rail, and light rail systems shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than 3 years after the date of enactment of this Act, except that the time limit may be extended by the Secretary of Transportation up to 20 years for extraordinarily expensive structural changes to, or replacement of, existing facilities necessary to achieve accessibility.

(C) Intercity rail systems.—All stations in intercity rail systems shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable, but in no event later than 20 years after the date of enactment of this Act.

(D) Plans and milestones.—The Secretary of Transportation shall require the appropriate public entity to develop a plan for compliance with this paragraph that reflects consultation with individuals with disabilities affected by such plan and that establishes milestones for achievement of the requirements of this paragraph.

SEC. 204. REGULATIONS.

(a) ATTORNEY GENERAL.—Not later than 1 year after the date of enactment of this Act, the Attorney General shall promulgate regulations in an accessible format that implement this title (other than section 203), and such regulations shall be consistent with this title and with the coordination regulations under part 41 of title 28, Code of Federal Regulations (as promulgated by the Department of Health, Education, and Welfare on January 13, 1978), applicable to recipients of Federal financial assistance under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) except, with respect to "program accessibility, existing facilities", and "communications", such regulations shall be consistent with regulations and analysis as in part 39 of title 28 of the Code of Federal Regulations, applicable to federally conducted activities under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

(b) SECRETARY OF TRANSPORTATION.—

(1) IN GENERAL.—Not later than 1 year after the date of enactment of this Act, the Secretary of Transportation shall promulgate regulations in an accessible format that include standards applicable to facilities and vehicles covered under section 203 of this title.

(2) CONFORMANCE OF STANDARDS.—Such standards shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504.

SEC. 205. ENFORCEMENT.

The remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be the remedies, procedures and rights this title provides to any individual who believes that he or she is being subjected to discrimination on the basis of disability in violation of this Act, or regulations promulgated under section 204, concerning public services. Nothing in this section shall require a person with a disability to engage in a futile gesture if such person has actual notice that a person or organization covered by this title does not intend to comply with its provisions.

SEC. 206. EFFECTIVE DATE.

(a) IN GENERAL.—Except as provided in subsection (b), this title shall become effective 18 months after the date of enactment of this Act.

(b) FIXED ROUTE VEHICLES.—Section 203(b)(1), as regarding new fixed route vehicles, shall become effective on the date of enactment of this Act.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

SEC. 301. DEFINITIONS.

As used in this title:

(1) COMMERCE.—The term "commerce" means travel, trade, traffic, commerce, transportation, or communication—

(A) among the several States;

(B) between any foreign country or any territory or possession and any State; or

(C) between points in the same State but through another State or foreign country.

(2) COMMERCIAL FACILITIES.—The term "commercial facilities" means facilities—

(A) that are intended for nonresidential use; and

(B) whose operations will affect commerce.

Such term shall not include facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968 (42 U.S.C. 3601 et seq.).

(3) PUBLIC ACCOMMODATION.—The following privately operated entities are considered public accommodations for purposes of this title, if the operations of such entities affect commerce—

(A) an inn, hotel, motel, or other similar place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor;

(B) a restaurant, bar, or other establishment serving food or drink;

(C) a motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment;

(D) an auditorium, convention center, lecture hall, or other place of public gathering;

(E) a bakery, grocery store, clothing store, hardware store, shopping center, or other sales or rental establishment;

(F) a laundromat, dry-cleaners, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other service establishment;

(G) a terminal, depot, or other station used for public transportation;

(H) a museum, library, gallery, or other place of public display or collection;

(I) a park, zoo, amusement park, or other place of recreation;

(J) a nursery, elementary, secondary, undergraduate, or postgraduate private school, or other place of education;

(K) a day care center, senior citizen center, homeless shelter, food bank, adoption agency, or other social service establishment; and

(L) a gymnasium, health spa, bowling alley, golf course, or other place of exercise or recreation.

(4) Public transportation.—The term "public transportation" means transportation by bus or rail, or by any other conveyance (other than by air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

(5) Readily achievable.—

(A) In general.—The term "readily achievable" means easily accomplishable and able to be carried out without much difficulty or expense.

(B) Determination.—In determining whether an action is readily achievable, factors to be considered include—

(i) the nature and cost of the action needed under this Act;

(ii) the overall financial resources of the facility or facilities involved in the action; the number of persons employed at the facility; the effect on expenses, resources, or the impact otherwise of such action upon the operation of the facility;

(iii) the overall financial resources of the covered entity; the overall size of the business of a covered entity with respect to the number of its employees; the number, type, and location of its facilities; and

(iv) the type of operation or operations of the covered entity, including the composition and structure of the workforce of such entity; the geographic separateness, administrative and fiscal relationship of the facility or facilities in question to the covered entity.

SEC. 302. PROHIBITION OF DISCRIMINATION BY PUBLIC ACCOMMODATIONS.

(a) General Rule.—No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation by any person who owns, leases (or leases to), or operates a place of public accommodation.

(b) Construction.—

(1) General prohibition.—

(A) Activities.—

(i) Denial of participation.—It shall be discriminatory to subject an individual with a disability or a class of individuals with disabilities, on the basis of such disability or disabilities, directly, or through contractual, licensing, or other arrangements, to a denial of the opportunity of the individual or class to participate in or benefit from the goods, services, facilities, privileges, advantages, or accommodations of an entity.

(ii) Participation in unequal benefit.—It shall be discriminatory to afford an individual with a disability or a class of individuals with disabilities, on the basis of such disability or disabilities, directly, or through contractual, licensing, or other arrangements with the opportunity to participate in or benefit from a good, service, facility, privilege, advantage, or accommodation that is not equal to that afforded to other individuals.

(iii) Separate benefit.—It shall be discriminatory to provide an individual with a disability or a class of individuals with disabilities, on the basis of such disability or disabilities, directly, or through contractual, licensing, or other arrangements with a good, service, facility, privilege, advantage, or accommodation that is different or separate from that provided to other individuals, unless such action is necessary to provide the individual or class of individuals with a good, service, facility, privilege, advantage, or accommodation, or other opportunity that is as effective as that provided to others.

(iv) For purposes of sec. 302(b)(1)(A)(i)–(iii), the term "individual with a disability or a class of individuals with disabilities" refers to the clients or customers of the covered public accommodation that enters into the contractual, licensing or other arrangement.

(B) INTEGRATED SETTINGS.—Goods, facilities, privileges, advantages, accommodations, or services shall be afforded to an individual with a disability in the most integrated setting appropriate to the needs of the individual.

(C) OPPORTUNITY TO PARTICIPATE.—Notwithstanding the existence of separate or different programs or activities provided in accordance with this section, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different.

(D) ADMINISTRATIVE METHODS.—An individual or entity shall not, directly or through contractual or other arrangements, utilize standards or criteria or methods of administration—

(i) that have the effect of discriminating on the basis of disability; or

(ii) that perpetuate the discrimination of others who are subject to common administrative control.

(E) ASSOCIATION.—It shall be discriminatory to exclude or otherwise deny equal goods, services, facilities, privileges, advantages, accommodations, or other opportunities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association.

(2) SPECIFIC PROHIBITIONS.—

(A) DISCRIMINATION.—As used in subsection (a), the term "discrimination" shall include—

(i) the imposition or application of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any goods, services, facilities, privileges, advantages, or accommodations, unless such criteria can be shown to be necessary for the provision of the goods, services, facilities, privileges, advantages, or accommodations being offered;

(ii) a failure to make reasonable modifications in policies, practices, or procedures, when such modifications are necessary to afford such goods, services, facilities, privileges, advantages, or accommodations to individuals with disabilities, unless the entity can demonstrate that making such modifications would fundamentally alter the nature of such goods, services, facilities, privileges, advantages, or accommodations;

(iii) a failure to take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the entity can demonstrate that taking such steps would fundamentally alter the nature of the good, service, facility, privilege, advantage, or accommodation being offered or would result in an undue burden;

(iv) a failure to remove architectural barriers, and communication barriers that are structural in nature, in existing facilities, and transportation barriers in existing vehicles used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles by the installation of a hydraulic or other lift), where such removal is readily achievable; and

(v) where an entity can demonstrate that the removal of a barrier under clause (iv) is not readily achievable, a failure to make such goods, services, facilities, privileges, advantages, or accommodations available through alternative methods if such methods are readily achievable.

(B) FIXED ROUTE SYSTEM.—

(i) ACCESSIBILITY.—It shall be considered discrimination for an entity that uses a vehicle for a fixed route system to transport individuals n covered under section 203 or 304, to purchase or lease a bus or a vehicle that is capable of carrying in excess of 16 passengers, for which solicitations are made later than 30 days after the effective date of this Act, that is not readily accessible to and usable by individuals with disabilities (including individuals who use wheelchairs), except that over-the-road buses shall be subject to section 304(b)(4) and section 305.

(ii) EQUIVALENT SERVICE.—If such entity purchases or leases a vehicle carrying 16 or less passengers after the effective date of this title that is not readily accessible to or usable by individuals with disabilities, it shall be discriminatory for such entity to fail to operate a system that, when viewed in its entirety, ensures a level of service to individuals with disabilities, including individuals who use wheelchairs, equivalent to the level of service provided to the general public.

(C) DEMAND RESPONSIVE SYSTEM.—As used in subsection (a), the term "discrimination" shall include, in the case of a covered entity that uses vehicles in a demand responsive system to transport individuals not covered under section 203 or 304, an incident in which—

(i) such entity purchases or leases a vehicle carrying 16 or less passengers after the effective date of this title, a failure to operate a system that, when viewed in its entirety, ensures a level of service to individuals with disabilities, including individuals who use wheelchairs, equivalent to the level of service provided to the general public; and

(ii) such entity purchases or leases a bus or a vehicle that can carry in excess of 16 passengers for which solicitations are made later than 30 days after the effective date of this Act, that is not readily accessible to and usable by individuals with disabilities (including individuals who use wheelchairs) unless such entity can demonstrate that such system, when viewed in its entirety, already provides a level of service to individuals with disabilities equivalent to that provided to the general public, except that over-the-road buses shall be subject to section 304(b)(4) and section 305.

(3) SPECIFIC CONSTRUCTION.—Nothing in this title shall require an entity to permit an individual to participate in or benefit from the goods, services, facilities, privileges, advantages and accommodations of such entity where such individual poses a direct threat to the health or safety of others. The term 'direct threat' means a significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices, or procedures or by the provision of auxiliary aids or services.

SEC. 303. NEW CONSTRUCTION IN PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES.

(a) APPLICATION OF TERM.—Except as provided in subsection (b), as applied to public accommodations and commercial facilities, the term "discrimination" as used in section 302(a) shall mean—

(1) a failure to design and construct facilities for first occupancy later than 30 months after the date of enactment of this Act that are readily accessible to and usable by individuals with disabilities, except where an entity can demonstrate that it is structurally impracticable to meet the requirements of such subsection in accordance with standards set forth or incorporated by reference in regulations issued under this title; and

(2) with respect to a facility or part thereof that is altered by, on behalf of, or for the use of an establishment in a manner that affects or could affect the usability of the facility or part thereof, a failure to make alterations in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. Where the entity is undertaking an alteration that affects or could affect usability of or access to an area of the facility containing a primary function, the entity shall also make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General).

(b) ELEVATOR.—Subsection (a) shall not be construed to require the installation of an elevator for facilities that are less than three stories or have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

SEC. 304. PROHIBITION OF DISCRIMINATION IN PUBLIC TRANSPORTATION SERVICES PROVIDED BY PRIVATE ENTITIES.

(a) General Rule.—No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of public transportation services provided by a privately operated entity that is primarily engaged in the business of transporting people, but is not in the principal business of providing air transportation, and whose operations affect commerce.

(b) Construction.—As used in subsection (a), the term "discrimination against" includes—

(1) the imposition or application by an entity of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully enjoying the public transportation services provided by the entity;

(2) the failure of an entity to—

(A) make reasonable modifications consistent with those required under section 302(b)(2)(A)(ii);

(B) provide auxiliary aids and services consistent with the requirements of section 302(b)(2)(A)(iii); and

(C) remove barriers consistent with the requirements of section 302(b)(2)(A) (iv), (v), and (vi);

(3) the purchase or lease of a new vehicle (other than an automobile or an over-the-road bus) that is to be used to provide public transportation services, and for which a solicitation is made later than 30 days after the date of enactment of this Act, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs (except in the case of a vehicle used in a demand response system, in which case the new vehicle need not be readily accessible to and usable by individuals with disabilities if the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to the level of service provided to the general public); and

(4) the purchase or lease of a new over-the-road bus that is used to provide public transportation services and for which a solicitation is made later than 7 years after the date of enactment of this Act for small providers (as defined by the Secretary of Transportation) and 6 years for other providers, except as provided in section 305(d), that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

SEC. 305. STUDY.

(a) Purpose.—The Office of Technology Assessment shall undertake a study to determine—

(1) the access needs of individuals with disabilities to over-the-road buses; and

(2) the most cost effective methods for making over-the-road buses readily accessible to and usable by individuals with disabilities, particularly individuals who use wheelchairs.

(b) Content.—The study shall analyze issues, including—

(1) the anticipated demand by individuals with disabilities for accessible over-the-road buses;

(2) the degree to which over-the road buses are readily accessible to and usable by individuals with disabilities;

(3) the cost of providing accessibility to over-the-road buses to individuals with disabilities, including recent technological and cost saving developments in equipment and devices providing such accessibility;

(4) possible design changes in over-the-road buses that could enhance such accessibility; and

(5) the impact of accessibility requirements on the continuation of inter-city bus service by over-the-road buses, with particular consideration of impact on rural service.

(c) Advisory Committee.—In conducting the study required by subsection (a), the Office of Technology Assessment shall establish an advisory committee, which shall consist of—

(1) members selected from among private operators using over-the-road buses, bus manufacturers, and lift manufacturers;

(2) members selected from among individuals with disabilities, particularly individuals who use wheelchairs, who are potential riders of such buses; and

(3) members selected for their technical expertise on issues included in the study.

The number of members selected under each of paragraphs (1) and (2) shall be equal, and the total number of members selected under paragraphs (1) and (2) shall exceed the number of members selected under paragraph (3).

(d) DEADLINE.—The study required by subsection (a), along with recommendations by the Office of Technology Assessment, including any policy options for legislative action, shall be submitted to the President and the Congress within 36 months after the date of enactment of this Act. If the President, after reviewing the study, determines that compliance with the requirements of section 304(a) on or before the applicable deadlines specified in section 304(b)(4) will result in a significant reduction in intercity bus service, each such deadline shall be extended by one additional year.

(e) REVIEW.—In developing the study required by subsection (a), the Office of Technology Assessment shall provide a preliminary draft of such study to the Architectural and Transportation Barriers Compliance Board established under section 502 of the Rehabilitation Act of 1973 (29 U.S.C. 792). The Board shall have an opportunity to comment on such draft study, and any such comments by the Board made in writing within 120 days after the Board's receipt of the draft study shall be incorporated as part of the final study required to be submitted under subsection (d).

SEC. 306. REGULATIONS.

(a) ACCESSIBILITY STANDARDS.—Not later than 1 year after the date of enactment of this Act, the Secretary of Transportation shall issue regulations in an accessible format that shall include standards applicable to facilities and vehicles covered under section 302(b)(2) (B) and (C) and section 304.

(b) OTHER PROVISIONS.—Not later than 1 year after the date of enactment of this Act, the Attorney General shall issue regulations in an accessible format to carry out the remaining provisions of this title not referred to in subsection (a) that include standards applicable to facilities and vehicles covered under section 302.

(c) STANDARDS.—Standards included in regulations issued under subsections (a) and (b) shall be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504.

(d) INTERIM ACCESSIBILITY STANDARDS.—For new construction or alterations for which a valid and appropriate State or local building permit is obtained prior to the issuance of final regulations under this section, and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the Uniform Federal Accessibility Standards in effect at the time the building permit is issued shall suffice to satisfy the requirement that facilities be readily accessible to and usable by persons with disabilities as required under sections 302(b)(2)(A)(vi) and 303, except that, if such final regulations have not been issued one year after the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines required under section 306(a), compliance with such supplemental minimum guidelines shall be necessary to satisfy the requirement that facilities be readily accessible to and usable by persons with disabilities.

SEC. 307. EXEMPTIONS FOR PRIVATE CLUBS AND RELIGIOUS ORGANIZATIONS.

The provisions of this title shall not apply to private clubs or establishments exempted from coverage under title II of the Civil Rights Act of 1964 (42 U.S.C. 2000-a(e)) or to religious organizations or entities controlled by religious organizations, including places of worship.

SEC. 308. ENFORCEMENT.

(a) IN GENERAL.—

(1) AVAILABILITY OF REMEDIES AND PROCEDURES.—The remedies and procedures set forth in section 204(a) of the Civil Rights Act of 1964 (42 U.S.C. sec. 2000a-3(a)) shall be the remedies and procedures this title provides to any person who is being subjected to discrimination on the basis of disability in violation of this title or has reasonable grounds for believing that such person is about to be subjected to discrimination in violation of section 303. Nothing in this section shall require an individual with a disability to engage in a futile gesture if such person has actual notice that a person or organization covered by this title does not intend to comply with its provisions.

(2) INJUNCTIVE RELIEF.—In the case of violations of section 302(b)(2)(A)(iv) and (vi) and section 303(a), injunctive relief shall include an order to alter facilities to make such facilities readily accessible to and usable by individuals with disabilities to the extent required by this title. Where appropriate, injunctive relief

shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by this title.

(b) Enforcement by the Attorney General.—

(1) Denial of rights.—

(A) Duty to investigate.—

(i) In general.—The Attorney General shall investigate alleged violations of this title, and shall undertake periodic reviews of compliance of covered entities under this title.

(ii) Attorney general certification.—On the application of a state or local government, the Attorney General may, in consultation with the Architectural and Transportation Barriers Compliance Board, and after prior notice and a public hearing at which persons, including persons with disabilities are provided an opportunity to testify against such certification, certify that a state law or local building code or similar ordinance that establishes accessibility requirements meets or exceeds the minimum requirements of the Act for the accessibility and usability of covered facilities under this title. At any enforcement proceeding under this section, such certification by the Attorney General shall be rebuttable evidence that such state law or local ordinance does meet or exceed the minimum requirements of the Act.

(B) Potential violation.—If the Attorney General has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of resistance to the full enjoyment of any of the rights granted by this title or that any person or group of persons has been denied any of the rights granted by such title, and such denial raises an issue of general public importance, the Attorney General may commence a civil action in any appropriate United States district court.

(2) Authority of court.—In a civil action under paragraph (1), the court—

(A) may grant any equitable relief that such court considers to be appropriate, including granting temporary, preliminary, or permanent relief, providing an auxiliary aid or service, modification of policy or alternative method, or making facilities readily accessible to and usable by individuals with disabilities, to the extent required by this title;

(B) may award such other relief as the court considers to be appropriate, including monetary damages to persons aggrieved when requested by the Attorney General; and

(C) may, to vindicate the public interest, assess a civil penalty against the entity in an amount—

(i) not exceeding $50,000 for a first violation; and

(ii) not exceeding $100,000 for any subsequent violation.

(3) In counting the number of previous determinations of violations for purposes of determining whether a "first" or "subsequent" violation has occurred, determinations in the same trial on liability that the covered entity has engaged in more than one discriminatory act are to be counted as a single violation.

(4) Punitive damages.—For purposes of subsection (b)(2)(B), the term "monetary damages" and "such other relief" does not include punitive damages.

(5) Judicial consideration.—In a civil action under paragraph (1), the court, when considering what amount of civil penalty, if any, is appropriate, shall give consideration to any good faith effort or attempt to comply with this Act by the entity. In evaluating good faith, the court shall consider, among other factors it deems relevant, whether the entity could have reasonably anticipated the need for an appropriate type of auxiliary aid needed to accommodate the unique needs of a particular individual with a disability.

SEC. 309. EXAMINATIONS AND COURSES.

Any person that offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes shall offer such examinations or courses in place and manner accessible to persons with disabilities or offer alternative accessible arrangements for such individuals.

SEC. 310. EFFECTIVE DATE.

This title shall become effective 18 months after the date of enactment of this Act.

TITLE IV—TELECOMMUNICATIONS RELAY SERVICES

SEC. 401. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

(a) Telecommunications.—Title II of the Communications Act of 1934 (47 U.S.C. 201 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 225. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

"(a) Definitions.—As used in this section—

"(1) Common carrier or carrier.—The term 'common carrier' or 'carrier' includes any common carrier engaged in interstate communication by wire or radio as defined in section 3(h), any common carrier engaged in intrastate communication by wire or radio, and any common carrier engaged in both interstate and intrastate communication, notwithstanding sections 2(b) and 221(b).

"(2) TDD.—The term 'TDD' means a Telecommunications Device for the Deaf, which is a machine that employs graphic communication in the transmission of coded signals through a wire or radio communication system.

"(3) Telecommunications relay services.—The term 'telecommunications relay services' means telephone transmission services that provide the ability for an individual who has a hearing impairment or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses a TDD or other nonvoice terminal device and an individual who does not use such a device.

"(b) Availability of Telecommunications Relay Services.—

"(1) In general.—In order to carry out the purposes established under section 1, to make available to all individuals in the United States a rapid, efficient nationwide communication service, and to increase the utility of the telephone system of the Nation, the Commission shall ensure that interstate and intrastate telecommunications relay services are available, to the extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals in the United States.

"(2) Remedies.—For purposes of this section, the same remedies, procedures, rights, and obligations under this Act that are applicable to common carriers engaged in interstate communication by wire or radio are also applicable to common carriers engaged in intrastate communication by wire or radio and common carriers engaged in both interstate and intrastate communication by wire or radio.

"(c) Provision of Services.—Each common carrier providing telephone voice transmission services shall provide telecommunications relay services individually, through designees, or in concert with other carriers not later than 3 years after the date of enactment of this section.

"(d) Regulations.—

"(1) In general.—The Commission shall, not later than 1 year after the date of enactment of this section, prescribe regulations to implement this section, including regulations that—

"(A) establish functional requirements, guidelines, and operations procedures for telecommunications relay services;

"(B) establish minimum standards that shall be met by common carriers in carrying out subsection (c);

"(C) require that telecommunications relay services operate every day for 24 hours per day;

"(D) require that users of telecommunications relay services pay rates no greater than the rates paid for functionally equivalent voice communication services with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination;

"(E) prohibit relay operators from refusing calls or limiting the length of calls that use telecommunications relay services;

"(F) prohibit relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of the call; and

"(G) prohibit relay operators from intentionally altering a relayed conversation.

"(2) Technology.—The Commission shall ensure that regulations prescribed to implement this section encourage the use of existing technology and do not discourage or impair the development of improved technology.

"(3) Jurisdictional separation of costs.—

"(A) In general.—The Commission shall prescribe regulations governing the jurisdictional separation of costs for the services provided pursuant to this section.

"(B) Recovering costs.—Such regulations shall generally provide that costs caused by interstate telecommunications relay services shall be recovered from the interstate jurisdiction and costs caused by intrastate telecommunications relay services shall be recovered from the intrastate jurisdiction.

"(C) Joint provision of services.—To the extent interstate and intrastate common carriers jointly provide telecommunications relay services, the procedures established in section 410 shall be followed, as applicable.

"(4) Fixed monthly charge.—The Commission shall not permit carriers to impose a fixed monthly charge on residential customers to recover the costs of providing interstate telecommunication relay services.

"(5) Undue burden.—If the Commission finds that full compliance with the requirements of this section would unduly burden one or more common carriers, the Commission may extend the date for full compliance by such carrier for a period not to exceed 1 additional year.

"(e) Enforcement.—

"(1) In general.—Subject to subsections (f) and (g), the Commission shall enforce this section.

"(2) Complaint.—The Commission shall resolve, by final order, a complaint alleging a violation of this section within 180 days after the date such complaint is filed.

"(f) Certification.—

"(1) State documentation.—Each State may submit documentation to the Commission that describes the program of such State for implementing intrastate telecommunications relay services.

"(2) Requirements for certification.—After review of such documentation, the Commission shall certify the State program if the Commission determines that the program makes available to hearing-impaired and speech-impaired individuals either directly, through designees, or through regulation of intrastate common carriers, intrastate telecommunications relay services in such State in a manner that meets the requirements of regulations prescribed by the Commission under subsection (d).

"(3) Method of funding.—Except as provided in subsection (d), the Commission shall not refuse to certify a State program based solely on the method such State will implement for funding intrastate telecommunication relay services.

"(4) Suspension or revocation of certification.—The Commission may suspend or revoke such certification if, after notice and opportunity for hearing, the Commission determines that such certification is no longer warranted.

"(g) Complaint.—

"(1) Referral of complaint.—If a complaint to the Commission alleges a violation of this section with respect to intrastate telecommunications relay services within a State and certification of the program of such State under subsection (f) is in effect, the Commission shall refer such complaint to such State.

"(2) Jurisdiction of commission.—After referring a complaint to a State under paragraph (1), the Commission shall exercise jurisdiction over such complaint only if—

"(A) final action under such State program has not been taken on such complaint by such State—

"(i) within 180 days after the complaint is filed with such State; or

"(ii) within a shorter period as prescribed by the regulations of such State; or

"(B) the Commission determines that such State program is no longer qualified for certification under subsection (f).".

(b) Conforming Amendments.—The Communications Act of 1934 (47 U.S.C. 151 et seq.) is amended—

(1) in section 2(b) (47 U.S.C. 152(b)), by striking "section 223 or 224" and inserting "sections 223, 224, and 225"; and

(2) in section 221(b) (47 U.S.C. 221(b)), by striking "section 301" and inserting "sections 225 and 301".

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. CONSTRUCTION.

(a) REHABILITATION ACT OF 1973.—Nothing in this Act shall be construed to reduce the scope of coverage or apply a lesser standard than the coverage required or the standards applied under title V of the Rehabilitation Act of 1973 (29 U.S.C. 790 et seq.) or the regulations issued by Federal agencies pursuant to such title.

(b) OTHER LAWS.—Nothing in this Act shall be construed to invalidate or limit any other Federal law or law of any State or political subdivision of any State or jurisdiction that provides greater or equal protection for the rights of individuals with disabilities than are afforded by this Act.

(c) INSURANCE.—Titles I through IV of this Act shall not be construed to prohibit or restrict—

(1) an insurer, hospital or medical service company, health maintenance organization, or any agent, or entity that administers benefit plans, or similar organizations from underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

(2) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that are based on underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law;

(3) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that is not subject to State laws that regulate insurance:

Provided, That paragraphs (1), (2), and (3) are not used as a subterfuge to evade the purposes of title I and III.

(d) ACCOMMODATIONS AND SERVICES.—Nothing in this Act shall be construed to require an individual with a disability to accept an accommodation, aid, service, opportunity, or benefit which such individual chooses not to accept.

SEC. 502. PROHIBITION AGAINST RETALIATION AND COERCION.

(a) RETALIATION.—No person shall discriminate against any individual because such individual has opposed any act or practice made unlawful by this Act or because such individual made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this Act.

(b) INTERFERENCE, COERCION, OR INTIMIDATION.—It shall be unlawful to coerce, intimidate, threaten, or interfere with any individual in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other individual in the exercise or enjoyment of, any right granted or protected by this Act.

(c) REMEDIES AND PROCEDURES.—The remedies and procedures available under sections 107, 205, and 308 of this Act shall be available to aggrieved persons for violations of subsections (a) and (b), with respect to title I, title II and title III, respectively.

SEC. 503. STATE IMMUNITY.

A State shall not be immune under the eleventh amendment to the Constitution of the United States from an action in Federal or State court of competent jurisdiction for a violation of this Act. In any action against a State for a violation of the requirements of this Act, remedies (including remedies both at law and in equity) are available for such a violation to the same extent as such remedies are available for such a violation in an action against any public or private entity other than a State.

SEC. 504. REGULATIONS BY THE ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD.

(a) ISSUANCE OF GUIDELINES.—Not later than 9 months after the date of enactment of this Act, the Architectural and Transportation Barriers Compliance Board shall issue minimum guidelines that shall supplement the existing Minimum Guidelines and Requirements for Accessible Design for purposes of titles II and III.

(b) CONTENTS OF GUIDELINES.—The guidelines issued under subsection (a) shall establish additional requirements, consistent with this Act, to ensure that buildings, facilities, and vehicles are accessible, in terms of architecture and design, transportation, and communication, to individuals with disabilities.

(c) Qualified Historic Properties.—(1) The guidelines issued under subsection (a) shall include guidelines and requirements for alterations that will threaten or destroy the historic significance of qualified historic buildings and facilities as defined in the Uniform Federal Accessibility Standards 4. 1. 7(1)(a).

(2) Regarding alterations of buildings or facilities that are covered by the requirements of Section 106 of the National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470, and the guidelines issued under paragraph (i) shall, at a minimum, maintain the procedures and standards established in the Uniform Federal Accessibility Standards 4. 1. 7 (1) and (2).

(3) Regarding alterations of qualified historic buildings designated as historic under a statute of the appropriate state or local government body, the guidelines issued under paragraph (i) shall establish procedures equivalent to those established by the Uniform Federal Accessibility Standards 4. 1. 7(1)(b) and (c), and shall require, at a minimum, compliance with the minimum requirements established in Uniform Federal Accessibility Standards 4. 1. 7(2).

SEC. 505. ATTORNEY'S FEES.

In any action or administrative proceeding commenced pursuant to this Act, the court or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

SEC. 506. TECHNICAL ASSISTANCE.

(a) Plan for Assistance.—

(1) In general.—Not later than 180 days after the date of enactment of this Act, the Attorney General, in consultation with the Chair of the Equal Employment Opportunity Commission, the Secretary of Transportation, the Chair of the National Council on Disability, the Chair of the Architectural and Transportation Barriers Compliance Board, and the Chair of Federal Communications Commission, shall develop a plan to assist entities covered under this Act, along with other executive agencies and commissions, in understanding the responsibility of such entities, agencies, and commissions under this Act.

(2) Publication of plan.—The Attorney General shall publish the plan referred to in paragraph (1) for public comment in accordance with the Administrative Procedure Act (5 U.S.C. 551 et seq.).

(b) Agency and Public Assistance.—The Attorney General is authorized to obtain the assistance of other Federal agencies in carrying out subsection (a), including the National Council on Disability, the President's Committee on Employment of People with Disabilities, the Small Business Administration, and the Department of Commerce.

(c) Implementation.—

(1) Authority to contract.—Each department or agency that has responsibility for implementing this Act may render technical assistance to individuals and institutions that have rights or responsibilities under this Act.

(2) Implementation of titles.—

(A) Title i.—The Equal Employment Opportunity Commission and the Attorney General shall implement the plan for assistance, as described in subsection (a), for title I.

(B) Title ii.—

(i) In general.—Except as provided for in clause (ii), the Attorney General shall implement such plan for assistance for title II.

(ii) Exception.—The Secretary of Transportation shall implement such plan for assistance for section 203.

(C) Title iii.—The Attorney General, in coordination with the Secretary of Transportation and the Chair of the Architectural Transportation Barriers Compliance Board, shall implement such plan for assistance for title III.

(D) Title iv.—The Chair of the Federal Communications Commission, in coordination with the Attorney General, shall implement such plan for assistance for title IV.

(3) Technical assistance manuals.—Each department or agency as part of its implementation responsibilities, shall ensure the availability and provision of appropriate technical assistance manuals to individuals or entities with rights or responsibilities under this Act, no later than six months after applicable final regulations are published for titles I, II, III, and IV of this Act.

(d) Grants and Contracts.—

(1) In general.—Each department and agency having responsibility for implementing this Act may make grants or enter into contracts with individuals, profit institutions, and nonprofit institutions, including educational institutions and groups or associations representing individuals who have rights or duties under this Act, to effectuate the purposes of this Act.

(2) Dissemination of information.—Such grants and contracts, among other uses, may be designed to ensure wide dissemination of information about the rights and duties established by this Act and to provide information and technical assistance about techniques for effective compliance with this Act.

(e) Failure to Receive Assistance.—An employer, public accommodation, or other entity covered under this Act shall not be excused from meeting the requirements of this Act because of any failure to receive technical assistance under this section, including any failure in the development or dissemination of any technical assistance manual authorized by this section.

SEC. 507. FEDERAL WILDERNESS AREAS.

(a) Study.—The National Council on Disability shall conduct a study and report on the effect that wilderness designations and wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System as established under the Wilderness Act (16 U.S.C. 1131 et seq.).

(b) Submission of Report.—Not later than 1 year after the enactment of this Act, the National Council on Disability shall submit the report required under subsection (a) to Congress.

SEC. 508. TRANSVESTITES.

For the purposes of this Act, the term "disabled" or "disability" shall not apply to an individual solely because that individual is a transvestite.

SEC. 509. CONGRESSIONAL INCLUSION.

(a) In General.—Notwithstanding any other provision of this Act or of law, the provisions of this Act shall, subject to subsection (b), apply in their entirety to the Senate, the House of Representatives, and all the instrumentalities of the Congress, or either House thereof.

(b) House Employees.—

(1) In general.—The rights and protections under this Act shall apply with respect to any employee in an employment position in the House of Representatives and any employing authority of the House of Representatives.

(2) Administration.—In the administration of this subsection, the remedies and procedures under the Fair Employment Practices Resolution shall be applied. As used in this paragraph, the term "Fair Employment Practices Resolution" means House Resolution 558, One Hundredth Congress, agreed to October 4, 1988, as continued in effect by House Resolution 15, One Hundred First Congress, agreed to January 3, 1989.

SEC. 510. ILLEGAL USE OF DRUGS.

(a) For purposes of this Act, an individual with a disability does not include an individual who is a current illegal user of drugs, when the covered entity acts on the basis of such use.

(b) Nothing in subsection (a) shall be construed to exclude as an individual with a disability an individual who (i) has successfully completed a supervised drug rehabilitation program and is no longer illegally using drugs, or has otherwise been rehabilitated successfully and is no longer illegally using drugs, or (ii) is participating in a supervised rehabilitation program and is no longer illegally using drugs, or (iii) is erroneously regarded as being an illegal user of drugs but is not illegally using drugs. Provided that it shall not be a violation of this Act for a covered entity to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual defined in this paragraph is no longer illegally using drugs.

(c) Notwithstanding subsection (a) and section 511(d), an individual shall not be denied health or social services on the basis of his or her current illegal use of drugs if he or she is otherwise entitled to such services.

SEC. 511. DEFINITIONS.

(a) Homosexuality and Bisexuality.—For purposes of the definition of "disability" in section 3(2), homosexuality and bisexuality are not impairments and as such are not disabilities under this Act.

(b) Certain Conditions.—Under this Act, the term "disability" shall not include—

(1) transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other behavior disorders;

(2) compulsive gambling, kleptomania, or pyromania; or

(3) psychoactive substance use disorders resulting from current illegal use of drugs.

SEC. 512. AMENDMENTS TO THE REHABILITATION ACT.

(a) Handicapped Individual.—Section 7(8)(B) of the Rehabilitation Act of 1973 (29 U.S.C. 706(8)(B)) is amended—

(1) in the first sentence, by striking out "Subject to the second sentence of this subparagraph" and inserting instead "Subject to subparagraphs (C) and (D)";

(2) by striking the second sentence;

(3) by inserting after subparagraph (B) the following:

"(C) For purposes of subchapter V of this Act the term 'individual with handicaps' does not include an individual who is a current illegal user of drugs, when a recipient acts on the basis of such use."; and

(4) by redesignating subparagraph (C) as subparagraph (D).

(b)(1) Nothing in subsection (a) shall be construed to exclude as an individual with handicaps an individual who (A) has successfully completed a supervised drug rehabilitation program and is no longer illegally using drugs, or has otherwise been rehabilitated successfully and is no longer illegally using drugs, or (B) is participating in a supervised rehabilitation program and is no longer illegally using drugs, or (C) is erroneously regarded as being an illegal user of drugs but is not illegally using drugs. Provided that it shall not be a violation of this Act for a recipient to adopt or administer reasonable policies or procedures, including but not limited to drug testing, designed to ensure that an individual defined in this paragraph is no longer illegally using drugs.

(2) Notwithstanding subsection 1(a), for purposes of programs and activities providing health services and services provided under title I, II and III of the Rehabilitation Act of 1973, an individual shall not be excluded from the benefits of such programs or activities on the basis of his or her current illegal use of drugs if he or she is otherwise entitled to such services.

(3) For purposes of programs and activities providing educational services, local educational agencies may take disciplinary action pertaining to the illegal use or possession of drugs or alcohol against any handicapped student who currently and illegally uses drugs or alcohol to the same extent that such disciplinary action is taken against nonhandicapped students. Furthermore, the due process procedures at 34 CFR 104.36 shall not apply to such disciplinary actions.

(4) For purposes of sections 503 and 504 of this Act as such sections relate to employment, the term "individual with handicaps" does not include any individual who is an alcoholic whose current use of alcohol prevents such individual from performing the duties of the job in question or whose employment, by reason of such current alcohol abuse, would constitute a direct threat to property or the safety of others.

(5) Section 7 of the Rehabilitation Act is further amended by adding at the end thereof the following new paragraph:

"(22) The term 'drugs' means controlled substances, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812), the possession or distribution of which is unlawful under such Act. The term 'illegal use of drugs' does not mean the use of controlled substances taken under supervision of a licensed health professional or other uses authorized by the Controlled Substances Act or other provisions of Federal law.".

SEC. 513. ALTERNATIVE MEANS OF DISPUTE RESOLUTION.

Where appropriate and to the extent authorized by law, the use of alternative means of dispute resolution, including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, and arbitration, is encouraged to resolve disputes arising under this Act.

SEC. 514. SEVERABILITY.

Should any provision in this Act be found to be unconstitutional by a court of law, such provision shall be severed from the remainder of the Act, and such action shall not affect the enforceability of the remaining provisions of the Act.

EXPLANATION OF THE AMENDMENT IN THE NATURE OF A SUBSTITUTE

The amendment in the nature of a substitute adopted by the Committee is modeled after bills ordered reported by other Committees with jurisdiction over the bill and S. 933 as passed by the Senate. The bill differs in significant respects from the bill as introduced.

The amendment differs from the bill as introduced primarily in the following respects: The amendment deletes the general provisions title of the bill (title I), and incorporates those provisions in the remaining titles of the amendment. The amendment adds specific provisions, discussed below, detailing obligations under the employment, public services, public accommodations, and telecommunications titles. The amendment adds miscellaneous provisions, including coverage of Congress, technical assistance, and the exclusion from coverage of individuals discriminated against because of current illegal use of drugs and other specific conditions.

PURPOSE OF THE BILL AS AMENDED BY THE COMMITTEE

The purpose of the Americans with Disabilities Act (ADA), H.R. 2273 as amended, is to provide a clear and comprehensive national mandate to end discrimination against individuals with disabilities and to bring those individuals into the economic and social mainstream of American life. The ADA provides enforceable standards addressing discrimination against individuals with disabilities and ensures that the federal government will play a central role in enforcing these standards on behalf of individuals with disabilities. Each title specifies the role of federal agencies in promulgating regulations, conducting compliance reviews, pursuing litigation and providing guidance and technical assistance regarding the requirements of the Act.

AMENDMENTS ADOPTED BY THE COMMITTEE

The Committee adopted 5 amendments to the bill ordered reported by the Subcommittee. An amendment added a new section to the bill, Section 513, to encourage the use of alternative dispute resolution where appropriate and to the extent authorized by law. An amendment added additional factors to be considered in making a determination of what constitutes an undue hardship under title I and what is readily achievable under title III. An amendment clarified that the remedies incorporated by reference in titles I, II and III are the remedies that the ADA provides, and that the incorporated remedies are the remedies currently available. If those remedies are amended in the future, such remedies will also apply to the ADA.

An amendment clarified the "direct threat" provision, the phrase "essential functions" of a job, and the "anticipatory discrimination" provision. This amendment also clarified what entities are covered under the general rule of title III, that commercial facilities are covered by the alterations provisions, and that exams and classes relating to applications, licensing, certifications, or credentialing must be held in an accessible place and manner. An amendment made technical changes to the interim accessibility standards under title III.

HISTORY

Federal civil rights protections for individuals with disabilities were first established by title V of the Rehabilitation Act of 1973.[1] Sections 501 and 503 of the Rehabilitation Act prohibit the federal government and most federal contractors from discriminating in employment, and requires them to use affirmative action to employ persons with disabilities. Section 504 of the Rehabilitation Act goes beyond employment, and prohibits discrimination against persons with disabilities in programs and activities of the federal government and by recipients of federal financial assistance.

The Americans with Disabilities Act was first introduced in 1988 during the 100th Congress.[2] This first bill was drafted by the National Council on Disability,[3] an independent federal agency charged with assessing the condition of persons with disabilities and making legislative recommendations. H.R. 4498 was referred to 4 Committees in the House, and was the subject of a joint hearing by subcommittees of the House Committee on Education and Labor and the Senate Committee on Labor and Human Resources.

Also in the 100th Congress, the Committee on the Judiciary considered amendments to the Fair Housing Act, title VIII of the Civil Rights Act of 1968, to prohibit discrimination against persons with disabilities in the sale or rental of housing. The amendments were enacted [4] to prohibit discrimination against persons with disabilities, to require that certain new multifamily housing units be accessible to and usable by persons with disabilities, and that units have adaptable features to meet individual needs of persons with disabilities.

The Americans with Disabilities Act was reintroduced, in a modified form, in the 101st Congress.[5] The bill as introduced again established a clear and comprehensive prohibition of discrimination on the basis of disability, in employment, public services, public accommodations and telecommunications, but responded to a number of concerns raised about the 1988 bill. The Subcommittee on Civil and Constitutional Rights conducted 3 hearings on the bill, and the Committee held one hearing, receiving testimony from the Attorney General of the United States.[6]

On April 25, 1990, the Subcommittee on Civil and Constitutional Rights, by a recorded vote of 7-1, ordered favorably reported to the Committee, H.R. 2273, as amended by an amendment in the nature of a substitute. The Committee considered H.R. 2273, as amended, on May 1 and 2, 1990. On May 2, by a recorded vote of 32-3, the Committee ordered H.R. 2273 reported favorably to the House, with a single amendment in the nature of a substitute.

[5] Mr. Coelho introduced the bill, H.R. 2273, in the House and Mr. Harkin introduced a companion bill in the Senate, S. 933.

[6] Hearings on H.R. 2273, the Americans with Disabilities Act, before the Committee on the Judiciary and the Subcommittee on Civil and Constitutional Rights, 101st Congress, 1st Session, Serial No. 58.

BACKGROUND AND NEED

A recent survey conducted by Louis Harris and Associates found that Americans with disabilities are notably underprivileged and disadvantaged. Compared with persons without disabilities, persons with disabilities are much poorer, have far less education, have less social and community life, participate much less often in social activities that other Americans regularly enjoy, and express less satisfaction with life.[7] Historically, the inferior economic and social status of disabled people has been viewed as an inevitable consequence of the physical and mental limitations imposed by disability.

Over the years, this assumption has been challenged by policy makers, citizens with disabilities, the courts and Congress. Gradually, public policy affecting persons with disabilities recognized that many of the problems faced by disabled people are not inevitable, but instead are the result of discriminatory policies based on unfounded, outmoded stereotypes and perceptions, and deeply imbedded prejudices toward people with disabilities. These discriminatory policies and practices affect people with disabilities in every aspect of their lives, from securing employment, to participating fully in community life, to securing custody of their children, to enjoying all of the rights that Americans take for granted.

The first major challenge to the notion that being disabled meant lifelong economic dependency was the enactment of the first Rehabilitation Act, the Fess-Kenyon Act of 1920,[8] which was prompted by the return of a vast number of disabled World War I veterans, and the ever-increasing incidence of industrial accidents. By the mid-1960's, the integration of disabled people into the mainstream of American life was the explicit goal of rehabilitation policy.

From a civil rights perspective, a profound and historic shift in disability public policy occurred in the 1970's. Through landmark litigation [9] and legislation,[10] Americans with disabilities were recognized for the first time as a minority group that was subject to discrimination, and worthy of basic civil rights protections.

[8] 41 Stat. 735.

[9] Two landmark cases *Pennsylvania Association for Retarded Children* v. *Pennsylvania*, 334 F. Supp. 1257 (E.D.Pa. 1971); and *Mills* v. *Board of Education of the District of Columbia*, 348 F. Supp. 866 (D.D.C. 1972), held that disabled children who had previously been excluded from public education had the right to a public education appropriate to their educational needs.

[10] In addition to the 1973 Rehabilitation Act, Congress enacted several other pieces of legislation designed to promote equal opportunity and integration of disabled people into the mainstream of American life. Chronologically, these statutes included: 1968, Architectural Barriers Act, 42 U.S.C. 4151 *et seq.* (required federally funded or leased buildings to be accessible); 1970, Urban Mass Transportation Act, 49 U.S.C. 1612 (required eligible jurisdictions to provide accessibility plan for mass transportation); 1973, Education for All Handicapped Children Act, 20 U.S.C. Section 1401 *et seq.* (provided that each handicapped child was entitled to a free appropriate education in the least restrictive environment); and 1975, National Housing Act Amendments, 12 U.S.C. 1701 *et seq.* (provided for barrier removal in federally supported housing).

This major shift in public policy relating to disability culminated in the passage of a broad anti-discrimination provision, Section 504 of the Rehabilitation Act of 1973. Section 504 bars discrimination by recipients of federal financial assistance against persons with disabilities in all the recipient's programs and activities. Section 504 recognizes that discrimination results from actions or inactions, and that discrimination occurs by effect as well as by intent or design. And Section 504 acknowledges, that, as in the finding 35 years ago by the Supreme Court in *Brown v. Board of Education*, in referring to the segregation of black students, that segregation for persons with disabilities "may affect their hearts and minds in a way unlikely ever to be undone." [11]

In 1973, during consideration of the Rehabilitation Act, Senator Harrison Williams said:

> for too long, we have been dealing with [the handicapped] out of charity. . . . I wish it to be said of America in the 1970's that when its attention at last returned to domestic needs, it made a strong and new commitment to equal opportunity and equal justice under law. . . . The handicapped are one part of our Nation that have been denied these fundamental rights for too long. It is for the Congress and the Nation to assure that these rights are no longer denied.[12]

The Americans With Disabilities Act completes the circle begun in 1973 with respect to persons with disabilities by extending to them the same civil rights protections provided to women and minorities beginning in 1964. This year, 1990, is an historic one in the evolution of this nation's public policy towards persons with disabilities. The ADA is a comprehensive piece of civil rights legislation which promises a new future: a future of inclusion and integration, and the end of exclusion and segregation.

SECTION-BY-SECTION ANALYSIS

Following is a section-by-section analysis of the Americans with Disabilities Act as ordered reported by the Committee.

Section 1. Short title; table of contents

This Act may be cited as the "Americans with Disabilities Act of 1990." The use of the term "disabilities" instead of the term "handicaps" reflects the desire of the Committee to use the most current terminology. It reflects the preference of persons with disabilities to use that term rather than "handicapped" as used in previous laws, such as the Rehabilitation Act of 1973 and the Fair Housing Amendments Act of 1988.

By this change in phraseology, the Committee does not intend to change the substantive definition of handicap. The Committee intends that the analysis of the term "individaul with handicaps" contained in the primary regulations implementing the Rehabilitation Act of 1973,[13] and the term "handicap" contained in the primary regulations implementing the Fair Housing Amendments Act of 1988,[14] apply to the definition of "disability" in the ADA.

---

[11] 347 U.S. 483, 494 (1954).

[12] 118 Cong. Rec. 3321-22 (1972).

The ADA should also not be interpreted to be limited to "Americans" with disabilities. The use of the title "Americans with Disabilities" reflects the belief that individuals with disabilities compose an integral part of our nation's makeup, and, like all other individuals, are entitled to equal access and opportunity. As in other civil rights laws, however, the ADA should not be interpreted to mean that only American citizens are entitled to the protections afforded by the Act.

Section 2. Findings and purposes

This section sets forth the findings and purposes of the Congress in enacting the ADA.

Section 3. Definitions

This section defines two terms: "auxiliary aids and services" and "disability."

Section 3(1)—Auxiliary aids and services

This section defines "auxiliary aids and services" to include services and devices which may be necessary to assure full and equal participation by persons with disabilities in the services and activities of public entities covered under title II and of public accommodations covered under title III.

Section 3(2)—Disability

The ADA uses the same basic definition of "disability" first used in the Rehabilitation Act of 1973 and in the Fair Housing Amendments Act of 1988. This definition was adopted for a number of reasons. First, it has worked well since it was adopted in 1973. Second, it would not be possible to guarantee comprehensiveness by providing a list of specific disabilities, especially because new disorders may develop in the future, as they have since the definition was first established in 1973.

The term "disability" means, with respect to an individual—

(A) a physical or mental impairment that substantially limits one or more of the major life activities of such individual;

(B) a record of such an impairment; or

(C) being regarded as having such an impairment.

If an individual meets any one of these three tests, he or she is considered to be an individual with a disability for purposes of coverage under the ADA.

---

[13] 45 CFR, Part 84.

[14] 24 CFR, Part 100.

Test A.—A physical or mental impairment that substantially limits one or more of the major life activities of such individual

Physical or mental impairment.—Under the first test, an individual must have a physical or mental impairment. This means any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive, digestive; genito-urinary; hemic and lymphatic; skin; and endocrine. It also means any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.[15]

Although the definition does not include a list of all the specific conditions, diseases, or infections that would constitute physical or mental impairments,[16] examples include: orthopedic, visual, speech and hearing impairments; cerebral palsy; epilepsy; infection with the Human Immunodeficiency Virus; muscular dystrophy; multiple sclerosis; cancer; heart disease; diabetes; mental retardation; emotional illness; specific learning disabilities; drug addiction [17] and alcoholism.

Physical or mental impairment does not include simple physical characteristics, such as blue eyes or black hair. Nor does it include environmental, cultural or economic disadvantages, such as having a prison record, or being poor. Age is not a disability. However, a person who has these characteristics and also has a physical or mental impairment may be considered as having a disability for purposes of the ADA based on the impairment.

Substantial limitation of a major life activity.—Under the first test, the impairment must be one that "substantially limits a major life activity." Major life activities include such things as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning and working.

For example, a paraplegic is substantially limited in the major life activity of walking, a person who is blind is substantially limited in the major life activity of seeing, and a person who is mentally retarded is substantially limited in the major life activity of learning.[18]

The impairment should be assessed without considering whether mitigating measures, such as auxiliary aids or reasonable accommodations, would result in a less-than-substantial limitation. For example, a person with epilepsy, an impairment which substantially limits a major life activity, is covered under this test, even if the effects of the impairment which substantially limits a major life activity, is also covered, even if the hearing loss is corrected by the use of a hearing aid.

---

[15] This is the list used in the regulations for Section 504 of the Rehabilitation Act of 1973, 45 CFR 84.3(j)(2)(i).

[16] The definition is specifically designed to be able to incorporate new conditions and diseases that may affect individuals in the future.

[17] The current illegal use of drugs is not protected by the ADA. *See*, Sections 104 and 510.

[18] Persons infected with the Human Immunodeficiency Virus are considered to have an impairment that substantially limits a major life activity, and thus are considered disabled under this first test of the definition. *See*, Memorandum of Arthur B. Culvahouse, Jr., Counsel to the President, from Douglas W. Kmiec, Acting Assistant Attorney General, Office of Legal Counsel, Department of Justice, September 27, 1988, at 3; *reprinted in* Hearings on S. 933, the Americans with Disabilities Act, before the Committee on Labor and Human Resources, 101st Congress, 1st Session, S. Hrg. 101-156, at 346.

A person with an impairment who is discriminated against in employment is also limited in the major life activity of working. However, a person who is limited in his or her ability to perform only a particular job, because of circumstances unique to that job site or the materials used, may not be substantially limited in the major life activity of working. For example, an applicant whose trade is painting would not be substantially limited in he major life activity of working if he has a mild allergy to a specialized paint used by one employer which is not generally used in the field in which the painter works.

However, if a person is employed as a painter and is assigned to work with a unique paint which caused severe allergies, such as skin rashes or seizures, the person would be substantially limited in a major life activity, by virtue of the resulting skin disease or seizure disorder. The cause of a disability is always irrelevant to the determination of disability. In such a case, a reasonable accommodation to the employee may include assignment to other areas where the particular paint is not used.

Test B.—A record of such an impairment

This test is intended to cover those who have a record of an impairment. This includes a person who has a history of an impairment that substantially limited a major life activity, such as those who have recovered from an impairment. It also includes persons who have been misclassified as having an impairment. Examples include a person who had, but no longer has, cancer, or a person who was misclassified as being mentally retarded.

Test C.—Being regarded as having such an impairment

This test is intended to cover persons who are treated by a covered entity as having a physical or mental impairment that substantially limits a major life activity. It applies whether or not a person has an impairment, if that person was treated as if he or she had an impairment that substantially limits a major life activity.

The ADA uses the same "regarded as" test set forth in the regulations implementing Section 504 of the Rehabilitation Act. Those regulations provide:

> (iv) "Is regarded as having an impairment" means (A) has a physical or mental impairment that does not substantially limit major life activities but that is treated by a recipient as constituting such a limitation; (B) has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or (C) has none of the impairments defined in paragraph (j)(2)(i) of this section but is treated by a recipient as having such an impairment.[19]

---

[19] 45 CFR 84.3(j)(2)(iv). Paragraph (j)(2)(i) is discussed at footnote 15.

The perception of the covered entity is a key element of this test. A person who perceives himself to have an impairment, but does not have an impairment, and is not treated as if he has an impairment, is not protected under this test.

A person would be covered under this test if an employer refused to hire, or a restaurant refused to serve, that person because of a fear of "negative reactions" of others to that person. A person would also be covered if an entity perceived that the applicant had an impairment which prevented the person from working, or if a public accommodation refused to serve a patron because it perceived that the patron had an impairment that limited his or her enjoyment of the goods or services being offered.

For example, severe burn victims often face discrimination in employment and participation in community activities which results in substantial limitation of major life activities. These persons would be covered under this test because of the attitudes of others towards the impairment, even if they did not view themselves as "impaired."

The rationale for this third test, as used in the Rehabilitation Act of 1973, was articulated by the Supreme Court in *School Board of Nassau County v. Arline.*[20] The Court noted that although an individual may have an impairment that does not in fact substantially limit a major life activity, the reaction of others may prove just as disabling. "Such an impairment might not diminish a person's physical or mental capabilities, but could nevertheless substantially limit that person's ability to work as a result of the negative reactions of others to the impairment." [21]

The Court concluded that, by including this test, "Congress acknowledged that society's accumulated myths and fears about disability and diseases are as handicapping as are the physical limitations that flow from actual impairment." [22]

Thus, a person who is rejected from a job because of the myths, fears and stereotypes associated with disabilities would be covered under this third test, whether or not the employer's perception was shared by others in the field and whether or not the person's physical or mental condition would be considered a disability under the first or second part of the definition.

Sociologists have identified common barriers that frequently result in employers excluding disabled persons. These include concerns regarding productivity, safety, insurance, liability, attendance, cost of accommodation and accessibility, and acceptance by co-workers and customers.

This list of frequent workplace concerns is not exhaustive. It illustrates, however, the attitudinal barriers that Congress clearly intended to include within the meaning of "regarded as" having a disability under the Rehabilitation Act and now under the ADA.

It is not necessary for the covered entity to articulate one of these concerns. In the employment context, if a person is disqualified on the basis of an actual or perceived physical or mental condition, and the employer can articulate no legitimate job-related reason for the rejection, a perceived concern about employing persons with disabilities could be inferred and the plaintiff would qualify for coverage under the "regarded as" test. A person who is covered because of being regarded as having an impairment is not required to show that the employer's perception is inaccurate, *e.g.*, that he will be accepted by others, or that insurance rates will not increase, in order to be qualified for the job.

---

[20] 480 U.S. 273 (1987).

[21] 480 U.S. at 283.

[22] 480 U.S. at 284.

For example, many people are rejected from jobs because a back x-ray reveals some anomaly, even though the person has no symptoms of a back impairment. The reasons for the rejection are often the fear of injury, as well as increased insurance or worker's compensation costs. These reasons for rejection rely on common barriers to employment for persons with disabilities and therefore, the person is perceived to be disabled under the third test.

Behaviors and conditions not included as disabilities

In other sections of the bill, certain behaviors are explicitly not included as disabilities. Current illegal use of drugs is not protected under the bill. *See* Sections 104 and 510. Homosexuality and bisexuality, which were never covered disabilities under other federal disability laws, because they are not physical or mental impairments, are explicitly noted as not being impairments and as such are not disabilities under the ADA. *See* Section 511(a). Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, other sexual behavior disorders, compulsive gambling, kleptomania, pyromania, and psychoactive substance use disorders resulting from current illegal use of drugs, are also excluded. *See* Sections 511(b)-(d).

TITLE I—EMPLOYMENT

Title I prohibits discrimination in employment against a qualified person with a disability. The title borrows much of its procedural framework from title VII of the Civil Rights Act of 1964,[23] which prohibits discrimination in employment on the basis of race, color, religion, sex or national origin, by incorporating title VII's enforcement provisions, notice posting provisions, and employer coverage provisions. The title borrows much of its substantive framework from Section 504 of the Rehabilitation Act of 1973.

The underlying premise of this title is that persons with disabilities should not be excluded from job opportunities unless they are actually unable to do the job. The requirement that job criteria actually measure skills required by the job is a critical protection, because stereotypes and misconceptions about the abilities and inabilities of persons with disabilities continue to be pervasive. Discrimination occurs against persons with disabilities because of stereotypes, discomfort, misconceptions, and fears about increased costs and decreased productivity.

In order to assure a match between job criteria and an applicant's actual ability to do the job, the bill contains the following provisions:

---

[23] 42 U.S.C. 2000e *et seq.*

the requirement that persons with disabilities not be disqualified because of the inability to perform non-essential or marginal functions of the job [Section 101(7)];

the requirement that any selection criteria that screen out or tend to screen out people with disabilities be job-related and consistent with business necessity [Section 102(b)(6)]; and

the requirement to provide reasonable accommodation to assist persons with disabilities to meet legitimate job criteria [Section 102(b)(5)].

These requirements work together to eliminate the pervasive bias against employing persons with disabilities.

If a person with a disability applies for a job and meets all selection criteria except one that he or she cannot meet because of a disability, the criterion must concern an essential, and not marginal, aspect of the job. The criterion must be carefully tailored to measure the actual ability of a person to perform an essential function of the job. If the criterion meets this test, it is not discriminatory on its face and is not prohibited by the ADA. If the legitimate criterion can be satisfied by the applicant with a reasonable accommodation, then the reasonable accommodation must be provided under Section 102(b)(5).

Section 101. Definitions

A number of definitions from title VII of the Civil Rights Act of 1964 are incorporated by reference in this title ("person," "labor organization," "employment agency," "commerce," and "industry affecting commerce"). Other terms, such as "Commission" and "employer" use the same concepts as contained in title VII. The definition of "employer" differs from title VII only to allow a phase-in for the first two years the law is in effect for employers employing less than 25 employees. "Employee" means an individual employed by an employer. The exception set out in title VII for elected officials and their employees and appointees is not incorporated in the ADA.

Section 101(5)—Illegal use of drugs

The term "drugs" means controlled substances as listed in schedules I through V of Section 202 of the Controlled Substances Act.[24] The Controlled Substances Act makes unlawful certain possession or distribution of listed drugs. The Committee does not intend to affect the Controlled Substances Act. The term "Illegal use of drugs" does not include the use of controlled substances, including the use of experimental drugs, taken under the supervision of a licensed health care professional. It also does not include uses authorized by the Controlled Substances Act or other provisions of federal law.

Section 101(7)—Qualified individual with a disability

The term "qualified individual with a disability" means an individual with a disability who, with a reasonable accommodation if necessary, can perform the essential functions of the employment position that such individual holds or desires.

---

[24] 21 U.S.C. 812.

This same concept is used in the regulations implementing Sections 501 and 504 of the Rehabilitation Act of 1973. The phrase "essential functions" means job tasks that are fundamental and not marginal. The regulations point out that "inclusion of this phrase is useful in emphasizing that handicapped persons should not be disqualified simply because they may have difficulty in performing tasks that bear only a marginal relationship to a particular job." [25]

For example, many employers require driver's licenses for a variety of jobs which do not require driving or where driving is incidental to the job. A driver's license is often required because it is presumed that people who drive to work are more likely to arrive at work on time or because a driver can do an occasional errand. The "essential functions" requirement assures that a person who cannot drive because of his or her disability is not disqualified for these reasons if he or she can do the actual duties of the job.

In one case, a person with epilepsy applied for the job of group counselor at a juvenile hall. After receiving a job offer, the offer was withdrawn when the employer learned that the applicant did not have a driver's license. Driving was required for emergencies, to take a juvenile to the hospital, for example, and to transport the juveniles to court appearances. While it was necessary that some of the group counselors be able to drive, it was not essential that all group counselors be available to drive. On any given shift, another group counselor could perform the driving duty. Hence, it is necessary to review the job duty not in isolation, but in the context of the actual work environment.

The incorporation of the requirement of reasonable accommodation into the definition of "qualified individual with a disability" is meant to indicate that essential functions are those which must be performed, even if the manner in which particular job tasks comprising those functions are performed, or the equipment used in performing them, may be different for an employee with a disability than for a non-disabled employee. For example, in a job requiring the use of a computer, the essential function is the ability to access, input, and retrieve information from the computer. It is not "essential" that a person be able to use the keyboard or visually read the information from a computer screen. Adaptive equipment or software may enable a person with no arms or a person with impaired vision to control the computer and access information.

The Committee adopted additional language to this definition during its consideration of the bill. The language states explicitly that consideration shall be given to the employer's judgment as to what functions of a job are essential. Although essential functions need not be listed in a written form, a written list by an employer is a useful starting point for determining essential functions of a job. An amendment that would have created a presumption in favor of the employer's determination of essential functions was rejected.

---

[25] 42 Fed. Reg. 22686 (1977).

This additional language adopted by the Committee is not meant to change the current burden of proof. This language simply assures that the employer's determination of essential functions is considered. A plaintiff may challenge the employer's determination of what is an essential function.

The determination of whether a person is qualified should be made at the time of the employment action, *e.g.* hiring or promotion, and should not be based on the possibility that the employee or applicant will become incapacitated and unqualified in the future. Nor can paternalistic concerns about what is best for the person with a disability serve to foreclose employment opportunities.

With respect to covered entities subject to rules promulgated by the department of Transportation regarding physical qualifications for drivers of certain classifications of motor vehicles, the Committee intends that a person with a disability applying for or currently holding a job subject to these standards must be able to satisfy any physical qualification standard that is job-related and required by business necessity in order to be considered a qualified individual with a disability. By the effective date of this title, the Committee expects the Secretary of Transportation to review these requirements to determine whether they are valid under this Act. Of course, the Department of Transportation currently has an obligation under Section 504 of the Rehabilitation Act to ensure that its regulations are consistent with that Act.

Section 101(8)—Direct threat

This definition was added during Committee consideration of the bill. The term "direct threat" means a significant risk to the health or safety of others that cannot be eliminated by reasonable accommodation. The Committee intends to codify the direct threat standard used by the Supreme Court in *School Board of Nassau County v. Arline.*[26]

Section 101(9)—Reasonable accommodation

The term "reasonable accommodation" incorporates a range of actions that may be necessary to allow a person with a disability to perform the essential functions of a job.

Examples of possible accommodations include, but are not limited to, making existing facilities used by employees readily accessible to and usable by individuals with disabilities, job restructuring, part-time or modified work schedules, reassignment to a vacant position, acquisition or modification of equipment of devices, appropriate adjustment or modifications of examinations, training materials or policies, the provision of qualified readers for the visually impaired or interpreters for the hearing impaired, and other similar accommodations.

The requirements of reasonable accommodation are discussed under Section 102(b)(5) below.

---

[26] 480 U.S. 273 (1987).

Section 101(10)—Undue hardship

The term undue hardship means an action requiring significant difficulty or expense. Undue hardship is determined by considering, at least, the overall size of the business, the site involved, and the nature and cost of the accommodation needed. Although an action may be a significant expense or result in significant difficulty in the abstract, or when considered with regard to a small employer, it may not be an undue hardship when considered in light of the size of the employer, the site involved and the accommodation needed.

The Committee adopted additional factors to be considered in making a determination of undue hardship. These additional factors are discussed under Section 102(b)(5) below.

Section 102. Discrimination

Section 102(a), General Rule. Discrimination is prohibited against a qualified individual with a disability in all parts of the employment process. Specifically included as part of the employment process are job application procedures, hiring, advancement, discharge, compensation, and job training, and other terms, conditions, and privileges of employment.

The Committee intends that the aspects of the employment process covered by the non-discrimination mandate be construed in a manner consistent with the regulations implementing Section 504 of the Rehabilitation Act. Those regulations provide that the antidiscrimination mandate applies in:

> (1) recruitment, advertising, and the processing of applications for employment;
>
> (2) hiring, updating, promotion, award of tenure, demotion, transfer, layoff, termination, right of return from layoff and rehiring;
>
> (3) rates of pay or any other form of compensation and changes in compensation;
>
> (4) job assignments, job classifications, organizational structures, position descriptions, lines of progression, and seniority lists;
>
> (5) leaves of absence, sick leave, or any other leave;
>
> (6) fringe benefits available by virtue of employment, whether or not administered by the [employer];
>
> (7) selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, and selection for leave of absence to pursue training;
>
> (8) employer sponsored activities, including social or recreational programs.[27]

Discrimination is prohibited against a qualified individual with a disability, as defined in Section 101(7), and as discussed above. The Committee does not intend to cover individuals who do not meet the definition of qualified individual with a disability.

As with other civil rights laws prohibiting discrimination in employment, the Committee does not intend to limit the ability of covered entities to choose and maintain a qualified workforce. Covered entities continue to have the ability to hire and employ employees who can perform the job. Employers can continue to use job-related criteria in choosing qualified employees. For example, in a job that requires lifting 50 pound boxes, an employer may test applicants and employees to determine whether they can lift 50 pound boxes. Similarly, an employer can continue to give typists typing tests to determine their abilities.

---

[27] 45 CFR 84.11(b).

The Committee does not intend that covered entities have an obligation to prefer applicants with disabilities over other applicants on the basis of disability.

Section 102(b)—Construction

This section of the bill describes 7 specific types of discrimination included in the prohibition under Section 102(a).

Section 102(b)(1)—Limiting, segregating or classifying

Section 102(b)(1) prohibits an employer from limiting, segregating or classifying a job applicant or employee in a way that adversely affects the opportunities or status of the applicant or employee based on that person's disability.

For example, an employer could not adopt a different pay scale, benefits, promotion opportunities or working area for employees with disabilities. In one case, an employer had a separate job category for janitors with developmental disabilities with lower pay, no benefits or seniority rights, even though the job duties were the same as other janitors. This would be a violation of this title.

Section 102(b)(2)—Contractual relationships

Section 102(b)(2) provides that a covered entity may not participate in a contractual relationship that has the effect of subjecting the covered entity's qualified applicants or employees to discrimination. The phrase "the covered entity's" qualified applicants or employees was included in order to avoid any misunderstanding regarding this provision. This provision is intended to apply to a situation in which a covered entity "A" enters into a contractual relationship with another entity "B," which has the effect of subjecting the covered entity "A's" own employees or applicants to discrimination. It does not apply to a situation in which covered "A" enters into a contractual relationship with another entity "B," and that entity "B" is engaging in some form of discrimination against its own employees or applicants. Entity "A" carries no liability in such a situation for the discrimination of entity "B." Of course, entity "B" may be separately liable to suit under this Act, by its employees or applicants.

Section 102(b)(2) also provides that a covered entity may not participate in a contractual relationship that has the effect of subjecting the covered entity's qualified applicants or employees "to the discrimination prohibited by this title." The intent of this provision is that an entity may not do through a contractual provision what it may not do directly. The type of discrimination prohibited is that set forth in the substantive provisions of the bill. Thus, if the contractual relationship having the effect of discrimination occurs in any of the areas covered by this title, for example, in hiring, training or promotion of employees, to the extent that the requirement of reasonable accommodation, and the limitation of undue hardship, apply if the entity is acting directly, these requirements and limitations would apply as well when the entity is acting in a contractual relationship. The contractual relationship adds no new obligations in and of itself beyond the obligations imposed by the Act, nor does it reduce the obligations imposed by the Act.

For example, assume that an employer "C" is seeking to contract with a company "D" to provide training for the employees of employer "C". Whatever responsibilities and limitations of reasonable accommodation that would apply to the employer "C" if it provided the training itself would apply as well in the contractual situation. Thus, if the training company "D" were planning to hold its program in a physically inaccessible location, thus making it impossible for an employee who used a wheelchair to attend the program, the employer "C" would have a duty to consider various reasonable accommodations. These could include, for example, (1) asking the training company to identify other sites for the training that are accessible; (2) identifying other training companies that use accessible sites; (3) paying to have the training company train the disabled employee (either one-on-one or with other employees who may have missed the training for other reasons), or any other accommodation that might result in making the training available to the employee.

If no accommodations were available that would have made the training program accessible, or if the only options that were available would have imposed an undue hardship on the employer, the employer would have then met its requirements under the Act. The Committee anticipates, however, that some form of accommodation could be made so the disabled employee would not be precluded from receiving training that the employer may consider necessary.

As a further example, assume that an employer contracts with a hotel for a conference held for the employer's emplcyees. Under the Act, the employer has an affirmaive duty to investigate the accessibility of a location that it plans to use for its own employees. Suggested approaches for determining accessibility would be for the employer to inspect the hotel first-hand, if possible, or to ask a local disability group to inspect the hotel. In any event, the employer can always protect itself in such situations by simply ensuring that the contract with the hotel specifies that all rooms to be used for the conference, incuding the exhibit and meeting rooms, be accessible in accordance with applicable standards. If the hotel breaches this accessibility provision, the hotel will be liable to the employer for the cost of any accommodation needed to provide access to the disabled individual during the conference, as well as for any other costs accrued by the employer. Placing a duty on the employer to investigate the accessibility of places that it contracts for will, in all likelihood, by the impetus for ensuring that these types of contractual provisions become commonplace in our society.

With respect to health insurance contracts, Section 501(c) of the Act specifically provides that the ADA does not affect pre-existing condition clauses included in insurance policies offered by employers. Employers may continue to offer policies that contain pre-existing condition exclusions, even though such exclusions adversely affect persons with disabilities, so long as such clauses are not used as a subterfuge to evade the purposes of this Act.

However, employers may not deny health insurance coverage completely to an individual based on the person's diagnosis or disability. For example, it is permissible for an employer to offer insurance policies that limit coverage for certain procedures or treatments (*e.g.*, a limit on the extent of kidneys dialysis or whether dialysis will be covered at all, or a limit on the amount of blood transfusions or whether transfusions will be covered). It would not be permissible, however, to deny coverage to individuals, such as persons with kidney disease or hemophilia, who are affected by these limits on coverage for procedures or treatments, for other procedures or treatments connected with their disability.[28] It would also not be permissible to deny coverage to such individuals for other conditions not connected with these limitions on coverage, such as treatment for a broken leg or heart surgery. While limitation may be placed on reimbursements for a procedure or the types of drugs or procedures covererd, that limitation must apply to all persons, with or without disabilities. Persons with disabilities must have equal access to the health insurance coverage that is provided by the employer to all employees.

Section 102(b)(3)—Standards, criteria or methods of administration that have the effect of discrimination or that perpetuate discrimination

Section 102(b)(3) prohibits employers from using standards, criteria or methods of administration that have the effect of discrimination or that perpetuate discrimination by others who are subject to common administrative control.

For example, an employer could not enter into a contract for liability insurance with an insurance company who refused to cover accidents or injuries of persons with disabilities. Nor could the employer refuse to hire a person with a disability because the liability policy did not cover persons with disabilities.

Section 102(b)(4)—Association

Discrimination is also prohibited against a qualified individual because of the known disability of an individual with whom the qualified individual is known to have a relationship or association.

This provision protects persons who associate with persons with disabilities and who are discriminated against because of that association. This may include family, friends, and persons who provide care for persons with disabilities. The Committee rejected an amendment to limit this provision to the relatives (by blood, marriage, adoption or guaradianship) of persons with disabilities.

This provision applies only when the employer knows of the association with the other person and knows of that other person's disability. The burden of proof is on the individual claiming discrimination to prove that the discrimination was motivated by that individual's relationship or association with a person with a disability.

---

[28] Of course, if the insurance plan had a pre-existing condition clause which limited coverage for a specified time, that clause would govern to limit coverage.

For example, it would be discriminatory for an employer to discriminate against a qualified employee who did volunteer work for people with AIDS, if the employer knew of the employee's relationship or association with the people with AIDS, and if the employment action was motivated by that relationship or association.

Similarly, it would be illegal for an employer to discriminate against a qualified employee because that employee had a family member or a friend who had a disbility, if the employer knew about the relationship or association, knew that the friend or family member has a disability, and acted on that basis. Thus, if an employee had a spouse with a disability, and the employer took an adverse action against the employee based on the spouse's disability, this would then constitute discrimination.

This section would not apply if the employer did not know of the relationship or association, or if the employer did not know of the disability of the other person. Thus, if an employer fired an employee, and did not know of a relationship or association of the employee with a person with a disability, the employee could not claim discrimination under this section.

Section 102(b)(5)—Reasonable accommodation

An employer is required to make reasonable accommodations to the known physical or mental limitations of an otherwise qualified individual with a disability. An employer may not deny employment opportunities if the denial is based on the need to make a reasonable accommodation. This reasonable accommodation requirement is central to the non-discrimination mandate of the ADA.

Section 101(9) provides examples of reasonable accommodations, including making changes in the physical environment in order to provide access, as well as changes in the structure of the job, such as part-time or modified work schedules. In other cases, the acquisition of modification of equipment, such as adaptive hardware or software for computers, telephone headset amplifiers, and the telecommunication devices will enable persons with disabilities to do the job. For some people with disabilities, the assistance of another individual, such as a reader, interpreter or attendant, may be necessary for specified activities.

The examples set forth in Section 101(9) are not meant to be exhaustive, but rather serve to illustrate the nature of the obligation. The employee or applicant must request a reasonable accommodation; the employer is not liable for failing to provide an accommodation if it was not requested.

A reasonable accommodation should be tailored to the needs of the individual and the requirements of the job. Persons with disabilities have vast experience in all aspects of their lives with the types of accommodations which are effective for them. Employers should not assume that accommodations are required without consulting the applicant or employee with the disability. Stereotypes about disability can result in stereotypes about the need for accommodations, which may exceed what is actually required. Consultations between employers and the persons with disabilities will result in an accurate assessment of what is required in order to perform the job duties.

In the event there are two effective accommodations, the employer may choose the accommodation that is less expensive or easier for the employer to implement, as long as the selected accommodation provides meaningful equal employment opportunity for the applicant or employee.

Like Sections 501, 503 and 504 of the 1973 Rehabilitation Act, the ADA provides that the employer is not required to provide accommodations if the employer demonstrates that providing such an accommodation will pose an undue hardship on the opeation of its business.

The ADA defines "undue hardship" in Section 101(10)(A) to mean an action requiring significant difficulty or expense, when considered in light of the factors set forth in subsection (B). This definition was included for two reasons. First, a definition of undue hardship was included in order to distinguish it from the definition of "readiily achievable" in title III governing the requirement to alter existing public accommodations. Readily achievable means "easily accomplishable and able to be carried out without much difficulty or expense." The duty to provide reasonable accommodation, by contrast, is a much higher standard than the duty to remove barriers in existing buildings (if removing the barriers is readily achievable) and creates a more substantial obligation on the employer.

Second, a definition was included in order to distinguish the duty to provide reasonable accommodation in the ADA from the Supreme Court's interpretation of title VII in *TWA v. Hardison,*[29] which held that accommodations to religious beliefs need not be provided if the cost was more than *de minimis* to the employer.

Thus, the definition of "undue hardship" in the ADA is intended to convey a significant, as opposed to a *de minimis* or insignificant, obligation on the part of employers. In determining whether this obligation is met, the legislation, like Sections 501, 503 and 504 of the Rehabilitation Act, sets forth a number of factors to be considered, including the size, budget and number of employees of the covered entity.

The ADA also sets forth additional factors which ae specifically addressed to entities which operate more than one facility. Concerns were expressed that a court would look only at the resources of the local facility involved, or only at the resources of the parent company, in determining whether an accommodation imposed an undue hardship. The Committee believes that both of these alternatives are unsatisfactory. Instead, the Committee intends that the resources of both the local facility involved and of the parent compnay, as well as the relationship between the two, be relevant to the undue hardship determination.

The Committee is responding particularly to concerns about employers who operate in depressed or rural areas and are operating at the margin or at a loss. Specifically, concern was expressed that an employer may elect to close a store if it is losing money or only marginally profitable rather than undertake significant investments to make reasonable accommodations to employees with disabilities. The Committee does not intend for the requirements of the Act to result in the closure of neighborhood stores or in loss of jobs. The Committee intends for courts to consider in determining "undue hardship," whether the local store is threatened with closure by the parent company or is faced with job loss as a result of the requirements of this Act.

---

[29] 432 U.S. 63 (1977).

The Committee adopted an amendment which sets forth the site factors in Section 101(10)(B)(ii) and the parent company factors in Section 101(10)(B)(iii). Section 101(10)(B)(iv) addresses the fiscal and administrative relationship between the covered entity and the facility involved in the accommodation. By rearranging the factors in Section 101(10)(B), the Committee did not intend to give any single factor paticular weight. Rather, all of the listed factors should be included in an analysis of whether providing an accommodation would impose an undue hardship on a covered entity.

By including a number of factors the Committee intends to establish a flexible approach. The Committee rejected an amendment which would have set a fixed limit of over 10% of the disabled employee's salary as a *per se* undue hardship. The Committee believes that setting a ceiling on reasonable accommodation is inappropriate and that the flexible approach used under Section 504 of the Rehabilitation Act, which has been in operation for 17 years, is appropriate for the ADA as well.

The Committee bill added the phrase in subparagraph (A) "when considered in light of the factor set forth in subparagraph (B)" in order to emphasize that the standard is relative. Thus, an action which may be significant in the abstract may, in fact, still be required when considered in light of all the factors. Only those accommodations which would require significant difficulty or expense when considered in light of the size, resources and structure of the employer would be considered an undue hardship.

The flexible approach is illustrated by a leading Section 504 case, *Nelson* v. *Thornburgh*.[30] In that case, a group of state income maintenance workers who were blind requested several accommodations, including the use of readers, braille forms and a computer which stores and retrieves information in braile. Although the costs of these accommodations were substantial, the court found that the additional dollar burden was only a small fraction of the state agency's personnel budget. Given these facts, the accommodations would not require "significant expense" and thus would not be an undue hardship. However, the same accommodations may be an undue hardship for a small employer because they would require expending significant proportions of available resources.

The fourth factor for determining or not an accommodation would impose an undue hardship focuses on the type of operation maintained by the entity. This would include, for example, consideration of the special circumstances incurred on certain types of temporary worksites common in the construction industry. For example, in some circumstances, it might fundamentally alter the nature of a construction site or be unduly costly to implement or maintain physical accessibility, for a job applicant or employee who uses a wheelchair if, for example, the site's terrain and the building structure changes daily as construction progresses. The Committee recognizes that some accommodations that can easily be made in an office setting may impose an undue hardship in other settings.

---

[30] 567 F. Supp. 369 (E.D. Pa. 1983).

The determination of undue hardship is a factual one which must be made on a case-by-case basis. Like Section 504 of the Rehabilitation Act, the burden is on the employer to demonstrate that the needed accommodation would cause an undue hardship.[31]

Section 102(b)(6)—Qualification standards

This section prohibits the use of qualification standards, employment tests or other selection criteria that screen out or tend to screen out persons with disabilities, unless the criteria are shown to be jobrelated and consistent with business necessity.

If an employer uses a facially neutral qualification standard, employment test or other selection criterion that has a discriminatory effect on persons with disabilities, this practice would be discriminatory unless the employer can demonstrate that it is jobrelated and required by business necessity.[32]

The requirement that job selection procedures be job-related and consistent with business necessity underscores the need to examine all selection criteria to assure that they not only provide an accurate measure of an applicant's actual ability to perform the job, but that even if they do provide such a measure, a disabled applicant is offered a reasonable accommodation to meet the criteria that relate to the essential functions of the job at issue. It is critical that paternalistic concerns for the disabled person's own safety not be used to disqualify an otherwise qualified applicant.

Section 102(b)(7)—Tests

Tests should measure what they purport to measure. It is discriminatory to select and administer tests to a person who has a disability that impairs sensory, manual, or speaking skills, if the test reflects impaired sensory, manual or speaking skills, rather than reflecting the skills or aptitudes the test purports to measure. An employer can use such a test if the test purports to measure sensory, manual, or speaking skills and those skills are related to the job, as required under this title.

Section 102(c)—Medical examinations and inquiries

Historically, employment application forms and employment interviews requested information concerning an applicant's physical or mental condition. This information was often used to exclude applicants with disabilities, particularly those with "hidden" disabilities such as epilepsy, diabetes, emotional illness, heart disease and cancer, before their ability to perform the job was even evaluated.

In order to assure that misconceptions do not bias the employment selection process, this section sets up a process that begins with the prohibition of pre-employment medical examinations or inquiries. This process parallels the requirements in the regulations implementing Section 504 of the Rehabilitation Act of 1973, but differs from requirements under Section 503 of the same Act.

---

[31] *Prewitt* v. *U.S. Postal Service*, 662 F.2d 292, 308 (5th Cir. 1981), 29 CFR 1613.704(a).

[32] *See, Prewitt* v. *U.S. Postal Service*, 662 F.2d 292, 306 (5th Cir., 1981), 45 CFR 84.13; 28 CFR 42.512; 29 CFR 32.14; 42 Fed. Reg. 22688, ¶ 17 (1977).

Before employment.—Employers may not conduct a medical examination or make inquiries of a job applicant as to whether the applicant is disabled or as to the nature of severity of a disability. An employer may make inquiry into the ability of an applicant to perform job-related functions.

After an offer of employment has been made, an employer may require a medical examination, and may condition the offer of employment on the results of the examination. All entering employees within the same job category must be subject to the examination, however, and information obtained during the examination must be kept confidential. This information, including the medical condition or history of the applicant, must be collected and maintained on separate forms and kept in separate files from general personnel information.

This confidential information may be shared with supervisors and managers regarding necessary restrictions on the work of the employee and necessary accommodations. It may also be shared with first aid and safety personnel for emergency purposes and with government officials investigating compliance with the Act.

The results of the medical examination cannot be used to discriminate against a person with a disability if the person is still qualified for the job.

In certain industries, such as air transportation, applicants for security and safety related positions are normally chosen on the basis of many competitive factors, some of which are identified as a result of post-offer pre-employment medical examinations. Thus, after the employer receives the results of the post-offer medical examination for applicants for safety or security sensitive positions, only those applicants who meet the employer's criteria for the job must receive confirmed offers of employment, so long as the employer does not use those results of the exam to screen out qualified disabled individuals on the basis of disability.

The Committee does not intend for this Act to override any legitimate medical standards or requirements established by federal, state or local law, or by employers for applicants for safety or security sensitive positions, if the medical standards are consistent with this Act.

During employment.—After an employee is hired, an employer cannot require a medical examination, make an inquiry as to whether the employee has a disability, or inquire as to the nature or severity of the disability, unless the examination or inquiry is job-related and consistent with business necessity.

An employer may conduct voluntary medical examinations which are part of an employee health program available to employees at a particular worksite. This provision was included in the bill to allow the continuation of voluntary "corporate wellness" programs. These voluntary corporate wellness programs have over the years uncovered employees with elevated blood pressure readings, glaucoma, lung cancer and other ailments for which the employee can then seek medical help. These programs can also be used, and are used, to provide treating physicians with x-ray and lab tests which help reduce the cost for medical care. This section does not preclude employers from continuing to offer these programs on a volunary basis. Employers may not require, however, medical examinations which are not job-related and consistent with business necessity.

As during pre-employment, employers may continue to make inquiries into the ability of an employee to perform job-related functions. These examinations and inquiries are subject to the same confidentiality and non-discrimination requirements as for pre-employment examinations and inquiries.

An inquiry or medical examination that is not job-related serves no legitimate employer purpose, but simply serves to stigmatize the person with a disability. For example, if an employee starts to lose a significant amount of hair, the employer should not be able to require the person to be tested for cancer unless the testing is job-related. While the employer may argue that it does not intend to penalize the person, the person with cancer may object merely to being identified, independent of the consequences. Being identified as having a disability often carriers both blatant and subtle stigma. Legitimate needs of the employer are met by allowing job-related examinations and inquiries.

Consistent with regulations implementing the Rehabilitation Act, covered entities may invite applicants to indicate whether and to what degree they have a disability only under the following circumstances:

> when a covered entity is taking remedial action to correct the effects of past discrimination,
>
> when a covered entity is taking voluntary action to overcome the effects of conditions that resulted in limited employment opportunities for persons with disabilities, or
>
> when a covered entity is taking affirmative action required by Section 503 of the Rehabilitation Act of 1973.

If a covered entity meets any of these circumstances, then it must state clearly on any written questionnaire used for this purpose or make clear orally (if no written questionnaire is used):

> that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary or affirmative action efforts, and
>
> that the information is being requested on a voluntary basis, that it will be kept confidential, that refusal to provide the information will not subject the applicant or employee to any adverse treatment, and that the information will be used only in accordance with this title.

Section 103. Defenses

Section 103(a)—In general

If a qualification standard, test, or other selection criterion screens out or tends to screen out or otherwise denies a job to an individual with a disability, an employer may defend the practice by showing that the practice is job-related and consistent with business necessity.

Section 103(b)—Qualification standards

Employers, as discussed above, may set qualification standards for their employees. For example, an employer may have a requirement that a person be able to lift 50 pounds or be able to drive a vehicle, if these requirements are job-related and consistent with business necessity.

A qualification standard may also include a requirement that an individual not pose a direct threat to the health or safety of other individuals in the workplace. During Committee consideration, this "direct threat" standard was extended to all individuals with disabilities, and not simply to those with contagious diseases or infections.

This concept is also contained in the Civil Rights Restoration Act of 1988 [33] and the Fair Housing Amendments Act.[34] It is based on the same standard for "qualified" person with a disability that has existed for years under the Rehabilitation Act of 1973.

In order to determine whether an individual poses a direct threat to the health or safety of other individuals in the workplace, the Committee intends to use the same standard as articulated by the Supreme Court in *School Board of Nassau County* v. *Arline.*[35] In *Arline,* the court held that a "person who poses a significant risk of communicating an infectious disease to others in the workplace will not be otherwise qualified for his or her job if reasonable accommodation will not eliminate that risk." [36] Such risk of transmitting the infection to others must be determined based on objective and accepted public health guidelines.

An amendment defining "direct threat" was adopted by the Committee in Section 101(8). Direct threat is defined as a "significant risk to the health or safety of others that cannot be eliminated with reasonable accommodation." This definition was added to clarify that the direct threat standard is a codification of the analysis in *Arline.*

While the *Arline* case involved a contagious disease, tuberculosis, the reasoning in that case is applicable to other circumstances. A person with a disability must not be excluded, or found to be unqualified, based on stereotypes or fear. Nor may a decision be based on speculation about the risk or harm to others. Decisions are not permitted to be based on generalizations about the disability but rather must be based on the facts of an individual case.

For example, an employer may not assume that a person with a mental disability, or a person who has been treated for a mental disability, poses a direct threat to others. This would be an assumption based on fear and stereotype. The purpose of creating the "direct threat" standard is to eliminate exclusions which are not based on objective evidence about the individual involved. Thus, in the case of a person with mental illness there must be objective evidence from the person's behavior that the person has a recent history of committing overt acts or making threats which caused harm or which directly threatened harm.[37]

---

[33] P.O. 100-259, 29 U.S.C. 706(8)(C).
[34] P.L. 100-430, 42 U.S.C. 3604(f)(9).
[35] 480 U.S.C. 273 (1987).
[36] 480 U.S. at 287, n.16.

The "direct threat" standard may not be used to circumvent the prohibition against pre-employment inquiries into a person's disability. It may not be used to justify generalized requests or inquiries related to medical records. The prohibition against pre-offer medical examinations also applies to psychological examinations.

The employer may, however, conduct a post-offer medical examination, including a psychological examination, as long as it meets the requirements of Section 102(c)(3). If the applicant is otherwise qualified for the job, he or she cannot be disqualified on the basis of a physical or mental condition unless the employer can demonstrate that the applicant's disability poses a direct threat to others in the workplace.

The plaintiff is not required to prove that he or she poses no risk. As stated in *Chalk* v. *U.S. District Court,* "[l]ittle in science can be proved with complete certainty, and section 504 does not require such a test. As authoritatively construed by the Supreme Court, section 504 allows the exclusion of an employee only if there is 'a *significant* risk . . . to others'." [38]

The determination of significant risk for persons with disabilities must be based on the current condition of the applicant or employee. The decision to exclude cannot be based on merely "an elevated risk of injury." [39] This amendment adopted by the Committee sets a clear, defined standard which requires actual proof of significant risk to others.

Section 103(c)—Religious entities

This section states that the ADA does not prohibit a religious corporation, association, educational institution or society from giving preference in employment to individuals of a particular religion to perform work connected with the carrying on by such entity. This provision is similar to provisions included in Section 702 of the Civil Rights Act of 1964,[40] and should be interpreted in a consistent manner. Nothing in this section should be interpreted to affect Section 702 of the Civil Rights Act of 1964.

This section also allows religious organizations to require that all applicants and employees conform to the religious tenets of such organizations. A similar provision is included in title IX of the Educational Amendments of 1972.[41] The Committee intends that this provision be interpreted consistent with that provision. To the extent allowed under title IX, religious tenets are not required to be in written form to be considered under this section.

---

[37] For example, an employer may not refuse to hire an individual simply because the applicant has mental retardation or has sought treatment for a mental disorder. Similarly, if the employer determines that the applicant has a history of mental illness, the employer cannot presume that the person poses a threat to the health or safety of others. Any determination of direct threat must be based on objective evidence, not stereotype or speculation.

[38] 840 F.2d 701, 707 (9th Cir. 1988), emphasis original, quoting *Arline* (see fn. 36).

[39] *See, Mantolete* v. *Bolger*, 767 F.2d 1416, 1422 (9th Cir., 1985).

[40] 42 U.S.C. 2000e–1.

[41] 20 U.S.C. 1681(a)(3).

Section 104. Illegal use of drugs and alcohol

Employers are not prohibited from discriminating against a person based on current illegal use of drugs. However, a person who illegally uses drugs, but is discriminated against because of some other disability that is covered under the Act, is still protected againt such discrimination. The person is simply not protected against adverse actions taken on the basis of such person's illegal use of drugs.

Section 104(b) provides protections for persons who are not currently illegally using drugs and (1) have successfully completed a drug rehabilitation program, (2) are participating in a supervised rehabilitation program, or (3) are erroneously regarded as being an illegal user of drugs.

Sections 104 (a) and (b) are similar to sections 510 (a) and (b) relating to the entire bill, and should be interpreted in a consistent fashion.

Employers may require that employees not be under the influence of illegal drugs and may prohibit the use of alcohol or illegal drugs at the workplace. Employers may require that employees behave in conformance with requirements of the Drug-Free Workplace Act of 1988,[42] and may hold an employee who is an illegal user of drugs or an alcoholic to the same qualification standards required of all employees. Employers may require employees in sensitive positions, as defined by regulations established by the Departments of Transportation and Defense, and the Nuclear Regulatory Commission, to adhere to standards established by such regulations.

Finally, section 104(b) and section 104(d) explicitly allow employers to conduct drug tests for the illegal use of drugs to ensure that an applicant or employee is not illegally using drugs. However, the Committee wishes to emphasize that this provision may not be applied to conflict with the right of individuals who are legally taking drugs (e.g., taking drugs under medical supervision for their disability) not to disclose their medical condition before a conditional offer of employment has been given.[43] Thus, employers must either give drug tests after conditional offers of employment have been made (the employer may then make the job offer strictly contingent on the person not testing positive on the drug test for the illegal use of drugs) or ensure that any drug test given before a conditional job offer will be used to test strictly for the illegal use of drugs and not for drugs that are taken legally pursuant to medical supervision.

Section 105. Posting notices

Section 105 requires covered entities to post notices in an accessible format to applicants, employees, and members of the public describing the applicable provisions of the Act, in a manner prescribed in Section 711 of the Civil Rights Act of 1964.[44]

---

[42] 41 U.S.C. 701, *et seq.*

[43] See Section 102(c)(2).

[44] 42 U.S.C. 2000-10.

Section 106. Regulations

The Equal Employment Opportunity Commission (EEOC) is required to issue regulations within 1 year after enactment. The regulations must be in an accessible format, and must be promulgated in accordance with the Administrative Procedure Act.[45]

In the employment title, as in all the titles, the Committee expects that the designated agencies will take their responsibilities seriously and will issue the required regulations in the designated time-frame. As noted, one of the stated purposes of this Act is "to ensure that the Federal Government plays a central role in enforcing the standards established in this Act on behalf of individuals with disabilities."[46] The first role that the federal agencies must play in enforcing the ADA is the issuance of regulations. The Committee intends that individuals with disabilities have a right under this Act to require the relevant agencies to issue the mandated regulations.

Section 107. Enforcement

Title I incorporated the powers, remedies and procedures set forth in Sections 705, 706, 707, 709 and 710 of the Civil Rights Act of 1964.[47] The Committee intends that the powers, remedies and procedures available to persons discriminated against based on disability shall be the same as, and parallel to, the powers, remedies and procedures available to persons discriminated against based on race, color, religion, sex or national origin. Thus, if the powers, remedies and procedures change in title VII of the 1964 Act, they will change identically under the ADA for persons with disabilities.

A bill is currently pending in the Judiciary and Education and Labor Committees, H.R. 4000, which would amend the powers, remedies and procedures of title VII of the Civil Rights Act of 1964. Because of the cross-reference to title VII in Section 107, any amendments to title VII that may be made in H.R. 4000 or in any other bill would be fully applicable to the ADA. An amendment was offered, during consideration of H.R. 2273 by the Committee, that would have removed the cross-reference to title VII and would have substituted the actual words of the cross-referenced sections. This amendment was an attempt to freeze the current title VII remedies (*i.e.*, equitable relief, including injunctions and back pay) in the ADA. This amendment was rejected as antithetical to the purpose of the ADA—to provide civil rights protections for persons with disabilities that are parallel to those available to minorities and women. By retaining the cross-reference to title VII, the Committee's intent is that the remedies of title VII, currently and as amended in the future, will be applicable to persons with disabilities.

The Committee also addressed the concern that the statutory language providing that the remedies and procedures set forth in title VII of the Civil Rights Act of 1964 "shall be available" might have been interpreted to imply that a plaintiff could bypass the administrative remedies of title VII and go directly to court under title I of the ADA.[48] Thus an amendment was adopted that replaced the term "available, with respect" with "the powers, remedies and procedures this title provides." The purpose of this amendment was to clarify that persons with disabilities must follow the same procedures and secure the same remedies as women and minorities under title VII, currently and as amended in the future. The Committee adopted this amendment because it reaffirms the intent of parity between people with disabilities and minorities and women under title VII, and because it serves to clarify the intended meaning of the provision. The amendment does not affect in any way the continued availability of the rights, remedies and procedures of other federal laws and other state laws (including state common law) as provided in Section 501(b) of this Act, but simply clarifies that the remedies of title VII of the Civil Rights Act of 1964 are the only remedies that are provided by title I of this Act for employment discrimination claims.

---

[45] 5 U.S.C. 551 *et seq.*

[46] Section 2(b)(3).

[47] 42 U.S.C. 2000e-4, 2000e-5, 2000e-6, 2000e-8 and 2000e-9.

Administrative complaints filed under this title and the Rehabilitation Act should be dealt with in a manner to avoid duplication of efforts, and to prevent inconsistent or conflicting standards. The Committee intends that agencies with enforcement authority under this title or the Rehabilitation Act of 1973 should develop procedures and coordination mechanisms to achieve these goals. Coordinating mechanisms should be established in regulations or memoranda of understanding.

The term "person" is used in the enforcement section to make it clear that organizations representing individuals with disabilities shall have standing to sue under the ADA.

Section 108. Effective date

Title I becomes effective 24 months after enactment.

TITLE II—PUBLIC SERVICES

Section 201. Definition

This section defines the term "qualified individual with a disability." This definition is derived from the regulations implementing Section 504 of the Rehabilitation Act of 1973,[49] and should be interpreted in a manner consistent with those regulations.

Section 202. Discrimination

Title II extends the protections of Section 504 of the Rehabilitation Act to cover all programs of state or local governments, regardless of the receipt of federal financial assistance. By prohibiting discrimination against persons with disabilities in programs and activities of the federal government and by recipients of federal financial assistance, Section 504 of the Rehabilitation Act has served not only to open up public services and programs to people with disabilities but has also been used to end segregation. The purpose of title II is to continue to break down barriers to the integrated participation of people with disabilities in all aspects of community life. The Committee intends that title II work in the same manner as Section 504.

---

[48] The concerns expressed was that the term "shall be available" could be read to mean that the powers, remedies and procedures were merely available to a plaintiff, and that a plaintiff could choose not to avail him or her self of such powers, remedies and procedures.

[49] 45 CFR 84.3(k).

While the integration of people with disabilities will sometimes involve substantial short-term burdens, both financial and administrative, the long-range effects of integration will benefit society as a whole.[50] The general prohibitions set forth in the Section 504 regulations,[51] are applicable to all programs and activities in title II. The specific sections on employment and program access in existing facilities are subject to the "undue hardship" and "undue burden" provisions of the regulations which are incorporated in Section 204. No other limitation should be implied in other areas.

As with Section 504 of the Rehabilitation Act, integrated services are essential to accomplishing the purposes of title II. As stated by Judge Mansmann in *ADAPT* v. *Skinner*,[52] "the goal [is to] eradicat[e] the 'invisibility of the handicapped'." Separate-but-equal services do not accomplish this central goal and should be rejected.

The fact that it is more convenient, either administratively or fiscally, to provide services in a segregated manner, does not constitute a valid justification for separate or different services under Section 504 of the Rehabilitation Act, or under this title. Nor is the fact that the separate service is equal to or better than the service offered to others sufficient justification for involuntary different treatment for persons with disabilities. While Section 504 of the Rehabilitation Act and this title do not prohibit the existence of all separate services which are designed to provide a benefit for persons with disabilities, such as specialized recreation programs, the existence of such programs can never be used as a basis to exclude a person with a disability from a program that is offered to persons without disabilities, or to refuse to provide an accommodation in a regular setting.[53]

In order to comply with the non-discrimination mandate, it is often necessary to provide training to public employees about disability. For example, persons who have epilepsy, and a variety of other disabilities, are frequently inappropriately arrested and jailed because police officers have not received proper training in the recognition of and aid for seizures. Often, after being arrested, they are deprived of medications while in jail, resulting in further seizures. Such discriminatory treatment based on disability can be avoided by proper training.

In the area of employment, title II incorporates the duty set forth in the regulations for Sections 501, 503 and 504 of the Rehabilitation Act to provide a "reasonable accommodation" that does not constitute an "undue hardship."

The provision of reasonable accommodation is central to the non-discrimination mandate. Courts have recognized that the Rehabilitation Act "mandates significant accommodation for the capabilities and conditions of the handicapped," [54] Which may require "substantial amounts of time and money to keep handicapped employees on the payroll," [55] Likwise, in *Nelson* v. *Thornburgh*, [56] the court recognized that while the cost of providing readers to blind caseworkers was substantial in the abstract, it was only a small part of the overall budget of the state agency and was slight compared to the societal consequences of unemployment of the blind workers.

---

[50] Cases which have enforced the rights of persons with disabilities to accessible public services have recognized that Section 504 may place substantial burdens on state and local agencies in order to accomplish the goals of non-discrimination and integration. *See, e.g. Dopico* v. *Goldschmidt*, 687 F.2d 644, 650 (2d Cir., 1982); *New Mexico Association for Retarded Citizens* v. *New Mexico*, 678 F.2d 847, 855 (10th Cir., 1982).

[51] 45 CFR 84.4.

[52] 881 F.2d 1184, 1204 (3rd Cir. 1989) (*en banc*) (concurring in part and dissenting in part).

[53] *See*, 45 CFR 84.4(b)(3).

In determining whether an accommodation would constitute an undue hardship, a number of factors, including the size and budget of the employer are set forth as factors to be considered. As stated in the appendix accompanying the Rehabilitation Act Section 504 regulations in 1977,

> Thus, a small day-care center might not be required to expend more than a nominal sum, such as that necessary to equip a telephone for use by a secretary with impaired hearing, but a large school district might be required to make available a teacher's aide to a blind applicant for a teaching job. Further, it might be considered reasonable to require a state welfare agency to accommodate a deaf employee by providing an interpreter, while it would constitute an undue hardship to improve that requirement on a provider of foster home care services.[57]

This approach is applicable to title II as well. Thus, the undue hardship determination is flexible, depending on the facts of an individual case. The employer must demonstrate that a reasonable accommodation would impose an undue hardship.

Similarly, title II incorporates the regulations applicable to federally conducted activities under Section 504 with respect to program accessibility, existing facilities and communications,[58] which requires that the agency demonstrate that access cannot be accomplished without imposing an undue burden after considering all available resources. The agency must still take any action that would not result in a fundamental alteration to the program or an undue burden, "but would nevertheless ensure that handicapped persons receive the benefits and services of the program or activity."[59]

Title II should be read to incorporate provisions of titles I and III which are not inconsistent with the regulations implementing Section 504 of the Rehabilitation Act of 1973, such as Section 102(b)(4) of the ADA. However, nothing in the other titles should be construed to lessen the standards in the Rehabilitation Act regulations which are incorporated by reference in Section 204.

[56] 567 F. Supp. 369 (E.D.Pa. 1983).

[57] 42 Fed. Reg. 22688, May 4, 1977.

[58] 28 CFR Part 39.

[59] 28 CFR 39.150(a)(2).

Section 203. Actions applicable to public transportation provided by public entities considered discriminatory

This section prohibits discrimination in public transportation provided by public entities. These requirements were extensively addressed by the Committees with jurisdiction over transportation issues.

Section 204. Regulations

The Attorney General is require to issue regulations within 1 year after enactment. The regulations must be consistent with this title and the coordination regulations under the Rehabilitation Act of 1973, except with respect to "program accessibility, existing facilities" and "communications." For these provisions, such regulations must be consistent with the regulations applicable to federally conducted activities under Section 504 of the Rehabilitation Act.

Unlike the other titles in this Act, title II does not list all of the forms of discrimination that the title is intended to prohibit. Thus, the purpose of this section is to direct the Attorney General to issue regulations setting forth the forms of discrimination prohibited.[60] The Committee intends that the regulations under title II incorporate interpretations of the term discrimination set forth in titles I and III of the ADA to the extent that they do not conflict with the Section 504 regulations.

The Secretary of Transportation is required to issue regulations for requirements under Section 203. The regulations must be in an accessible format, and must be promulgated in accordance with the Administrative Procedure Act.

Section 205. Enforcement

Section 205 incorporates the remedies, procedures and rights set forth in Section 505 of the Rehabilitation Act of 1973.[61] As in title I, the Committee adopted an amendment to delete the term "shall be available" in order to clarify that Rehabilitation Act remedies are the only remedies which title II provides for violations of title II. The Rehabilitation Act provides a private right of action, with a full panoply of remedies available, as well as attorney's fees.[62]

This enforcement provision, like the others in the ADA, should be read in conjunction with Section 501(b), which provides that the ADA does not preempt other applicable laws that include equal or greater protection. For title II, like Section 504 of the Rehabilitation Act, this includes remedies available under 42 U.S.C. 1983 and under state law claims.[63]

---

[60] The Act requires that regulations promulgated by the Attorney General shall be consistent with the coordination regulations codified at 28 CFR Part 41, as in existence on January 13, 1978. The portion of the 1978 regulation which dealt with design, construction and alteration used the American National Standards Institute (ANSI) specifications: later notices have substituted the Uniform Federal Accessibility Standards (UFAS) for the ANSI reference. The Committee does not intend that the Attorney General use the old ANSI standard from the 1978 regulation.

[61] 29 U.S.C. 794a.

[62] *See, e.g., Miener* v. *State of Missouri*, 673 F. 2d 969 (8th Cir. 1982).

[63] See discussion of Section 501(b), below.

Section 206. Effective date

Title II becomes effective 18 months after enactment. Requirements for fixed route vehicles under Section 203 become effective upon enactment.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

Section 301. Definitions

This section provides definitions for the terms "commerce," "commercial facilities," "public accommodations," "public transportation," and "readily achievable."

Section 301(1)—Commerce

Commerce is defined in the same manner as in title II of the Civil Rights Act of 1964, regarding public accommodations.

Section 301(2)—Commercial facilities

Commercial facilities is a term used in Section 303 to address requirements for new construction and alterations. It is designed to cover nonresidential facilities that are not public accommodations and whose operations will affect commerce. For example, office buildings that are not public accommodations [*i.e.* do not contain entities listed in Section 301(3)], factories and warehouses, would be commercial facilities and thus are subject to the requirements of Section 303.

The term "commercial facilities" does not include entities that are covered or expressly exempted under the Fair Housing Act. Entities covered under the Fair Housing Act are already under an obligation not to discriminate against persons with disabilities.

The obligations imposed by Section 303 for new construction and alterations are the same for public accommodations and for commercial facilities.

The term "commercial facilities" replaces the term "potential places of employment" in H.R. 2273 as introduced. This change was made to eliminate confusion over the obligations under this title and title I concerning employment. The Committee intends that obligations under each title be separate and distinct.

With this change, the Committee does not intend to restrict the scope of the term "commercial facilities," which retains the same definition that "potential places of employment" has in S. 933, as enacted by the Senate. The term is not intended to be defined by a dictionary or common industry definition. Rather, the definition of "commercial facility" is any facility that is intended for nonresidential use and whose operations will affect commerce.

Section 301(3)—Public accommodation

The definition of public accommodation differs from the bill as introduced. The bill as introduced provided a standard to be applied, rather than a list of covered accommodations. The new definition lists 12 categories of public accommodation.

The bill, as reported, provides examples of public accommodations, based on the following categories:

1. Places of lodging
2. Establishments serving food or drink
3. Places of exhibition or entertainment
4. Places of public gathering
5. Establishments selling or renting items
6. Establishments providing services
7. Stations used for public transportation
8. Places of public display or collection
9. Places of recreation
10. Places of education
11. Establishments providing social services
12. Places of exercise or recreation

These 12 listed categories are exhaustive. However, within each category, the bill lists only a number of examples. For example, under category (5), the bill lists "a bakery, grocery store, clothing store, hardware store, shopping center, or other sales or rental establishment." This list is only a representative sample of the types of entities covered under this category. Other retail or wholesale establishments selling or renting items, such as a book store, videotape rental store, or pet store, would be a public accommodation under this category.

A person alleging discrimination does not have to prove that the entity being charged with discrimination is similar to the examples listed in the definition. Rather, the person must show that the entity falls within the overall category. For example, it is not necessary to show that a jewelry store is like a clothing store. It is sufficient that the jewelry store sells items to the public.

Entities not falling under one of these categories, or not privately operated, or not affecting commerce, are not considered to be public accommodations. Entities that are not public accommodations may be commercial facilities and subject to the requirements of Section 303. Entities operated by governments are not covered by this title, but are covered by other titles of this bill or other federal laws. The fact that a private entity receives funds from federal, state, or local governments would not remove it from coverage under this title.

Both the public accommodation facility and the programs and services offered by the public accommodation cannot discriminate against individuals with disabilities. As discussed below, there is an obligation not to discriminate in programs and services provided by the public accommodation, to remove barriers in existing facilities, and to make new and altered facilities accessible and usable. It is not sufficient to only make facilities accessible and usable; this title prohibits, as well, discrimination in the provision of programs and activities conducted by the public accommodation.

Section 301(5)—Readily achievable

The term "readily achievable" means easily accomplishable and able to be carried out without much difficulty or expense.

Unlike many other terms used in this bill, this is a new term that was not part of earlier civil rights laws, such as the Civil Rights Act of 1964, the Rehabilitation Act of 1973, or their implementing regulations.

The definition provides factors to be considered in making a determination of what is readily achievable in a particular case. Factors include the size of both the overall business and the site involved in making the determination. This analysis is the same as in title I, when considering whether a reasonable accommodation in the employment context will impose an undue hardship. The same factors adopted during Committee consideration of the bill for "undue hardship" were adopted for "readily achievable."

In adopting this amendment, the Committee has responded to concerns about public accommodations that operate in depressed or rural areas that may be operating at the margin or at a loss. Specifically, concern was expressed that a business may elect to close a site if it is losing money rather than undertake significant investments to remove barriers to allow access and use for persons with disabilities.

The Committee does not intend for the requirements of the Act to result in the closure of neighborhood stores or in the loss of jobs. Rather, the Committee intends for courts to consider as a factor in determining whether removing a barrier is "readily achievable" whether the local store is threatened with closure by the parent company or is faced with job loss as a result of the requirements of this Act.

Section 302. Prohibition of discrimination by public accommodations

Section 302(a)—General rule

As a general rule, this section prohibits discrimination on the basis of disability in the full and equal enjoyment of goods, services, facilities, privileges, advantages and accommodations of any place of public accommodation.

Full and equal enjoyment means the right to participate and to have an equal opportunity to obtain the same results as others. It does not mean that an individual with a disability must achieve an identical result or level of achievement as persons without a disability. For example, an exercise class cannot exclude a person who uses a wheelchair because he or she cannot do all of the exercises and derive the same result from the class as persons without a disability.

The Committee adopted an amendment which clarifies that the prohibition against discrimination "in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation," applies to "any person who owns, leases (or leases to), or operates a place of public accommodation."

This amendment makes it clear that the owner of the building which houses the public accommodation, as well as the owner or operator of the public accommodation itself, has obligations under this Act. For example, if an office building contains a doctor's office, both the owner of the building and the doctor's office are required to make readily achievable alterations. It simply makes no practical sense to require the individual public accommodation, a doctor's office for example, to make readily achievable changes to the public accommodation without requiring the owner to make readily achievable changes to the primary entrance to the building.

Similarly, a doorman or guard to an office building containing public accommodations would be required, if requested, to show a person who is blind to the elevator or to write a note to a person who is deaf regarding the floor number of a particular office.

The amendment also clarifies that the owner of a public accommodation is liable for discriminatory policies. For example, if the corporate headquarters for a chain of restaurants designs all new restaurants to contain barriers to access, an injunction could be brought against the corporation to enjoin the inaccessible new construction.

The amendment also clarifies that entities which lease public accommodations are covered by the requirements of this title.

Section 302(b)(1)—General prohibitions

Section 302(b)(1) sets out general prohibitions against discrimination. These prohibitions are further refined by the specific prohibitions in Section 302(b)(2)

Section 302(b)(1)(A)—Activities

Deny participation.—It is discriminatory to deny a person with a disability the right to participate in or benefit from the goods, services, facilities, privileges, advantages or accommodations of the public accommodation.

The Committee emphasizes that a public accommodation may not exclude persons with disabilities for reasons other than those specifically set forth in this title ("direct threat" and eligibility criteria that are necessary to the operation of the business, see discussion below). For example, a public accommodation cannot refuse to serve a person with a disability because its insurance company conditions coverage or rates on the absence of persons with disabilities. This is a frequent basis of exclusion from a variety of community activities and is prohibited by this title.

Unequal benefit.—This title, like Section 504 of the Rehabilitation Act, prohibits services or accommodations which are not equal to those provided others. For example, person with disabilities must not be limited to certain performances at a theater.

Separate benefit.—Separate benefits or services are allowed only when necessary to provide persons with disabilities opportunities as effective as those provided others. Thus, this title would not prohibit the designation of restrooms or parking spaces for persons with disabilities.

Section 302(b)(1)(B)—Integrated settings

Integration is fundamental to the purposes of the ADA. Provision of segregated accommodations and services relegate persons with disabilities to second-class citizen status. For example, it would be a violation of this provision to require persons with disabilities to eat in the back room of a restaurant or to refuse to allow a person with a disability the full use of a health spa because of stereotypes about the person's ability to participate.

For example, it would also be a violation of this Act to segregate seating for persons using wheelchairs to the back of auditoriums or theaters. In addition to providing inferior seating, the patron in a wheelchair may be forced to separate from family or friends during a performance.

At times segregated seating is simply the result of thoughtlessness and indifference. At other times, safety concerns are raised, such as requiring patrons to sit near theater exits because of perceived hazards in case of fire. The purported safety hazard is largely based on inaccurate assumptions and myths about the ability of people with disabilities to get around in such circumstances. People who use wheelchairs vary greatly, as does the general public, in their individual ability to move quickly or slowly.

A balance between the safety interest and the need to preserve a choice of seating for movie patrons who use wheelchairs has already been accomplished under existing federal accessibility standards that have applied since 1984 to theaters, auditoriums and other places of assembly constructed with federal funds. These standards provide that wheelchair seating areas must be "dispersed throughout the seating area" and "located to provide lines of sight comparable to those for all viewing areas." Wheelchair areas are not restricted to areas near an exit, but can be located in various parts of the theater so long as they "adjoin an accessible route that also serves as a means of egress in case of emergency."[64]

The availability of a choice of seating is critical to assure that patrons with disabilities are not segregated from family or friends. New construction must provide a variety of seating options. In existing theaters, efforts should be made to increase seating options where readily achievable. If removal of seats is not readily achievable, the theater must, at a minimum, modify rules and procedures to allow a non-disabled companion to sit with a person who uses a wheelchair, by providing, for example, a folding chair. Seating should also be available in the front of the audience for persons with hearing and vision impairments, including those who use wheelchairs.

Section 302(b)(1)(C)—Opportunity to participate

It is critical that the existence of separate specialized services never be used as a justification for exclusion from programs that are not separate or different. For example, the existence of a special art program for persons who are developmentally disabled must not be used as a reason to reject an individual who is retarded from the regular art class if that person prefers to participate in that class. This provision does not require changes in the regular method of instruction that are not required under Sections 302(b)(2)(A)(ii) and (iii).

Section 302(b)(1)(D)—Administrative methods

Standards, criteria or administrative methods that have the effect of or perpetuate discrimination are also prohibited. (See discussion of 302(b)(2)(A)(i) below.)

---

[64] Section 4.33.3, Uniform Federal Accessibility Standards.

Section 302(b)(1)(E)—Association

It is also illegal to discriminate against an individual or entity based on a relationship or association of the individual or entity with a disabled person. The term "entity" is included in this section because, at times entities that provide services to, or are otherwise associated with persons with disabilities, are subjected to discrimination. This protection is analogous to the protection provided in Section 102(b)(4) in the employment context.

Section 302(b)(2)—Specific prohibitions

Section 302(b)(2) sets out specific prohibitions. The general prohibitions set forth in Section 302(b)(1) are patterned after provisions contained in other civil rights laws protecting women and minorities. In order to provide effective protections for persons with disabilities, however, additional specific prohibitions are provided in this section. These specific provisions, including the limitations contained within them, control over the general provision to the extent that is any conflict.

Section 302(b)(2)(A)(i)—Eligibility Criteria

It is discriminatory to impose eligibility criteria that screen out or tend to screen out disabled persons from public accommodations, unless the eligibility criteria can be shown by the public accommodation to be necessary to provide persons with disabilities the goods or services of that public accommodation.

For example, it would be illegal to require all customers to present a driver's license in order to purchase merchandise, because this would screen out persons with disabilities who do not drive. It would not be discriminatory to require another equally valid form of identification that did not screen out persons with disabilities.

Under this provision, it would be a violation for a store to impose a rule that no blind or deaf person would be allowed in the store. Further, it would be a violation for such an establishment to invade such individuals' privacy by trying to identify unnecessarily the existence of a disability—for example, by asking whether a person has a disability, by forcing the person to disclose medical records, or by requiring the person to undergo an exam or to determine whether the person has a disability.

A public accommodation may, however, impose neutral rules and criteria that are necessary for the safe operation of its business. For example, a height limitation for certain rides in an amusement park may screen out certain persons with disabilities of short stature, but may still be a legitimate safe criterion. Similarly, it may be a legitimate safety requirement that persons be able to see in order to operate certain devices or vehicles, even though the effect of this requirement is to deny access only to those persons with visual impairments. Safety criteria must, however, be based on actual risks and not on speculation, stereotypes or generalizations about persons with disabilities.

Section 302(b)(2)(A)(ii)—Reasonable modifications

It is discriminatory to fail to make reasonable modifications in policies and practices when such modifications are necessary to provide goods or services, unless it can be demonstrated that the modifications would fundamentally alter the nature of the goods or services provided.

For example, it is discriminatory to refuse to alter a "no pets" rule for a person with a disability who uses a guide or service dog. It would not be a violation of this title to refuse to modify a policy of not touching delicate works of art for a person who is blind if the touching threatened the integrity of the work.

Section 302(b)(2)(A)(iii)—Auxiliary aids and services

It is discriminatory to fail to take steps to ensure that a disabled individual is not treated differently because of the absence of auxiliary aids and services, unless it can be demonstrated that the auxiliary aids would fundamentally alter the nature of the goods or services being offered, or would result in an undue burden.

For example, a store would be required to communicate with a person who is deaf by writing down information which is normally spoken (such as indicating the location of the furniture department). It may be an undue burden, however, for the store to provide an inerpreter to convey this information.

The term "undue burden" is analogous to the term "undue hardship" in title I. The determination of whether the provision of an auxiliary aid or service imposes an undue burden on a public accommodation will be made on a case-by-case basis, taking into account the same standard and factors used for determining an undue hardship.

A critical determination is what constitutes an effective auxiliary aid or service (or reasonable accommodation in the employment context). While the use of handwritten notes may be effective to a person who is deaf in the context of shopping, it may not be an effective means of communication in a training session for employees in the employment context. Likewise, while it may not be necessary to provide braille price tags for shoppers who are visually impaired, it may be necessary to provide braille manuals in the employment context. For this reason, the obligations of a business will vary depending on the context involved.

Open-captioning of feature films playing in movie theaters is not required by this Act. Filmmakers are encouraged, however, to produce and distribute open-captioned versions of films and theaters are encouraged to have at least some pre-announced screenings of captioned versions of feature films.

Sections 302(b)(2)(A)(iv)-(v) and 303—Obligations for existing facilities, alterations and new construction

One major obstacle for persons with disabilities is simply obtaining access into buildings. Buildings have often been constructed in such a manner that persons with disabilities are effectively excluded from such places—they cannot get through the door, get around and use the building, or go to another floor.

This title sets out accessibility standards for buildings containing public accommodations. Three situations are covered: existing facilities, alternations, and new construction.

This section reflects the balance between the need to provide access for persons with disabilities and the desire to impose limited cost on businesses. Because retrofitting existing structures to make them fully accessible is costly, a far lower standard of accessibility has been adopted for existing structures—a standard of "readily achievable." Because it costs far less to incorporate accessible design into the planning and constructing of new buildings and of alterations, a higher standard of "readily accessible to and usable by" persons with disabilities has been adopted in the ADA for new construction and alterations.

The Fair House Amendments Act of 1988 adopted the same "readily accessible to and usable by" standard for common areas in newly constructed multi-family housing units.

"Readily achievable" vs. "readily accessible to and usable by"

The "readily achievable" and "readily accessible" standards are quite different. Readily achievable is defined as meaning an action which is easily accomplishable without much difficulty or expense. In making this determination, many factors are to be taken into consideration, including the overall size of the business, the site involved, and the nature and cost of the action needed. These are the same factors used when determining whether a reasonable accommodation imposes an undue hardship on an employer in title I.[65]

"Readily accessible to and usable by" is a higher standard, and has been used in a number of previous laws requiring accessibility. It is intended to enable persons with disabilities to get to, enter and use a facility. Although it does not mean total accessibility in every part of every area of a facility, it does mean a high degree of convenient accessibility: for example, accessible routes to and throughout a facility, accessible entrances to buildings and spaces, usable bathrooms, water fountains and other features.[66]

For example, many banks provide automatic teller machines (ATMs) for use of their customers. A bank with existing ATMs would have to remove barriers associated with the ATM if removal is readily achievable—easily accomplished without much difficulty or expense. Providing a small ramp to avoid a few steps may be readily achievable, but raising or lowering the ATM may be too difficult or expensive. If no readily achievable changes were possible, then the bank would have to provide service through alternative methods.

For new construction and alterations, the purpose is to ensure that the service offered to persons with disabilities is equal to the service offered to others. It would be a violation of this title to build a new bank with ATMs that were not readily accessible to and usable by persons with disabilities. It is not sufficient that the person with a disability can conduct business inside the bank. The ATMs provide an additional service which must be made available to persons with disabilities.

---

[65] As noted in the discussion of that title, the standard to be applied to these factors is significantly lower in determining whether an action is "readily achievable" than the standard used to determine whether a reasonable accommodation poses an undue hardship.

[66] Additionally, at supermarkets, for example, features erected to discourage the removal of shopping carts must meet established accessibility criteria for doors, including the required clearance, hardware, thresholds and operating pressure to allow for passage of persons with disabilities.

When identical features will generally be used in different ways once the new building is occupied, each one should be accessible in most situations. For example, in a convention center, each of the many identical meeting rooms should be accessible, because they will house meetings on different subjects when the buildings is in use. However, although each restroom in a new facility must be accessible, it is not necessary that every stall within the bathroom have access features.

Section 302(b)(2)(A)(iv)—Existing facilities

For existing facilities, it is discriminatory to fail to remove structural architectural and communications barriers, if such removal is readily achievable (i.e. easily accomplishable without much difficulty or expense). If it can be demonstrated that removal is not readily achievable, then goods or services must be provided through alternative methods, if such methods are readily achievable.

This readily achievable analysis must be done on a case by case basis. The Committee cannot give a blanket statement of what specific actions are readily achievable and thus required by this section. The readily achievable standard provides flexibility for public accommodations to remove barriers and provide access for persons with disabilities.

For example, questions were raised during the Subcommittee hearings concerning whether an existing retail store would have to raise, lower or remove its shelves to allow access. The obligation under this section is to remove barriers if such removal is readily achievable, that is, easily accomplishable without difficulty or expense. If it is not readily achievable, then the store must provide access through alternative methods, if the alternative methods are readily achievable.

Fixtures that pose barriers must be removed if doing so would be readily achievable. If removing a fixture means losing an insignificant amount of selling space, which would not be expensive or difficult, the fixture would have to be removed. By contrast, if removing the fixture would result in a significant loss of selling space, it would be difficult and expensive, and thus would not have to be removed.

The same principles apply to the question of whether aisles have to be widened for persons who use wheelchairs. Again, the test is whether the aisles would be readily achievable, that is, can it be done without difficulty or expense? If not, service must be provided in an alternative manner, if the alternative manner is readily achievable.

As another example, concerns were expressed regarding the use of temporary facilities brought to areas following natural disasters such as floods and tornados, to temporarily replace public accommodations. These temporary facilities must remove barriers if such removal is readily achievable. For example, if a pharmacy is temporarily operating in a trailer following a natural disaster, the pharmacy must explore whether providing access to the trailer is readily achievable, *i.e.*, would providing access, by a temporary ramp, for example, be easily accomplishable and able to be carried out without much difficulty or expense).

Section 302(b)(2)(A)(v)—Alternative methods for existing facilities

If an entity can demonstrate that removal of a barrier is not readily achievable, then there is an obligation to make goods services available through alternative methods, if the alternative methods are readily achievable.

If, in the retail store example above, the store could demonstrate that raising, lowering, or removing shelves would not be readily achievable, then the store must consider providing access through alternative methods. For example, a clerk could retrieve merchandise from inaccessible shelves, unless this alternative method is not readily achievable.

In the pharmacy example above, if the pharmacy could demonstrate that removing the barrier is not readily achievable, then it must consider methods of providing it services through alternative methods. In this case, a clerk could meet a customer at the foot of the trailer stairs to take or deliver prescription orders. This would satisfy the alternative methods requirement.

Section 302(b)(3)—Specific construction

The Committee adopted an amendment adding this provision which states that nothing in this title requires an entity to permit an individual to participate in or benefit from the goods, services, facilities, privileges, advantages and accommoditions of an entity where an individual poses a direct threat to the health or safety of others. The term "direct threat" is defined as posing a "significant risk to the health or safety of others that cannot be eliminated by a modification of policies, practices or procedures or by the provision of auxiliary and services."

The Committee does not wish to imply, by the addition of this provision, that people with disabilities necessary pose risks to others. Rather, this provision was added simply to address any concerns that may arise in this area and to establish clearly the strict standard that must be met before denying services or goods to an individual with a disability based on the fear that such individual poses a risk to others. This provision is identical to one added in the employment section, and the discussion of this issue there applies here as well.

Section 303. New construction and alterations in public accommodations and commercial facilities

New construction and alterations of both public accommodations and commercial facilities must be made readily accessible to and usable by individuals with disabilities. The requirements for new construction applies to facilities for first occupancy 30 months after enactment.

As noted above, the requirement of "readily accessible to and usable by" individuals with disabilities contemplates a high degree of convenient accessibility. Essentially, it is designed to ensure that patrons and employees of public accommodations and commercial facilities are able to get to, enter and use the facility.

For potential patrons, this means accessibility of parking areas, accessible routes to, from and into the facility, usable bathrooms and water fountains, and access to the goods, services, and programs of the facility. For example, a new building should be designed so that a potential patron can get to a store, get into the store, and get to the areas where goods are being provided.

For potential employees, the requirement of "readily accessible to and usable by" includes the same types of access, although such individuals require access to and around the employment area, rather than to the area where goods or services are being provided. For example, a new building should be designed so that a potential employee can get to the building, get into the building and get to and around the employment area. It is not required, however, that all individual workstations be constructed in a fully accessible manner, with, for example, accessible features such as lowered shelves and counters. Such modifications in a particular workstation would be instituted as a "reasonable accommodation" if a particular employee requires such modifications and if they did not constitute an undue hardship.[67]

The Committee adopted an amendment to move the section governing alterations for existing facilities from Section 302(b)(2)(vi), which only covered public accommodations, to Section 303 which covers both public accommodations and commercial facilities.

The rationale for making new construction accessible applies with equal force to alterations. The ADA is geared to the future—the goal being that, over time, access will be the rule rather than the exception. Thus, the bill only requires modest expenditures to provide access in existing facilities, while requiring all new construction to be accessible. The provision governing alterations is akin to new construction because it is only applicable to situations where the commercial facility itself has chosen to alter the premises.

This provision does not require alterations. Rather it simply provides that, when alterations are being made, they must be done in a manner such that, to the maximum extent feasible, the altered area is readily accessible to and usable by individuals with disabilities. It simply makes no sense to alter premises in a manner that does not consider access. Moreover, if alterations were not included in Section 303, governing commercial facilities, the anomalous situation could arise of a new accessible building being renovated to include barriers to access. If a business is going to build a new building or engage in alterations, the access requirements apply.

Alterations that affect or could affect usability of a public accommodation or commercial facility must be done in such a manner that the altered portions of the facility are readily accessible to and usable by persons with disabilities, to the maximum extent feasible. Minor changes such as painting or papering walls, replacing ceiling tiles, and similar alterations that do not affect usability do not trigger the requirement that the altered areas must be made accessible or that the path of travel to the alteration, or the bathrooms and other facilities must be made accessible. Usability should be broadly defined to include renovations which affect the use of facility, and not simply changes which relate directly to access.

---

[67] Of course, it is always less expensive to build something new in an accessible manner, the Committee expects that if it would not affect the usability or the enjoyment of the public accommodation by members of the general public, consideration should be given in new construction to placing fixtures and equipment at a convenient height for accessibility. In addition, if such items are commercially available, and it would not affect usability or enjoyment by the general public, an effort should be made to purchase new fixtures and equipment that are adjustable so that reasonable accommodations in the future will be less likely to pose undue hardships.

If an alteration is done to an area that contains a primary function, to the maximum extent feasible, the alteration, the path of travel to the alteration, and bathrooms, telephones and drinking fountains serving the remodeled area must be readily accessible to and usable by individuals with disabilities. Areas containing primary functions refer to those portions of a public accommodation where significant goods, services, facilities, privileges, advantages, or accommodations are provided. It is analogous to the concept in existing Uniform Federal Accessibility Standards of "the rooms or spaces in a building or facility that house the major activities." [68] A mechanical room, boiler room, supply storage room, or janitorial closet is not an area containing a primary function; the customer services lobby or a bank, the dining area of a cafeteria, the meeting rooms in a conference center, and the viewing galleries of a museum are areas containing a primary function.

These additional obligations for areas containing primary functions must not be disproportionate to the overall alterations in terms of cost and scope. This disproportionality concept recognizes that, in some circumstances, achieving an accessible path of travel and accessible restrooms, telephones, and drinking fountains may be sufficiently significant in terms of cost or scope in comparison to the remainder of the alteration being undertaken as to render this requirement unreasonable. For example, it would clearly be disproportionate to require a public accommodation to double the cost of a planned alteration. The Committee believes, however, that it would be consistent with the ADA for the minimum guidelines or regulations to establish a specific standard, such as 30% of the alteration costs, for determining the disproportionality of the accessible path of travel and related accessibility features required.

The parameters of the concept of disproportionality will be addressed in minimum guidelines issued by the Architectural and Transportation Barriers Compliance Board and established in the regulations promulgated by the Attorney General.

A public accommodation or commercial facility may not evade the path of travel, accessible restrooms, and other requirements by performing a series of small alterations which it would otherwise have performed as a single undertaking. For example, if a public accommodation has completed an alteration without incorporating an accessible path of travel, accessible restrooms, and other requirements, the total costs of the prior alterations plus others that are or will be proximate in time may be considered in determining whether providing an accessible path of travel, restrooms, telephones and bathrooms is disproportionate.

---

[68] Section 3.5, Uniform Federal Accessibility Standards.

If the aggregate cost of an accessible path of travel, accessible restrooms, telephones, and drinking fountains would be disproportionate to the overall alteration cost, the public accommodation is not relieved of the obligation to provide a number of such features that are not disproportionate. The goal is to provide a maximum degree of accessibility in such features without exceeding the disproportionality limit.

If a selection must be made between accessibility features, those which provide the greatest use of the facility be selected. For example, an accessible entrance would generally be the most important path of travel features, since without it the facility will be totally unusable by many persons with disabilities. An accessible restroom would have greater priority than an accessible drinking fountain.

If there is no way to provide an accessible path of travel to an altered area because of the disproportionality limit, making restrooms, telephones and drinking fountains serving the area accessible is still required if it is not disproportionate. Some individuals with disabilities can negotiate steps but still need accessibility features in restrooms, drinking fountains, and telephones.

Elevators are not required in an alteration or new construction for facilities of fewer than 3 stories or that have less than 3000 square feet per story, unless the builidng is a shopping center or mall, a health care provider, or as determined by the Attorney General.

Section 306. Regulations

The Attorney General is required to issue regulations for this title, except for Sections 302(b)(2)(B) and (C), and Section 304. These other sections address transportation issues for which the Secretary of Transportation shall issue appropriate regulations.

The Attorney General is required to issue the regulation within 1 year after enactment. As with the other regulations required by this bill the regulations must be in an accessible format, and must be promulgated in accordance with the Administrative Procedure Act.[69]

These regulations should include standards for facilities and vehicles and such standards must be consistent with the minimum guidelines and requirements issued by the Architectural and Transportation Barriers Compliance Board (ATBCB) in accordance with Section 504 of this Act.

Until final regulations are issued, compliance with the Uniform Federal Accessibility Standards (UFAS) will satisfy the requirements that facilities be "readily accessible to and usable by persons with disabilities," for alterations and new construction under Section 303.

If the Attorney General has not issued final regulations within 1 year after the ATBCB has issued supplemental minimum guidelines as required under section 504(a), then compliance with the ATBCB supplemental guidelines is required to satisfy the "readily accessible" standard, until final regulations are issued by the Attorney General.

---

[69] U.S.C. 551, *et seq.*

The Committee adopted an amendment to clarify the interim accessibility standards under the ADA. The standard was modified to link the interim accessibility standards to when a builder has obtained a permit for a building and will build the facility within the time specified in the permit. This amendment added to the existing language to give builders a time frame with which to work.

Section 307. Exemptions for private clubs and religious organizations

The section creates an exemption from this title for private clubs and religious organizations. The exemption for private clubs is intended to operate in the same narrow manner as in title II of the Civil Rights Act of 1964.[70]

The Committee does not intend to cover under this title religious organizations or entities controlled by religious organizations, including places of worship. Thus a church sanctuary would not be required to make its facilities accessible to and usable by disabled persons, nor to construct new facilities in such a manner.

In order to qualify for this exemption, the entity must be controlled by a religious organization, as that concept has been applied in other civil rights laws, such as in the exemption provided under title IX of the Education Amendments of 1972, as amended by the Civil Rights Restoration Act.[71]

Section 308. Enforcement

Private Right of Action.—Section 308 sets forth the enforcement procedures available under this title. Section 308(a)(1) incorporates by reference the remedies and procedures provided under Section 204(a) of title II of the Civil Rights Act of 1964, which prohibits discrimination in public accommodations on account of race, color, religion or national origin. Thus, a private civil action for preventive relief, including an application for a permanent or temporary injunction, restraining order or other order, is provided under this title. Section 204(a) of the 1964 Act also provides that the Attorney General may intervene in a suit brought by a private plaintiff.

As with other titles of the bill, the Committee intends that persons with disabilities have remedies and procedures parallel to those available under comparable civil rights laws. Thus, if the remedies and procedures change in title II of the 1964 Act, for persons discriminated against in public accommodations on account of race, color, religion, or national origin, they will change identically in this title for persons with disabilities.

Section 308(a)(2) makes clear that for violations of Section 302(b)(2)(A)(iv), regarding removing barriers in existing facilities, and Section 303(a), regarding making new construction and alterations readily accessible, injunctive relief shall include an order to make these facilities readily accessible, injunctive relief shall include an order to make these facilities readily accessible to and usable by persons with disabilities to the extent required by this title. Also, where appropriate, injunctive relief shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by this title.

---

[70] 42 U.S.C. 2001a(e).

[71] 29 U.S.C. 1681(a)(3).

Enforcement by the Attorney General.—Section 308(b) sets out enforcement procedures by the Attorney General. The Attorney General has a three part obligation: (1) to investigate alleged violations of title III and to conduct periodic reviews of compliance, (2) to certify that state laws or local building codes meet or exceed requirements of the bill and (3) to bring cases that indicate a pattern or practice of discrimination or that are of general public importance.

The Attorney General is required to investigate alleged violations of this title, and to conduct periodic reviews to evaluate whether covered entities are complying with this title. This duty of the Attorney General is essential to effective enforcement of this title. The Committee expects that the Attorney General will engage in active enforcement and will allocate sufficient resources to carry out this responsibility.

The Attorney General is empowered to certify that state or local laws meet or exceed the minimum standards for accessibility established in title, on application of a state or local government. Before certification may be granted, the Attorney General must give notice of a public hearing, and at such hearing allow persons, including persons with disabilities, an opportunity to testify against the certification. Certification shall be rebuttable evidence that the state or local law meets or exceeds the minimum requirements of this Act.

If the Attorney General proposes to grant certification for a particular law, code, or ordinance, a notice shall be issued in the Federal Register. An informal hearing shall be held before an official of the Department of Justice (not an Administrative Law Judge), at which interested persons shall have an opportunity to express their views, and the Attorney General shall also consider written comments. Certification is not to be considered rulemaking for purposes of the Administrative Procedure Act. The Attorney General may establish priorities for considering certification (*e.g.*, priority could be given to state documents before local documents, or to those that incorporated acceptable model building codes). The Attorney General may also establish procedures for revoking certification and establish the circumstances in which such action would be appropriate.

The Attorney General may bring a civil action in an appropriate court if he or she has reasonable cause to believe that any person or group of persons is engaged in a pattern or practice of resistance to the full enjoyment of any of the rights granted by this title. In addition, the Attorney General may bring a case where any person or group of persons has been denied any of the rights granted by this title, if such denial raises an issue of general public importance.

Section 308(b)(2) sets forth the authority of the court in actions brought by the Attorney General. The court may grant equitable relief, including making auxiliary aids available and making facilities readily accessible to and usable by persons with disabilities.

The court also may award monetary damages to the person aggrieved, if it is requested by the Attorney General. The court does not have authority to award monetary damages in situations where such relief is not requested by the Attorney General. The Committee intends that monetary damages may include compensatory damages. Such damages are not limited to out-of-pocket expenses. Monetary damages do not include punitive damages, as specifically stated in Section 308(b)(4).

To vindicate the public interest, the court may assess a civil penalty against a violator. Civil penalties may not exceed $50,000 for a first violation, and $100,000 for a subsequent violation. The Committee intends that these civil penalties are maximum, not minimum, penalties, and are not to be automatically imposed in every case. When making a determination regarding the amount of penalty, the court should consider the nature and circumstances of the violation, the degree of culpability, any history of price violations the financial circumstances of the violator, the goal of deterrence, and other matters as justice may require.

Section 308(b)(5) states that the court should also consider whether the entity could have reasonably anticipated the need for an appropriate type of auxiliary aid needed to accommodate the unique needs of a particular individual with a disability.

Section 308(b)(3) provides that for purposes of determining whether a "first" or "subsequent" violation has occurred, a determination of liability in the same trial counts as a single violation. Thus, multiple violations of the Act, determined in a first trial, cannot trigger the imposition of a $100,000 civil penalty based on the "subsequent" violations provision.

Section 309. Examinations and courses

The Committee adopted an amendment which provides that any person who offers examinations or courses related to applications, licensing, certification, or credentialing for secondary or postsecondary education, professional, or trade purposes shall offer such examinations or courses in a place and manner accessible to persons with disabilities or offer alternative accessible arrangements for such individuals.

The purpose of this amendment is to fill a gap which is created when licensing certification and other testing authorities are not covered by Section 504 of the Rehabilitation Act or title II of the ADA. Any such authority that is covered by Section 504, because of the receipt of federal money, or by title II, because it is a function of a state or local government, must make all of its programs accessible to persons with disabilities, which includes physical access as well as accommodations in the way the test is administered, *e.g.* extended time or assistance of a reader.

However, it is the Committee's belief that many licensing, certification and testing authorities are not covered by either Section 504 of the Rehabilitation Act, because no federal money is received, or by title II of the ADA, because they are not state agencies. However, states often require the licenses provided by such authorities in order for an individual to practice a particular profession or trade. Thus, this provision was adopted in order to assure that persons with disabilities are not foreclosed from educational, professional or trade opportunities because an examination or course is conducted in an inaccessible site or without an accommodation.

Under this requirement an entity cannot offer its program in an inaccessible site without providing persons with disabilities an alternative accessible arrangement which provides comparable conditions to those provided to others. For example, the entity could not give a course or a test in an inaccessible classroom and then offer the person with the disability the test in a cold, poorly lit basement.

Section 310. Effective date

This title becomes effective 18 months after enactment.

Title IV—Telecommunications Relay Services

This title amends the Communications Act of 1934,[72] to make telecommunications services available to hearing and speech impaired persons. This title requires a national relay service to be established so persons with disabilities can communicate with other persons using telecommunications devices. These requirements were extensively addressed by the Committee with jurisdiction over communications issues.

Title V—Miscellaneous Provisions

Section 501. Construction

This section describes the relationship between the ADA and the Rehabilitation Act of 1973 and other laws. This section also describes the relationship between the ADA and insurance. Finally, the section provides an individual with a disability the right to decline a separate service or accommodation.

Under Section 501(a), nothing in the ADA is intended or should be construed to limit the scope of coverage or to apply lesser standards than are required under title V of the Rehabilitation Act of 1973, or the regulations implementing that title. Thus, for example, the standards of title V of the Rehabilitation Act shall apply for purposes of the ADA to the extent that the ADA has not explicitly adopted a different standard than Section 504 of the Rehabilitation Act.

In those instances where the ADA explicitly provides a different standard from Section 504 of the Rehabiliation Act, the ADA standard applies to the ADA, but not to Section 504. For example, Section 504 requires that all of the programs of a recipient of federal financial assistance be available to persons with disabilities. This may require major structural changes in existing facilities, if other means are ineffective in achieving program access. No financial limitation is imposed

By contrast, the ADA adopts a lower standard of access to public accommodations for existing buildings under title III. Access must be provided only if it can be provided in a manner that is "readily achievable," that is, if it can be easily accomplished without much difficulty or expense, under Section (301)(5)(A), in light of a number of factors which are set forth in 301(5)(B). This is an instance in which the ADA provides a lesser standard than set forth in Section 504 of the Rehabilitation Act. This lesser standard applies only to the ADA and not to Section 504

---

[72] 47 U.S.C. 201 *et seq.*

Under Section 501(b) of the ADA, all of the rights, remedies and procedures that are available to people with disabilities under other federal laws, including Section 504 of the Rehabilitation Act, or other state laws (including state common law) are not preempted by this Act. This approach is consistent with that taken in other civil rights laws. The basic principle underlying this provision is that Congress does not intend to displace any of the rights or remedies provided by other federal or laws or other state laws (including state common law) which provide greater or equal protection to individuals with disabilities.

A plaintiff may choose to pursue claims under a state law that does not confer greater substantive rights, or even confers fewer substantive rights, if the plaintiff's situation is protected under the alternative law and the remedies are greater. For example, the California Fair Enforcement and Housing Act (FEHA) does not cover persons with mental disabilities. However, the FEHA has been construed to provide compensatory and punitive damages. Because the ADA covers mental disabilities, the FEHA could be construed as not conferring equal or greater rights than the ADA. However, a person with a physical disability may choose to sue under the FEHA, as well as under the ADA, because of the availability of damages under the FEHA. Section 501(b) ensures that the FEHA is not preempted by the ADA.

Moreover, state tort claims confer greater remedies and are not preempted by the ADA. A plaintiff may join a state tort claim to a case brought under the ADA. In such a case, the plaintiff must, of course, prove all the elements of the state tort claim in order to prevail under that cause of action.

Insurance.—Section 501(c) specifies that titles I, II, and III shall not be construed to restrict various insurance practices on the part of insurance companies aned employers, as long as such practices are not used to evade the purposes of this Act.

The Committee added this provision because it does not intend for the ADA to affect legitimate classification of risks in insurance plans in accordance with the state laws and regulations under which such plans are regulated. Further, the Committee does not intend to affect the preemption provision of the Employment Retirement Income Security Act (ERISA), which has been interpreted to exempt self-insured plans from state insurance regulation. In order to make this clear, the Committee has added Sections 501(c)(1)–(3).

Specifically, Section 501(c)(1) makes it clear that insurers may continue to sell to and underwrite individuals applying for life, health, or other insurance on an individually underwritten basis, or to service such insurance products, so long as the standards used are based on sound actuarial data and not on speculation.

Section 501(c)(2) recognizes the need for employers, and their agents, to establish and observe the terms of employee benefits plans, so long as these plans are based on legitimate underwriting or classification of risks.

Section 501(c)(3) provides that persons or organizations covered by the Act may continue to establish, sponsor, observe, or administer the terms of a bona fide benefit plan that is not subject to state laws that regulate insurance.

Section 501(c)(3) is designed to clarify that self-insured plans, which are currently governed by the preemption provision of the Employment Retirement Income Security Act (ERISA), are still governed by that preemption provision and are not subject to state insurance laws. Concerns had been raised that Sections 501(c) (1) and (2) could be interpreted as affecting the preemption provision of ERISA. The Committee does not intend such an implication. Until the preemption provision of ERISA is modified, these self-insured plans are subject to state law only to the extent determined by the courts in their interpretatioun of ERISA's preemption provision. Of course, under the ADA, the provisions of these plans must conform with the requirements of ERISA, just as the provisions of other plans must be based on or not inconsistent with state law.

Section 501(c) may not, however, be used as a subterfuge to evade the requirements of this Act pertaining to employment, public services, and public accommodations regardless of the date an insurance or employer benefit plan was adopted.

For example, an employer could not deny a qualified applicant a job because the employer's current insurance plan does not cover the person's disability or because of an anticipated increase in the costs of the insurance. Moreover, while a plan which limits certain kinds of coverage based on classification of risk would be allowed under this section, the plan my not refuse to insure or refuse to continue to insure, or limit the amount, extent, or kind of coverage available to an individual, or charge a different rate for the same coverage solely because of a physical or mental impairment, except where the refusal, limitation, or rate differential is based on sound actuarial principles, or is related to actual or reasonably anticipated experience.

For example, a blind person my not be denied coverage on blindness independent of actuarial classification. Likewise, with respect to group health insurance coverage, an individual with a pre-existing condition may be denied coverage for that condition for the period specified in the policy but cannot be denied coverage for illness or injuries unrelated to the non-existing condition. And as noted above, while it is permissible for an employer to offer insurance policies that limit coverage for certain procedures or treatments, coverage cannot be denied entirely to a perosn with a disability.

In sum, ADA requires that underwriting and classification of risks be based on sound actuarial principles or be related to actual or reasonably anticipated experience.

Accommodations and services.—Section 501(d) provides that nothing in the ADA shall be construed to require an individual with a disability to accept an accommodation, aid, service, opportunity or benefit which the individual chooses not to accept. The Committee added this section to clarify that nothing in the ADA is intended to permit discriminatory treatment on the basis of disability, even when such treatment is rendered under the guise of providing an accommodation, service, aid or benefit to the individual with disability. For example, a blind individual may choose not to avail himself or herself of the right to go to the front of a line, even if a particular public accommodation has chosen to offer such a modification of a policy for blind individuals. Or, a blind individual may choose to decline to participate in a special museum tour that allows persons to touch sculptures in an exhibit and instead tour the exhibits at his or her own pace with the museum's recorded tour.

Section 502. Prohibition against retaliation and coercion.

Section 502(a) protects individuals from retaliation based on the exercise of rights under the ADA. Discrimination is prohibited against any individual who has opposed any act or practice made unlawful by the ADA. Discrimination is also prohibited against any individual who participates in the enforcement process.

Section 502(b) makes it illegal to coerce, intimidate, threaten or interfere with any individual who exercised, enjoyed, aided or encouraged rights granted under the ADA.

Section 502(c) provides the same remedies and procedures for victims of retaliation and coercion as in the underlying title. For example, an individual who was retaliated against in an employment discrimination complaint would have the same remedies and procedures available under Section 107 as an individual alleging employment discrimination.

Section 503. State Immunity

This section removes immunity of states granted by the Eleventh Amendment of the Constitution. The Committee intends for states to be covered by the ADA, where applicable, and to be subject to suit in federal or state courts. The remedies available against state defendants are the same as those available against other defendants.

This section was included to meet the requirements of *Atascadero State Hospital* v. *Scanlon.*[73]

Section 504. Regulations by the Architectural and Transportation Compliance Board

This section requires the ATBCB to issue minimum guidelines to supplement the existing Minimum Guidelines and Requirements for accessible Design (MGRAD).[74]

Those supplemental guidelines are required to be issued within 9 months of enactment. The Committee lengthened the time period from 6 months to 9 months to accommodate the existing procedures for promulgation and review used by ATBCB.

These supplemental guidelines will establish requirements, in addition to those currently existing in MGRAD, to ensure that buildings, facilities, and vehicles are accessible to individuals with disabilities in conformance with the ADA. These guidelines should include scoping requirements. The guidelines will provide invaluable guidance to entities covered under titles II and III, as to the specific technical requirements in a myriad of situations.

---

[73] 473 U.S. 234 (1985).

[74] 36 C.F.R. Part 1190.

Qualified Historic Properties

Section 504(c) requires the supplemental guidelines to incorporate standards already developed under the Uniform Federal Accessibility Standards (UFAS)[75] for qualified historic buldings undergoing alterations.

This issue was raised by the American Institute of Architects during hearings before the Subcommittee. The Committee does not intend that qualfied historic structures be altered in such a manner that would threaten or destroy their historical significance.

This issue has been addressed by Section 4.1.7(1) and (2) of UFAS. The Committee intends that these standards be used for historic buildings as designated under federal law and under similar state or local laws.

Section 505. Attorney's fees

Section 505 provides that courts or agencies may award attorney's fees including litigation expenses, and costs to a prevailing party for actions brought under the ADA. The Committee intends that the attorney's fee provision be interpreted in a manner consistent with the Civil Rights Attorney's Fees Act,[76] including that statute's definition of prevailing party, as construed by the Supreme Court.[77]

Litigation expenses include the costs of expert witnesses. This provision explicitly incorporates the phrase "including litigation expenses" to respond to rulings form the Supreme Court that items such as expert witness fees, travel expenses, etc., be explicitly included if intended to be covered under an attorney's fee provision.[78] further, such expenses are included under the rubric of "attorney's fees" and not "costs" so that such expenses will be assessed against a plaintiff only under the standard set forth in *Christiansburg Garment.*

The Committee recognizes that the enforcement sections in titles I, II and III also include cross-referenced cites to attorney's fee provision in other laws, such as title VII and title II of the Civil Rights Act of 1964. Section 505 of this Act is a complimentary provision, which simply spells out clearly the elements that are included (and which the Committee assumes was always intended by Congress to be included) in such attorney's fee provisions.

Section 506. Technical assistance

Section 506(a) requires the Attorney General to develop and publish within 180 days a plan to assist covered entities and governments in understanding their obligations under the ADA. In developing this plan, the Attorney General is required to consult with the Secretary of Transportation, and the Chairs of the Equal Employment Opportunity Commission, National Council on Disability,

---

[75] 49 Fed. Reg. 31528.

[76] 42 U.S.C. 1988.

[77] *See, Christiansburg Garment Co.* v. *EEOC*, 434 U.S. 412, 422 (1978) (a plaintiff shall not be assessed an opponent's attorney's fees unless a court finds that the plaintiff's claim is "frivolous, unreasonable or groundless."); *Hughes* v. *Rowe*, 449 U.S. 5 (1980).

[78] *See, Crawford Fitting Co.* v. *J.T. Gibbons*, 482 U.S. 437 (1987).

Architectural and Transportation Barriers Compliance Board and Federal Communications Commissions.

Section 506(b) allows the Attorney General to obtain assistance from other federal agencies.

Section 506(c) allows departments and agencies implementing the Act to render technical assistance to individuals and entities that have rights and responsibilities under the ADA. These departments and agencies are required to make technical assistance manuals available, within 6 months after final regulations have been issued.

Section 506(d) allows departments and agencies to make grants or enter into contracts for services necessary to effectuate the ADA, including the dissemination of information about rights and duties under the ADA, and the development and dissemination of information and technical assistance about techniques for effective compliance.

The Committee recognizes that the provision of technical information and assistance is important for effective implementation of the ADA. Because of the individualized nature of providing accommodations and removing barriers, technical information and assistance will aid persons in under their obligations under the law. Effective assistance will help to reduce unnecessary confusion and litigation over the requirements of the ADA.

Section 506(e) provides that covered entities are not excused from meeting the requirements of the ADA because of any failure to receive technical assistance or any failure by the appropriate agencies to develop or disseminate manuals. The Committee expects that assistance and manuals will be available in a timely fashion, but the lack thereof is not an excuse for noncompliance with the ADA.

Section 507. Federal wilderness areas

Section 507 requires the National Council on Disability to conduct a study and report to Congress within 1 year on the effect that wilderness designations and wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System.

Under current National Park Service regulations, wheelchairs (both manual and motorized) are allowed access onto park lands, including both designated public parks and protected wilderness areas.[79] Wheelchair users are considered by the Park Service to be pedestrians, and are treated the same way as pedestrians.

Section 508. Transvestites

Section 508 provides that the term "disabled" and "disability" shall not apply to an individual solely because that individual is a transvestite. Transvestism is also excluded from the definition of disability under Section 511.

---

[79] 36 CFR 1.2(e), 1.4.

Section 509. Congressional inclusion

Section 509 provides that the ADA applies in its entirety to Congress, and provides an enforcement mechanism for the House of Representatives.

Section 510. Illegal use of drugs

Section 510 provides that an individual who is a current illegal user of drugs and is discriminated against on that basis in not considered an individual with a disability. The term "drugs" means controlled substances as listed in schedules I through V of Section 202 of the Controlled Substances Act.[80] The Controlled Substances Act makes unlawful the possession or distribution of listed drugs. The term "illegal use of drugs" does not include the use of controlled substances, including experimental drugs, taken under the supervision of a licensed health care professional. It also does not include uses authorized by the Controlled Substances Act or other provisions of federal law.

Section 510(a) and (b) are similar to sections 104(a) and (b) relating to employment, and should be interpreted in a consistent fashion.

Section 510(c) provides that if an individual is otherwise entitled to health or social services, that individual shall not be denied such services on the basis of current illegal use of drugs. For example, a current illegal user of drugs cannot be refused service at a hospital for a broken leg if that individual is otherwise entitled to that service. This is consistent with Section 407 of the Drug Abuse Office and Treatment Act of 1972,[81] and regulations implementing the Rehabilitation Act of 1973.[82]

Section 511. Definitions

Section 511(a) clarifies that homosexuality and bisexuality are not impairments and as such are not disabilities under the ADA. Sexual preference is not considered a disability under the ADA, and has not been considered a handicap under the Rehabilitation Act. Individuals who are homosexual or bisexual and are discriminated against because they have a disability, such as infection with the Human Immunodeficiency Virus, are protected under the ADA. The Committee specifically rejected amendments to exclude homosexuals with certain disabilities from coverage.

Section 511(b) clairifies that the definition of "disability" does not include the following conditions:

> Transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairmants, other sexual behavior disorders, compulsive gambling, kleptomania, pyromania, and psychoactive substance use disorders resulting from current illegal use of drugs.

---

[80] 21 U.S.C. 812.

[81] 21 U.S.C. 1174.

[82] Appendix A—Analysis of final regulations, Subpart A—Definitions, 4. Drug Addicts and alcoholics, ¶ 5, 42 Federal Register 22686, reprinted in 45 CFR Part 84 Appendix A (1986).

These conditions are physical or mental impairments and would have been included under the ADA, but for this provision. Section 511 was not part of H.R. 2273 as introduced. This provision was adopted during Senate consideration of the bill, and was included with only minor clarifying changes in the bill adopted by the Committee

Section 512. Amendments to the Rehabilitation Act

This section makes amendments to the Rehabilitation Act to exclude protection for current illegal users of drugs when discrimination occurs on that basis, but to protect persons who are not current illegal users of drugs, and have been or are being rehabilitated, or are erroneously regarded as being illegal users of drugs. The Rehabilitation Act presently protects these individuals against discrimination as long as they are qualified to participate in the activity at issue or are qualified to perform the job and do not present a direct threat to property or the safety of others. Section 512 amends this standard so that the treatment of persons who engage in the current illegal use of drugs is parallel to Sections 104 and 511 of the ADA. The same definition for "drugs" as used in the ADA is also included in the Rehabilitation Act.

This section also amends the Rehabilitation Act to provide that if an individual is otherwise entitled to health services, or services provided under titles, I, II and III of the Rehabilition Act, that individuals cannot be denied such services on the basis of current illegal use of drugs. This is consistent with Section 407 of the Drug Abuse Office and Treatment Act of 1972, 21 U.S.C. 1174, and regulations implementing the Rehabilitation Act of 1973.[83] This provision is similar to Section 510(c) of the bill and should be interpreted in consistent fashion.

This section further amends the Rehabilitation Act regarding the ability of local education agencies to take disciplinary action based on the current illegal use of drugs or alcohol. Further, the amendment includes a provision regarding alcoholics whose current use of alcohol prevents them from performing the duties of the job in question or whose employment, by reason of the current alcohol abuse, would constitute a direct threat to the health or safety of others.

Section 513. Alternative Dispute Resolution

The Committee adopted this section during its consideration of the bill. This section encourages the use of alternative means of dispute resolution, where appropriate and to the extent authorized by law. These methods include settlement negotiations, conciliation, facilitation, mediation, factfinding, mini-trials and arbitration.

This amendment was adopted to encourage alternative means of dispute resolution that are already authorized by law. The Committee wishes to emphasize, however, that the use of alternative dispute resolution mechanisms is intended to supplement, not supplant, the remedies provided by this Act. Thus, for example, the Committee believes that any agreement to submit disputed issues to arbitration, whether in the context of a collective bargaining agreement or in an employment contract, does not preclude the affected person from seeking relief under the enforcement provisions of this Act. This view is consistent with the Supreme Court's interpretation of title VII of the Civil Rights Act of 1964, whose remedial provisions are incorporated by reference in title I. The Committee believes that the approach articulated by the Supreme Court in *Alexander* v. *Gardner-Denver Co.*[84] applies equally to the ADA and does not intend that the inclusion of Section 513 be used to preclude rights and remedies that would otherwise be available to persons with disabilities.

Section 514. Severability

This section provides that if any provision of the ADA is found to be unconstitutional, such provision will be severed from the Act and will not affect the enforceability of the remaining provisions.

OVERSIGHT

Pursuant to clause 2(l)(3) of rule XI of the Rules of the House of Representatives, no oversight findings have been presented to the Committee by the Committee on Government Operations. The findings of the Committee on the Judiciary are incorporated throughout this report.

BUDGETARY INFORMATION

Clause 2(l)(3)(B) of rule XI of the Rules of the House of Representatives is inapplicable because the instant legislation does not provide new budgetary authority.

INFLATIONARY IMPACT

Pursuant to clause 2(l)(4) of rule XI of the rules of the House of Representatives, the Committee believes the legislation will have no significant inflationary impact on prices and costs in the operation of the national economy.

ESTIMATE OF COST

Pursuant to clause 7 of rule XIII of the Rules of the House of Representatives, the Committee states that it concurs with the estimate submitted by the Congressional Budget Office as set forth below.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, May 15, 1990.

Hon. JACK BROOKS,
Chairman, Commitee on the Judiciary,
House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the attached cost estimate of H.R. 2273, the Americans with Disabilities Act of 1990, as ordered reported by the Committee on the Judiciary on May 2, 1990.

---

[84] 415 U.S. 36 (1974).

If you wish further details on this estimate, we will be pleased to provide them.

Sincerely,

Robert D. Reischauer,
Director.

Attachment.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

1. Bill number H.R. 2273.
2. Bill title: Americans with Disabilities Act of 1990.
3. Bill status: As ordered reported by the House Committee on the Judiciary on May 2, 1990.
4. Bill purpose: To prohibit discrimination against people with disabilities in areas such as employment practices, public accommodations and services, transportation services and telecommunications services.
5. Estimated cost to the Federal Government:

[By fiscal years, in millions of dollars]

	1991	1992	1993	1994	1995
Estimated authorization level	5	7	19	31	31
Estimated outlays	5	7	19	31	31

Basis of Estimate

Equal Employment Opportunities Commission (EEOC).—Title I—Employment —would prohibit discrimination by employers against qualified individuals with disabilities. H.R. 2273 would require the EEOC to issue regulations to carry out Title I and to provide for enforcement of the provisions. In addition, the EEOC would ensure the availability of a technical assistance manual to those entities with rights of responsibilities under this act. Although no specific authorization level is stated in the bill, CBO estimates the cost of these activities would be $1 million in fiscal year 1991, $2 million in fiscal year 1992, $15 million in fiscal year 1993, and $27 million annually in fiscal years 1994-95. This estimate is based on the EEOC's past experience with enforcing civil rights standards and assumes that approximately 259 additional full-time equivalent employees would be needed for the Commission's 50 field offices and that approximately 58 additional staff would be needed for the EEOC headquarters.

Department of Transportation.—H.R. 2273 would direct the Secretary of Transportation to issue regulations including standards applicable to the facilities and vehicles covered by these provisions. Also, the Secretary of Transportation would make available technical assistance manuals to those with rights and responsibilities under this act. CBO estimates that the cost to the federal government of developing these regulations and manuals would be about $0.5 million in fiscal year 1991. In addition, the federal government might bear some part of the costs of making transit services accessible to the handicappped, which are discussed below. The capital and operating costs of most mass transit systems are heavily subsidized by the federal government through grants by the Urban Mass Transportation Administration. We cannot predict the extent to which these grants might be increased to compensate for the additional costs attributable to H.R. 2273.

Architectural and Transportation Barriers Compliance Board.—H.R. 2273 would require the board to issue minimum guidelines that would supplement existing minimum guidelines for accessible design of buildings, facilities and vehicles. Atlhough no specific authorization level is stated in the bill, CBO estimates the cost of these guidelines would be $0.2 million in fiscal year 1991. This estimate assumes salaries and expense costs of $104,000 and research contract costs of $80,000. Although the bill does not state specifically that the guidelines should be maintained, the board currently maintains the existing guidelines and most likely would maintain the new guidelines. CBO estimates the cost of maintaining the guidelines would be $0.2 million every other year beginning in fiscal year 1993.

Office of Technology Assessment (OTA).—The OTA would be required to undertake a study to determine (1) the needs of individuals with disabilities with regards to buses and (2) a cost-effective method for making buses accessible and usable by those with disabilities. In conjunction with this study, the OTA is directed to establish an advisory committee to assist with and review the study. Although no specific authorization level is stated in the bill, CBO estimates the cost of the study and advisory committee would be $0.2 million in fiscal year 1991, $0.3 million in 1992, and $0.1 million in 1993. This estimate is based upon the assumption that the OTA will not have to conduct significant additional field research.

Department of Justice.—H.R. 2273 also would require the Attorney General to develop regulations to prohibit discrimination in public services and to investigate alleged violations of public accommodation provisions, which would include undertaking periodic reviews of compliance of covered entities under Title III. These regulations would ensure that a qualified individual with a disability would not be excluded from participation in, or denied benefits by a department, agency, special purpose district or other instrumentality of a state or local government. In addition, H.R. 2273 would require the Department of Justice to make available technical assistance manuals to those with rights and responsibilities under this act. We estimate the cost of these activities would be $3 million in fiscal year 1991 and $4 million annually in fiscal years 1992-1995.

Federal Communications Commission (FCC).—H.R. 2273 requires the FCC to prescribe and enforce regulations with regard to telecommunications relay services. These regulations include: (1) establishing functional regulations, guidelines and operations for telecommunications relay services, (2) establishing minimum standards that shall be met by common carriers, and (3) ensuring that users of telecommunications relay services pay rates no greater than rates paid for functionally equivalent voice communication services with respect to duration of call, the time of day, and the distance from point of origination to point of termination. In addition, H.R. 2273 would require the FCC to make available technical assistance manuals to those with rights and responsibilities under this act. While no authorization level is stated, CBO estimates the cost of developing and enforcing these regulations to be $0.1 million in fiscal year 1991, $0.1 million in fiscal year 1992, $0.2 million in 1993, $0.2 million in 1994, and $0.1 million in 1995.

National Council on Disability.—H.R. 2273 would require the council to conduct a study on the effect that wilderness land management practices have on the ability of individuals with disabilities to use and enjoy the National Wilderness Preservation System. Although no authorization level is stated, CBO estimates the cost of this study would be $0.2 million in fiscal year 1991 and $0.1 million in fiscal year 1992.

Other Possible Effects.—In addition to the federal costs of establishing and enforcing new regulations, H.R. 2273 could also affect the federal budget indirectly through changes in employment and earnings. If employment patterns and earnings were to change, both federal spending and federal revenues could be affected. There is, however, insufficient data to estimate these secondary effects on the federal budget.

6. Estimated cost to State and local governments: Enactment of H.R. 2273 would result in substantial costs for state and local governments, but CBO cannot estimate the total impact with any certainty. Most of these costs would involve actions required to make public transit systems accessible to the handicapped. In addition, some local governments might incur additional costs to make newly-constructed public buildings accessible, as required by this bill, but most already face similar requirements.

Public Buildings.—H.R. 2273 wold mandate that newly constructed state and local public buildings be made accessible to the handicapped. All states currently mandate accessibility in newly-constructed, state-owned public buildings and therefore would incur little or no costs if this bill were to be enacted. It is possible, however, in rare cases, for some local governments not to have such law. These municipalities would incur additional costs for making newly-constructed, locally-owned public buldings accessible if this bill were to become law. According to a study conducted by the Department of Housing and Urban Development in 1978, the cost of making a building accessible to the handicapped is less than one percent of total construction costs if the accessibility features are included in the original building design. Otherwise, the costs could be much higher.

Public Transit.—CBO cannot provide a comprehensive analysis of the impact of H.R. 2273 on mass transit costs of state and local governments. The scope of the bill's requirements in this area is very broad, many provisions are subject to interpretation, and the potential effects on transit systems are significant and complex. While we have attempted to discuss the major potential areas of cost, we cannot assign a total dollar figure to these costs.

H.R. 2273 would require that all new buses and rail vehicles be accessible to handicapped individuals, including those who use wheelchairs, and that public transit operators offer paratransit services as a supplement to fixed route public transportation. In addition, the bill includes a number of requirements relating to the accessibility of mass transportation facilities. Specifically, all new facilities, alterations to existing facilities, intercity rail stations, and key stations in rapid rail, commuter rail, and light rail systems would have to be accessible to handicapped persons.

Bus and Paratransit Services.—CBO estimates that it would cost between $20 million and $30 million a year over the next several years to purchse additional lift-equipped buses as required by H.R. 2273. Additional maintenance costs would increase each year as lift-equipped buses are acquired, and would reach $15 million by 1995. The required paratransit systems would add to those costs.

Based on the size of the current fleet and on projections of the American Public Transit Association (APTA), CBO expects that public transit operators will purchase about 4,300 buses per year, on average, over the next five years. About 38 percent of the existing fleet of buses is currently equipped with lifts to make them accessible to handicapped individuals and, based on APTA projections, we estimate that an average of 55 percent to 60 percent of future bus purchases will be lift-equipped in the absence of new legislation. Therefore, this bill would require additional annual purchases of about 1,800 lift-equipped buses. Assuming that the added cost per bus for a lift will be $10,000 to $15,000 at 1990 prices, operators would have to spend from $20 million to $30 million per year, on average, for bus acquisitions as a result of this bill.

Maintenance and operating costs of lifts have varied widely in different cities. Assuming that additional annual costs per bus average $1,500, we estiamte that it would cost about $2 million in 1991, increasing to $15 million in 1995, to maintain and operate the additional lift-equipped buses required by H.R. 2273.

In addition, bus fleets may have to be expanded to make up for the loss in seating capacity and the increase in boarding time needed to accommodate handicapped persons. The cost of expanding bus fleets is uncertain since the extent to which fleets would need to be expanded depends on the degree to which handicapped persons would use the new lift-equipped buses. If such use increases significantly, added costs could be substantial.

These costs are sensitive to the number of bus purchases each year, which may vary considerably. In addition, these estimates reflect total costs for all transit operators, regardless of their size. Costs may fall disproportionately on smaller operators, who are currently more likely to choose options other than lift-equipped buses to achieve handicapped access.

The bill also requires transit operators to offer paratransit or other special transportation services providing a level of service comparable to their fixed route public transportation. Because we cannot predict how this provision will be implemented, and because the demand for paratransit services is very uncertain, we cannot estimate the potential cost of the paratransit requirement, but it could be significant. The demand for paratransit services probably would be reduced by the greater availability of lift-equipped buses.

New regulations recently proposed by the Department of Transportation concerning bus and paratransit services include requirements much the same as those in H.R. 2273. Should these proposed rules become final in their current form, the mandates of the bill would have much less effect.

Transit Facilities.—We expect that the cost of compliance with the provisions concerning key stations would be significant for a number of transit systems, and could total several hundred million dollars (at 1990 prices) over 20 years. The precise level of these costs would depend on future interpretation of the bill's requirements and on the specific options chosen by transit systems to achieve accessibility. The costs properly attributable to this bill would also depend on the degree to which transit operators will take steps to achieve accessibility in the absence of new legislation.

In 1979, CBO published a study, (*Urban Transportation for Handicapped Persons: Alternative Federal Approaches,* November 1979), that outlined the possible costs of adapting rail systems for handicapped persons. In that study, CBO estimated that the capital costs of adapting key subway, commuter and light rail stations and vehicles for wheelchair users would be $1.1 billion to $1.7 billion, while the additional annual operating and maintenance costs would be $14 million to $21 million.

Based on a 1981 survey of transit operators, the Department of Transportation has estimated that adapting existing key stations and transit vehicles would require additional capital expenditures of $2.5 billion over 30 years and would result in additional annual operating costs averaging $57 million (in 1979 dollars) over that period. Many groups representing the handicapped asserted that the assumptions and methodology used by the transit operators in this survey tended to severely overstate these costs. The department estimated that the cumulative impact of using the assumptions put forth by these groups could lower the total 30-year costs to below $1 billion.

CBO believes that the figures in both these studies significantly overstate the cost of the requirements of H.R. 2273, because, in the intervening years, several of the major rail systems have begun to take steps to adapt a number of their existing stations for handicapped access. In addition, it seems likely that the number of stations that would be defined as "key" under this bill would be much lower than that assumed in either of those studies. Furthermore, the Metropolitan Transit Authority in New York and the Southeastern Pennsylvania Transportation Authority in Philadelphia, two large rail systems, have entered into settlement agreements with handicapped groups that include plans for adaptation of key stations. These plans would probably satisfy the bill's requirement for accessibility of key stations. Other rail systems are also taking steps to make existing stations accessible. Therefore, we expect that the cost of the bill's requirements concerning key stations would probably not be greater than $1 billion (in 1990 dollars) and might be considerably less.

7. Estimate comparison: None.

8. Previous CBO estimate: CBO prepared an estimate of S. 933, the Americans with Disabilities Act of 1989, as ordered reported by the Senate Committee on Labor and Human Resources on August 2, 1989. We also prepared estimates of other versions of H.R. 2273, the Americans with Disabilities Act of 1989: as ordered reported by the House Committee on Education and Labor on November 14, 1989; as ordered reported by the House Committee on Energy and Commerce on March 13, 1990; and as ordered reported by the

House Committee on Public Works and Transportation on April 3, 1990. The estimates in this bill are similar to those for the versions of H.R. 2273 ordered reported by the House Committees and are substantially different from those in the Senate bill.

9. Estimate prepared by: Cory Leach and Marjorie Miller.

10. Estimate approved by: C.G. Nuckols (For James L. Blum, Assistant Director for Budget Analysis).

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3 of Rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italics, existing law in which no change is proposed is shown in roman):

COMMUNICATIONS ACT OF 1934

* * * * * * *

APPLICATION OF ACT

SEC. 2. (a) * * *

(b) Except as provided in [section 223 or 224] *section 223, 224, and 225* and subject to the provisions of section 301 and title VI, nothing in this Act shall be construed to apply or to give the Commission jurisdiction with respect to (1) charges, classifications, practices, services, facilities, or regulations for or in connection with instrastate communication service by wire or radio of any carrier, or (2) any carrier engaged in interstate or foreign communications solely through physical connection with the facilities of another carrier not directly or indirectly controlling or controlled by, or under direct or indirect common control with such carrier, or (3) any carrier engaged in interstate or foreign communication solely through connection by radio, or by wire and radio, with facilities, located in an adjoining State or in Canada or Mexico (where they adjoin the State in which the carrier is doing business), of another carrier not directly or indirectly controlling or controlled by, or under direct or indirect common control with such carrier, or (4) any carrier to which clause (2) or clause (3) would be applicable except for furnishing interstate mobile radio communication service or radio communication service to mobile stations on land vehicles in Canada or Mexico; except that sections 201 through 205 of this Act, both inclusive, shall, except as otherwise provided therein, apply to carriers described in clauses (2), (3), and (4).

* * * * * * *

TITLE II—COMMON CARRIERS

* * * * * * *

SPECIAL PROVISIONS RELATING TO TELEPHONE COMPANIES

SEC. 221. (a)

(b) Subject to the provisions of [section 301] *sections 225 and 301,* nothing in this Act shall be construed to apply, or to give the

Commission jurisdiction, with respect to charges, classifications, practices, services, facilities, or regulations for or in connection with wire, mobile, or point-to-point radio telephone exchange service, or any combination thereof even though a portion of such exchange service constitutes interstate or foreign communication, in any case where such matters are subject to regulation by a State commission or by local governmental authority.

* * * * * * *

SEC. 225. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

(a) DEFINITIONS.—As used in this this section—

(1) COMMON CARRIER OR CARRIER.—The term "common carrier" or "carrier" includes any common carrier engaged in interstate communication by wire or radio as defined in section 3(h), any common carrier engaged in interastate communication by wire or radio, and any common carrier engaged in both interstate and intrastate communications, notwithstanding sections 2(b) and 221(b).

(2) TDD.—The term "TDD" means a Telecommunications Device for the Deaf, which is a machine that employs graphic communications in the transmission of coded signals through a wire or radio communication system.

(3) TELECOMMUNICATIONS RELAY SERVICES.—The term "telecommunications relay services" means telephone transmission services that provide the ability for an individual who has a hearing impairment or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses a TDD or other nonvoice terminal device and an individual who does not use such a device.

(b) AVAILABILITY OF TELECOMMUNICATIONS RELAY SERVICES.—

(1) IN GENERAL.—In order to carry out the purposes established under section 1, to make available to all individuals in the United States a rapid, efficient nationwide communication service, and to increase the utility of the telephone system of the Nation, the Commisson shall ensure that interstate and intrastate telecommunications relay services are available, to extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals in the United States.

(2) REMEDIES.—For purposes of this section, the same remedies, procedures, rights, and obligations under this Act that are applicable to common carriers engaged in interstate communication by wire or radio are also applicable to common carriers engaged in intrastate communication by wire or radio and common carriers engaged in both interstate and intrastate communication by wire or radio.

(c) PROVISION OF SERVICES.—Each common carrier providing telephone voice transmission services shall provide telecommunications

relay services individually, through designees, or in concert with other carriers not later than 3 years after the date of enactment of this section.

(d) REGULATIONS.—

(1) IN GENERAL.—The Commission shall, not later than 1 year after the date of enactment of this section, prescribe regulations to implement this section, including regulations that—

(A) establish functional requirements, guidelines, and operations procedures for telecommunications relay services;

(B) establish minimum standards that shall be met by common carriers in carrying out subsection (c);

(C) require that telecommunications relay services operate every day for 24 hours per day;

(D) require that users of telecommunications relay services pay rates no greater than the rates paid for functionally equivalent voice communications services with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination;

(E) prohibit relay operators from refusing calls or limiting the length of calls that use telecommunications realy services.

(F) prohibit relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such converstation beyond the duration of the call; and

(G) prohibit relay operators from intentionally altering a relayed conversation.

(2) TECHNOLOGY.—The Commission shall ensure that regulations prescribed to implement this section encourage the use of existing technology and do not discourage or impair the development of improved technology.

(3) JURISDICTIONAL SEPARATION OF COSTS.—

(A) IN GENERAL.—The Commission shall prescribe regulations governing the jurisdictional separation of costs for the services provided pursuant to this section.

(B) RECOVERING COSTS.—Such regulations shall generally provide that costs caused by interstate telecommunications relay services shall be recovered from the interstate jurisdiction and costs caused by intrastate telecommunications relay services shall be recovered from the intrastate jurisdiction.

(C) JOINT PROVISION OF SERVICES.—To the extent interstate and intrastate common carriers jointly provide telecommunications relay services, the procedures established in section 410 shall be followed, as applicable.

(4) FIXED MONTHLY CHARGE.—The Commission shall not permit carriers to impose a fixed monthly charge on residential customers to recover the costs of providing interstate telecommunication relay services.

(5) UNDUE BURDEN.—If the Commission finds that full compliance with the requirements of this section would unduly burden one or more common carriers, the Commission may

extend the date for full compliance by such carrier for a period not to exceed 1 additional year.

(e) ENFORCEMENT.—

(1) IN GENERAL.—Subject to subsections (f) and (g), the Commission shall enforce this section.

(2) COMPLAINT.—The Commission shall resolve, by final order, a complaint alleging a violation of this section within 180 days after the date such complaint is filed.

(f) CERTIFICATION.—

(1) STATE DOCUMENTATION.—Each State may submit documentation to the Commission that describes the program of such State for implementing intrastate telecommunications relay services.

(2) REQUIREMENTS FOR CERTIFICATION.—After review of such documentation, the Commission shall certify the State program if the Commission determines that the program makes available to hearing-impaired and speech-impaired individuals either directly, through designees, or through regulation of intrastate common carriers, intrastate telecommunications relay services in such State in a manner that meets the requirements of regulations prescribed by the Commission under subsection (d).

(3) METHOD OF FUNDING.—Except as provided in subsection (d), the Commission shall not refuse to certify a State program based solely on the method such State will implement for funding intrastate telecommunication relay services.

(4) SUSPENSION OR REVOCATION OF CERTIFICATION.—The Commission may suspend or revoke such certification if, after notice and opportunity for hearing, the Commission determines that such certification is no longer waranted.

(g) COMPLAINT.—

(1) REFERRAL OF COMPLAINT.—If a complaint to the Commission alleges a violation of this section with respect to intrastate telecommunications relay services within a State and certification of the program of such State under subsection (f) is in effect, the Commission shall refer such complaint to such State.

(2) JURISDICTION OF COMMISSION.—After referring a complaint to a State under paragraph (1), the Commission shall exercise jurisdiction over such complaint only if—

(A) final action under such State program has not been taken on such complaint by such State—

(i) within 180 days after the complaint is filed with such State; or

(ii) within a shorter period as prescribed by the regulations of such State; or

(B) the Commission determines that such State program is no longer qualified for certification under subsection (f).

* * * * * * *

REHABILITATION ACT OF 1973

* * * * * * *

DEFINITIONS

SEC. 7. For the purposes of this Act: (1)

* * * * * * *

(8)(A) * * *

(B) [Subject to the second sentence of this subparagraph,] *Subject to subparagraphs (C) and (D),* the term "individual with handicaps" means, for purposes of titles IV and V of this Act, any person who (i) has a physical or mental impairment which substantially limits one or more of such person's major life activities, (ii) has a record of such an impairment, or (iii) is regarded as having such an impairment. [For purposes of sections 503 and 504 as such sections relate to employment, such term does not include any individual who is an alcoholic or drug abuser whose current use of alcohol or drugs prevents such individual from performing the duties of the job in question or whose employment, by reason of such current alcohol or drug abuse, would constitute a direct threat to property or the safety of others.]

(C) For purposes of subchapter V of this Act the term "individual with handicaps" does not include an individual who is a current illegal user of drugs, when a recipient acts on the basis of such use.

[(C)] *(D)* For the purposes of sections 503 and 504, as such sections relate to employment, such term does not include an individual who has a currently contagious disease or infection and who, by reason of such disease or infection, would constitute a direct threat to the health or safety of other individuals or who, by reason of the currently contagious disease or infection, is unable to perform the duties of the job.

* * * * * * *

(22) The term "drugs" means controlled substances, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812), the possession or distribution of which is unlawful under such Act. The term "illegal use of drugs" does not mean the use of controlled substances taken under supervision of a licensed health professional or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

ADDITIONAL VIEWS OF HON. F. JAMES SENSENBRENNER, JR., HON. BILL McCOLLUM, HON. GEORGE W. GEKAS, HON. WILLIAM E. DANNEMEYER, HON. LAMAR S. SMITH, AND HON. CRAIG T. JAMES

We are concerned that Section 107 of the Americans with Disabilities Act linking the employment remedies under the Act to remedies available under Title VII of the Civil Rights Act of 1964 should be amended to clarify that the ADA only calls for equitable relief as a remedy for employment discrimination.

If the remedies provision of the ADA is to be changed, there should be a conscious debate and a conscious vote on the issue, rather than a "bootstrap" to the pending Civil Rights Act of 1990.

BACKGROUND

As originally introduced, the Americans with Disabilities Act (H.R. 2273 and S. 933) would have provided greater remedies for the disabled than provided under current Title VII law. H.R. 2273 originally contained the following provision:

> **SEC. 205. ENFORCEMENT.**
>
> The remedies and procedures set forth in sections 706, 709, and 710 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-5, 2000e-8, and 2000e-9), and the remedies and procedures available under section 1981 of the Revised Statues (42 U.S.C. 1981) shall be available, with respect to any individual who believes that he or she is being or about to be subjected to discrimination on the basis of disability in violation of any provisions of this Act, or regulations promulgated under section 204, concerning employment.

The highlighted portion of the statute references Section 1981 of the Civil Rights Act of 1866. Section 1981 has been interpreted by the courst to allow for recovery of punitive and compensatory damages and jury trials in certain cases of employment discrimination. Inclusion of this language in the original version of the ADA would have allowed the recovery of expanded damages and jury trials for employment discrimination against the disabled under the ADA.

After intense negotiations between the Senate and the Bush Administration, an agreement was reached in August of 1989 to, among other items, delete the reference to Section 1981 procedures from the employment remedies provision in exchange for broadening the coverage under the public accommodations title. Thus, the ADA's employment remedies were limited to current Title VII remedies: back pay, injunctive relief, reinstatement and attorneys' fees. With this significant change, the Bush Administration and the business community gave their support to the bill. The Senate passed the bill on September 7, 1989 by a vote of 76 to 8 and it was sent to the House for consideration.

Four Committees of the House reviewed the Americans with Disabilities Act: the Committee on Education and Labor, Energy and Commerce, Public Works and Transportation and the Judiciary Committee. Of these Committees, Judiciary and Education and Labor have had jurisdiction to review Title I of the ADA prohibiting discrimination in employment against the disabled. In October and November or 1989, the Subcommittee on Civil and Constitutional Rights held hearings on H.R. 2273. On November 14, 1989, the Committee on Education and labor reported a version of H.R. 2273 which incorporated the changes made in S. 933 and as modified through additional negotiations among the Committee members.

On February 7, 1990, Senator Kennedy and Representative Hawkins introduced the Civil Rights Act of 1990 (H.R. 4000 and S. 2104). H.R. 4000 would exppand damages available in Title VII actions to authorize punitive and compensatory damages and jury trials. Because of the cross-reference to Title VII, amendment of Title VII as proposed in the Civil Rights Act of 1990 would amend the employment discrimination remedies of the ADA to provide for the expanded remedies.

At the time that the Subcommittee on Civil and Constitutional Rights held its hearings and the Committee on Education and Labor reported on the bill, the damages available for employment discrimination were limited to current Title VII remedies. Thus, the expansion of remedies proposed by H.R. 4000 had not previously been considered by the House and in fact had been explicitly rejected by the Senate in the context of the Americans with Disabilities Act.

PROPOSED AMENDMENT

Congressman Sensenbrenner offered an amendment in the Subcommittee on Civil and Constitutional Rights and at the Full Judiciary Committee Markup to "de-link" the remedies for employment discrimination in the Americans with Disabilities Act from the remedies contained in Title VII of the Civil Rights Act of 1964 amendments.

The amendment offered would have incorporated the remedies and procedures set forth in sections 705, 706, 707, 709 and 710 of the Civil Rights Act of 1964 while limiting the remedies to current Title VII remedies: injunctive relief, attorneys' fees and back pay. The amendment was defeated in the Full Committee by a voice vote.

The amendment was offered for two reasons. First, the Administration and the business community view the possible effect of H.R. 4000 on the ADA as a substantial breach of the agreement reached last year with the Senate on the ADA.

In anticipation of the Judiciary Committee markup of the Americans with Disabilities Act, Attorney General Thornburgh sent a letter to Congressman Hamilton Fish, Jr., the Ranking Minority Member of the House Judiciary Committee on March 12, 1990. The letter stated, A very critical element of this bill was that, as under Title VII of the CIvil Rights Act of 1964, the remedies it made available for violations of the employment title were limited to non-damage remedies that can be obtained in a trial before a judge. That formulation was crucial to the thrust and structure of a number of critical sections of the legislation. Because we were emulating the remedial scheme of Title VII, those remedies were simply incorporated by reference. In return, the Administration agreed to broad coverage under the public accommodations title, e.g. retail stores, doctors' and lawyers' offices, drug stores and grocery stores—all establishments necessary for people with disabilities to be truly in the mainstream. This coverage is much broader than Title II of the Civil Rights Act of 1964, which essentially prohibits discrimination on the basis of race in hotels, motels, restaurants, gas stations, and places of public entertainment.

The Kennedy-Hawkins bill would greatly expand the remedies available under Title VII and hence, by reference, the remedies in the employment title of the ADA. The Administration is opposed to that aspect of Kennedy-Hawkins, as stated in our testimony on that legislation. The ADA need not be held hostage to the legislative outcome on Kennedy-Hawkins, however, in order to ensure that a critical element of the agreement struck previously will be observed.

Second, expansion of remedies, especially in the context of a new and comprehensive piece of legislation is ill-advised. Employers and employees have had more than 25 years of experience with the procedures and remedies of Title VII for discrimination based on race, color, religion, sex or national origin. In enacting Title VII and other employment discrimination statutes, Congress has consistently pursued a policy of encouraging mediation and conciliation in resolving disputes and in avoiding unnecessary litigation. The current remedies of Title VII are equitable, that is, they are intended to restore the individual to the position he or she would have been in but for the discrimination. As stated above, the relief available includes injunctions, back pay, promotion, reinstatement and attorneys' fees.

Although federal agencies and recipients of federal funds have been covered under the Rehabilitation Act prohibiting discrimination against the disabled since 1973, the "mainstream" of society, "the retail stores, doctors' and lawyers' offices, drug stores and grocery stores" have no experience in compliance with anti-discrimination laws against the disabled. The possibility of a compensatory and/or punitive damages award and a jury trial in employment disputes, therefore, raises the stakes much higher. In order to be effective at eliminating discrimination against the disabled, the active cooperation of business will be required.

We urge our colleagues to consider the consequences of the failure to remedy this problem. We should not let this dispute over remedies in the ADA undermine its promise and the business community's response to it. The employment titles of the ADA should be amended so that it clearly reflects the remedies of back pay, injunctive relief and attorneys fees as it was originally intended. To do otherwise is to take the risk of postponing, once again, the civil rights of many disabled Americans.

F. James Sensenbrenner, Jr.
George W. Gekas.
Craig T. James.
Bill McCollum.
William E. Dannemeyer.
Lamar Smith.

DISSENTING VIEWS OF HON. CHUCK DOUGLAS

Four different House committees have studied the Americans with Disabilities Act, and each has adopted amendments which greately clarify a poorly drafted bill which raced through the Senate attracting very little consideration. The original version was vague and subject to varying interpretations by those who would benefit from its provisions, as well as those who would be required to take the required corrective actions.

One of my amendments, which was unanimously adopted, specifically limited the rights and procedures available under the ADA to those which are available to women and minorities under Title VII of the Civil Rights Act of 1964. Without this amendment, persons claiming discrimination could have gone directly to court, avoiding all attempts at mediation and could have sued for all kinds of damages which were not anticipated by Congress. I am pleased the committee saw the wisdom of my remedies language.

Another amendment which was passed, addressed a concern which I had initially raised. That amendment, further defined *when* an employer could refuse to hire or continue to employ an employee. If the employee would pose a "direct threat" to the health or safety of individuals in the work place, the employer has a defense for refusing to hire that individual. The amendment clarified that a "direct threat" is one which would place those other workers at a "significant risk" from any harm. This was needed in order to address my concern about dangerous or unbalanced workers threatening co-workers.

I still have serious problems with those employers who are covered by the bill and those who are not. Even though the same exemption exists in the Civil Rights Act of 1964, I question the provision in the employment title of the bill which exempts "a bona fide private membership club (other than a labor organization) that is exempt from section 501(c) of the Internal Revenue Code." This bill should include as many organizations as possible and not just the businesses of this country which are *trying* to make profits.

It is also incredible to me that the largest employer in this country, the Federal Government, is exempt from this bill! While other laws are said to cover the Federal Government's responsibilities to the disabled, those laws do not contain the exact same provisions as this bill. How can we tell every State and political subdivision, as well as every business employing over 15 people, that they must comply but then say our largest employer does *not* have to comply with the same law. *All of us* are going to be *very embarrassed* when we try to explain why even churches must comply but the Federal Government and golf clubs get off scot-free. Churches should be exempt because of the First Amendment to the Constitution, but under this legislation those rights are violated.

It is my opinion that we are further complicating this area of law by introducing an almost impossible standard for employers to meet with the requirement that they must justify *all* their actions regarding the disabled as a "business necessity." The current standard which is applied in discrimination cases for women and minorities is "legitimate business purpose." Why complicate the law by establishing a new standard which does not parallel the law with other minority groups?

I believe that still more consideration should be given to the public safety issue at the pre-hire stage. When a police or sheriff's department is considering hiring an individual who will handle a deadly weapon, it should be free to inquire as to an individual's mental stability, well *before* it has extended an offer of employment. The City of Los Angeles is an excellent example. According to Dr. Sheldon Kay, Chief Psychiatrist for the Los Angeles Police Department, *before* an applicant is extended an invitation to attend the police academy, the individual is given a battery of medical tests and undergoes a background check. The very last test the individual undergoes is a psychological test and interview to determine if the individual is stable enough to perform the duties of a police officer.

The way the legislation now reads, *none* of these tests could be run until *after* an offer of employment has been extended, even though that offer may be conditioned on succesfully passing these tests. According to Dr. Kay, moving the timing of the test to the *end* of the hiring sequence would be extremely disruptive. As things currently stand, once an applicant has an offer of employment he gives notice to his or her present employer. Under the legislation as drafted, he would not be certain he had a job until after he had passed all the exams. Dr. Kay indicated that an applicant could be in the embarrassing position of telling his associates that he had been offered a position and then have to tell them he had failed the mental stability test portions of the job.

In essence, a department would have to offer everybody a job and then test to see who was disqualified totally rather than being able to weed out unqualified applicants at any point during the process. This would certainly place a chilling effect on these types of tests which are designed to *protect* the public safety. Hundreds of other police and private security agencies work this way. Does it not make sense for these departments to be able to screen out individuals who cannot perform the "essential functions" of the job *before* they even consider hiring an individual? Let's not make the job of the police even tougher than it is.

We also do not want to force establishments like restaurants out of business causing the ultimate "undue hardship." Under H.R. 2273, as presently drafted, a food service operator could not even *transfer* an employee with AIDS, or one who has tested positive for the AIDS virus out of a food-handling position even if the employer continued to pay the same wages and benefits. The reasons the employer could not are the following:

(1) The person *does not* pose a direct threat to the health and safety of other workers and patrons. Center for Disease Control guidelines consistently state that the AIDS virus is not transmitted through food or drink or casual contact.

> (2) While the disease is in the very early stages, an employee could certainly continue to perform the essential functions of the job because he or she would not "be sick."

Unfortunately, there are many Americans who panic at the mention of the word AIDS and would refuse to patronize any food establishment if an employee were known to have the virus. Very few restaurants have the luxury of a captive audience of customers who have no place else to go to get a meal. It is a very competitive business, and for the restaurant with an employee known to have AIDS, it will translate to *no customers* and *no business* at all. With over 600,000 restaurants in this country all you need to do is go to another establishment down the street. It will be too late after the business has lost all its customers for "the undue harship" defense to do much good.

There are also sections of the bill which either have not been explained carefully or are not capable of being understood. A good example comes in Section 501(c) which deals with insurance. After spending a great deal of time explaining what insurance plans are permissible, the Act seems to say that these same plans which were previously approved are not permissible if they act as a subterfuge to the purposes of the Act. What does that mean? How does an employer or employee know when a subterfuge has been created?

One of the purposes of this and every piece of legislation is to provide a basis for reasonable expectation between parties in conflict. Even though great strides have been made in cleaning up this bill in that regard, it is still nebulous. What the meaning of "undue hardship" or "reasonable accommodation" is will vary depending upon where you sit. This legislation should attempt to narrow the gap between those expectation levels. At this point, those expectations are left for courts all over this country to decide. No one will ever be certain that they have complied. Let's make them at least a little more certain. Congress is abrogating it constitutional duty by writing vague laws which must be clarified by the Federal courts. Our *responsibility* is to write laws which can be clearly understood when reading them—not have another branch of government do our job.

CHUCK DOUGLAS.

2d Session | | Part 4

AMERICANS WITH DISABILITIES ACT OF 1990

May 15, 1990.—Committed to the Committee of the Whole House on the State of the Union and ordered to be printed

Mr. Dingell, from the Committee on Energy and Commerce, submitted the following

REPORT

together with

DISSENTING VIEWS

[To accompany H.R. 2273 which on May 9, 1989, was referred jointly to the Committee on Education and Labor, the Committee on Energy and Commerce, the Committee on Public Works and Transportation, and the Committee on the Judiciary]

[Including cost estimate of the Congressional Budget Office]

The Committee on Energy and Commerce, to whom was referred the bill (H.R. 2273) to establish a clear and comprehensive prohibition of discrimination on the basis of disability, having considered the same, report favorably thereon with an amendment and recommend that the bill as amended do pass.

Sec. 506. Technical assistance.
Sec. 507. Illegal use of drugs.
Sec. 508. Definitions.

SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds that—

(1) some 43,000,000 Americans have one or more physical or mental disabilities, and this number is increasing as the population as a whole is growing older;

(2) historically, society has tended to isolate and segregate individuals with disabilities, and, despite some improvements, such forms of discrimination against individuals with disabilities continue to be a serious and pervasive social problem;

(3) discrimination against individuals with disabilities persists in such critical areas as employment, housing, public accommodations, education, transportation, communication, recreation, institutionalization, health services, voting, and access to public services;

(4) unlike individuals who have experienced discrimination on the basis of race, sex, national origin, religion, or age, individuals who have experienced discrimination on the basis of disability have often had no legal recourse to redress such discrimination;

(5) individuals with disabilities continually encounter various forms of discrimination, including outright intentional exclusion, the discriminatory effects of architectural, transportation, and communication barriers, overprotective rules and policies, failure to make modifications to existing facilities and practices, exclusionary qualification standards and criteria, segregation, and relegation to lesser services, programs, activities, benefits, jobs, or other opportunities;

(6) census data, national polls, and other studies have documented that people with disabilities, as a group, occupy an inferior status in our society, and are severely disadvantaged socially, vocationally, economically, and educationally;

(7) individuals with disabilities are a discrete and insular minority who have been faced with restrictions and limitations, subjected to a history of purposeful unequal treatment, and relegated to a position of political powerlessness in our society, based on characteristics that are beyond the control of such individuals and resulting from stereotypic assumptions not truly indicative of the individual ability of such individuals to participate in, and contribute to, society;

(8) the Nation's proper goals regarding individuals with disabilities are to assure equality of opportunity, full participation, independent living, and economic self-sufficiency for such individuals; and

(9) the continuing existence of unfair and unnecessary discrimination and prejudice denies people with disabilities the opportunity to compete on an equal basis and to pursue those opportunities for which our free society is justifiably famous, and costs the United States billions of dollars in unnecessary expenses resulting from dependency and nonproductivity.

(b) Purpose.—It is the purpose of this Act—

(1) to provide a clear and comprehensive national mandate for the elimination of discrimination against individuals with disabilities;

(2) to provide clear, strong, consistent, enforceable standards addressing discrimination against individuals with disabilities;

(3) to ensure that the Federal Government plays a central role in enforcing the standards established in this Act on behalf of individuals with disabilities; and

(4) to invoke the sweep of congressional authority, including the powers to enforce the fourteenth amendment and to regulate commerce, in order to address the major areas of discrimination faced day-to-day by people with disabilities.

SEC. 3. DEFINITIONS.

As used in this Act:

(1) Auxiliary aids and services.—The term "auxiliary aids and services" includes—

(A) qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments;

(B) qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments;

(C) acquisition or modification of equipment or devices; and

(D) other similar services and actions.

(2) Disability.—The term "disability" means, with respect to an individual—

(A) a physical or mental impairment that substantially limits one or more of the major life activities of such individual;

(B) a record of such an impairment; or

(C) being regarded as having such an impairment.

(3) **STATE**.—The term "State" means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

SEC. 4. DEFENSES.

(a) **IN GENERAL**.—It shall be a defense to a charge of discrimination under this Act that an alleged application of qualification standards, selection criteria, performance standards, or eligibility criteria that exclude or deny services, programs, activities, benefits, jobs, or other opportunities to an individual with a disability has been demonstrated by the covered entity to be both necessary and substantially related to the ability of an individual to perform or participate, or take advantage of the essential components of such particular service, program, activity, job, or other opportunity and such performance, participation, or taking advantage of such essential components cannot be accomplished by applicable reasonable accommodations, modifications, or the provision of auxiliary aids or services.

(b) **QUALIFICATION STANDARDS**.—The term "qualification standards" may include—

(1) requiring that the current use of alcohol or drugs by an alcoholic or drug abuser not pose a direct threat to property or the safety of others in the workplace or program; and

(2) requiring that an individual with a currently contagious disease or infection not pose a direct threat to the health or safety of other individuals in the workplace or program.

TITLE I—EMPLOYMENT

SEC. 101. DEFINITIONS.

As used in this title:

(1) **COMMISSION**.—The term "Commission" means the Equal Employment Opportunity Commission established by section 705 of the Civil Rights Act of 1964 (42 U.S.C. 2000e-4).

(2) **EMPLOYEE**.—

(A) **IN GENERAL**.—The term "employee" means an individual employed by an employer.

(B) **EXCEPTION**.—The term "employee" shall not include any individual elected to public office in any State or political subdivision of any State by the qualified voters thereof, or any individual chosen by such officer to be on such officer's personal staff, or an appointee on the policy making level or an immediate adviser with respect to the exercise of the constitutional or legal powers of the office.

(C) **LIMITATION ON EXCEPTION**.—The exception contained in subparagraph (B) shall not include employees subject to the civil service laws of a State government, governmental agency, or political subdivision.

(3) **EMPLOYER**.—

(A) **IN GENERAL**.—The term "employer" means a person engaged in an industry affecting commerce who has 15 or more employees for each working day in each of 20 or more calendar weeks in the current or preceding calendar year, and any agent of such a person.

(B) **EXCEPTIONS**.—The term "employer" does not include—

(i) the United States, a corporation wholly owned by the government of the United States, or an Indian tribe; or

(ii) a bona fide private membership club (other than a labor organization) that is exempt from taxation under section 501(c) of the Internal Revenue Code of 1986.

(4) **PERSON, ETC**.—The terms "person", "labor organization", "employment agency", "commerce", and "industry affecting commerce", shall have the same meaning given such terms in section 701 of the Civil Rights Act of 1964 (42 U.S.C. 2000e).

(5) **QUALIFIED INDIVIDUAL WITH A DISABILITY**.—The term "qualified individual with a disability" means an individual with a disability who, with or without reasonable accommodation, can perform the essential functions of the employment position that such individual holds or desires.

SEC. 102. DISCRIMINATION.

(a) **GENERAL RULE**.—No employer, employment agency, labor organization, or joint labor-management committee shall discriminate against any qualified individual with a disability because of such individual's disability in regard to job application procedures, the hiring or discharge of employees, employee compensation, advancement, job training, and other terms, conditions, and privileges of employment.

(b) CONSTRUCTION.—As used in subsection (a), the term "discrimination" includes—

(1) the failure by an employer, employment agency, labor organization, or joint labor-management committee to make reasonable accommodations to the known physical or mental limitations of a qualified individual with a disability who is an applicant or employee unless such entity can demonstrate that the accommodation would impose an undue hardship on the operation of its business;

(2) the denial of employment opportunities by a covered employer, employment agency, labor organization, or joint labor-management committee to an applicant or employee who is a qualified individual with a disability if the basis for such denial is because of the need of the individual for reasonable accommodation; and

(3) the imposition or application by a covered employer, employment agency, labor organization, or joint labor-management committee of qualification standards, tests, selection criteria, or eligibility criteria that identify or limit, or tend to identify or limit, a qualified individual with a disability, or any class of qualified individuals with disabilities, unless such standards, tests, or criteria can be shown by such entity to be necessary and substantially related to the ability of an individual to perform the essential functions of the particular employment position.

SEC. 103. POSTING NOTICES.

Every employer, employment agency, labor organization, or joint labor-management committee covered under this title shall post notices in an accessible format to applicants, employees, and members describing the applicable provisions of this Act, in the manner prescribed by section 711 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–10).

SEC. 104. REGULATIONS.

Not later than 180 days after the date of enactment of this Act, the Commission shall issue regulations in an accessible format to carry out this title in accordance with subchapter II of chapter 5 of title 5, United States Code.

SEC. 105. ENFORCEMENT.

The remedies and procedures set forth in sections 706, 709, and 710 of the Civil Rights Act of 1964 (42 U.S.C. 2000e–5, 2000e–8, and 2000e–9), and the remedies and procedures available under section 1981 of the Revised Statutes (42 U.S.C. 1981) shall be available, with respect to any individual who believes that he or she is being or is about to be subjected to discrimination on the basis of disability in violation of any provisions of this Act, or regulations promulgated under section 104, concerning employment.

TITLE II—PUBLIC SERVICES

Subtitle A—Prohibition Against Discrimination

SEC. 201. DEFINITION.

As used in this subtitle, the term "qualified individual with a disability" means an individual with a disability who, with or without reasonable modifications to rules, policies, and practices, the removal of architectural, communication, and transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a department, agency, special purpose district, or other instrumentality of a State or a local government, commuter authority (as defined in section 103(8) of the Rail Passenger Service Act), or the National Railroad Passenger Corporation.

SEC. 202. DISCRIMINATION.

Subject to the provisions of this title, no qualified individual with a disability shall, by reason of such disability, be excluded from participation in or be denied the benefits of the services, programs, or activities of a State or local government, any department, agency, special purpose district, or other instrumentality of a State or local government, a commuter authority (as defined in section 103(8) of the Rail

Passenger Service Act), or the National Railroad Passenger Corporation, or be subjected to discrimination by any such government or entity.

SEC. 203. REGULATIONS.

Not later than 1 year after the date of enactment of this Act, the Attorney General shall promulgate regulations in an accessible format that implement this subtitle, and such regulations shall be consistent with this subtitle and with the coordination regulations under part 41 of title 28, Code of Federal Regulations (as promulgated by the Department of Health, Education, and Welfare on January 13, 1978), applicable to recipients of Federal financial assistance under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) except, with respect to "program accessibility, existing facilities", and "communications", such regulations shall be consistent with regulations and analysis as in part 39 of title 28 of the Code of Federal Regulations, applicable to federally conducted activities under section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).

SEC. 204. ENFORCEMENT.

The remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be available to individuals alleging discrimination on the basis of disability in violation of this subtitle.

SEC. 205. EFFECTIVE DATE.

(a) GENERAL RULE.—Except as provided in subsection (b), this subtitle shall become effective 18 months after the date of enactment of this Act.

(b) EXCEPTION.—Section 203 shall become effective on the date of enactment of this Act.

Subtitle B—Actions Applicable to Public Transportation Provided by Public Entities Considered Discriminatory

PART I—PUBLIC TRANSPORTATION OTHER THAN BY AIRCRAFT OR CERTAIN RAIL OPERATIONS

SEC. 211. ACTIONS APPLICABLE TO PUBLIC TRANSPORTATION CONSIDERED DISCRIMINATORY.

(a) DEFINITIONS.—As used in this part:

(1) PUBLIC TRANSPORTATION.—The term "public transportation" means transportation by bus or rail, or by any other conveyance (other than transportation by aircraft, intercity or commuter rail transportation, as defined in section 221, or rail transportation covered by title III) that provides the general public with general or special service (including charter service) on a regular and continuing basis.

(2) VEHICLE.—The term "vehicle" does not include an intercity or commuter rail car described in section 222 or a rail passenger car covered by title III.

(b) VEHICLES.—

(1) NEW BUSES, RAPID AND LIGHT RAIL VEHICLES, AND OTHER FIXED ROUTE VEHICLES.—It shall be considered discrimination for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for an individual or entity to purchase or lease a new fixed route bus of any size, a new rapid rail vehicle, a new light rail vehicle to be used for public transportation, or any other new fixed route vehicle to be used for public transportation and for which a solicitation by such individual or entity is made later than 30 days after the date of enactment of this Act, if such bus, rail, or other vehicle is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) USED VEHICLES.—If an individual or entity purchases or leases a used vehicle after the date of enactment of this Act, such individual or entity shall make demonstrated good faith efforts to purchase or lease a used vehicle that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(3) REMANUFACTURED VEHICLES.—If an individual or entity remanufactures a vehicle, or purchases or leases a remanufactured vehicle, so as to extend its usable life for 5 years or more, the vehicle shall, to the maximum extent feasible, be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(c) PARATRANSIT AS A SUPPLEMENT TO FIXED ROUTE PUBLIC TRANSPORTATION SYSTEM.—If an individual or entity operates a fixed route public transportation system to provide public transportation, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such individual or entity to fail to provide paratransit or other special transportation services sufficient to provide a comparable level of services as is provided to individuals using fixed route public transportation to individuals with disabilities, including individuals who use wheelchairs, who cannot otherwise use fixed route public transportation and to other individuals associated with such individuals with disabilities in accordance with service criteria established under regulations promulgated by the Secretary of Transportation.

(d) COMMUNITY OPERATING DEMAND RESPONSIVE SYSTEMS FOR THE GENERAL PUBLIC.—If an individual or entity operates a demand responsive system that is used to provide public transportation for the general public, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such individual or entity to purchase or lease a new vehicle, for which a solicitation is made later than 30 days after the date of enactment of this Act, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs unless the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to that provided to the general public.

(e) NEW FACILITIES.—For purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for an individual or entity to build a new facility that will be used to provide public transportation services, including bus service, rapid rail service, light rail service, and other service used for public transportation that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(f) ALTERATIONS OF EXISTING FACILITIES.—With respect to a facility or any part thereof that is used for public transportation and that is altered by, on behalf of, or for the use of an individual or entity later than 1 year after the date of enactment of this Act, in a manner that affects or could affect the usability of the facility or part thereof, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for such individual or entity to fail to make the alterations in such a manner that, to the maximum extent feasible, the altered portion of the facility, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the remodeled area are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(g) EXISTING FACILITIES, RAPID RAIL AND LIGHT RAIL SYSTEMS, AND KEY STATIONS.—

(1) EXISTING FACILITIES.—Except as provided in paragraph (3), with respect to existing facilities used for public transportation, it shall be considered discrimination, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), for an individual or entity to fail to operate such public transportation program or activity conducted in such facilities so that, when viewed in the entirety, it is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(2) RAPID AND LIGHT RAIL SYSTEMS.—With respect to vehicles operated by light and rapid rail systems, for purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for an individual or entity to fail to have at least one car per train that is accessible to individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in any event in no less than 5 years.

(3) KEY STATIONS.—For purposes of this Act and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), it shall be considered discrimination for an individual or entity to fail to make key stations in rapid rail and light rail systems readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than 3 years after the date of enactment of this Act, except that the time limit may be extended by the Secretary of Transportation up to 20 years for extraordinarily expensive structural changes to, or replacement of, existing facilities necessary to achieve accessibility.

SEC. 212. REGULATIONS.

(a) IN GENERAL.—Not later than 240 days after the date of enactment of this Act, the Secretary of Transportation shall issue regulations in an accessible format that include standards applicable to facilities and vehicles covered under section 211.

(b) CONFORMANCE OF STANDARDS.—Such standards shall be consistent with the minimum guidelines issued by the Architectural and Transportation Barriers Compliance Board under section 504(a) of this Act.

SEC. 213. ENFORCEMENT.

The remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be available with respect to any individual who believes that he or she is being or about to be subjected to discrimination on the basis of disability in violation of section 211, or regulations issued under section 212, concerning public services.

PART II—PUBLIC TRANSPORTATION BY INTERCITY AND COMMUTER RAIL

SEC. 221. DEFINITIONS.

As used in this part—

(1) the term "commuter authority" has the meaning given such term in section 103(8) of the Rail Passenger Service Act (45 U.S.C 502(8));

(2) the term "commuter rail transportation" has the meaning given the term "commuter service" in section 103(9) of the Rail Passenger Service Act (45 U.S.C 502(9));

(3) the term "intercity rail transportation" means transportation provided by the National Railroad Passenger Corporation;

(4) the term "public entity" means the National Railroad Passenger Corporation, any commuter authority, any State or local government, and any department, agency, special purpose district, or other instrumentality of a State or local government;

(5) the term "rail passenger car" means, with respect to intercity rail transportation, single level and bi-level coach cars, single level and bi-level dining cars, single level and bi-level sleeping cars, single level and bi-level lounge cars, and food service cars;

(6) the term "responsible person" means—

(A) in the case of a station more than 50 percent of which is owned by a public entity, such public entity;

(B) in the case of a station more than 50 percent of which is owned by a private party, the persons providing intercity or commuter rail transportation to such station, as allocated on an equitable basis by regulation by the Secretary of Transportation; and

(C) in a case where no party owns more than 50 percent of a station, the persons providing intercity or commuter rail transportation to such station and the owners of the station, other than private party owners, as allocated on an equitable basis by regulation by the Secretary of Transportation; and

(7) the term "station" means the portion of a property located appurtenant to a right-of-way on which intercity or commuter rail transportation is operated, where such portion is used by the general public and is related to the provision of such transportation, including passenger platforms, designated waiting areas, ticketing areas, restrooms, and, where a public entity providing rail transportation owns the property, concession areas, to the extent that such public entity exercises control over the selection, design, construction, or alteration of the property, but such term does not include flag stops.

SEC. 222. INTERCITY AND COMMUTER RAIL ACTIONS CONSIDERED DISCRIMINATORY.

(a) INTERCITY RAIL TRANSPORTATION.—

(1) ONE CAR PER TRAIN RULE.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person who provides intercity rail transportation to fail to have at least one passenger car per train that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, in accordance with regulations issued under section 225, as soon as practicable, but in no event later than 5 years after the date of enactment of this Act.

(2) NEW INTERCITY CARS.—

(A) GENERAL RULE.—Except as otherwise provided in this subsection with respect to individuals who use wheelchairs, it shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to purchase or lease any new rail passenger cars for use in intercity rail transportation, and for which a solicitation is made later than 30 days after the effective date of this section, unless all such rail cars are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 225.

(B) SPECIAL RULE FOR SINGLE LEVEL PASSENGER COACHES FOR INDIVIDUALS WHO USE WHEELCHAIRS.—Single level passenger coaches shall be required to—

(i) be able to be entered by an individual who uses a wheelchair;

(ii) have space to park and secure a wheelchair;

(iii) have a seat to which a passenger in a wheelchair can transfer, and a space to fold and store such passenger's wheelchair; and

(iv) have a restroom usable by an individual who uses a wheelchair, only to the extent provided in paragraph (3).

(C) SPECIAL RULE FOR SINGLE LEVEL DINING CARS FOR INDIVIDUALS WHO USE WHEELCHAIRS.—Single level dining cars shall not be required to—

(i) be able to be entered from the station platform by an individual who uses a wheelchair; or

(ii) have a restroom usable by an individual who uses a wheelchair if no restroom is provided in such car for any passenger.

(D) SPECIAL RULE FOR BI-LEVEL DINING CARS FOR INDIVIDUALS WHO USE WHEELCHAIRS.—Bi-level dining cars shall not be required to—

(i) be able to be entered by an individual who uses a wheelchair;

(ii) have space to park and secure a wheelchair;

(iii) have a seat to which a passenger in a wheelchair can transfer, or a space to fold and store such passenger's wheelchair; or

(iv) have a restroom usable by an individual who uses a wheelchair.

(3) ACCESSIBILITY OF SINGLE LEVEL COACHES.—

(A) GENERAL RULE.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person who provides intercity rail transportation to fail to have on each train which includes one or more single level rail passenger coaches—

(i) a number of spaces—

(I) to park and secure wheelchairs (to accommodate individuals who wish to remain in their wheelchairs) equal to not less than one-half of the number of single level rail passenger coaches in such train; and

(II) to fold and store wheelchairs (to accommodate individuals who wish to transfer to coach seats) equal to not less than one-half of the number of single level rail passenger coaches in such train,

as soon as practicable, but in no event later than 5 years after the date of enactment of this Act; and

(ii) a number of spaces—

(I) to park and secure wheelchairs (to accommodate individuals who wish to remain in their wheelchairs) equal to not less than the total number of single level rail passenger coaches in such train; and

(II) to fold and store wheelchairs (to accommodate individuals who wish to transfer to coach seats) equal to not less than the total number of single level rail passenger coaches in such train,

as soon as practicable, but in no event later than 10 years after the date of enactment of this Act.

(B) LOCATION.—Spaces required by subparagraph (A) shall be located in single level rail passenger coaches or food service cars.

(C) LIMITATION.—Of the number of spaces required on a train by subparagraph (A), not more than two spaces to park and secure wheelchairs nor more than two spaces to fold and store wheelchairs shall be located in any one coach or food service car.

(D) OTHER ACCESSIBILITY FEATURES.—Single level rail passenger coaches and food service cars on which the spaces required by subparagraph (A) are located shall have a restroom usable by an individual who uses a wheelchair and shall be able to be entered from the station platform by an individual who uses a wheelchair.

(4) FOOD SERVICE.—

(A) SINGLE LEVEL DINING CARS.—On any train in which a single level dining car is used to provide food service—

(i) if such single level dining car was purchased after the date of enactment of this Act, table service in such car shall be provided to a passenger who uses a wheelchair if—

(I) the car adjacent to the end of the dining car through which a wheelchair may enter is itself accessible to a wheelchair;

(II) such passenger can exit to the platform from the car such passenger occupies, move down the platform, and enter the adjacent accessible car described in subclause (I) without the necessity of the train being moved within the station; and

(III) space to park and secure a wheelchair is available in the dining car at the time such passenger wishes to eat (if such passenger wishes to remain in a wheelchair), or space to store and fold a wheelchair is available in the dining car at the time such passenger wishes to eat (if such passenger wishes to transfer to a dining car seat); and

(ii) appropriate auxiliary aids and services, including a hard surface on which to eat, shall be provided to ensure that other equivalent food service is available to individuals with disabilities, including individuals who use wheelchairs, and to passengers traveling with such individuals.

Unless not practicable, a person providing intercity rail transportation shall place an accessible car adjacent to the end of a dining car described in clause (i) through which an individual who uses a wheelchair may enter.

(B) BI-LEVEL DINING CARS.—On any train in which a bi-level dining car is used to provide food service—

(i) if such train includes a bi-level lounge car purchased after the date of enactment of this Act, table service in such lounge car shall be provided to individuals who use wheelchairs and to other passengers; and

(ii) appropriate auxiliary aids and services, including a hard surface on which to eat, shall be provided to ensure that other equivalent food service is available to individuals with disabilities, including individuals who use wheelchairs, and to passengers traveling with such individuals.

(b) COMMUTER RAIL TRANSPORTATION.—

(1) ONE CAR PER TRAIN RULE.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person who provides commuter rail transportation to fail to have at least one passenger car per train that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, in accordance with regulations issued under section 225, as soon as practicable, but in no event later than 5 years after the date of enactment of this Act.

(2) NEW COMMUTER RAIL CARS.—

(A) GENERAL RULE.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to purchase or lease any new rail passenger cars for use in commuter rail transportation, and for which a solicitation is made later than 30 days after the effective date of this section, unless all such rail cars are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 225.

(B) ACCESSIBILITY.—For purposes of this part, and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) a requirement that a rail passenger car used in commuter rail transportation be accessible to or readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, shall not be construed to require—

(i) a restroom usable by an individual who uses a wheelchair if no restroom is provided in such car for any passenger;

(ii) space to fold and store a wheelchair; or

(iii) a seat to which a passenger who uses a wheelchair can transfer.

(c) USED RAIL CARS.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to purchase or lease a used rail passenger car for use in intercity or commuter rail transportation, unless such person makes demonstrated good faith efforts to purchase or lease such a used rail car that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 225.

(d) REMANUFACTURED RAIL CARS.—

(1) REMANUFACTURING.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to remanufacture a rail passenger car for use in intercity or commuter rail transportation so as to extend its usable life for 10 years or more, unless

the rail car, to the maximum extent feasible, is made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 225.

(2) PURCHASE OR LEASE.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to purchase or lease a remanufactured rail passenger car for use in intercity or commuter rail transportation unless such car was remanufactured in accordance with paragraph (1).

(e) STATIONS.—

(1) NEW STATIONS.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a person to build a new station for use in intercity or commuter rail transportation that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 225.

(2) EXISTING STATIONS.—

(A) FAILURE TO MAKE READILY ACCESSIBLE.—

(i) GENERAL RULE.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for a responsible person to fail to make existing stations in the intercity rail transportation system, and existing key stations in commuter rail transportation systems, readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary of Transportation in regulations issued under section 225.

(ii) PERIOD FOR COMPLIANCE.—

(I) INTERCITY RAIL.—All stations in the intercity rail transportation system shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable, but in no event later than 20 years after the date of enactment of this Act.

(II) COMMUTER RAIL.—Key stations in commuter rail transportation systems shall be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than 3 years after the date of enactment of this Act, except that the time limit may be extended by the Secretary of Transportation up to 20 years after the date of enactment of this Act in a case where the raising of the entire passenger platform is the only means available of attaining accessibility or where other extraordinarily expensive structural changes are necessary to attain accessibility.

(iii) DESIGNATION OF KEY STATIONS.—Each commuter authority shall designate the key stations in its commuter rail transportation system, in consultation with individuals with disabilities and organizations representing such individuals, taking into consideration such factors as high ridership and whether such station serves as a transfer or feeder station. Before the final designation of key stations under this clause, a commuter authority shall hold a public hearing.

(iv) PLANS AND MILESTONES.—The Secretary of Transportation shall require the appropriate person to develop a plan for carrying out this subparagraph that reflects consultation with individuals with disabilities affected by such plan and that establishes milestones for achievement of the requirements of this subparagraph.

(B) REQUIREMENT WHEN MAKING ALTERATIONS.—

(i) GENERAL RULE.—It shall be considered discrimination, for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), with respect to alterations of an existing station or part thereof in the intercity or commuter rail transportation systems that affect or could affect the usability of the station or part thereof, for the responsible person, owner, or person in control of the station to fail to make the alterations in such a manner that, to the maximum extent feasible, the altered portions of the station are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs,' upon completion of such alterations.

(ii) ALTERATIONS TO A PRIMARY FUNCTION AREA.—It shall be considered discrimination, for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), with respect to alterations that affect or could affect the usability of or access to an area of the station containing a primary function, for the responsible person, owner, or person in control of the station to fail to make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations, where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General).

(C) REQUIRED COOPERATION.—It shall be considered discrimination for purposes of this part and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) for an owner, or person in control, of a station governed by subparagraph (A) or (B) to fail to provide reasonable cooperation to a responsible person with respect to such station in that responsible person's efforts to comply with such subparagraph. An owner, or person in control, of a station shall be liable to a responsible person for any failure to provide reasonable cooperation as required by this subparagraph. Failure to receive reasonable cooperation required by this subparagraph shall not be a defense to a claim of discrimination under this Act.

SEC. 223. CONFORMANCE OF ACCESSIBILITY STANDARDS.

Accessibility standards included in regulations issued under this part shall be consistent with the minimum guidelines issued by the Architectural and Transportation Barriers Compliance Board under section 504(a) of this Act.

SEC. 224. INTERIM ACCESSIBILITY REQUIREMENTS.

(a) STATIONS.—If final regulations have not been issued pursuant to section 225, for new construction or alterations for which a valid and appropriate State or local building permit is obtained prior to the issuance of final regulations under such section, and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the Uniform Federal Accessibility Standards in effect at the time the building permit is issued shall suffice to satisfy the requirement that stations be readily accessible to and usable by persons with disabilities as required under section 222(e), except that, if such final regulations have not been issued one year after the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines required under section 504(a) of this Act, compliance with such supplemental minimum guidelines shall be necessary to satisfy the requirement that stations be readily accessible to and usable by persons with disabilities prior to issuance of the final regulations.

(b) RAIL PASSENGER CARS.—A person shall be considered to have complied with the requirements of section 222(a) through (d) that a rail passenger car be readily accessible to and usable by individuals with disabilities, if the design for such car complies with the laws, regulations (including the Minimum Guidelines and Requirements for Accessible Design and such supplemental minimum guidelines as are issued under section 504(a) of this Act), and any standard for accessibility issued under the Architectural Barriers Act of 1968 (42 U.S.C. 4151 et seq.) governing accessibility of such cars, to the extent that such laws, regulations, guidelines, and standards are not inconsistent with this part and are in effect at the time such design is substantially completed.

SEC. 225. REGULATIONS.

The Secretary of Transportation shall, within one year after the date of enactment of this Act, issue regulations, in an accessible format, necessary for carrying out this part.

SEC. 226. ENFORCEMENT.

The remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be available to individuals alleging discrimination on the basis of disability in violation of this part.

SEC. 227. EFFECTIVE DATE.

(a) GENERAL RULE.—Except as provided in subsection (b), this part shall become effective 18 months after the date of enactment of this Act.

(b) **Exception**.—Sections 222 and 225 shall become effective on the date of enactment of this Act.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

SEC. 301. DEFINITIONS.

As used in this title:

(1) **Commerce**.—The term "commerce" means travel, trade, traffic, commerce, transportation, or communication—

(A) among the several States;

(B) between any foreign country or any territory or possession and any State; or

(C) between points in the same State but through another State or foreign country.

(2) **Commercial facilities**.—The term "commercial facilities" means facilities—

(A) that are intended for nonresidential use; and

(B) whose operations will affect commerce.

Such term shall not include railroad locomotives, railroad freight cars, railroad cabooses, railroad cars described in section 222 or covered under this title, railroad rights-of-way, or facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968 (42 U.S.C. 3601 et seq.).

(3) **Public accommodation**.—The term "public accommodation" means—

(A) an inn, hotel, motel, or other similar place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor;

(B) a restaurant, bar, or other establishment serving food or drink;

(C) a motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment;

(D) an auditorium, convention center, or lecture hall;

(E) a bakery, grocery store, clothing store, hardware store, shopping center, or other similar retail sales establishment;

(F) a laundromat, dry-cleaner, bank, barber shop, beauty shop, travel service, shoe repair service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other similar service establishment;

(G) a terminal used for public transportation;

(H) a museum, library, gallery, and other similar place of public display or collection;

(I) a park or zoo;

(J) a nursery, elementary, secondary, undergraduate, or postgraduate private school;

(K) a day care center, senior citizen center, homeless shelter, food bank, adoption program, or other similar social service center; and

(L) a gymnasium, health spa, bowling alley, golf course, or other similar place of exercise or recreation,

if such entities are privately operated and their operations affect commerce.

(4) **Public transportation**.—The term "public transportation" means transportation by bus or rail, or by any other conveyance (other than by air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis, but does not include commuter rail transportation or intercity rail transportation as such terms are defined in section 221(2) and (3).

(5) **Rail and railroad**.—The terms "rail" and "railroad" have the meaning given the term "railroad" in section 202(e) of the Federal Railroad Safety Act of 1970 (45 U.S.C. 431(e)).

(6) **Readily achievable**.—The term "readily achievable" means easily accomplishable and able to be carried out without much difficulty or expense. In determining whether an action is readily achievable, factors to be considered include—

(A) the overall size of the business of a covered entity with respect to the number of its employees, the number, type, and location of its facilities, the overall financial resources of the entity and the financial resources of its facility or facilities involved in the removal of the barrier;

(B) the type of operation or operations maintained by a covered entity, including the composition and structure of the workforce, in terms of such factors as functions of the workforce, geographic separateness, and administrative relationship to the extent that such factors contribute to a reasonable determination of whether the action is readily achievable; and

(C) the nature and cost of the action needed.

SEC. 302. PROHIBITION OF DISCRIMINATION BY PUBLIC ACCOMMODATIONS.

(a) General Rule.—No individual shall be discriminated against on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation.

(b) Construction.—

(1) General prohibitions.—

(A) Activities.—

(i) Denial of participation.—It shall be discriminatory to subject an individual or class of individuals on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements, to a denial of the opportunity of the individual or class to participate in or benefit from the goods, services, facilities, privileges, advantages, or accommodations of an entity.

(ii) Participation in unequal benefit.—It shall be discriminatory to afford an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements, with the opportunity to participate in or benefit from a good, service, facility, privilege, advantage, or accommodation that is not equal to that afforded to other individuals.

(iii) Separate benefit.—It shall be discriminatory to provide an individual or class of individuals, on the basis of a disability or disabilities of such individual or class, directly, or through contractual, licensing, or other arrangements, with a good, service, facility, privilege, advantage, or accommodation that is different or separate from that provided to other individuals, unless such action is necessary to provide the individual or class of individuals with a good, service, facility, privilege, advantage, accommodation, or other opportunity that is as effective as that provided to others.

(iv) Limitation.—For purposes of this subparagraph, the term "individual or class of individuals" refers to the clients or customers of the covered public accommodation that enters into the contractual, licensing, or other arrangement.

(B) Integrated settings.—Goods, services, facilities, privileges, advantages, and accommodations shall be afforded to an individual with a disability in the most integrated setting appropriate to the needs of the individual.

(C) Opportunity to participate.—Notwithstanding the existence of separate or different programs or activities provided in accordance with this section, an individual with a disability shall not be denied the opportunity to participate in such programs or activities that are not separate or different.

(D) Administrative methods.—An individual or entity shall not, directly or through contractual or other arrangements, utilize standards or criteria or methods of administration—

(i) that have the effect of discriminating on the basis of disability; or

(ii) that perpetuate the discrimination of others who are subject to common administrative control.

(E) Association.—It shall be discriminatory to exclude or otherwise deny equal goods, services, facilities, privileges, advantages, accommodations, or other opportunities to an individual or entity because of the known disability of an individual with whom the individual or entity is known to have a relationship or association.

(2) Specific prohibitions.—As used in subsection (a), the term "discriminated against" includes—

(A) the imposition or application of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully and equally enjoying any goods, services, facilities, privileges, advantages, or accommodations, unless such criteria can be shown to be necessary for the provision of the goods, services, facilities, privileges, advantages, or accommodations being offered;

(B) a failure to make reasonable modifications in policies, practices, and procedures when such modifications are necessary to afford such goods, services, facilities, privileges, advantages, or accommodations to individuals with disabilities, unless the entity can demonstrate that making such modifications would fundamentally alter the nature of such goods, services, facilities, privileges, advantages, or accommodations;

(C) a failure to take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the entity can demonstrate that taking such steps would fundamentally alter the nature of the good, service, facility, privilege, advantage, or accommodation being offered or would result in undue burden;

(D) a failure to remove architectural barriers, and communication barriers that are structural in nature, in existing facilities, and transportation barriers in existing vehicles and rail passenger cars used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles or rail passenger cars by the installation of a hydraulic or other lift), where such removal is readily achievable;

(E) where an entity can demonstrate that the removal of a barrier under subparagraph (D) is not readily achievable, a failure to make such goods, services, facilities, privileges, advantages, or accommodations available through alternative methods if such methods are readily achievable;

(F) with respect to a facility or part thereof that is altered by, on behalf of, or for the use of an establishment in a manner that affects or could affect the usability of the facility or part thereof, a failure to make alterations in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations, and where the entity is undertaking an alteration that affects or could affect the usability of or access to an area of the facility containing a primary function, the entity shall also make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations, where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General), except that this clause shall no' be construed to require the installation of an elevator for facilities that are less than three stories or that have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

SEC. 303. NEW CONSTRUCTION IN PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES.

(a) Application of Term.—Except as provided in subsection (b), as applied to a—

(1) public accommodation; and

(2) commercial facility,

it shall be considered discrimination to fail to design and construct facilities for first occupancy later than 30 months after the date of enactment of this Act that are readily accessible to and usable by individuals with disabilities, except where an entity can demonstrate that it is structurally impracticable to meet the standards set forth or incorporated by reference in regulations issued under this title.

(b) Elevator.—Subsection (a) shall not be construed to require the installation of an elevator for facilities that are less than three stories or have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

SEC. 304. PROHIBITION OF DISCRIMINATION IN PUBLIC TRANSPORTATION SERVICES PROVIDED BY PRIVATE ENTITIES.

(a) General Rule.—No individual shall be discriminated against on the basis of disability in the full and equal enjcyment of public transportation services provided by a privately operated entity that is primarily engaged in the business of transporting people, but is not in the principal business of providing air transportation, and whose operations affect commerce.

(b) Construction.—As used in subsection (a), the term "discriminated against" includes—

(1) the imposition or application by an entity of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully enjoying the public transportation services provided by the entity, unless such criteria can be shown to be necessary for the provision of the services being offered;

(2) the failure of an entity to—

(A) make reasonable modifications consistent with those required under section 302(b)(2)(B);

(B) provide auxiliary aids and services consistent with the requirements of section 302(b)(2)(C); and

(C) remove barriers consistent with the requirements of section 302(b)(2)(D), (E), and (F);

(3) the purchase or lease of a new rail passenger car that is to be used to provide public transportation services, and for which a solicitation is made later than 30 days after the effective date of this paragraph, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs; and

(4) the remanufacture of a rail passenger car that is to be used to provide public transportation so as to extend its usable life for 10 years or more, or the purchase or lease of such a rail car, unless the rail car, to the maximum extent feasible, is made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

(c) Historical or Antiquated Cars.—

(1) Exception.—To the extent that compliance with subsection (b)(2)(C) or (4) would significantly alter the historic or antiquated character of a historical or antiquated rail passenger car, or a rail station served exclusively by such cars, or would result in violation of any rule, regulation, standard, or order issued by the Secretary of Transportation under the Federal Railroad Safety Act of 1970, such compliance shall not be required.

(2) Definition.—As used in this subsection, the term "historical or antiquated rail passenger cars" means rail passenger cars—

(A) which are not less than 30 years old at the time of their use for transporting individuals;

(B) the manufacturer of which is no longer in the business of manufacturing rail passenger cars; and

(C) which—

(i) has a consequential association with events or persons significant to the past; or

(ii) embodies, or is being restored to embody, the distinctive characteristics of a type of rail passenger car used in the past, or to represent a time period which has passed.

SEC. 305. REGULATIONS.

(a) Accessibility Standards.—Not later than 1 year after the date of enactment of this Act, the Secretary of Transportation shall issue regulations, in an accessible format, necessary for carrying out section 304 that shall include standards applicable to rail facilities and rail passenger cars covered under such section.

(b) Other Provisions.—Not later than 1 year after the date of enactment of this Act, the Attorney General shall issue regulations, in an accessible format, to carry out the remaining provisions of this title not referred to in subsection (a) that include standards applicable to facilities and vehicles covered under section 302.

(c) Standards.—Standards included in regulations issued under subsections (a) and (b) shall be consistent with the minimum guidelines issued by the Architectural and Transportation Barriers Compliance Board in accordance with section 504(a) of this Act.

(d) Interim Accessibility Standards.—If final regulations have not been issued pursuant to this section, for new construction or alterations for which a valid and appropriate State or local building permit is obtained prior to the issuance of final regulations under this section, and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the Uniform Federal Accessibility Standards in effect at the time the building permit is issued shall suffice to satisfy the requirements that buildings and facilities be readily accessible to and usable by persons with disabilities as required under sections 302(b)(2)(F) and 303, except that, if such final regulations have not been issued one year after the Architectural and Transportation Barriers Compliance Board has issued the supplemental minimum guidelines required under section 504(a) of this Act, compliance with such supplemental minimum guidelines shall be necessary to satisfy the requirement that buildings, facilities, vehicles, and rail passenger cars be readily accessible to and usable by persons with disabilities prior to issuance of the final regulations.

SEC. 306. ENFORCEMENT.

(a) In General.—

(1) Availability of remedies and procedures.—The remedies and procedures set forth in section 204(a) of the Civil Rights Act of 1964 (42 U.S.C. 2000a-3(a)) shall be available to any individual who has reasonable grounds for believing that he or she is being or is about to be subjected to discrimination on the basis of disability in violation of this title.

(2) Injunctive relief.—In the case of violations of section 302(b)(2)(D) and (F) and section 303(a), injunctive relief shall include an order to alter facilities to make such facilities readily accessible to and usable by individuals with disabilities to the extent required by this title. Where appropriate, injunctive relief shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by this title.

(b) Enforcement by the Attorney General.—

(1) Denial of rights.—

(A) Duty to investigate.—

(i) In general.—The Attorney General shall investigate alleged violations of this title, and shall undertake periodic reviews of compliance of covered entities under this title.

(ii) Attorney general certification.—On the application of a State or local government, the Attorney General may, in consultation with the Architectural and Transportation Barriers Compliance Board, and after prior notice and a public hearing at which individuals with disabilities are provided an opportunity to testify against such certification, certify that a State law or local building code or similar ordinance that establishes accessibility requirements meets or exceeds the minimum requirements of this Act for the accessibility and usability of covered facilities under this title. At any enforcement proceeding under this section, such certification by the Attorney General shall be rebuttable evidence that such State law or local ordinance does meet or exceed the minimum requirements of this Act.

(B) Potential violation.—If the Attorney General has reasonable cause to believe that—

(i) any person or group of persons is engaged in a pattern or practice of discrimination under this title; or

(ii) any person or group of persons has been discriminated against under this title and such discrimination raises an issue of general public importance,

the Attorney General may commence a civil action in any appropriate United States district court.

(2) Authority of court.—In a civil action under paragraph (1)(B), the court—

(A) may grant any equitable relief that such court considers to be appropriate, including, to the extent required by this title—

(i) granting temporary, preliminary, or permanent relief;

(ii) providing an auxiliary aid or service, modification of policy, practice, or procedure, or alternative method; and

(iii) making facilities readily accessible to and usable by individuals with disabilities;

(B) may award such other relief as the court considers to be appropriate, including monetary damages to persons aggrieved when requested by the Attorney General, but not including punitive damages; and

(C) may, to vindicate the public interest, assess a civil penalty against the entity in an amount—

(i) not exceeding $50,000 for a first violation; and

(ii) not exceeding $100,000 for any subsequent violation.

(3) Single violation.—For purposes of paragraph (2)(C), in determining whether a first or subsequent violation has occurred, a determination in a

single action, by judgment or settlement, that the covered entity has engaged in more than one discriminatory act shall be counted as a single violation.

(4) Judicial consideration.—In a civil action under paragraph (1)(B), the court, when considering what amount of civil penalty, if any, is appropriate, shall give consideration to any good faith effort or attempt to comply with this Act by the entity. In evaluating good faith, the court shall consider, among other factors it deems relevant, whether the entity could have reasonably anticipated the need for an appropriate type of auxiliary aid needed to accommodate the unique needs of a particular individual with a disability.

SEC. 307. EFFECTIVE DATE.

(a) General Rule.—Except as provided in subsection (b), this title shall become effective 18 months after the date of enactment of this Act.

(b) Exception.—Sections 304(b)(3) and 305 shall become effective on the date of enactment of this Act.

TITLE IV—TELECOMMUNICATIONS

SEC. 401. TELECOMMUNICATIONS RELAY SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

(a) Telecommunications.—Title II of the Communications Act of 1934 (47 U.S.C. 201 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 225. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

"(a) Definitions.—As used in this section—

"(1) Common carrier or carrier.—The term 'common carrier' or 'carrier' includes any common carrier engaged in interstate communication by wire or radio as defined in section 3(h) and any common carrier engaged in intrastate communication by wire or radio, notwithstanding sections 2(b) and 221(b).

"(2) TDD.—The term 'TDD' means a Telecommunications Device for the Deaf, which is a machine that employs graphic communication in the transmission of coded signals through a wire or radio communication system.

"(3) Telecommunications relay services.—The term 'telecommunications relay services' means telephone transmission services that provide the ability for an individual who has a hearing impairment or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an individual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses a TDD or other nonvoice terminal device and an individual who does not use such a device.

"(b) Availability of Telecommunications Relay Services.—

"(1) In general.—In order to carry out the purposes established under section 1, to make available to all individuals in the United States a rapid, efficient nationwide communication service, and to increase the utility of the telephone system of the Nation, the Commission shall ensure that interstate and intrastate telecommunications relay services are available, to the extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals in the United States.

"(2) Use of General Authority and Remedies.—For the purposes of administering and enforcing the provisions of this section and the regulations prescribed thereunder, the Commission shall have the same authority, power, and functions with respect to common carriers engaged in intrastate communication as the Commission has in administering and enforcing the provisions of this title with respect to any common carrier engaged in interstate communication. Any violation of this section by any common carrier engaged in intrastate communication shall be subject to the same remedies, penalties, and procedures as are applicable to a vioiation of this Act by a common carrier engaged in interstate communication.

"(c) Provision of Services.—Each common carrier providing telephone voice transmission services shall, not later than 3 years after the date of enactment of this section, provide in compliance with the regulations prescribed under this section, within the area in which it offers service, telecommunications relay services, individually, through designees, through a competitively selected vendor, or in concert with other carriers. A common carrier shall be considered to be in compliance with such regulations—

"(1) with respect to intrastate telecommunications relay services in any State that does not have a certified program under subsection (f) and with respect to interstate telecommunications relay services, if such common carrier (or other entity through which the carrier is providing such relay services) is in compliance with the Commission's regulations under subsection (d); or

"(2) with respect to intrastate telecommunications relay services in any State that has a certified program under subsection (f) for such State, if such common carrier (or other entity through which the carrier is providing such relay services) is in compliance with the program certified under subsection (f) for such State.

"(d) Regulations.—

"(1) In general.—The Commission shall, not later than 1 year after the date of enactment of this section, prescribe regulations to implement this section, including regulations that—

"(A) establish functional requirements, guidelines, and operations procedures for telecommunications relay services;

"(B) establish minimum standards that shall be met in carrying out subsection (c);

"(C) require that telecommunications relay services operate every day for 24 hours per day;

"(D) require that users of telecommunications relay services pay rates no greater than the rates paid for functionally equivalent voice communication services with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination;

"(E) prohibit relay operators from failing to fulfill the obligations of common carriers by refusing calls or limiting the length of calls that use telecommunications relay services;

"(F) prohibit relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of the call; and

"(G) prohibit relay operators from intentionally altering a relayed conversation.

"(2) Technology.—The Commission shall ensure that regulations prescribed to implement this section encourage, consistent with section 7(a) of this Act, the use of existing technology and do not discourage or impair the development of improved technology.

"(3) Jurisdictional separation of costs.—

"(A) In general.—Consistent with the provisions of section 410 of this Act, the Commission shall prescribe regulations governing the jurisdictional separation of costs for the services provided pursuant to this section.

"(B) Recovering costs.—Such regulations shall generally provide that costs caused by interstate telecommunications relay services shall be recovered from all subscribers for every interstate service and costs caused by intrastate telecommunications relay services shall be recovered from the intrastate jurisdiction. In a State that has a certified program under subsection (f), a State commission shall permit a common carrier to recover the costs incurred in providing intrastate telecommunications relay services by a method consistent with the requirements of this section.

"(e) Enforcement.—

"(1) In general.—Subject to subsections (f) and (g), the Commission shall enforce this section.

"(2) Complaint.—The Commission shall resolve, by final order, a complaint alleging a violation of this section within 180 days after the date such complaint is filed.

"(f) Certification.—

"(1) State documentation.—Any State desiring to establish a State program under this section shall submit documentation to the Commission that describes the program of such State for implementing intrastate telecommunications relay services and the procedures and remedies available for enforcing any requirements imposed by the State program.

"(2) Requirements for certification.—After review of such documentation, the Commission shall certify the State program if the Commission determines that—

"(A) the program makes available to hearing-impaired and speech-impaired individuals, either directly, through designees, through a competitively selected vendor, or through regulation of intrastate common carriers, intrastate telecommunications relay services in such State in a manner that meets or exceeds the requirements of regulations prescribed by the Commission under subsection (d); and

"(B) the program makes available adequate procedures and remedies for enforcing the requirements of the State program.

"(3) **Method of funding.**—Except as provided in subsection (d), the Commission shall not refuse to certify a State program based solely on the method such State will implement for funding intrastate telecommunication relay services.

"(4) **Suspension or revocation of certification.**—The Commission may suspend or revoke such certification if, after notice and opportunity for hearing, the Commission determines that such certification is no longer warranted. In a State whose program has been suspended or revoked, the Commission shall take such steps as may be necessary, consistent with this section, to ensure continuity of telecommunications relay services.

"(g) **Complaint.**—

"(1) **Referral of complaint.**—If a complaint to the Commission alleges a violation of this section with respect to intrastate telecommunications relay services within a State and certification of the program of such State under subsection (f) is in effect, the Commission shall refer such complaint to such State.

"(2) **Jurisdiction of commission.**—After referring a complaint to a State under paragraph (1), the Commission shall exercise jurisdiction over such complaint only if—

"(A) final action under such State program has not been taken on such complaint by such State—

"(i) within 180 days after the complaint is filed with such State; or

"(ii) within a shorter period as prescribed by the regulations of such State; or

"(B) the Commission determines that such State program is no longer qualified for certification under subsection (f).".

(b) **Conforming Amendments.**—The Communications Act of 1934 (47 U.S.C. 151 et seq.) is amended—

(1) in section 2(b) (47 U.S.C. 152(b)), by striking "section 223 or 224" and inserting "sections 223, 224, and 225"; and

(2) in section 221(b) (47 U.S.C. 221(b)), by striking "section 301" and inserting "sections 225 and 301".

SEC. 402. CLOSED-CAPTIONING OF PUBLIC SERVICE ANNOUNCEMENTS.

Section 711 of the Communications Act of 1934 is amended to read as follows:

"SEC. 711. CLOSED-CAPTIONING OF PUBLIC SERVICE ANNOUNCEMENTS.

"Any television public service announcement that is produced or funded in whole or in part by any agency or instrumentality of Federal government shall include closed captioning of the verbal content of such announcement. A television broadcast station licensee—

"(1) shall not be required to supply closed captioning for any such announcement that fails to include it; and

"(2) shall not be liable for broadcasting any such announcement without transmitting a closed caption unless the licensee intentionally fails to transmit the closed caption that was included with the announcement.".

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. CONSTRUCTION.

(a) **Rehabilitation Act of 1973.**—Except as otherwise provided in this Act, nothing in this Act shall be construed to reduce the scope of coverage or apply a lesser standard than the coverage required or the standards applied under title V of the Rehabilitation Act of 1973 (29 U.S.C. 790 et seq.) or the regulations issued by Federal agencies pursuant to such title.

(b) **Other Laws.**—Nothing in this Act shall be construed to invalidate or limit any other Federal law or law of any State or political subdivision of any State or jurisdiction that provides greater or equal protection for the rights of individuals with disabilities than are afforded by this Act. Nothing in this Act shall be construed to preclude the prohibition of, or the imposition of restrictions on, smoking in places of public accommodation, in places of employment, in public transportation as defined in sections 211(a)(1) and 301(4), in commuter rail transportation as defined in section 221(2), or in intercity rail transportation as defined in section 221(3).

(c) **Insurance.**—Titles I through IV of this Act shall not be construed to prohibit or restrict—

(1) an insurer, hospital or medical service company, health maintenance organization, or any agent, or entity that administers benefit plans, or similar organizations from underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

(2) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that are based on underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

(3) a person or organization covered by this Act from establishing, sponsoring, observing or administering the terms of a bona fide benefit plan that is not subject to State laws that regulate insurance.

Paragraphs (1), (2), and (3) shall not be used as a subterfuge to evade the purposes of title I and III.

SEC. 502. PROHIBITION AGAINST RETALIATION AND COERCION.

(a) Retaliation.—No individual shall discriminate against any other individual because such other individual has lawfully opposed any act or practice made unlawful by this Act or because such other individual made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this Act.

(b) Interference, Coercion, or Intimidation.—It shall be unlawful to coerce, intimidate, threaten, or interfere with any person in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other person in the exercise or enjoyment of, any right granted or protected by this Act.

(c) Remedies and Procedures.—The remedies and procedures available under sections 105, 204, 213, 226, and 306 of this Act shall be available to persons aggrieved by violations of subsections (a) and (b) with respect to title I, subtitle A of title II, parts I and II of subtitle B of title II, and title III, respectively.

SEC. 503. STATE IMMUNITY.

A State shall not be immune under the eleventh amendment to the Constitution of the United States from an action in Federal court for a violation of this Act. In any action against a State for a violation of the requirements of this Act, remedies (including remedies both at law and in equity) are available for such a violation to the same extent as such remedies are available for such a violation in an action against any public or private entity other than a State.

SEC. 504. REGULATIONS BY THE ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD.

(a) Issuance of Guidelines.—Not later than 9 months after the date of enactment of this Act, the Architectural and Transportation Barriers Compliance Board shall issue minimum guidelines that shall supplement the existing Minimum Guidelines and Requirements for Accessible Design for purposes of titles II and III of this Act.

(b) Contents of Guidelines.—The supplemental guidelines issued under subsection (a) shall establish additional requirements, consistent with this Act, to ensure that buildings, facilities, rail passenger cars, and vehicles are accessible, in terms of architecture and design, transportation, and communication, to individuals with disabilities.

(c) Qualified Historic Properties.—

(1) In general.—The supplemental guidelines issued under subsection (a) shall include procedures and requirements for alterations that will threaten or destroy the historic significance of qualified historic buildings and facilities as defined in 4.1.7(1)(a) of the Uniform Federal Accessibility Standards.

(2) Sites eligible for listing in national register.—With respect to alterations of buildings or facilities that are eligible for listing in the National Register of Historic Places under the National Historic Preservation Act (16 U.S.C. 470 et seq.), the guidelines described in paragraph (1) shall, at a minimum, maintain the procedures and requirements established in 4.1.7(1) and (2) of the Uniform Federal Accessibility Standards.

(3) Other sites.—With respect to alterations of buildings or facilities designated as historic under State or local law, the guidelines described in paragraph (1) shall establish procedures equivalent to those established by 4.1.7(1)(b) and (c) of the Uniform Federal Accessibility Standards, and shall require, at a minimum, compliance with the requirements established in 4.1.7(2) of such standards.

SEC. 505. ATTORNEYS' FEES.

In any action or administrative proceeding commenced pursuant to this Act, the court or agency, in its discretion, may allow the prevailing party, other than the United States, reasonable attorneys' fees, including litigation expenses, and costs, and the United States shall be liable for the foregoing the same as a private individual.

SEC. 506. TECHNICAL ASSISTANCE.

(a) Plan for Assistance.—

(1) In general.—Not later than 180 days after the date of enactment of this Act, the Attorney General, in consultation with the Chairman of the Equal Employment Opportunity Commission, the Secretary of Transportation, the Chairperson of the Architectural and Transportation Barriers Compliance Board, and the Chairman of the Federal Communications Commission, shall develop a plan to assist entities covered under this Act, and other Federal agencies, in understanding the responsibility of such entities and agencies under this Act.

(2) Publication of plan.—The Attorney General shall publish the plan referred to in paragraph (1) for public comment in accordance with subchapter II of chapter 5 of title 5, United States Code (commonly known as the Administrative Procedure Act).

(b) Agency and Public Assistance.—The Attorney General may obtain the assistance of other Federal agencies in carrying out subsection (a), including the National Council on Disability, the President's Committee on Employment of People with Disabilities, the Small Business Administration, and the Department of Commerce.

(c) Implementation.—

(1) Rendering assistance.—Each Federal agency that has responsibility under paragraph (2) for implementing this Act may render technical assistance to individuals and institutions that have rights or duties under the respective title or titles for which such agency has responsibility.

(2) Implementation of titles.—

(A) Title I.—The Equal Employment Opportunity Commission and the Attorney General shall implement the plan for assistance developed under subsection (a), for title I.

(B) Title II.—

(i) Subtitle A.—The Attorney General shall implement such plan for assistance for subtitle A of title II.

(ii) Subtitle B.—The Secretary of Transportation shall implement such plan for assistance for subtitle B of title II.

(C) Title III.—The Attorney General, in coordination with the Secretary of Transportation and the Chairperson of the Architectural Transportation Barriers Compliance Board, shall implement such plan for assistance for title III, except for section 304, the plan for assistance for which shall be implemented by the Secretary of Transportation.

(D) Title IV.—The Chairman of the Federal Communications Commission, in coordination with the Attorney General, shall implement such plan for assistance for title IV.

(3) Technical assistance manuals.—Each Federal agency that has responsibility under paragraph (2) for implementing this Act shall, as part of its implementation responsibilities, ensure the availability and provision of appropriate technical assistance manuals to individuals or entities with rights or duties under this Act no later than six months after applicable final regulations are published under titles I, II, III, and IV.

(d) Grants and Contracts.—

(1) In general.—Each Federal agency that has responsibility under subsection (c)(2) for implementing this Act may make grants or enter into contracts to effectuate the purposes of this Act.

(2) Dissemination of information.—Such grants and contracts, among other uses, may be designed to ensure wide dissemination of information about the rights and duties established by this Act and to provide information and technical assistance about techniques for effective compliance with this Act.

(e) Failure to Receive Assistance.—An employer, public accommodation, or other entity covered under this Act shall not be excused from compliance with the requirements of this Act because of any failure to receive technical assistance under this section, including any failure in the development or dissemination of any technical assistance manual authorized by this section.

SEC. 507. ILLEGAL USE OF DRUGS.

(a) In General.—For purposes of this Act, except as provided in subsection (c), the current illegal use of a drug does not constitute a disability.

(b) Limitation.—For purposes of this section, an individual shall not be considered a current illegal user of a drug if such individual—

(1) has successfully completed a supervised drug rehabilitation program and is no longer illegally using drugs, or has otherwise been rehabilitated successfully and is no longer illegally using drugs;

(2) is participating in a supervised drug rehabilitation program and is no longer illegally using drugs; or

(3) is erroneously regarded as being an illegal user of drugs but is not illegally using drugs.

It shall not be a violation of this Act for a covered entity to adopt or administer reasonable policies or procedures designed to ensure that an individual described in paragraph (1) or (2) is no longer illegally using drugs.

(c) Health and Social Services.—Notwithstanding subsection (a) and section 508(b)(3), an individual shall not be denied health or social services on the basis of the current illegal use of drugs, if such individual is otherwise entitled to such services.

(d) Drug Testing.—Nothing in this section shall be construed to encourage, prohibit, restrict, or authorize the conducting of drug testing.

(e) Definitions.—For purposes of this section—

(1) the term "drug" means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812); and

(2) the term "illegal use of drugs" does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

SEC. 508. DEFINITIONS.

(a) Homosexuality and Bisexuality.—For purposes of the definition of "disability" in section 3(2), homosexuality and bisexuality shall not be considered impairments.

(b) Certain Conditions.—Under this Act, the term "disability" shall not include—

(1) transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders;

(2) compulsive gambling, kleptomania, or pyromania; or

(3) psychoactive substance use disorders resulting from current use of illegal drugs.

Purpose and Summary

The purpose of the Americans with Disabilities Act (ADA) is to provide a clear and comprehensive national mandate to end discrimination against individuals with disabilities and to bring persons with disabilities into the economic and social mainstream of American life; to provide enforceable standards addressing discrimination against individuals with disabilities; and to ensure that the Federal government plays a central role in enforcing these standards on behalf of individuals with disabilities.

The Energy and Commerce Committee's action on the bill was limited to those matters within the Committee's sole or shared jurisdiction. Those matters include provisions affecting rail transportation services provided by Amtrak, commuter authorities, and private entities; provisions affecting telecommunications services for the speech- and hearing-impaired; and provisions generic to the entire bill, including certain definitions, defenses, and limitations on the scope of coverage.

H.R. 2273, as amended by the Committee, requires that, within five years, Amtrak and all commuter authorities have at least one car per train that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. It also requires that, with certain specified exceptions, all new rail passenger cars purchased or leased for intercity and commuter rail transportation be fully accessible to all disabled individuals. Wheelchair accessibility is not required in all cases for certain types of new rail cars, including single-level Amtrak passenger coaches. However, Amtrak must take various steps specified in the bill to accommodate individuals who use wheelchairs by other means.

The legislation also requires that Amtrak stations and key commuter stations, within 20 years and 3 years respectively, be made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. A waiver procedure is provided in the case of certain extraordinarily expensive structural changes, permitting an extension of up to 20 years to accomplish these changes at key commuter stations. The bill also requires that any new Amtrak or commuter stations be constructed so as to be accessible to disabled individuals. It improves current law by clearly delineating the legal responsibility of Amtrak, commuter authorities, other public owners, and private owners for making stations accessible.

In the area of telecommunications, the bill requires the Federal Communications Commission (FCC) to ensure that interstate and intrastate relay services are available, to the extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals. These services must be provided by common carriers within three years, using any of several methods specified in the legislation. FCC certification would be available to state programs designed to make relay services available on an interstate basis. In addition, the Committee added a provision requiring any television public service announcement produced or funded in whole or in part by any Federal agency or instrumentality to include closed captioning for the hearing-impaired.

BACKGROUND AND NEED FOR THE LEGISLATION

H.R. 2273 would provide broad-based protection against discrimination for 43 million Americans with disabilities. It covers employment, public transportation, other programs and services provided by public entities, public accommodations and services (including transportation) provided by private entities, and telecommunications.

Under section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794, Federal agencies, the United States Postal Service, and all other programs and activities receiving Federal financial assistance are prohibited from discriminating against an otherwise qualified individual with a disability on the basis of such disability. However, section 504 does not apply to private sector entities that do not receive Federal funds. Moreover, 17 years of experience with section 504—in the development and issuance of regulations, guidelines, and standards, in the implementation of those requirements, and in the interpretation of the law—have demonstrated the need for further legislative action in this area.

The ADA was introduced in both the House (H.R. 2273) and Senate (S. 933) on May 9, 1989. Similar legislation had been introduced in the 100th Congress. These bills originated in a proposal from the National Council on Disability, an independent Federal agency authorized to make recommendations to Congress regarding individuals with disabilities. 29 U.S.C. 781. Legislation of this type was also recommended in the 1988 report of the Presidential Commission on the Human Immunodeficiency Virus Epidemic chaired by Admiral James Watkins.

In the House, H.R. 2273 was referred to four Committees—Energy and Commerce, Education and Labor, Judiciary, and Public Works and Transportation. The Energy and Commerce Committee's action on the bill was limited to those matters within its sole and shared jurisdiction. Accordingly, the remainder of this discussion is confined to those matters.

TRANSPORTATION

Transportation plays a central role in the lives of all Americans. It is a veritable lifeline to the economic and social benefits that our Nation offers its citizens. The absence of effective access to the transportation network can mean, in turn, the inability to obtain satisfactory employment. It can also mean the inability to take full advantage of the services and other opportunities provided by both the public and private sectors.

The absence of adequate and accessible transportation can present a serious barrier to disabled individuals seeking integration into the community, impeding their efforts to lead spontaneous, independent lives. For this reason, the National Council on Disability has declared that "accessible transportation is a critical component of a national policy that promotes the self-reliance and self-sufficiency of people with disabilities."

The United States has made significant progress in this area since enactment of the Rehabilitation Act of 1973. That Act and regulations issued under it mandate that transportation systems receiving Federal financial assistance be made accessible to individuals with disabilities. As a witness before the Subcommittee on Transportation and Hazardous Materials observed in his testimony on the ADA, "The only question at this point is not whether transportation systems and all aspects of those systems should be covered, it is how they should be covered." See *Americans with Disabilities Act: Hearings on H.R. 2273 and S. 933*, Serial No. 101-95 at p. 144 (September 28, 1989) (statement of Tim Cook).

The ADA renews the commitment made by Congress in enacting section 504 to promote the mainstreaming of individuals with disabilities by providing clear, consistent, and enforceable standards addressing discrimination on the basis of disabilities and by ensuring that the Federal government plays a central role in enforcing those standards. Thus, the bill is designed to eliminate discrimination on the basis of disability in, among other areas, passenger rail transportation provided by both the public and private sectors. At the same time, 17 years of experience with the Rehabilitation Act has enabled the Congress in this legislation to address several important issues related to the accessibility of passenger rail transportation that have arisen in the administration of section 504.

First, while the Department of Transportation's (DOT) section 504 regulations, issued in 1979, set forth specific accessibility requirements for the stations and passenger cars of railroads receiving Federal financial assistance, 49 C.F.R. 27.73, the Federal Railroad Administration (FRA) apparently takes the position that those regulations apply only to Amtrak and not to commuter railroads.[1] Moreover, not all commuter railroads receive Federal financial assistance. Thus, while some commuter authorities have undertaken, as a matter of policy or pursuant to other laws, to provide accessible transportation to individuals with disabilities, others have not been willing to adopt this approach as readily or as fully.

Second, to the extent if any that the regulations cited above do apply to commuter railroads, those regulations do not distinguish appropriately between the differing operational characteristics of Amtrak and the commuter railroads. Thus, statutory clarification is needed to guide the relevant agencies—meaning not only DOT and FRA but also the Architectural and Transportation Barriers Compliance Board (ATBCB)—in the promulgation of accessibility regulations and guidelines that are sensitive to the specific nature and functions of intercity and commuter rail transportation, respectively.

Third, the section 504 regulations applicable to Amtrak demonstrate little regard for the different types of equipment used in various Amtrak trains. Instead, they simply provide that to be considered accessible a rail passenger car must have (1) space to park and secure one or more wheelchairs, (2) space to store and fold one or more wheelchairs, and (3) a restroom large enough to accommodate a wheelchair. 49 C.F.R. 27.73(b)(2). Accessibility issues, however, differ from car type to car type and from train to train, depending on the function a car is intended to serve and on whether the train is composed of single-level or bi-level cars. Legislation should require refinement of the section 504 regulations to address the need to treat these differing cars and trains appropriately.

Fourth, experience suggests that while the goals set by the Rehabilitation Act for the attainment of accessibility were commendable and worthy, the deadlines for achieving the goals set by the 1979 regulations were too ambitious relative to the resources that have been provided to Amtrak by the Federal government. The appropriation for Amtrak in fiscal year 1980, one year after the section 504 regulations were promulgated, was $873.4 million. Of that amount, $203 million was allocated for capital acquisitions and improvements. During the last decade, however, Federal support for Amtrak service has dropped dramatically. In fiscal year 1986, the amount appropriated for capital was a mere $2 million, with a total appropriation of $590.7 million. The fiscal year 1990 appropriation was $604.7 million, of which approximately $83 million was allocated for capital—a reduction over 10 years in *real* terms of more than 50 percent in the overall subsidy and more than 70 percent in the capital subsidy.

---

[1] In 49 C.F.R. Part 609, the Urban Mass Transportation Administration (UMTA) has established accessibility requirements for rapid rail vehicles (49 C.F.R. 609.17) and light rail vehicles (49 C.F.R. 609.19). Obviously, these provisions do not apply to commuter rail passenger cars, whose design and safety features are regulated by the Federal Railroad Administration under the Federal Railroad Safety Act of 1970.

Torn between having to operate a viable national passenger railroad and having to invest funds to make every one of its nearly 500 stations accessible within ten years, Amtrak appropriately chose to give priority to the mission described in section 101(a) of the Rail Passenger Service Act: "provid[ing], to the extent that the Corporation's budget allows, modern, cost-efficient, and energy-efficient intercity railroad passenger service between crowded urban areas and in other parts of the country." It has not been suggested by Amtrak or any other interested party that a passenger railroad receiving Federal funds should not be required to make its system accessible; indeed, it would be inappropriate and unjustified to suggest that the civil rights of disabled Americans should be held hostage to economic considerations. However, legislation is necessary to ensure that accessibility is achieved in a manner and within a time frame that is reasonable to both Amtrak and to disabled individuals, recognizing the realities of the Federal budget process and Amtrak's financial limitations.

Finally, because the Rehabilitation Act covers only programs and agencies receiving Federal financial assistance, it does not address the need for accessibility in public transportation services provided by private entities. While very little rail passenger service is supplied by wholly private firms, there are a handful of such operations. Like all other privately owned entities serving the general public, these private railroads should be addressed by the ADA.

TELECOMMUNICATIONS

With the enactment of the Communications Act of 1934, Congress established the goal of universal telephone service for all Americans. That goal is even more important today than it was when first enunciated a half-century ago because telecommunications and the need for information drive modern society. The telephone is therefore no longer a luxury item but an essential component of our daily lives. Yet for many of the Nation's 26 million hearing- and speech-impaired persons, the goal of universal service remains an unfulfilled promise.

The inadequacy or absence of telecommunications service for these Americans is not the result of a technology gap. By connecting telecomunications devices for the deaf (TDDs) to an operator relay system, a handful of states have already put programs in place for provision of such service. In these systems, a relay operator, acting as an intermediary between the parties, translates typed TDD messages by voice and vice versa. Through these relay systems, a large segment of the population has been given an opportunity to escape from a world of virtual silence and enter into the world of modern communication. In California alone, the call volume has reached approximately 245,000 calls per month.

Yet most States have not progressed as rapidly in the deployment of this technology as some others. And in July 1989, the FCC found that interstate TDD relay systems are virtually nonexistent. This situation is incompatible both with the universal service goal embodied in the Communications Act and with other actions taken by the Congress in recent years to improve telephone service for the hearing- and speech-impaired.[2] Legislation therefore appears necessary to establish a seamless interstate and intrastate relay system for the use of TDDs that will allow a communications-impaired caller to communicate with anyone who has a telephone, anywhere in the country.

Telephone usage among the general population continues to increase dramatically every year. It is reasonable to expect, therefore, that when an effective TDD relay network becomes a reality in the United States, it will not only enjoy heavy usage among hearing- and speech-impaired Americans but will also help integrate them into the business and social maintstream of the Nation. Legislation will thus ensure that the full benefits of the telephone network are extended and shared equally by all our citizens.

HEARINGS

The Committee's Subcommittee on Telecommunications and Finance held one day of hearings on Title V of H.R. 2273 on September 27, 1989. Testimony was received from six witnesses, with additional material submitted for the record by two parties. The witnesses testifying at the hearing were the Honorable Steny H. Hoyer, Member of Congress; Linda D. Hershman, General Manager for Government Relations, Southern New England Telephone Co. on behalf of the United States Telephone Association; Dr. I. King Jordan, President, Gallaudet University; The Honorable Gail Garfield Schwartz, Deputy Chairman, New York State Public Service Commission; Karen Peltz Strauss, Esquire, National Center for Law and the Deaf, Gallaudet University; and Merrill R. Tutton, Vice President for Consumer Services, American Telephone and Telegraph Co. Additional material was submitted for record by the Honorable Steve Gunderson, Member of Congress, and Direct Connect (Minnesota Relay Service).

The Committee's Subcommittee on Transportation and Hazardous Materials held one day of hearings on H.R. 2273 and the related bill S. 933 on September 28, 1989. Testimony was received from 13 witnesses, with additional material submitted for the record by three parties. The witnesses testifying at the hearing were The Honorable Jeffrey N. Shane, Assistant Secretary for Policy and International Affairs, Department of Transportation, accompanied by Mark Lindsey, Chief Counsel, Federal Railroad Administration and John Cline, Associate Administrator for Budget and Policy, Urban Mass Transportation Administration; W. Graham Claytor, Jr., President, National Railroad Passenger Corporation (Amtrak), accompanied by David Carol, Senior Director, Government Affairs; Lawrence Roffe, Executive Director, Architectural and Transportation Barriers Compliance Board, accompanied by Dennis Cannon, Accessibilities Specialist; Philip Calkins, Director of Public Affairs, President's Committee on Employment of People with Disabilities; Tim Cook, Executive Director, National Disability Action Center;

---

[2] In the Hearing Aid Compatibility Act of 1988 (47 U.S.C. 610), for example, Congress required all telephones to be able to be used with a hearing aid. In the Telecommunications Accessibility and Enhancement Act (40 U.S.C. 762), the Federal government was required to provide TDD relay systems so that hearing- and speech-impaired citizens could communicate with their Government officials and elected representatives.

Scott Fazekas, American Institute of Architects; Philp A. Pagano, Assistant Executive Director for Corporate Administration, Chicago METRA; Henry Miller, Director of Government and Community Relations, New York Metropolitan Transit Authority; and Carol Lavoritano, Director, Program Policy and Analysis Department, Southeastern Pennsylvania Transportation Authority.

COMMITTEE CONSIDERATION

On October 12, 1989, the Subcommittee on Telecommunications and Finance met in open session and ordered reported the bill H.R. 2273, amended, by a voice vote, a quorum being present.

On March 13, 1990, the Committee met in open session and, by unanimous consent, discharged the Subcommittee on Transportation and Hazardous Materials from the further consideration of the bill H.R. 2273. On the same day, the Committee ordered reported the bill H.R. 2273, with an amendment, by a recorded vote of 40 to 3, a quorum being present.

SUBSEQUENT ACTION IN THE HOUSE

H.R. 4807, a bill to establish clear and comprehensive prohibition of discrimination on the basis of disability, was introduced on May 14, 1990 and constitutes an amalgamation of the differing versions of H.R. 2273 ordered reported by the four Committees that considered the earlier bill. When H.R. 2273 is considered on the floor, the text of H.R. 4807 is expected to be made in order under the rule as original text. H.R. 4807 contains the language ordered reported by the Committee on Energy and Commerce applicable to intercity and commuter rail transportation, as well as to rail transportation service provided by private entites. Accordingly, the section-by-section analysis in this report covering these rail transportation matters serves as the relevant analysis for the text of the legislation to be considered by the House.

COMMITTEE OVERSIGHT FINDINGS

Pursuant to clause 2(l)(3)(A) of rule XI of the Rules of the House of Representatives, the Committee makes the oversight findings and recommendations reflected in this report.

COMMITTEE ON GOVERNMENT OPERATIONS

Pursuant to clause 2(l)(3)(D) of rule XI of the Rules of the House of Representatives, the Committee states that no oversight findings have been submitted to it by the Committee on Government Operations.

COMMITTEE COST ESTIMATE

In compliance with clause 7(a) of rule XIII of the Rules of the House of Representatives, the Committee believes that the cost of implementing and administering H.R. 2273, as amended, will be no more than that stated by the Congressional Budget Office in the estimate accompanying this report.

CONGRESSIONAL BUDGET OFFICE ESTIMATE

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, April 6, 1990.

Hon. JOHN D. DINGELL,
Chairman, Committee on Energy and Commerce,
U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the attached revised cost estimate of H.R. 2273, the Americans with Disabilities Act of 1990, as ordered reported by the Committee on Energy and Commerce on March 13, 1990. This revision includes an estimate of the impact of the bill on the National Railroad Passenger Corporation (Amtrak).

If you wish further details on this estimate, we will be pleased to provide them.

Sincerely,

ROBERT D. REISCHAUER, *Director.*

Attachment.

CONGRESSIONAL BUDGET OFFICE, COST ESTIMATE

1. Bill number: H.R. 2273.
2. Bill title: Americans with Disabilities Act of 1990.
3. Bill status: As ordered reported by the House Committee on Energy and Commerce on March 13, 1990.
4. Bill purpose: To prohibit discrimination against people with disabilities in areas such as employment practices, public accommodations and services, transportation services and telecommunication services.
5. Estimated cost to the Federal Government:

[By fiscal years, in millions of dollars]

	1991	1992	1993	1994	1995
Estimated authorization level	5	6	19	31	31
Estimated outlays	5	6	19	31	31

Basis of estimate: Equal Employment Opportunities Commission (EEOC). Title I—Employment—would prohibit discrimination by employers against qualified individuals with disabilities. H.R. 2273 would require the EEOC to issue regulations to carry out Title I and to provide for enforcement of the provisions. In addition, the EEOC would ensure the availability of a technical assistance manual to those entities with rights of responsibilities under this act. Although no specific authorization level is stated in the bill, CBO estimates the cost of these activities would be $1 million in fiscal year 1991, $2 million in fiscal year 1992, $15 million in fiscal year 1993, and $27 million annually in fiscal years 1994–95. This estimate is based on the EEOC's past experience with enforcing civil rights standards and assumes that approximately 259 additional full-time equivalent employees would be needed for the Commission's 50 field offices and that approximately 58 additional staff would be needed for the EEOC headquarters.

Department of Transportation: H.R. 2273 would direct the Secretary of Transportation to issue regulations including standards applicable to the facilities and vehicles covered by these provisions. Also, the Secretary of Transportation would make available technical assistance manuals to those with rights and responsibilities under this act. CBO estimates that the cost to the federal government of developing these regulations and manuals would be about $0.5 million in fiscal year 1991.

In addition, the bill would require the National Railroad Passenger Corporation (Amtrak) to take a number of steps to make stations and trains accessible to the handicapped. Based on information provided by Amtrak, CBO estimates that these requirements would increase its costs by $2 million to $3 million per year, mostly to make stations accessible. Amtrak is a private corporation and is not part of the federal government. However, it receives a substantial subsidy in the form of government grants each year, and some of its additional costs could be borne by the government through the grant program.

The federal government might also bear some part of the costs of making transit services accessible to the handicapped, which are discussed below. Like Amtrak, the capital and operating costs of most mass transit systems are heavily subsidized by the federal government through grants by the Department of Transportation. We cannot predict the extent to which these grants might be increased to compensate for the additional costs attributable to H.R. 2273.

Architectural and Transportation Barriers Compliance Board: H.R. 2273 would require the board to issue minimum guidelines that would supplement existing minimum guidelines for accessible design of buildings, facilities and vehicles. Although no specific authorization level is stated in the bill, CBO estimates the cost of these guidelines would be $0.2 million in fiscal year 1991. This estimate assumes salaries and expense costs of $104,000 and research contract costs of $80,000. Although the bill does not state specifically that the guidelines should be maintained, the board currently maintains the existing guidelines and most likely would maintain the new guidelines. CBO estimates the cost of maintaining the guidelines would be $0.2 million every other year beginning in fiscal year 1993.

Department of Justice: H.R. 2273 also would require the Attorney General to develop regulations to prohibit discrimination in public services and to investigate alleged violations of public accommodation provisions, which would include undertaking periodic reviews of compliance of covered entities under Title III. These regulations would ensure that a qualified individual with a disability would not be excluded from participation in, or denied benefits by a department, agency, special purpose district or other instrumentality of a state or local government. In addition, H.R. 2273 would require the Department of Justice to make available technical assistance manuals to those with rights and responsibilities under this act. We estimate the cost of these activities would be $3 million in fiscal year 1991 and $4 million annually in fiscal years 1992-1995.

Federal Communications Commission (FCC): H.R. 2273 requires the FCC to prescribe and enforce regulations with regard to telecommunications relay services. These regulations include: (1) establishing functional regulations, guidelines and operations for telecommunications relay services, (2) establishing minimum standards that shall be met by common carriers, and (3) ensuring that users of telecommunications relay services pay rates no greater than rates paid for functionally equivalent voice communication services with respect to duration of call, the time of day, and the distance from point to origination to point of termination. In addition, H.R. 2273 would require the FCC to make available technical assistance manuals to those with rights and responsibilities under this act. While no authorization level is stated, CBO estimates the cost of developing and enforcing these regulations to be $0.1 million in fiscal year 1991, $0.1 million in fiscal year 1992, $0.2 million in 1993, $0.2 million in 1994, and $0.1 million in 1995.

H.R. 2273 would require all federally funded public service announcements to include closed captioning. CBO estimates that the cost to the federal government for closed captioning public service announcements would be an additional $235 for a 60-second spot. The cost could be lower if the public service announcement is only partially funded by the federal government. It is difficult to determine how many public service announcements—funded in whole or part by the federal government—are produced each year. Based on information from several federal agencies, CBO expects that the Department of Defense would have to close caption its public service announcements and the Department of Agriculture would have to close caption its Woodsy Owl announcements. The additional cost to the federal government for these announcements would be less than $10,000 annually. This estimate does not include announcements that are produced and broadcast locally or announcements that are produced for use in public schools. For example, local guard and reserve organizations produce and broadcast their own public service announcements, but the production cost is picked up by the Department of Defense.

In addition to the federal costs of establishing and enforcing new regulations, H.R. 2273 could also affect the federal budget indirectly through changes in employment and earnings. If employment patterns and earnings were to change, both federal spending and federal revenues could be affected. There is, however, insufficient data to estimate these secondary effects on the federal budget.

6. Estimated cost to State and local governments: Enactment of H.R. 2273 would result in substantial costs for State and local governments, but CBO cannot estimate the total impact with any certainty. Most of these costs would involve actions required to make public transit systems accessible to the handicapped. In addition, some local governments might incur additional costs to make newly-constructed public buildings accessible, as required by this bill, but most already face similar requirements.

Public buildings.—H.R. 2273 would mandate that newly constructed state and local public buildings be made accessible to the handicapped. All states currently mandate accessibility in newly-constructed, state-owned public buildings and therefore would incur little or no costs if this bill were to be enacted. It is possible, however, in rare cases, for some local governments not to have such law. These municipalities would incur additional costs for making newly-constructed, locally-owned public buildings accessible if this bill were to become law. According to a study conducted by the Department of Housing and Urban Development in 1978, the cost of making a building accessible to the handicapped is less than one percent of total construction costs if the accessibility features are included in the original building design. Otherwise the costs could be much higher.

Public transit.—CBO cannot provide a comprehensive analysis of the impact of H.R. 2273 on mass transit costs of state and local governments. The scope of the bill's requirements in this area is very broad, many provisions are subject to interpretation, and the potential effects on transit systems are significant and complex. While we have attempted to discuss the major potential areas of cost, we cannot assign a total dollar figure to these costs.

H.R. 2273 would require that all new buses and rail vehicles be accessible to handicapped individuals, including those who use wheelchairs, and that public transit operators offer paratransit services as a supplement to fixed route public transportation. In addition, the bill includes a number of requirements relating to the accessibility of mass transportation facilities. Specifically, all new facilities, alterations to existing facilities, intercity rail stations, and key stations in rapid rail, commuter rail, and light rail systems would have to be accessible to handicapped persons.

Bus and Paratransit Services.—CBO estimates that it would cost between $20 million and $30 million a year over the next several years to purchase additional lift-equipped buses as required by H.R. 2273. Additional maintenance costs would increase each year as lift-equipped buses are acquired, and would reach $15 million by 1994. The required paratransit systems would add to those costs.

Based on the size of the current fleet and on projections of the American Public Transit Association (APTA), CBO expects that public transit operators will purchase about 4,300 buses per year, on average, over the next five years. About 38 percent of the existing fleet of buses is currently equipped with lifts to make them accessible to handicapped individuals and, based on APTA projections, we estimate that an average of 55 percent to 60 percent of future bus purchases will be lift-equipped in the absence of new legislation. Therefore, this bill would require additional annual purchases of about 1,800 lift-equipped buses. Assuming that the added cost per bus for a lift will be $10,000 to $15,000 at 1990 prices, operators would have to spend from $20 million to $30 million per year, on average, for bus acquisitions as a result of this bill.

Maintenance and operating costs of lifts have varied widely in different cities. Assuming that additional annual costs per bus average $1,500, we estimate that it would cost about $2 million in 1991, increasing to $15 million in 1995, to maintain and operate the additional lift-equipped buses required by H.R. 2273.

In addition, bus fleets may have to be expanded to make up for the loss in seating capacity and the increase in boarding time needed to accommodate handicapped persons. The cost of expanding bus fleets is uncertain since the extent to which fleets would need to be expanded depends on the degree to which handicapped persons would use the new lift-equipped buses. If such use increases significantly, added costs could be substantial.

These costs are sensitive to the number of bus purchases each year, which may very considerably. In particular, existing Environmental Protection Agency emissions regulations may result in accelerated purchases over the next two years as operators attempt to add to their fleets before much more stringent standards for new buses go into effect. Such variations in purchasing patterns would affect the costs of this bill in particular years. In addition, these estimates reflect total costs for all transit operators, regardless of their size. Costs may fall disproportionately on smaller operators, who are currently more likely to choose options other than lift-equipped buses to achieve handicapped access.

The bill also requires transit operators to offer paratransit or other special transportation services providing a level of service comparable to their fixed route public transportation. Because we cannot predict how this provision will be implemented, and because the demand for paratransit services is very uncertain, we cannot estimate the potential cost of the paratranist requirement, but it could be singificant. The demand for paratransit services probably would be reduced by the greater availability of lift-equipped buses.

New regulations recently proposed by the Department of Transportation concerning bus and paratransit services include requirements much the same as those in H.R. 2273. Should these proposed rules become final in their current form, the mandates of the bill would have much less effect.

Transit Facilities.—We expect that the cost of compliance with the provisions concerning key stations would be significant for a number of transit systems, and could total several hundred million dollars (at 1990 prices) over 20 years. The precise level of these costs would depend on future interpretation of the bill's requirements and on the specific options chosen by transit systems to achieve accessibility. The costs properly attributable to this bill would also depend on the degree to which transit operators will take steps to achieve accessibility in the absence of new legislation.

In 1979, CBO published a study, (*Urban Transportation for Handicapped Persons: Alternative Federal Approaches*, November 1979), that outlined the possible costs of adapting rail systems for handicapped persons. In that study, CBO estimated that the capital costs of adapted key subway, commuter and light rail stations and vehicles for wheelchair users would be $1.1 billion to $1.7 billion, while the additional annual operating and maintenance costs would be $14 million to $21 million.

Based on a 1981 survey of transit operators, the Department of Transportation has estimated that adapting existing key stations and transit vehicles would require additional capital expenditures of $2.5 billion over 30 years and would result in additional annual operating costs averaging $57 million (in 1979 dollars) over that period. Many groups representing the handicapped asserted that the assumptions and methodology used by the transit operators in this survey tended to severely overstate these costs. The department estimated that the cumulative impact of using the assumptions put forth by these groups could lower the total 30-year costs to below $1 billion.

CBO believes that the figures in both these studies significantly overstate the cost of the requirements of H.R. 2273, because, in the intervening years, several of the major rail systems have begun to take steps to adapt a number of their existing stations for handicapped access. In addition, it seems likely that the number of stations that would be defined as "key" under this bill would be much lower than that assumed in either of those studies. Furthermore, the Metropolitan Transit Authority in New York and the Southeastern Pennsylvania Transportation Authority in Philadelphia, two large rail systems, have entered into settlement agreements with handicapped groups that include plans for adaption of key stations. These plans would probably satisfy the bill's requirement for accessibility of key stations. Other rail systems are also taking steps to make existing stations accessible. Therefore, we expect that the cost of the bill's requirements concerning key stations would probably not be greater than $1 billion (in 1990 dollars) and might be considerably less.

7. Estimate comparison: None.

8. Previous CBO estimate:

CBO prepared an estimate of S. 933, Americans with Disabilities Act of 1989, as ordered reported by the Senate Committee on Labor and Human Resources on August 2, 1989. We also prepared an estimate of H.R. 2273, Americans with Disabilities Act of 1989, as ordered reported by the Committee on Education and Labor on November 14, 1989. The estimates in this bill are similar to those of the Education and Labor version of H.R. 2273 and are substantially different from those in the Senate bill.

9. Estimate prepared by: Cory Leach (226-2820) and Marjorie Miller (226-2860).

10. Estimate approved by: C.G. Nuckols for James L. Blum, Assistant Director for Budget Analysis.

INFLATIONARY IMPACT STATEMENT

Pursuant to clause 2(l)(4) of rule XI of the Rules of the House of Representatives, the Committee makes the following statement with regard to the inflationary impact of the reported bill:

Federal expenditures on Americans with disabilities now exceed $60 billion annually, with $57 billion spent on disability benefits and other programs that are premised on the dependency of the people being served and the remainder spent on education, training, and rehabilitation. These figures do not include the funds expended by State and local governments, or by private firms and organizations. Eligibility for most of these benefits is based upon the inability to engage in substantial gainful activity or upon low income criteria. The Committee believes that this legislation—by substantially increasing the likelihood that many of the 12 million disabled Americans of working age who are unemployed but want to work will become taxpayers and consumers, and by otherwise greatly reducing the cost of dependency—will have no inflationary effect and may well have an anti-inflationary effect.

SECTION-BY-SECTION ANALYSIS

SECTION 1. SHORT TITLE; TABLE OF CONTENTS

Subsection (a) provides that this Act may be cited as the "Americans with Disabilities Act of 1990".

Subsection (b) sets forth a table of contents for the bill.

SECTION 2. FINDINGS AND PURPOSES

Subsection (a) sets forth the Congressional findings demonstrating the need for enactment of this legislation.

Subsection (b) describes the purposes of the legislation.

SECTION 3. DEFINITIONS

Section 3 contains definitions for certain terms used throughout the bill.

The term "auxiliary aids and services" is defined to include (A) qualified interpreters or other effective methods of making aurally delivered materials available to individuals with hearing impairments; (B) qualified readers, taped texts, or other effective methods of making visually delivered materials available to individuals with visual impairments; (C) acquisition or modification of equipment or devices; and (D) other similar services and actions.

The term "disability" is defined to mean, with respect to an individual, (A) a physical or mental impairment that substantially limits one or more of the major life activities of such individual; (B) a record of such an impairment; or (C) being regarded as having such an impairment. These three prongs of the definition are intended to have the same meanings given to the corresponding provisions used in the definitions of the term "individual with handicaps" in section 7(8)(B) of the Rehabilitation Act of 1973 and the term "handicaps" in section 802(h) of the the Fair Housing Act, and in regulations issued under those statutes. The change to the use of the word "disability" rather than "handicap" in the defined term itself is intended simply to make use of currently accepted terminology, not to have any substantive effect.

The term "State" is defined to mean each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Commonwealth of the Northern Mariana Islands.

SECTION 4. DEFENSES

Subsection (a) provides that, in general, it shall be a defense to a charge of discrimination under the bill that an alleged application of qualification standards, selection criteria, performance standards, or eligibility criteria that exclude or deny services, programs, activities, benefits, jobs, or other opportunities to an individual with a disability has been demonstrated by the covered entity to be both necessary and substantially related to the individual's ability to perform or participate in, or take advantage of the essential components of, such service, program, activity, benefit, job, or other opportunity, notwithstanding the provision of applicable reasonable accommodations, modifications, or auxiliary aids or services.

Subsection (b) permits the "qualification standards" described in subsection (a) to include a requirement that (1) the current use of alcohol or drugs by an alcoholic or drug abuser not pose a direct threat to property or the safety of others in the workplace or program; or (2) an individual with a currently contagious disease or infection not pose a direct threat to the health or safety of other individuals in the workplace or program.

In order to meet the "direct threat" standard under the latter of these two provisions, a person must pose a significant risk of transmitting the disease or infection to others in the workplace or program that cannot be eliminated by reasonable accommodation. See *School Board of Nassau County v. Arline,* 480 U.S. 273, 287 n.16 (1987).

TITLE I—EMPLOYMENT

Title I prohibits employment discrimination against any qualified individual with a disability. The Committee notes that the matters addressed in this title fall outside the Committee's jurisdiction and that, accordingly, no changes in the introduced bill have been made by the Committee in this title. The analysis below reflects the provisions of the bill as introduced. Those provisions were considered separately by the Committee on Education and Labor during its markup on November 14, 1989. Readers should consult the report of the Education and Labor Committee for an analysis of that Committee's action in this regard.

SECTION 101. DEFINITIONS

This section provides definitions for the following terms: "Commission", "employee", "employer", "person" (and related terms), and "qualified individual with a disability".

SECTION 102. DISCRIMINATION

Subsection (a) specifies in general that an employer, employment agency, labor organization, or joint labor-management committee may not discriminate against any qualified individual with a disability in regard to any term, condition, or privilege of employment.

Subsection (b) sets forth several specific examples of discrimination that are prohibited.

SECTION 103. POSTING NOTICES

This section incorporates by reference the notice-posting requirements in section 711 of the Civil Rights Act of 1964.

SECTION 104. REGULATIONS

This section requires the Equal Employment Opportunity Commission (EEOC) to issue regulations to carry out this title within 180 days after enactment.

SECTION 105. ENFORCEMENT

This section incorporates by reference the enforcement provisions in sections 706, 709, and 710 of the Civil Rights Act of 1964, and, for acts of intentional discrimination, the remedies and procedures of 42 U.S.C. 1981.

TITLE II—PUBLIC SERVICES

Subtitle A—Prohibition Against Discrimination

SECTION 201. DEFINITION

This section defines the term "qualified individual with a disability" for purposes of this subtitle to mean an individual with a disability who, with or without reasonable modifications to rules, policies, and practices, the removal of architectural, communication, and transportation barriers, or the provision of auxiliary aids and services, meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by a commuter authority (as defined in section 103(8) of the Rail Passenger Service Act (RPSA)), the National Railroad Passenger Corporation (commonly known as Amtrak), or a department, agency, special purpose district, or other instrumentality of a State or local government.

The statutory requirement that a person with a disability must be able to meet the "essential eligibility requirements" of a program reflects the long-standing section 504 principle that, to the extent of the manifestations of a person's disability prevent that person from meeting the basic eligibility requirements of the program—for example, by causing substantial interference with the operation of the program or by posing a significant risk to the health or safety of others that cannot be eliminated by reasonable accommodation (subject, of course, to the same limitations on the application of this concept as are applicable in other titles of the bill)—that manifestation of the person's disability may be taken into account by the operator of the program in denying service to the person with the disability. Of course, the prejudice or stereotypical views of other individuals cannot be used as the basis for claiming a substantial interference with the operation of a program. Consistent with current law, the assessment as to whether an individual with a disability meets the essential eligibility requirements of a program must take into account whether a reasonable modification to rules, policies, and procedures, or the provision of auxiliary aids or services, would enable the person to meet the essential eligibility requirements.

SECTION 202. DISCRIMINATION

This section provides that, subject to the provisions of this title, no qualified individual with a disability shall, by reason of such disabiity, be excluded from participation in or be denied the benefits of the services, programs, or activities of a commuter authority (as defined in section 103(8) of the RPSA), the National Railroad Passenger Corporation (commonly known as Amtrak), a State or local government, or any department, agency, special purpose district, or other instrumentality of a State or local government.

SECTION 203. REGULATIONS

This section requires the Attorney General, within one year after the date of enactment, to promulgate regulations in an accessible format implementing this subtitle. With respect to "program accessibility, existing facilities" and "communications", these regulations are required to be consistent with the regulations and analysis found in 28 C.F.R. Part 39 applicable to Federally conducted activities under section 504 and this subtitle. In all other respects, the regulations are required to be consistent with this subtitle and with the coordination regulations found in 28 C.F.R. Part 41 (as promulgated by the Department of Health, Education, and Welfare on January 13, 1978) applicable under section 504 to recipients of Federal financial assistance.

SECTION 204. ENFORCEMENT

This section provides that the remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 (29 U.S.C. 794a) shall be available to individuals alleging discrimination on the basis of disability in violation of this subtitle.

SECTION 205. EFFECTIVE DATE

Under this section, the requirements imposed on the Attorney General in section 203 with respect to the issuance of regulations become effective on the date of enactment. In all other respects, this subtitle shall become effective 18 months after the date of enactment.

Subtitle B—Actions Applicable to Public Transportation Provided by Pubic Entities Considered Discriminatory

Part I—Public Transportation Other Than By Aircraft or Certain Rail Operations

This part prohibits discrimination against individuals with disabilities in the provision by certain public entities of public transportation other than by aircraft, intercity rail, commuter rail, or rail transportation covered by title III. The Committee notes that the matters addressed in this part—specifically, requirements imposed on public entities operating buses, rapid rail vehicles, light rail vehicles, and other fixed route vehicles, including requirements with respect to paratransit, demand responsive systems, and facilities and stations of such entities—fall outside the Committee's jurisdiction. Accordingly, no changes in the introduced bill other than those of a technical or conforming nature have been made by the Committee in this part. Readers should consult the report of the Committee on Public Works and Transportation for an analysis of that Committee's action with respect to these matters.

Under Rule X, clause 1(h)(11) of the Rules of the House of Representatives, the Committee on Energy and Commerce has exclusive jurisdiction over matters pertaining to intercity and commuter railroads. The requirements of the bill with respect to these entities are analyzed under part II, *infra*.

SECTION 211. ACTIONS APPLICABLE TO PUBLIC TRANSPORTATION CONSIDERED DISCRIMINATORY

Subsection (a) provides definitions for the terms "public transportation" and "vehicle" as used in this part. The definition of the term "public transportation" explicitly excludes transportation by aircraft, intercity or commuter rail transportation as defined in section 221, or rail transportation covered by title III. The definition of the term "vehicle" explicitly excludes an intercity or commuter rail car described in section 222 or a rail passenger car covered by title III.

Subsection (b) describes various actions with respect to public transportation that shall be considered discriminatory under the bill. (In the following analysis of this section and succeeding sections of this subtitle, it should be assumed that any prohibition on discrimination applies for purposes of both the ADA and section 504 of the Rehabilitation Act unless otherwise specified.)

—Paragraph (1) specifies that it shall be considered discrimination for an individual or entity to purchase or lease a new fixed route bus of any size, a new rapid rail vehicle, a new light rail vehicle, or any other new fixed route vehicle to be used for public transportation and for which a solictation is made later than 30 days after the date of enactment, if such bus, rail, or other vehicle is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

—Paragraph (2) specifies that if an individual or entity purchases or leases a used vehicle after the date of enactment, such individual or entity shall make demonstrated good faith efforts to purchase or lease a used vehicle that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

—Paragraph (3) specifies that if an individual or entity remanufacturers a vehicle, or purchases or leases a remanufactured vehicle, so as to extend its usable life for five years or more, the vehicle shall, to the maximum extent feasible, be readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

Subsection (c) specifies that if an individual or entity operates a fixed route public transportation system to provide public transportation, it shall be considered discrimination for such individual or entity to fail to provide paratransit or other special transportation services sufficient to provide a level of services comparable to that provided to individuals using fixed route public transportation to individuals with disabilities, including individuals who use wheelchairs, who cannot otherwise use fixed route public transportation and to other individuals associated with such individuals with disabilities, in accordance with service criteria established under regulations issued by the Secretary of Transportation (Secretary).

Subsection (d) specifies that if an individual or entity operates a demand responsive system that is used to provide public transportation for the general public, it shall be considered discrimination for such individual or entity to purchase or lease a new vehicle, for which a solicitation is made later than 30 days after the date of enactment, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, unless the entity can demonstrate that such system, when viewed in its entirety, provides a level of service to individuals with disabilities equivalent to that provided to the general public.

Subsection (e) provides that it shall be considered discrimination for an individual or entity to build a new facility that will be used to provide public transportation services that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

Subsection (f) provides that with respect to a facility or any part thereof that is used for public transportation and that is altered by, or on behalf of, or for the use of an individual or entity later than one year after the date of enactment, in a manner that affects or could affect the usability of the facility or part thereof, it shall be considered discrimination for such individual or entity to fail to make the alternations in such a manner that, to the maximum extent feasible, the altered portion of the facility, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the remodeled area are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

Subsection (g) sets forth the requirements for making existing facilities, rapid and light rail systems, and key stations in such systems, accessible to and usable by individuals with disabilities.

—Paragraph (1) provides that, except as provided in paragraph (3), with respect to existing facilities used for public transportation, it shall be considered discrimination for an individual or entity to fail to operate such public transportation program or activity conducted in such facilities so that, when viewed in the entirety, it is readily accessible to an usable by individuals with disabilities, including individuals who use wheelchairs.

—Paragraph (2) provides that, with respect to vehicles operated by light and rapid rail systems, it shall be considered discrimination for an individual or entity to fail to have at least one car per train that is accessible to individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in any event in no less than five years.

—Paragraph (3) provides that it shall be considered discrimination for an individual or entity to fail to make key stations in rapid rail and light rail systems readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than three years after the date of enactment. The paragraph also provides an exception under which the time limit may be extended by the Secretary up to 20 years for extraordinarily expensive structural changes to, or replacement of, existing facilities necessary to achieve accessibility.

SECTION 212. REGULATIONS

Subsection (a) provides that the Secretary shall, not later than 240 days after the date of enactment, issue regulations in an accessible format that include standards applicable to facilities and vehicles covered under section 211.

Subsection (b) provides that the standards described in subsection (a) shall be consistent with the minimum guidelines issued by the ATBCB under section 504(a) of the ADA.

SECTION 213. ENFORCEMENT

This section provides that the remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act (29 U.S.C. 794a) shall be available with respect to any individual who believes that he or she is being or is about to be subjected to discrimination on the basis of disability in violation of section 211, or regulations issued under section 212, concering public services.

Part II—Public Transportation by Intercity and Commuter Rail

SECTION 221. DEFINITIONS

This section sets forth the definitions of key terms used in this part.

Paragraph (1) defines the term "commuter authority" to have the meaning given such term in section 103(8) of the RPSA.

- —Paragraph (2) defines the term "commuter rail transportation" the have the meaning given the term "commuter service" in section 103(9) of the RPSA.
- —Paragraph (3) defines the term "intercity rail transportation" to mean transportation provided by Amtrak.
- —Paragraph (4) defines the term "public entity" to mean Amtrak, any commuter authority, any State or local government, and any department, agency, special purpose district, or other instrumentality of a State or local government.
- —Paragraph (5) defines the term "rail passenger car" to mean, with respect to intercity rail transportation, the following: single-level and bi-level coach cars; single-level and bi-level dining cars; single-level and bi-level sleeping cars; single-level and bi-level lounge cars; and food service cars.
- —Paragraph (6) defines the term "responsible person" to mean (A) in the case of a station more than 50 percent of which is owned by a pubic entity, such public entity; (B) in the case of a station more than 50 percent of which is owned by a private party, the persons providing intercity or commuter rail transportation to such station, as allocated on an equitable basis by regulations by the Secretary; and (C) in a case where no party owns more than 50 percent of a station, the persons providing intercity or commuter rail transportation to such station and the owners of the station, other than private party owners, as allocated on an equitable basis by regulations by the Secretary.

The inclusion in the ADA of the term "responsible person" is designed to improve upon current law, which arguably subjects private parties owning passenger rail stations to the legal and financial obligations imposed under 49 C.F.R. 27.73(a)(2). These regulations set forth the requirements and timetable for making existing passenger rail stations accessible. As a matter of equity and sound transportation policy, the Committee views it as unfair and unwise to impose these obligations on private parties. The vast majority of

Amtrak's 499 stations, for example, are owned by freight railroads who have little or no business interest in the continuation of rail passenger service at these stations. The Committee believes that the legal an financial responsibilities associated with making existing intercity and commuter passenger rail stations accessible or with making alterations to such stations in an accessible manner should be improved upon those parties that actually operate the rail service being provided to passengers at each location or, where applicable, upon those public entities that own all or a share of such stations.

Under the bill, the Secretary is directed to issue regulations allocating responsibility in various circumstances "on an equitable basis" among Amtrak and the commuter railroad (or railroads) providing service to a station, or among the various railroads and other public entity owners. In making this allocation, the Committee expects the Secretary to apply the principle of "costs to the cost-causer," at least to the extent it is practicable to ascertain cost causation, and in addition to weigh such other sound economic, transportation, and other public policy considerations as will lead to an "equitable" result.

Paragraph (7) defines the term "station" to mean the portion of a property located appurtenant to a right-of-way on which Amtrak or commuter rail transportation is operated, where such portion is used by the general public and is related to the provision of such transportation, including passenger platforms, designated waiting areas, ticketing areas, restrooms, and, where a public entity providing rail transportation owns the property, concession areas, to the extent that such pubiic entity exercises control over the selection, design, construction, or alteration of the property. However, the term does not include flag stops, which are locations that are not regularly scheduled stops and at which trains will stop to entrain or detrain passengers only on signal or advance notice.

The Committee notes its awareness of the many different circumstances in which a "station" may be found and thus emphasize the control requirement as an essential element of the definition. By way of example, the "station" (as defined in the bill) at the building and surrounding property commonly known as Washington Union Station is acutally only a part of that building and surrounding property. Thus, restrooms located in the designated passenger waiting areas adjacent to the gates would clearly be part of the "station" for purposes of the legislation. However, restrooms in a pubiic accommodation or common area located in another part of the building not under the control of Amtrak or another public entity providing rail transportation would not be part of the "station".

SECTION 222. INTERCITY AND COMMUTER RAIL ACTIONS CONSIDERED DISCRIMINATORY

In general

This section sets forth the actions and omissions by Amtrak and commuter railroads that would constitute discrimination for purposes of the ADA and section 504 of the Rehabilitation Act of 1973. In general, these provisions may be read as imposing various requirements on the railroads in three areas: accessibility of rail passenger cars, accessibility of rail passenger trains, and accessibility of rail passenger stations. In the interest of clarity and convenience, certain language recurring throughout the section and pertaining to multiple provisions is addressed at this point.

In describing cars and stations, the section frequently uses the phrase "readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs". This term refers to the ability of individuals with disabilities, including individuals who use wheelchairs, to enter into, exit from, and safely and effectively use a rail passenger car or station used in public transportation. Nothing in this legislation is intended to supersede or supplant the Federal Railroad Safety Act of 1970 (45 U.S.C. 421 et seq.). Accordingly, modifications designed to improve or achieve accessibility and usability be compatible in all respects with all rules, regulations, standards, and orders issued under that Act.

The Committee notes that the concepts of accessibility and usability entail more than simply the notion of wheelchair accessibility. For example, the design of new railroad cars might be required to include non-slip surfaces and contrast edges on steps, as well as handrails in boarding areas, to make the car accessible to and usable by individuals with mobility impairments who do not use wheelchairs. In addition, the design might be required to include adequate illumination in boarding areas, tactile markings for identifying basic amenities and circulation needs, contrasting characters on signage, a public address system for audible announcements, and automatic door closing alarms to make the care accessible to and usable by individuals with other disabilities.

The section specifically refers to "individuals who use wheelchairs" among the individuals with disabilities who must be provided access in order to emphasize clearly that the section's requirements apply even to those individuals whose particular disability requires the most extensive modifications in order to assure access. This specific reference to individuals who use wheelchairs is made because of past misinterpretations of the nature and extent of obligations under section 504 of the Rehabilitation Act of 1973. The Committee nevertheless wishes to emphasize that the obligation to provide public transportation in a non-discriminary fashion applies to all persons with disabilities, including people with sensory impairments, all forms of mobility impairments, and those with cognitive impairments such as mental retardation. For example, it is the Committee's intent that the obligation to provide lift service applies not only to people who use wheelchairs, but also to other individuals who have difficulty in walking. Thus, for example, people who use crutches or walkers should be allowed to use a lift.

Except as specifically provided, however, the section does not *require* the provision of lifts, ramps, or other equipment in any *particular* circumstance. In this vein, the Committee believes it is important to distinguish between the accessibility of cars and the accessibility of stations because the two concepts, although related, are nonetheless quite different. A single car stops at many stations, each of which may have differing design characteristics; a single station may be visited by many different types of cars. This simple reality requires some flexibility in the achievement of the ADA's goals. Thus, the requirement that newly purchased cars be accessible to and usable by individuals with disabilities does not require that the car be equipped with an on-board lift. Nor does the section necessarily dictate the raising of the passenger platform at any given station. In many instances on both Amtrak and commuter railroads, raising the platform would create clearance problems and safety hazards for freight cars using the same track as that running through a station. This problem, and the engineering complications it creates, were well-summarized in a recent trade publication:

> High level platforms represent the most workable solution to the problem of handicapped access, and they can significantly reduce station dwell times required for passenger boarding and alighting. High level platforms can readily be installed in terminals or on-line stations where passenger trains are operated exclusively, but freight equipment clearances can present a problem whenever mixed traffic must be provided for.
>
> On a few multiple track routes, such as the Northeast Corridor, freight traffic can be limited to certain tracks, permitting the use of high level platforms on exclusive passenger tracks. For a new station on the CSX main line at Greenbelt, Md., where the [*sic*] Maryland's MARC commuter service will be linked with the Washington Metro, the agency is simply building a side track in order to use high level platforms. Still another alternative that's been considered by some roads has been the use of gauntlet tracks to provide adequate clearance for freight trains passing high level platforms. [From "Commuter Rail: 'All Aboard, America!,'" *Railway Age*, p. CG3, CG7 (October 1988).]

While such creative solutions are certainly acceptable means of achieving accessibility under this legislation, they are also extremely expensive and will entail negotiations with freight railroads who do not carry passengers at all. It is therefore *not* the Committee's intention to require the addition, removal, modification, or movement of any tracks in the manner described by the article, whether for Amtrak or for commuter service. For low-platform stations where freight equipment is also operated, portable ramps or lift devices on the station platform may be the only feasible means available to make the station accessible. In other cases, so-called "mini-high" platforms in one or more locations at the station may be preferable. The same considerations apply to the construction of new stations in these situations.

Commuter railroads are given a maximum of three years from the date of enactment to make their key stations accessible, and they may seek an extension of up to 20 years for certain extraordinarily expensive structural changes; Amtrak is given a maximum of 20 years to make its stations accessible. In light of the Committee's intention expressed above not to mandate the installation of on-board lifts in new cars or the raising of all low-level station platforms, there may be times at which a new car is itself accessible and usable but not able to be entered from every station it serves or from every point within a station. In this circumstance, so long as the railroad is complying or has complied with the requirement of this section that existing stations be made accessible and usable "as soon as practicable", the Committee does not intend that the railroad be chargeable with discrimination. Of course, nothing in this section is intended to prohibit a railroad from designing onboard lifts into its cars if that railroad determines that such devices provide a feasible means of ensuring accessibility on its system.

Intercity rail transportation

Subsection (a) sets forth the requirements of the ADA applicable to Amtrak cars and trains, as well as to certain services provided on such cars and trains.

Paragraph (1) of the subsection states that it shall be considered discrimination for Amtrak to fail to have at least one passenger car per train that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, in accordance with regulations issued under section 225, as soon as practicable but in no event later than five years after the date of enactment. Under the "as soon as practicable" standard, Amtrak, to the extent that its accessible rolling stock is limited, shall have discretion to determine where and how such rolling stock is to be deployed, taking into account differing ridership levels on its respective routes, in the course of achieving full compliance with this subsection by the end of the five-year period.

Paragraph (2)(A) sets forth a general rule with respect to the purchase of new Amtrak cars. The paragraph states that, except as otherwise provided in this subsection with respect to individuals who use wheelchairs, it shall be considered discrimination for a person to purchase or lease any new rail passenger cars for use in intercity rail transportation, and for which a solicitation is made later than 30 days after the effective date of this section, unless all such rail cars are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed in regulations issued by the Secretary under section 225. The use of the phrase "except as otherwise provided . . . with respect to individuals who use wheelchairs" reflects the Committee's intent, as described above, to require the design of all new cars to incorporate accessibility and usability features for disabled individuals other than those who use wheelchairs, even if in certain cases special rules or alternative requirements are prescribed in order to balance the needs of wheelchair users with the operational or structural limitations posed by a particular type of railroad car.

In those cases where no special rule or alternative requirement is prescribed, the Committee intends that the accessibility features with respect to wheelchairs found in current Federal Railroad Administration regulations at 49 C.F.R. 27.73(b)(2) should apply. In this regard, the Committee emphasizes that neither the ATBCB nor the Secretary of Transportation is granted authority under this Act to require the widening of aisles or passageways in railroad cars to accommodate wheelchairs. In light of the discussion of paragraph (4)(A) below regarding the Committee's determination not to sanction the car-to-car movement of individuals who use wheelchairs (except in one narrow circumstance), the Committee sees no valid purpose to be served by permitting this legislation to serve as authority to mandate the narrowing of seats, bedrooms, kitchen facilities, or other train amenities, which would have to occur in order to widen such aisles and passageways. Such a move would unduly and unnecessarily inconvenience other passengers, threaten Amtrak revenues, and put Amtrak to the tremendous expense of redesigning virtually all of its cars.

Paragraphs (2)(B) through (2)(D) set forth several special rules with respect to wheelchair accessibility in certain specific types of Amtrak cars. Paragraph (2)(B) provides that single-level passenger coaches shall be required to:

—be able to be entered by an individual who uses a wheelchair;
—have space to park and secure a wheelchair;
—have a seat to which a passenger in a wheelchair can transfer, and a space to fold and store such passenger's wheelchair; and
—be equipped with a restroom usable by an individual who uses a wheelchair;

but only to the extent provided in paragraph (3), which is described below.

Paragraph (2)(C) provides that single-level dining cars shall not be required to:

—be able to be entered from the station platform by an individual who uses a wheelchair (with or without a lift or similar device); or
—have a restroom usable by an individual who uses a wheelchair if no restroom is provided in such car for any passenger.

Paragraph (2)(D) provides that bi-level dining cars shall not be required to:

—be able to be entered by an individual who uses a wheelchair;
—have space to park and secure a wheelchair;
—have a seat to which a passenger in a wheelchair can transfer, or space to fold and store such passenger's wheelchair; or
—have a restroom usable by an individual who uses a wheelchair.

Paragraph (3) sets forth the requirements with respect to wheelchair accessibility for single-level passenger coaches referred to in paragraph (2)(B) above. The paragraph requires that as soon as practicable, but in no event later than five years after the date of enactment, on each train that includes one or more single-level rail passenger coaches, Amtrak must provide a number of spaces:

—to park and secure wheelchairs (to accommodate individuals who wish to remain in their wheelchairs) equal to not less than one-half of the number of single-level rail passenger coaches in such train; and
—to fold and store wheelchairs (to accommodate individuals who wish to transfer to coach seats) equal to not less than one-half of the number of single-level rail passenger coaches in such train.

The paragraph further requires that as soon as practicable, but in no event later than ten years after the date of enactment, on each train that includes one or more single-level rail passenger coaches, Amtrak must provide a number of spaces:

- —to park and secure wheelchairs (to accommodate individuals who wish to remain in their wheelchairs) equal to not less than the total number of single-level rail passenger coaches in such train; and
- —to fold and store wheelchairs (to accommodate individuals who wish to transfer to coach seats) equal to not less than the total number of single-level rail passenger coaches in such train.

These spaces are required by the bill to be located in single-level rail passenger coaches or food services cars. However, not more than two spaces to park and secure wheelchairs nor more than two spaces to fold and store wheelchairs shall be located in any one coach or food service car. Single-level coaches and food service cars on which the required spaces are located must be equipped under the bill with a restroom usable by an individual who uses a wheelchair. Finally, the coach or food service car must be able to be entered from the station platform by an individual who uses a wheelchair.

Paragraph (4) addresses the provision of food service on Amtrak trains to passengers who use wheelchairs and to others traveling with such passengers. The requirements vary, depending on whether the dining car on a train is a single-level or bi-level car, and on whether the dining car was purchased before or after the ADA's date of enactment.

Paragraph (4)(A) provides that on any train which includes a single-level dining car purchased after the date of enactment, table service in that dining car shall be provided to a passenger who uses a wheelchair if the following three conditions are met:

- —the car adjacent to the end of the dining car through which a wheelchair may enter is itself accessible to a wheelchair;
- —the passenger using the wheelchair can exit to the platform from the car such passenger occupies, move down the platform, and enter the adjacent accessible car described above without the necessity of the train being moved within the station; and
- —space to park and secure a wheelchair is available in the dining car at the time such passenger wishes to eat (if such passenger wishes to remain in a wheelchair), or space to store and fold a wheelchair is available in the dining care at the time such passenger wishes to eat (if such passenger wishes to transfer to a dining car seat).

Paragraph (4)(A) further requires that unless not practicable, Amtrak shall place an accessible car adjacent to the end of a dining car described above through which an individual who uses a wheelchair can enter. The Committee notes that this provision represents the *only* instance in the legislation in which the right of a passenger who uses a wheelchair to pass between cars is recognized. During consideration of the bill, considerable attention was devoted to the question of whether the movement of a passenger who uses a wheelchair through the vestibule connecting adjacent cars should be permitted. In the Committee's judgment, such movement as a general rule constitutes an unsafe practice that can seriously endanger the passenger and in turn subject Amtrak or other passenger railroads to major lawsuits. Thus, it is not the intention of the bill to require any railroad or commuter authority to provide access between cars on a train for passengers using wheelchairs, except in the single instance described in this paragraph. In that single instance, the right of a disabled passenger to have an opportunity to eat in an integrated setting appeared to the Committee, on balance, to outweigh the safety concerns, particularly because the movement between cars is likely to occur when the train is stopped. There are situations, however, in which a train, in departing from a station, will be required to switch from one track to another, subjecting any passenger in the vestibule at that moment to some degree of danger. The Committee does not believe that Amtrak should be held responsible for any injuries to such a passenger, whether disabled or not, who enters the vestibule at that inopportune moment.

In addition to the requirments set forth above with respect to trains containing single-level dining cars purchased after the date of enactment, paragraph (4)(A) also requires that on any train in which a single-level dining car (regardless of date of purchase) is used to provide food service, appropriate auxiliary aids and services, including a hard service on which to eat, shall be provided at the passenger's seat or sleeping compartment to ensure that other food service equivalent to that in the dining car is available to individuals with disabilities, including individuals who use wheelchairs, and to passengers traveling with such individuals.

Paragraph (4)(B) similarly provides that on any train in which a bi-level dining car (regardless of date of purchase) is used to provide food service, appropriate auxiliary aids and services, including a hard surface on which to eat, shall be provided at the passenger's seat or sleeping compartment to ensure that other food service equivalent to that in the dining car is available to individuals with disabilities, including individuals who use wheelchairs, and to passengers traveling with such individuals. If such train also includes a bi-level lounge car purchased after the date of enactment, table service shall be provided in such lounge car to individuals who use wheelchairs and to other passengers.

The Committee notes that the requirement to provide table service to other passengers in such a lounge car does not require that Amtrak, in effect, treat the table area of the lounge car as through it were itself a dining car. Although the Committee expects Amtrak in most instances to provide table service in the lounge car as a matter of course to passengers dining with a disabled individual, Amtrak has discretion to establish reasonable conditions for the availability to other passengers of table service in the lounge car.

Commuter rail transportation

Paragraph (2) of subsection (b) states that it shall be considered discrimination for a commuter authority to fail to provide at least one passenger car per train that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, in accordance with regulations issued under section 225, as soon as practicable but in no event later than five years after the date of enactment. Under the "as soon as practicable" standard, a commuter authority, to the extent that its accessible rolling stock is limited, shall have discretion to determine where and how such rolling stock is to be deployed, taking into account differing ridership levels on its respective routes, in the course of achieving full compliance with this subsection by the end of the five-year period.

Paragraph (2)(A) sets forth a general rule with respect to the purchase of new passenger cars for use in commuter rail transportation. The paragraph states that it shall be considered discrimination for a person to purchase or lease any new rail passenger cars for use in commuter rail transportation, and for which a solicitation is made later than 30 days after the effective date of this section, unless all such rail cars are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed in regulations issued by the Secretary under section 225.

Paragraph (2)(B) provides that for purposes of this part and section 504 of the Rehabilitation Act of 1973, the requirement that a rail passenger car used in commuter rail transportation be accessible to or readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, shall not be construed to require any of the following:

—a restroom usable by an individual who uses a wheelchair if no restroom is provided in such car for any passenger;

—space to fold and store a wheelchair; or

—a seat to which a passenger who uses a wheelchair can transfer.

In all other aspects, the Committee intends that the accessibility features with respect to wheelchairs found in current Federal Railroad Administration regulations at 49 C.F.R. 27.73(b)(2) should apply. The Committee's comments above with respect to the question of whether this Act permits regulations to mandate the widening of aisles and passageways on Amtrak trains apply with equal force here as well.

Used Rail Cars

Subsection (c) sets forth the requirements applicable to the purchase or lease of used rail passenger cars for use in intercity or commuter rail transportation. Under this provision, it shall be considered discrimination for a person to purchase or lease a used rail passenger car for such use unless that person makes demonstrated good faith efforts to purchase or lease one that is readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary in regulations issued under section 225.

Remanufactured Rail Cars

Subsection (d) sets forth the requirements applicable to the remanufacturing of rail passenger cars, and the purchase or lease of such cars, for use in intercity or commuter rail transportation Under this provision, it shall be considered discrimination for a person to remanufacture a rail passenger car for such use so as to extend its usable life for 10 years or more unless the rail car, to the maximum extent feasible, is made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed by the Secretary in regulations issued under section 225. Similarly, it shall be considered discrimination for a person to purchase or lease a remanufactured rail car for such use unless the car was remanufactured as required above.

The phrase "to the maximum extent feasible" is included to make clear that the Committee does not intend to require accessibility for a remanufactured vehicle if it would destroy the structural integrity of the vehicle.

Stations

Subsection (e) sets forth the requirements applicable to stations in the Amtrak system and in commuter rail systems, respectively. The provision covers both new stations and existing stations.

Under paragraph (1) it shall be considered discrimination for a person to build a new station for use in intercity or commuter rail transportation that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as prescribed in regulations issued by the Secretary under section 225.

The requirements applicable under paragraph (2)(A) to existing stations differ in part as between Amtrak and the commuter railroad. Amtrak is required to make *all* stations in its systems readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, as soon as practicable but in no event later than 20 years after the date of enactment. The Committee recognizes that Amtrak's funds for station modernization and rehabilitation have been and are likely to remain limited. The Committee further recognizes that the effect of these limitations will be exacerbated by the expense of complying with the requirements of this legislation. It is the hope and expectation of the Committee that those inside and outside government who have lent their support to the ADA will give that support meaning and content by also endorsing and working for additional funds for Amtrak to use in meeting the ADA's requirements.

In recent years, Amtrak has been able to increase the effectiveness of its funds by arranging for partnerships with State and local entities that agree to assume or defray the expenses of station construction and rehabilitation. The Committee wishes to encourage the continuation and expansion of this highly successful and innovative procedure. Especially in the case of smaller stations where the revenue contribution to a particular Amtrak service route may be quite small, support of station construction and modification through State and local funding sources may well mean the difference between closure of a station or continued rail passenger service for a particular community. The Committee expects, however, that with respect to existing stations, Amtrak will give the mandated modifications sufficient funding priority to prevent closures except as a last resort.

In the same vein, the Committee notes that the FRA's budget submission to the congressional Appropriations Committees for fiscal year 1991 provide for the elimination of funds "for Amtrak to research and improve elderly and disabled access between rail passenger cars and station platforms." In fiscal year 1990, $392,000 was appropriated for this purpose. With the passage of the ADA, the Committee questions whether this is an appropriate time to make the cut recommended by FRA and strongly recommends that resources in this area be ehhanced, not reduced.

Commuter railroads are required only to make *key* stations in their systems readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs. These stations must be made accessible and usable as soon as practicable but in no event later than three years after the date of enactment. Commuter railroads may seek an extension of up to 20 years from the Secretary under this provision in a case where the raising of the entire passenger platform is the only means available of attaining accessibility or where other extraordinarily expensive structural changes are necessary to attain accessibility.

The Committee viewed it as important to provide commuter authorities with statutory guidance to aid them in the task of designating key stations, as well as to mandate in the statute a process for doing so. Thus, the bill requires each commuter authority to designate the key stations in its system, in consultation with individuals with disabilities and organizations representing such individuals, taking into account such factors as high ridership and whether such station serves as a transfer or feeder station. In addition, before the final designation of key stations under the bill, the commuter authority is required to conduct a public hearing. The bill does not mandate adherence to a particular public hearing procedure. However, the Committee expects that such hearings will include a fair opportunity to be heard from, at a minimum representatives of the local disabilities community and of such organizations, local governments, business interests, and commuters that have a direct interest in the proposed designation.

The Secretary is directed under this paragraph to require the appropriate person to develop a plan for executing the provisions set forth above with respect to existing stations The plan should reflect consultation with individuals with disabilities affected by it and establish milestones for the achievement of the requirements of this provision.

The Committee does not intend this legislation to upset in any manner the settlement agreements recently reached by commuter authorities in New York and Philadelphia with respect to key stations.

Paragraph (2)(B) addresses the manner in which alterations to existing stations are made. As a general rule, it shall be considered discrimination for a responsible person, owner, or person in control of an Amtrak or commuter station to fail to make alterations that affect or could affect the usability of the station or a part thereof in such a manner that, to the maximum extent feasible, the altered portions of the station are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations. In addition, where alterations are made that affect or could affect the usability of or access to an area of the station containing a primary function, it shall be considered discrimination for the responsible person, owner, or person in control to fail to make such alterations in a manner that, to the maximum extent feasible, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations, where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General).

As alluded to above, the ownership, leasing, control, and occupancy arrangements governing passenger railroad stations differ markedly from case to case. Accordingly, the Committee believed it important to ensure that a responsible person under the legislation would have the ability to make existing stations accessible under paragraph (2)(A) and to make alterations as required by paragraph (2)(B) even where that person was not also the owner or person in control of the station. Thus, paragraph (2)(C) provides that it shall be considered discrimination in these cases for such an owner or person in control to fail to provide reasonable cooperation to a responsible person in that responsible person's efforts to comply with the requirements of this paragraph with respect to such station. For example, an owner or person in control would be prohibited under this provision from requiring an unreasonable insurance bond from the responsible person as a condition of performing the work.

While the failure to receive reasonable cooperation required by this provision would not be a defense to a claim of discrimination under the ADA, the bill provides a cause of action to the responsible person to redress such failure against the owner or person in control. Thus, for example, an owner or person in control may be liable to a responsible person for damages caused by a construction delay engendered by the failure to provide reasonable cooperation or may be required to idenfity the responsible person for damages recovered by a disabled plaintiff. Alternatively, a responsible person may obtain an injunction requiring the owner or person in control to provide the necessary cooperation in order to carry out the requirements of this paragraph.

No paratransit obligation imposed

The bill imposes no requirement that Amtrak or commuter railroads provide paratransit or other special transportation services of the nature described in section 211(c). Nor should the bill be read to imply any obligation on Amtrak or commuter railroads to provide paratransit or other special transportation services merely because Amtrak or any commuter railroads are associated with a person who is subject to the requirements of section 211(c). The Committee specifically rejects any notion that Amtrak or commuter railroads should be required to provide paratransit or other special transportation services. This issue was discussed at the hearing on H.R. 2273 and S. 933 held by the Subcommittee on Transportation and Hazardous Materials. Witnesses uniformly indicated that there was no intention to impose paratransit or other special transportation service obligations upon either Amtrak or any commuter railroad under the legislation. See *Americans with Disabilities Act: Hearings on H.R. 2273 and S. 933,* Serial No. 101-95 at pp. 123-24, 150 (September 28, 1989). To the extent that Amtrak or a commuter authority provides transportation other than intercity or commuter rail transportation as defined in section 221, this part does not address paratransit or other special transportation service obligations that may be applicable to such other forms of transportation.

SECTION 223. CONFORMANCE OF ACCESSIBILITY STANDARDS

This section directs that accessibility standards included in regulations issued under this part be consistent with the minimum guidelines issued by the ATBCB under section 504(a) of the ADA.

SECTION 224. INTERIM ACCESSIBILITY REQUIREMENTS

This section addresses the issue of compliance with the requirements of section 222 during the period prior to the effective date of final regulations issued under this part with respect to the accessiblity of stations and rail passenger cars.

Subsection (a) provides that, if final regulations have not been issued pursuant to section 225, for new construction or alterations for which a valid and appropriate State of local building permit is obtained prior to the issuance of final regulations under such section, and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the Uniform Federal Accessibility Standards (UFAS) in effect at the time the building permit is issued shall suffice to satisfy the requirement that stations be readily accessible to and usable by persons with disabilities as required under section 222(e). However, if such final regulations have not been issued one year after the ATBCB has issued the supplemental minimum guidelines required under section 504(a) of this Act, compliance with such supplemental minimum guidelines shall be necessary to satisfy the requirement that stations be readily accessible to and usable by persons with disabilities prior to issuance of the final regulations.

Subsection (b) provides that a person shall be considered to have complied with the accessibility and usability requirements of section 222 (a) through (d) if the design for a rail passenger car complies with the laws, regulations (including MGRAD and such supplemental minimum guidelines as are issued under section 504(a) of the ADA), and any standard for accessibility issued under the Architectural Barriers Act of 1968 governing accessibility of such cars, to the extent that such laws, regulations, guidelines, and standards are not inconsistent with this part and are in effect at the time such design is substantially completed. Reference to the UFAS is omitted in this subsection because the UFAS does not and is not contemplated to contain standards applicable to rail passenger cars.

SECTION 225. REGULATIONS

This section requires the Secretary, within one year after the date of enactment, to issue regulations in an accessible format necessary for carrying out this part. The Committee expects the Secretary to delegate the task of drafting and issuing regulations with respect to commuter railroads to the Federal Railroad Administration, which has the background and expertise necessary to coordinate these regulations with existing railroad safety laws, to which the commuter railroads are subject.

SECTION 226. ENFORCEMENT

This section provides that the remedies, procedures, and rights set forth in section 505 of the Rehabilitation Act of 1973 shall be available to individuals alleging discrimination on the basis of disability in violation of this part.

SECTION 227. EFFECTIVE DATE

Under this section, part II of subtitle B of this title shall become effective 18 months after the date of enactment, except for sections 222 and 225, which shall become effective on the date of enactment.

TITLE III—PUBLIC ACCOMMODATIONS AND SERVICES OPERATED BY PRIVATE ENTITIES

SECTION 301. DEFINITIONS

This section sets forth the definitions of key terms used in this title.

Paragraph (1) defines the term "commerce" to mean travel, trade, traffic, commerce, transportation, or communication (A) among the several States; (B) between any foreign country or any territory or possession and any State; or (C) between points in the same State but through another State or foreign country.

Paragraph (2) defines the term "commercial facilities" to mean facilities (A) that are intended for nonresidential use, and (B) whose operations will affect commerce. Excluded from the term are railroad locomotives, railroad freight cars, railroad cabooses, railroad cars described in section 222 or covered under this title, railroad rights-of-way, or facilities that are covered or expressly exempted from coverage under the Fair Housing Act of 1968 (42 U.S.C. 3601 et seq.).

Paragraph (3) defines the term "public accommodations". Under the definition, the following entities are considered public accommodations if they are privately operated and their operations affect commerce:

(A) an inn, hotel, motel, or other similar place of lodging, except for an establishment located within a building that contains not more than five rooms for rent or hire and that is actually occupied by the proprietor of such establishment as the residence of such proprietor;

(B) a restaurant, bar, or other establishment serving food or drink;

(C) a motion picture house, theater, concert hall, stadium, or other place of exhibition or entertainment;

(D) an auditorium, convention center, or lecture hall;

(E) a bakery, grocery store, clothing store, hardware store, shopping center, or other similar retail sales establishment;

(F) a laundromat, dry cleaner, bank, barber shop, beauty shop, travel service, funeral parlor, gas station, office of an accountant or lawyer, pharmacy, insurance office, professional office of a health care provider, hospital, or other similar service establishment;

(G) a terminal used for public transportation;

(H) a museum, library, gallery, and other similar place of public display or collection;

(I) a park of zoo;

(J) a nursery, elementary, secondary, undergraduate, or postgraduate private school;

(K) a day care center, senior citizen center, homeless shelter, food bank, adoption program, or other similar social service center; and

(L) a gymnasium, health spa, bowling alley, golf course, or other similar place of exercise or recreation.

The twelve categories of entities included in the definition of the term "public accommodation" are intended to be exhaustive.

Paragraph (4) defines the term "public transportation" to mean transportation by bus or rail, or by any other conveyance (other than by air travel) that provides the general public with general or special service (including charter service) on a regular and continuing basis, but does not include commuter rail transportation or intercity rail transportation as such terms are defined in section 221 (2) and (3).

Paragraph (5) defines the terms "rail" and "railroad" to have the meaning given the term "railroad" in section 202(e) of the Federal Railroad Safety Act of 1970.

Paragraph (6) defines the term "readily achievable" to mean easily accomplishable and able to be carried out without such difficulty or expense. In determining whether an action (such as removal of a barrier) is readily achievable, factors specified for consideration under the definition include (A) the overall size of the business of a covered entity with respect to the number of its employees, the number, type, and location of its facilities, the overall financial resources of the entity and the financial resources of its facility or facilities involved in the removal of the barrier; (B) the type of operation or operations maintained by a covered entity, including the composition and structure of the workforce, in terms of such factors as functions of the workforce, geographic separateness, and administrative relationship to the extent that such factors contribute to a reasonable determination of whether the action is readily achievable; and (C) the nature and cost of the action needed.

It is important to note that "readily achievable" is a significantly lesser or lower standard than the "undue burden" standard used in this title and the "undue hardship" standard used in title I. Actions that are not easily accomplishable or able to be carried out without much difficulty or expense are not required under the "readily achievable" standard, even if they do not impose an undue burden or hardship. The term focuses on achievability from the perspective of the business operator and addresses the degree of ease or difficulty that the business operator would experience in removing a barrier or making goods, services, facilities, and so forth available through alternative methods; if these actions cannot be accomplished easily and without much difficulty or expense, then they are not required. What the standard will mean in practice will depend on the particular circumstances of each public accommodation, considering the factors listed previously, but insofar as it addresses the removal of barriers, the standard only requires physical access that can be achieved without extensive restructuring or burdensome expense. It allows for minimal investment with a potential return of profit from use by disable patrons, often more than justfying the small expense.

SECTION 302. PROHIBITION OF DISCRIMINATION BY PUBLIC ACCOMMODATIONS

Subsection (a) provides a general rule prohibiting discrimination against any individual on the basis of disability in the full and equal enjoyment of the goods, services, facilities, privileges, advantages, or accommodations of any place of public accommodation. The phrase "full and equal enjoyment" does not require that individuals with disabilities must attain the identical result of level of achievement as nondisabled persons, but does mean that individuals with disabilities must be afforded an equal opportunity to attain substantially the same result.

Subsection (b) provides principles of construction for the general rule, divided between general prohibitions against discrimination set forth in paragraph (1) and specific prohibitions set forth in paragraph (2). Under the general prohibitions of paragraph (1), the bill provides that it shall be discriminatory for any person, directly or through contractual, licensing, or other arrangements to:

—subject an individual or class of individuals on the basis of a disability or disabilities to a denial of the opportunity of the individual or class to participate in or benefit from the goods, services, facilities, privileges, advantages, or accommodations of an entity;

—afford an individual or class of individuals on the basis of a disability or disabilities with the opportunity to participate in or benefit from a good, service, facility, privilege, advantage, or accommodation that is not equal to that afforded other individuals; or

—provide an individual or class of individuals on the basis of a disability or disabilities with a good, service, facility, privilege, advantage, or accommodation that is different or separate from that provided to other individuals, unless such action is necessary to provide the individual or class with a good, service, facility, privilege, advantage, or accommodation or other opportunity that is an effective as that provided to others.

The term "individual or class of individuals" in the preceding discussion refers to the clients or customers of the covered public accommodation that enters into the described contractual, licensing, or other arrangement.

The general prohibitions of paragraph (1) also include the following requirements:

—Goods, services, facilities, privileges, advantages, and accommodation shall be afforded to an individual with a disability in the most integrated setting appropriate to the needs of the individual.

—An individual with a disability shall not be denied the opportunity to participate in programs or activities that are not separate from or different than those provided to others, even if those separate or different programs or activities are provided in accordance with this section.

—An individual or entity shall not, directly or through contractual or other arrangement, utilize standards, criteria, or methods of administration that have the effect of discriminating on the basis of disability or that perpetuate the discrimination of others who are subject to common administrative control.

—No individual or entity shall be excluded or otherwise denied equal goods, services, facilities, privileges, advantages, accommodations, or other opportunities because of the known disability of another individual with whom the first individual or entity is known to have a relationship or association.

Subsection (b)(2) goes on to set forth the bill's specific prohibitions against discrimination in public accommodations. Subsection (b)(2)(A) provides that the term "discrimination", as used in subsection (a), shall include the impositon or application of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individual with disabilities from fully and equally enjoying any goods, services, facilities, privileges, advantages, or accommodations, unless such criteria can be shown to be necessary for the provision of the goods, services, facilities, privileges, advantages, or accommodations being offered.

The statutory requirement that a person with a disability must be able to meet the "necessary eligibility criteria" of a public accommodation reflects the longstanding principle under section 504 of the Rehabilitation Act that, to the extent the manifestations of a person's disability prevent that person from meeting the basic eligibility requirements of a public accommodation—for example, by causing substantial interference with the operation of the public accommodation—that manifestation of the person's disability may be taken into account by the operator of the public accommodation in denying services to the person with the disability. Of course, the prejudice or stereotypical views of other individuals cannot be used as the basis for claiming a substantial interference with the operation of a public accommodation. Consistent with current law, the assessment as to whether an individual with a disability meets the necessary eligibility criteria of a public accommodation must take into account whether a reasonable modification to rules, policies, and procedures, or the provision of auxiliary aids or services, would enable the person to meet the necessary eligibility criteria.

Under the specific prohibitions of paragraph (2), the following omissions would constitute discrimination for purposes of subsection (a):

—a failure to make reasonable modifications in policies, practices, and procedures when such modifications are necessary to afford to individuals with disabilities the goods, services, facilities, privileges, advantages, or accommodations being offered, unless the entity can demonstrate that making such modification would fundamentally alter nature of such goods, services, facilities, privileges, advantages, or accommodations;

—a failure to take such steps as may be necessary to ensure that no individual with a disability is excluded, denied services, segregated, or otherwise treated differently than other individuals because of the absence of auxiliary aids and services, unless the entity can demonstrate that taking such steps would fundamentally alter the nature of the goods, services, facilities, privileges, advantages, or accommodations being offered or would result in undue burden;

—a failure to remove architectural barriers, and communication barriers that are structural in nature, in existing facilities, and transportation barriers in existing vehicles and rail passenger cars used by an establishment for transporting individuals (not including barriers that can only be removed through the retrofitting of vehicles or rail passenger cars by the installation of a hydraulic or other lift), where such removal is readily achievable;

—where an entity can demonstrate that the removal of a barrier under the preceding requirement is not readily achievable, a failure to make such goods, services, facilities, privileges, advantages, or accommodations available through alternative methods if such methods are readily achievable.

Finally, paragraph (2) provides that with respect to a facility or part thereof that is altered by, on behalf of, or for the use of an establishment in a manner that affects or could affect the usability of the facility or part thereof, the term "discrimination" under subsection (a) includes a failure to make alterations in such a manner that, to the maximum extent feasible, the altered portions of the facility are readily accessible to and unsable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations. Where the entity is undertaking an alteration that affects or could affect the usability of or access to an area of the facility containing a primary function, the entity shall also make the alterations in such a manner that, to the maximum extent feasible, the path of travel to the altered area, and the bathrooms, telephones, and drinking fountains serving the altered area, are readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs, upon completion of such alterations, where such alterations to the path of travel or the bathrooms, telephones, and drinking fountains serving the altered area are not disproportionate to the overall alterations in terms of cost and scope (as determined under criteria established by the Attorney General). Under the bill, this provision is not to be construed to require the installation of an elevator for facilities that are less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

SECTION 303. NEW CONSTRUCTION IN PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES

Subsection (a) sets forth a general rule with respect to the design and construction of new public accommodations and commercial facilities. Except as provided in subsection (b), it shall be considered discrimination under this provision to fail to design and construct such accommodations and facilities for first occupancy later than

30 months after the date of enactment that are readily accessible to and usable by individuals with disabilities, except where an entity can demonstrate that it is structurally impracticable to meet the standards set forth or incorporated by reference in regulations issued under this title.

Subsection (b) provides that the installation of an elevator is not required under subsection (a) for public accommodations and commercial facilities that are less than three stories or have less than 3,000 square feet per story unless the building is a shopping center, a shopping mall, or the professional office of a health care provider or unless the Attorney General determines that a particular category of such facilities requires the installation of elevators based on the usage of such facilities.

The inclusion in this title of provisions applicable to commercial facilities is not intended to subject such facilities to the requirements of section 302 applicable to public accommodations if those facilities would not otherwise qualify as public accommodations under section 301(3).

SECTION 304. PROHIBITION OF DISCRIMINATION IN PUBLIC TRANSPORTATION SERVICES PROVIDED BY PRIVATE ENTITIES

Subsection (a) sets forth a general rule providing that no individual shall be discriminated against on the basis of disability in the full and equal enjoyment of public transportation services provided by a privately operated entity that is primarily engaged in the business of transporting people, but is not in the principal business of providing air transportation, and whose operations affect commerce.

Subsection (b) provides principles of construction for subsection (a) by setting forth several specific acts and omissions constituting discrimination. These acts include the imposition or application by an entity of eligibility criteria that screen out or tend to screen out an individual with a disability or any class of individuals with disabilities from fully enjoying the public transportation services provided by the entity, unless such criteria can be shown to be necessary for the provision of the services being offered.

The statutory requirement that a person with a disability must be able to meet the "necessary eligibility criteria" of an entity providing public transportation services reflects the longstanding principle under section 504 of the Rehabilitation Act that, to the extent the manifestations of a person's disability prevent that person from meeting the basic eligibility requirements of a public transportation service—for example, by causing substantial interference with the operation of the public transportation service—that manifestation of the person's disability may be taken into account by the public transportation operator in denying service to the person with the disability. Of course, the prejudice or stereotypical views of other individuals cannot be used as the basis for claiming a substantial interference with the operation of a public transportation service. Consistent with current law, the assessment as to whether an individual with a disability meets the necessary eligibility criteria of a public transportation service must take into account whether a reasonable modification to rules, policies, and procedures, or the provision of auxiliary aids or services, would enable the person to meet the necessary eligibility criteria.

Other acts and omissions described in subsection (b) that would constitute discrimination under subsection (a) are:

—the failure of an entity to make reasonable modifications, provide auxiliary aids and services, or remove barriers consistent with the requirements of section 302(b)(2) (B), (C), (D), and (E);

—the purchase or lease of a new rail passenger car that is used to provide public transportation services, and for which a solicitation is made later than 30 days after the effective date of this paragraph, that is not readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs; and

—the remanufacture of a rail passenger car that is used to provide public transportation so as to extend its usable life for 10 years or more, or the purchase or lease of such a rail car, unless the rail car, to the maximum extent feasible, is made readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs.

For purposes of this section, the concepts of accessibility and usability in the context of the phrase "readily accessible to and usable by individuals with disabilities, including individuals who use wheelchairs" has the same meaning as described under section 222. Similarly, as with comparable provisions and requirements applicable to Amtrak and commuter railroads under section 222, this section does not *require* the provision of lifts, ramps, or other equipment in any *particular* circumstance with respect to public transportation by rail when provided by private entities. Moreover, where the provision of such a device would not be readily achievable, the private entity to provide it.

Subsection (c) provides an exception to the requirements of subsection (b) for historical or antiquated rail passenger cars with respect to remanufacture and the removal of barriers. Under subsection (c), to the extent that compliance with those requirements of subsection (b) would significantly alter the historic or antiquated character of a historical or antiquated rail passenger car, or a rail station served exclusively by such cars, or would result in violation of any rule, regulation, standard, or order issued by the Secretary of Transportation under the Federal Railroad Safety Act of 1970, such compliance shall not be required. As used in this subsection, the term "historical or antiquated rail passenger cars" is defined to mean rail passenger cars:

—which are not less than 30 years old at the time of their use for transporting individuals;

—the manufacturer of which is no longer is the business of manufacturing rail passenger cars; and

—which either (i) has a consequential association with events or persons significant to the past, or (ii) embodies, or is being restored to embody, the distinctive characteristics of a type of rail passenger car used in the past, or to represent a time period which has passed.

The Committee recognizes that historical or antiquated rail passenger cars used in public transportation service present a unique situation with respect to accessibility. Such cars, which embody the distinctive characteristics of a type of rail car used in the past or which represent a particular historical era, play an important role in preserving the heritage of the United States. The cars represent "living history," a look back at the building and expansion of our country. Unfortunately, some of the alterations that would be necessary to make these rail passenger cars accessible to disabled individuals, particularly those who use wheelchairs, would undermine the historical or antiquated nature of such cars. Additionally, structural modifications necessary to accommodate individuals with certain disabilities may result in changes to the car that prevent it from meeting Federal Railroad Administration (FRA) safety and mechanical standards.

In analyzing these problems, the Committee struck an equitable balance between, on the one hand, the requirements of the legislation to ensure that public transportation in general be readily accessible to disabled individuals and, on the other hand, the need and desire to preserve the heritage embodied in these cars. This balance was achieved by providing an exception to the requirements of the legislation for historical and antiquated rail passenger cars to the extent that compliance with the legislation would significantly alter the historical or antiquated characteristics of such cars. Additionally, an exception is provided if alterations to the car could be made in such a way as not to significantly alter the historical or antiquated characteristics but would result in a violation of any rules, regulations, standards, or orders issued by the Secretary of Transportation under the Federal Railroad Safety Act of 1970. However, whenever possible without significantly altering the historical or antiquated characteristics, such cars should be made accessible to individuals with disabilities, and operators of such cars should attempt to accommodate such individuals.

The Committee has included a definition for "historical or antiquated rail passenger cars". The Committee believes that the cars meeting the requirements of this definition are generally used for educational purposes, as tourist attractions, for excursions, or on a charter basis. Under the definition, a car does not suddenly become "historical or antiquated" merely because, for example, one furnishes it with a piece of antique furniture or hangs an antique fixture in an otherwise unremarkable setting. The passengers riding on these cars are generally attracted to such transportation, as opposed to other modes of transportation, for the ambience and experience provided by the historical or antiquated characteristics of the cars. These are the type of rail passenger cars that are intended to fall within the exception to the legislation. The Committee notes, however, that a car does not lose its protected status under this provision merely as a result of the presence of amenities that make the car attractive to or comfortable for these very riders. Thus, for example, the installation of kitchens meeting FRA and OSHA safety standards, or the presence of air conditioning and modern plumbing, would not prevent a car from qualifying for the exception if these amenities do not detract from the overall historical or antiquated character of the car.

SECTION 305. REGULATIONS

Subsection (a) provides that not later than one year after the date of enactment, the Secretary of Transportation shall issue regulations, in an accessible format, necessary for carrying out section 304 that shall include standards applicable to rail facilities and rail passenger cars covered under such section.

Subsection (b) provides that not later than one year after the date of enactment, the Attorney General shall issue regulations, in an accessible format, to carry out the remaining provisions of this title not referred to in subsection (a) that include standards applicable to facilities and vehicles covered under section 302.

Subsection (c) provides that standards included in regulations issued under subsections (a) and (b) shall be consistent with the minimum guidelines issued by the ATBCB in accordance with section 504(a) of the ADA.

Subsection (d) provides that, if final regulations have not been issued pursuant to this section, for new construction or alterations for which a valid and appropriate State or local building permit is obtained prior to the issuance of final regulations under this section, and for which the construction or alteration authorized by such permit begins within one year of the receipt of such permit and is completed under the terms of such permit, compliance with the UFAS in effect at the time the building permit is issued shall suffice to satisfy the requirement that buildings and facilities be readily accessible to and usable by persons with disabilities as required under sections 302(b)(2)(F) and 303. However, if such final regulations have not been issued one year after the ATBCB has issued the supplemental minimum guidelines required under section 504(a) of this Act, compliance with such supplemental minimum guidelines shall be necessary to satisfy the requirement that buildings, facilities, vehicles, and rail passenger cars be readily accessible to and usable by persons with disabilities prior to issuance of the final regulations.

The reference to vehicles and rail passenger cars is excluded from the first portion of the subsection, covering the period prior to ATBCB's issuance of supplemental minimum guidelines, because the UFAS does not and is not contemplated to contain standards applicable to vehicles and rail passenger cars. Accordingly, reference to vehicles and rail passenger cars in that portion would be inappropriate.

SECTION 306. ENFORCEMENT

Subsection (a) sets forth, in general, the availability of remedies and procedures to redress violations of this title. The subsection provides in paragraph (1) that the remedies and procedures set forth in section 204(a) of the Civil Rights Act of 1964 (42 U.S.C. 2000a-3(a)) shall be available to any individual who has reasonable grounds for believing that he or she is being or is about to be subjected to discrimination on the basis of disability in violation of this title.

The subsection further provides in paragraph (2) that in the case of violations of section 302(b)(2) (D) and (F) and section 303(a), injunctive relief shall include an order to alter facilities to make such facilities readily accessible to and usable by individuals with disabilities to the extent required by this title. Where appropriate, injunctive relief shall also include requiring the provision of an auxiliary aid or service, modification of a policy, or provision of alternative methods, to the extent required by this title. While the issuance of an order to make a facility readily accessible to and usable by individuals with disabilities is mandatory under the first sentence of paragraph (2), the Committee does not intend by this provision to deprive the court of all equitable discretion in such matters. Thus, in framing the terms of a mandatory injunction, such as the period for compliance, the court may take into account the particular facts and circumstances of each case.

Subsection (b) sets forth the authorities and responsibilities of the Attorney General in enforcing the provisions of this title. Under subsection (b)(1)(A), the Attorney General is required to investigate alleged violations of this title and to undertake periodic reviews of the compliance of covered entities under this title. If the Attorney General has reasonable cause to believe that (i) any person or group of persons is engaged in a pattern or practice of discrimination under this title, or (ii) any person or group of persons has been discriminated against under this title and such discrimination raises an issue of general public importance, then the Attorney General may commence a civil action under subsection (b)(1)(B) in any appropriate Federal district court.

Under subsection (b)(1)(A), the Attorney General is further authorized, on the application of a State or local government and in consultation with the ATBCB, and after prior notice and a public hearing, to certify that a State law or local building code or similar ordinance that establishes accessibility requirements meets or exceeds the minimum requirements of this Act for the accessibility and usability of covered facilities under this title. At any enforcement proceeding under this section, such certification shall be rebuttable evidence that such State law or local ordinance does meet or exceed the minimum requirements of this Act.

Subsection (b)(2) provides that in a civil action brought by the Attorney General, the court may grant any one or more of several remedies specified in the legislation—equitable relief, monetary damages, and civil penalties. However, the court is not authorized under this provision to award punitive damages. Furthermore, the purpose of civil penalties is stated to be the vindication of the public interest, and those penalties are limited to a maximum of $50,000 for a first violation and $100,000 for any subsequent violation.

For purposes of determining whether a first or subsequent violation has occurred under the civil penalty provision, subsection (b)(3) provides that a determination in a single action, by judgment or settlement, that the covered entity has engaged in more than one discriminatory act shall be counted as a single violation.

Finally, subsection (b)(4) provides that in a civil action brought by the Attorney General under subsection (b)(1)(B), the court, when considering what amount of civil penalty, if any, is appropriate to assess, shall give consideration to any good faith effort or attempt to comply with this Act by the defendant. In evaluating good faith, the court shall consider, among other factors, whether the defendent could have reasonably anticipated the need for an appropriate type of auxiliary aid needed to accommodate the unique needs of a particular individual with a disability.

SECTION 307. EFFECTIVE DATE

This section provides that this title, with the exception of sections 304(b)(3) and 305, shall become effective 18 months after the date of enactment. Sections 304(b)(3) and 305, however, shall become effective on the date of enactment.

TITLE IV—TELECOMMUNICATIONS

SECTION 401. TELECOMMUNICATIONS RELAY SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS

This section amends Title II of the Communications Act of 1934 by adding a new section 225. The new section is described in detail below:

Definitions

Section 225(a) defines: (1) "common carrier" or "carrier" to include both interestate common carriers and intrastate common carriers for purposes of this section only; (2) "TDD" to mean a machine that employs graphic communications in the transmission of coded signals through a telephone wire or radio communication system; and (3) "telecommunications relay services" to mean telephone transmission services that allow a hearing-impaired or speech-impaired individual to communicate in a manner that is functionally equivalent to voice communications services offered to hearing individuals. The term includes, but is not limited to, TDD relay services.

Availability to telecommunications relay services

Section 225(b)(1) states that to promote the availability and use of communications services to all Americans, the Commission must ensure that interstate and intrastate telecommunications relay services are provided to the greatest extent possible and in the most efficient manner.

Section 225(b)(2) extends to the Federal Communications Commission the same authority, power, and functions (including remedies, procedures, rights, penalties, and obligations) with respect to intrastate carriers as it has with respect to interstate carriers under the Communications Act of 1934, as amended, for the limited purposes of implementing and enforcing the requirements of this section.

Provision of services

Section 225(c) requires that carriers providing telephone voice transmission services provide telecommunications relay services within three years after the date of enactment of this section in the area in which it offers service. Carriers are to offer to hearing-impaired and speech-impaired individuals services which are functionally equivalent to voice telephone services provided to non-impaired individuals. Carriers are granted the flexibility to provide such services individually, through designees, through a competitively selected vendor, or in concert with other carriers. In exercising this flexibility, it is the carriers' responsibility to ensure compliance with all the requirements of the section. A carrier will be in compliance with the regulations of this section with regard to the provision of intrastate relay service if the carrier complies with the requirements of a state certified program under subsection (f) or, in those states that do not have a certified program, complies with the Commission's regulations under subsection (d).

If an entity other than a carrier is providing the service, it remains the carrier's responsibility to ensure that all applicable regulations are being complied with.

There are some services, such as audiotext services, that connect callers to recorded information services. It is not the function of this legislation to facilitate access to these kinds of services. Rather, the legislation is intended to extend the benefits of voice telephone service to hearing- and speech-impaired individuals.

In carrying out their responsibilities under this Act, common carriers are encouraged to accommodate individuals who speak a language other than English. This is particularly important in areas in which there is a substantial population of individuals for whom English is not the primary language. However, carriers are not required to provide relay services in languages other than those which predominate among large sections of the population.

Regulations

Section 225(d)(1) requires the Commission to prescribe the necessary rules and regulations to carry out the requirements of this section within one year of enactment. The Commission's regulations must establish functional requirements, guidelines, operational procedures, and minimum standards for the provision of telecommunications relay services. The regulations must ensure that the telecommunications relay services are available every day for 24 hours on a non-discriminatory basis. The users of the telecommunications relay services are to be charged rates no greater than the rates charged for functionally equivalent voice communications services.

Consistent with their common carrier obligations, the common carriers' relay operators must not refuse calls, nor limit the length of calls to users of the telecommunications relay services. The legislation also prohibits the relay operators from disclosing the content of any relayed conversation. Any record of a conversation shall not be kept any longer than the duration of the call; however, records of the transaction may be kept for billing purposes.

Section 225(d)(2) requires that the Commission ensure that regulations prescribed to implement this section are consistent with section 7 of the Communications Act, while allowing for the use of existing technology. Such regulations should not have the effect of freezing technology or thwarting the introduction of a superior or more efficient technology.

There are two formats currently being utilized by TDD users—ASCII and Baudot. In a Notice of Proposed Rulemaking (Docket 87-124, adopted Juy 21, 1989), the Commission last year stated "that requiring all TDDs to use the ASCII format would impose unnecessary burden on owners of the Baudot devices." In implementing this section, the Commission should continue its policy of accommodating both existing formats, so that TDD users will not be required to purchase new equipment to continue to receive service.

Section 225(d)(3)(A) requires that the Commission prescribe regulations, consistent with section 410 of the Communications Act, governing the jurisdictional separation of costs for telecommunications relay services provided under this section.

Section 225(d)(3)(B) states that the Commission shall issue regulations to ensure that carriers are permitted to recover the costs incurred in meeting the requirements of this Act from subscribers of the respective interstate and intrastate jurisdictions. The Commission's regulations shall ensure that all subscribers to every interstate service, including private line, public switched network services, and other common carrier services, contribute to recover the costs incurred in the provision of interstate relay services.

The Commission also is granted broad discretion to structure a cost-recovery mechanism to determine the most appropriate method of recovery of interstate costs. While "Lifeline" services are not exempted specifically from this section, requiring "Lifeline" subscribers to pay for relay services would tend to undermine the rationale for such services. Exempting "Lifeline" services would not be inconsistent with this provision.

The Committee amendment struck the prohibition on end-user charges that was contained in the introduced legislation. It is the Committee's intent that the Commission have broad discretion in promulgating rules under this Act to determine the most appropriate method to ensure the recovery of interstate and intrastate costs.

The Act requires that state commissions permit common carriers to recover the costs incurred in providing intrastate telecommunications relay services, if the common carrier meets the requirements of the state's certified program. In states without a certified program, the Act requires state commissions to permit the recovery of costs as long as the carrier complies with the federal regulatory requirements established by the commission.

Enforcement

Section 225(e)(1) requires that the commission enforce the requirements of this section subject to subsections (f) and (g). The Committee intends that the commission have sufficient enforcement authority to ensure that telecommunications relay services are provided nationwide and that certain minimum federal standards are met by all providers of the services. The Commission's enforcement authority over the provision of intrastate telecommunications relay services is limited in states with certified programs by certification procedures required to be established under subsection (f).

Section 225(e)(2) requires that the Commission resolve any complaint by final order within 180 days after that complaint has been filed.

Certification

Section 225(f)(1) and (f)(2) describe the state certification procedure whereby states may apply to assert jurisdiction over the provision of intrastate telecommunications relay services. The Commission may grant certification upon a showing that such services are being made available in the state and that they comply with the federal guidelines and standards promulgated pursuant to subsection (d). A state plan may make service available through the state government itself, through designees, through a competitively selected vendor, or through regulation of intrastate carriers.

Any state wishing to obtain certification must include in its submission to the Commission documentation on the procedures and remedies for enforcing compliance with the state's requirements. This is necessary because states with certified plans will have the primary role in enforcing the provisions of the Title IV in those states.

Section 225(f)(3) states that, except for reasons affecting rules promulgated pursuant to subsection (d), the Commission may not deny certification to a state based solely on its chosen method of founding the provision of intrastate telecommunications relay services. Subsection (d), however, would require that a state program not include cost recovery mechanisms that would have the effect of requiring users of telecommunications relay services to pay effectively higher rates than those paid for functionally equivalent voice communications services.

In addition, the Committee recognizes that the relay services are of benefit to all society and therefore would expect that any funding mechanism not be labled so as to prejudice or offend the public, especially the hearing-impaired and speech-impaired community. For example, California's relay service is funded by a surcharge that appears on telephone bills as "Deaf Trust Fund." This unfortunate choice of words is offensive and should be precluded.

Section 225(f)(4) allows for the Commission to revoke such certification if, after notice and opportunity for a hearing, the Commission determines that certification is no longer warranted. In a state whose program has been suspended, the Commission shall provide a reasonable transition period to ensure both continuity of relay service for users and to provide a reasonable opportunity for common carriers to meet the requirements of the Commission's regulations after the suspension or revocations of the certified program.

Complaint

Section 225(g)(1) states that when a complaint is filed with the Commission that alleges a violation of this section with respect to the provision of intrastate to telecommunications relay services, the Commission shall refer such complaint to the appropriate state commission is that state has been duly certified by the Commission pursuant to subsection (f). If the appropriate state has not been duly certified, then the Commission will handle the complaint pursuant to subsection (e)(1) and (e)(2)

Once a complaint has been properly referred to a state commission, subsection (g)(2) permits the Commission to exercise its jurisdiction over such a complaint only if final action has not been taken within 180 days after the complaint is filed with the state, or within a shorter period as prescribed by the regulations of such state, or if the Commission determines that a state program no longer qualifies for certification under subsection (f).

SECTION 402. CLOSED-CAPTIONING OF PUBLIC SERVICE ANNOUNCEMENTS

This section amends section 711 of the communications Act of 1934 to require that any public service announcement, either partially or wholly funded by the Federal government, shall include closed captioning of the verbal content of the announcement.

The section further states that a television broadcast licensee shall not be required to supply closed captioning for any such announcement that does not include closed captioning. Unless the licensee intentionally fails to transmit the closed caption that was included in the announcement, the licensee shall not be held liable for broadcasting any such announcement without transmitting a closed caption.

TITLE V—MISCELLANEOUS PROVISIONS

SECTION 501. CONSTRUCTION

Subsection (a) states that, except as otherwise provided in this Act, nothing in this Act shall be construed to reduce the scope of coverage or apply a lesser standard than the coverage required or the standards applied under title V of the Rehabilitation Act of 1973 or the regulations issued by Federal agencies pursuant to such title. The phrase "except as otherwise provided in this Act" has been included because the legislation, as reported, makes several changes in existing law, particularly with respect to requirements imposed on Amtrak and commuter railroads. The Committee intends that the provisions of the ADA in these areas shall supersede any provisions of title V of the Rehabilitation Act providing a broader scope of coverage or higher standards.

Subsection (b) provides that nothing in this Act shall be construed to invalidate or limit any other Federal law or law of any State or political subdivision of any State or jurisdiction that provides greater or equal protecton for the rights of individuals with disabilities than are afforded by this Act. The Committee notes that while nothing in *this Act* shall be construed to have this effect, the Act is not intended to override traditional constitutional prohibitions against the burdening of or interference with the free flow of interstate commerce, particularly with respect to the interstate operation of railroads. Amtrak, for example, operates in 44 States and the District of Columbia. The Committee does not expect Amtrak to have to comply with the multiple requirements and standards that might be imposed by various jurisdictions with respect to the accessibility of its cars, stations, and other facilities and services. The same is true with respect to commuter railroads operating in more than one State. In this respect, the ADA defines the scope of these railroads' obligations.

Subsection (b) further provides that nothing in this Act shall be construed to preclude the prohibition of, or the imposition of restrictions on, smoking in places of public accommodation, in places of employment, in public transportation as defined in section 211(a)(1) and 301(4), in commuter rail transportation as defined in section 221(2), or in intercity rail transportation as defined in section 221(3).

Subsection (c) provides that titles I through IV and this Act shall not be construed to prohibit or restrict:

—an insurer, hospital or medical service company, health maintenance organization, or any agent, or entity that administers benefit plans, or similar organizations from underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

—a person or organization covered by this Act from establishing, sponsoring, observing, or administering the terms of a bona fide benefit plan that are based on underwriting risks, classifying risks, or administering such risks that are based on or not inconsistent with State law; or

—a person or organization covered by this Act from establishing, sponsoring, observing, or administering the terms of a bona fide benefit plan that is not subject to State laws that regulate insurance.

The subsection further provides, however, that the activities described above with respect to risks and benefit plans are not to be used as a subterfuge to evade the purposes of titles I and III.

SECTION 502. PROHIBITION AGAINST RETALIATION AND COERCION

Subsection (a) prohibits discrimination against any individual because that individual has lawfully opposed any act or practice made unlawful by this Act or because that individual has made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or hearing under this Act.

Subsection (b) provides that it shall be unlawful to coerce, intimidate, threaten, or interfere with any person in the exercise or enjoyment of, or on account of his or her having exercised or enjoyed, or on account of his or her having aided or encouraged any other person in the exercise or enjoyment of, any right granted or protected by this Act.

Subsection (c) provides that the remedies and procedures available under sections 105, 204, 213, 226, and 306 of this Act shall be available to persons aggrieved by violations of subsections (a) and (b) with respect to title I, subtitle A of title II, parts I and II of subtitle B of title II, and title III, respectively.

SECTION 503. STATE IMMUNITY

Consistent with the requirements set forth in *Atascadero State Hospital v. Scanlon*, 473 U.S. 234 (1985), this section specifies that a State shall not be immune under the 11th Amendment from an action in Federal court for a violation of this Act. The section further provides that in any such action, remedies are available for such a violation to the same extent as such remedies are available for such a violation in an action against any public or private entity other than a State.

SECTION 504. REGULATIONS ISSUED BY THE ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

Subsection (a) provides that not later than 9 months after the date of enactment, the ATBCB shall issue minimum guidelines supplementing the existing MGRAD for purposes of titles II and III of this Act.

Subsection (b) requires that the supplemental guidelines issued under subsection (a) establish additional requirements, consistent with this Act, to ensure that buildings, facilities, rail passenger cars, and vehicles are accessible, in terms of architecture and design, transportation, and communication, to individuals with disabilities.

Subsection (c) sets forth special provisions for qualified historic properties. Under these provisions, the supplemental guidelines issued under subsection (a) shall include procedures and requirements for alterations that will threaten or destroy the historic significance of qualified historic buildings and facilities as defined in 4.1.7(1)(a) of the UFAS. With respect to alterations of buildings or facilities that are eligible for listing in the National Register of Historic Places under the National Historic Preservation Act (16 U.S.C. 470 et seq.), the guidelines shall, at a minimum, maintain the procedures and requirements established in 4.1.7 (1) and (2) of the UFAS. With respect to alterations of buildings or facilities designated as historic under State or local law, the guidelines shall establish procedures equivalent to those established by 4.1.7(1) (b) and (c) of the UFAS, and shall require, at a minimum, compliance with the requirements established in 4.1.7(2) of such standards.

SECTION 505. ATTORNEYS' FEES

This section provides that in any action or administrative proceeding commenced pursuant to this Act, the court or agency, in its discretion, may allow the prevailing party, other than the United States, a reasonable attorney's fee, including litigation expenses and costs. Under this provision, the United States shall be liable for the foregoing the same as a private individual.

SECTION 506. TECHNICAL ASSISTANCE

Subsection (a) requires the Attorney General, within 180 days after the date of enactment and in consultation with the Chairman of the EEOC, the Secretary of Transporation, the Chairperson of the ATBCB, and the Chairman of the FCC, to develop a plan to assist entities covered under this Act, and other Federal agencies, in understanding the responsibility of such entities and agencies under the Act. The plan is to be published for public comment in accordance with the Administrative Procedure Act.

Subsection (b) authorizes the Attorney General, in carrying out subsection (a), to obtain the assistance of other Federal agencies, including the National Council on Disability, the President's Committee on Employment of People with Disabilities, the Small Business Administration, and the Department of Commerce.

Subsection (c) authorizes each Federal agency that has responsibility for implementing this Act to render technical assistance to individuals and institutions that have rights or duties under the respective title or titles for which such agency has responsibility. The subsection divides the responsibility for implementation of the plan for assistance under subsection (a) as follows:

—For title I, the EEOC and the Attorney General;
—For subtitle A of title II, the Attorney General;
—For subtitle B of title II, the Secretary of Transportation;
—For title III (except for section 304), the Attorney General, in coordination with the Secretary of Transportation and the Chairperson of the ATBCB;
—For section 304, the Secretary of Transportation; and
—For title IV, the Chairman of the FCC.

Each Federal agency that has responsibility for implementing this Act is further required by subsection (c) to ensure the availability and provision of appropriate technical assistance manuals to individuals or entities with 'rights and duties under the Act no later than six months after applicable final regulations are published under titles I, II, III, and IV.

Subsection (d) authorizes each Federal agency referred to above to make grants and enter into contracts to effectuate the purposes of this Act. Such grants and contracts, among other uses, may be designed to ensure wide dissemination of information about the rights and duties established by the Act and to provide information and technical assistance about techniques for effective compliance with the Act.

Subsection (e) provides that an employer, public accommodation, or other entity covered under the Act shall not be excused from compliance with the requirements of this Act because of any failure to receive technical assistance under this section, including any failure in the development or dissemination of any technical assistance manual authorized by this section.

SECTION 507. ILLEGAL USE OF DRUGS

Subsection (a) specifies that, for purposes of this Act, except as provided in subsection (c), the current illegal use of a drug does not constitute a disability.

Subsection (b) provides that, for purposes of this section, an individual shall not be considered a current illegal user of a drug if such individual:

—has successfully completed a supervised drug rehabilitation program and is no longer illegally using drugs, or has otherwise been rehabilitated successfully and is no longer illegally using drugs;
—is participating in a supervised drug rehabilitation program and is no longer illegally using drugs; or
—is erroneously regarded as being an illegal user of drugs but is not illegally using drugs.

Subsection (b) further provides that it shall not be a violation of this Act for a covered entity to adopt or administer reasonable policies or procedures designed to ensure that an individual who has successfully completed or is participating in a supervised drug rehabilitation program, as described above, is no longer illegally using drugs. The Committee notes that the term "supervised drug rehabilitation program" is not defined in the Act and that there are no standards currently in place to determine whether a given program qualifies under this section. The Committee intends that the term be interpreted to include both in-patient and outpatient programs, as well as employee assistance programs that provide professional (not necessarily medical) assistance and counseling.

Subsection (c) provides that notwithstanding subsection (a) and section 508(b)(3) of the Act, an individual shall not be denied health or social services on the basis of the current illegal use of drugs if such individual is otherwise entitled to such services.

Subsection (d) provides that nothing in this section shall be construed to encourage, prohibit, restrict, or authorize the conducting of drug testing.

Under subsection (e) the term "drug" is defined to mean a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812). The subsection also provides that the term "illegal use of drugs" does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.

SECTION 508. DEFINITIONS

Subsection (a) provides that for purposes of the definition of the term "disability" in section 3(2), homosexuality and bisexuality shall not be considered impairments.

Subsection (b) provides that under this Act, the term "disability" shall not include:

—transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments, or other sexual behavior disorders;

—compulsive gambling, kleptomania, or pyromania; or

—psychoactive substance use disorders resulting from current use of illegal drugs.

CHANGES IN EXISTING LAW MADE BY THE BILL, AS REPORTED

In compliance with clause 3 of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, H.R. 2273 as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, existing law in which no change is proposed is shown in roman):

COMMUNICATIONS ACT OF 1934

TITLE I—GENERAL PROVISIONS

* * * * * * *

APPLICATION OF ACT

SEC. 2. (a) * * *

(b) Except as provided in [section 223 or 224] *sections 223, 224, and 225* and subject to the provisions of section 301 and title VI, nothing in this Act shall be construed to apply or to give the Commission jurisdiction with respect to (1) charges, classifications, practices, services, facilities, or regulations for or in connection with intrastate communication service by wire or radio of any carrier, or (2) any carrier engaged in interstate or foreign communication solely through physical connection with the facilities of another carrier not directly or indirectly controlling or controlled by, or under direct or indirect common control with such carrier, or (3) any carrier engaged in interstate or foreign communication solely through connection by radio, or by wire and radio, with facilities, located in an adjoining State or in Canada or Mexico (where they adjoin the State in which the carrier is doing business), of another carrier not directly or indirectly controlling or controlled by, or under direct or indirect common control with such carrier, or (4) any carrier to which clause (2) or clause (3) would be applicable except for furnishing interstate mobile radio communication service or radio communication service to mobile stations on land vehicles in Canada or Mexico; except that sections 201 through 205 of this Act, both inclusive, shall, except as otherwise provided therein, apply to carriers described in clauses (2), (3), and (4).

* * * * * * *

TITLE II—COMMON CARRIERS

* * * * * * *

SPECIAL PROVISIONS RELATING TO TELEPHONE COMPANIES

SEC. 221. (a) * * *

(b) Subject to the provisions of [section 301] *sections 225 and 301,* nothing in this Act shall be construed to apply, or to give the Commission jurisdiction, with respect to charges, classifications, practices, services, facilities, or regulations for or in connection with wire, mobile, or point-to-point radio telephone exchange service, or any combination thereof even though a portion of such exchange service constitutes interstate or foreign communication, in any case where such matters are subject to regulation by a State commission or by local governmental authority.

* * * * * * *

SEC. 225. TELECOMMUNICATIONS SERVICES FOR HEARING-IMPAIRED AND SPEECH-IMPAIRED INDIVIDUALS.

(a) DEFINITIONS.—As used in this section—

(1) COMMON CARRIER OR CARRIER.—The term "common carrier" or "carrier" includes any common carrier engaged in interstate communication by wire or radio as defined in section 3(h) and any common carrier engaged in intrastate communication by wire or radio, notwithstanding sections 2(b) and 221(b).

(2) TDD.—The term "TTD" means a Telecommunications Device for the Deaf, which is a machine that employs graphic communication in the transmission of coded signals through a wire or radio communication system.

(3) TELECOMMUNICATIONS RELAY SERVICES.—The term "telecommunications relay services" means telephone transmission services that provide the ability for an individual who has a hearing impairment or speech impairment to engage in communication by wire or radio with a hearing individual in a manner that is functionally equivalent to the ability of an indi-

vidual who does not have a hearing impairment or speech impairment to communicate using voice communication services by wire or radio. Such term includes services that enable two-way communication between an individual who uses a TDD or other nonvoice terminal device and an individual who does not use such a device.

(b) Availability of Telecommunications Relay Services.—

(1) In general.—In order to carry out the purposes established under section 1, to make available to all individuals in the United States a rapid, efficient nationwide communication service, and to increase the utility of the telephone system of the Nation, the Commission shall ensure that interstate and intrastate telecommunications relay services are available, to the extent possible and in the most efficient manner, to hearing-impaired and speech-impaired individuals in the United States.

(2) Use of general authority and remedies.—For the purposes of administering and enforcing the provisions of this section and the regulations prescribed thereunder, the Commission shall have the same authority, power, and functions with respect to common carriers engaged in intrastate communication as the Commission has in administering and enforcing the provisions of this title with respect to any common carrier engaged in interstate communication. Any violation of this section by any common carrier engaged in intrastate communication shall be subject to the same remedies, penalties, and procedures as are applicable to a violation of this Act by a common carrier engaged in interstate communication.

(c) Provision of Services.—Each common carrier providing telephone voice transmission services shall, not later than 3 years after the date of enactment of this section, provide in compliance with the regulations prescribed under this section, within the area in which it offers service, telecommunications relay services, individually, through designees, through a competitively selected vendor, or in concert with other carriers. A common carrier shall be considered to be in compliance with such regulations—

(1) with respect to intrastate telecommunications relay services in any State that does not have a certified program under subsection (f) and with respect to interstate telecommunications relay services, if such common carrier (or other entity through which the carrier is providing such relay services) is in compliance with the Commission's regulations under subsection (d); or

(2) with respect to intrastate telecommunications relay services in any State that has a certified program under subsection (f) for such State, if such common carrier (or other entity through which the carrier is providing such relay services) is in compliance with the program certified under subsection (f) for such State.

(d) Regulations.—

(1) In general.—The Commission shall, not later than 1 year after the date of enactment of this section, prescribe regulations to implement this section, including regulations that—

(A) establish functional requirements, guidelines, and operations procedures for telecommunications relay services;

(B) establish minimum standards that shall be met in carrying out subsection (c);

(C) require that telecommunications relay services operate every day for 24 hours per day;

(D) require that users of telecommunications relay services pay rates no greater than the rates paid for functionally equivalent voice communication services with respect to such factors as the duration of the call, the time of day, and the distance from point of origination to point of termination;

(E) prohibit relay operators from failing to fulfill the obligations of common carriers by refusing calls or limiting the length of calls that use telecommunications relay services;

(F) prohibit relay operators from disclosing the content of any relayed conversation and from keeping records of the content of any such conversation beyond the duration of the call; and

(G) prohibit relay operators from intentionally altering a relayed conversation.

(2) Technology.—The Commission shall ensure that regulations prescribed to implement this section encourage, consistent with section 7(a) of this Act, the use of existing technology and do not discourage or impair the development of improved technology.

(3) Jurisdictional separation of costs.—

(A) In general.—Consistent with the provisions of section 410 of this Act, the Commission shall prescribe regulations governing the jurisdictional separation of costs for the services provided pursuant to this section.

(B) Recovering costs.—Such regulations shall generally provide that costs caused by interstate telecommunications relay services shall be recovered from all subscribers for every interstate service and costs caused by intrastate telecommunications relay services shall be recovered from the intrastate jurisdiction. In a State that has a certified program under subsection (f), a State commission shall permit a common carrier to recover the costs incurred in providing intrastate telecommunications relay services by a method consistent with the requirements of this section.

(e) Enforcement.—

(1) In general.—Subject to subsections (f) and (g), the Commission shall enforce this section.

(2) Complaint.—The Commission shall resolve, by final order, a complaint alleging a violation of this section within 180 days after the date such compliant is filed.

(f) Certification.—

(1) State documentation.—Any State desiring to establish a State program under this section shall submit documentation to the Commission that describes the program of such State for implementing intrastate telecommunications relay services and the procedures and remedies available for enforcing any requirements imposed by the State program.

(2) Requirements for certification.—After review of such documentation, the Commission shall certify the State program if the Commission determines that—

(A) the program makes available to hearing-impaired and speech-impaired individuals, either directly, through designees, through a competitively selected vendor, or through regulation of intrastate common carriers, intrastate telecommunications relay services in such State in a manner that meets or exceeds the requirements of regulations prescribed by the Commission under subsection (d); and

(B) the program makes available adequate procedures and remedies for enforcing the requirements of the State program.

(3) Method of funding.—Except as provided in subsection (d), the Commission shall not refuse to certify a State program based solely on the method such State will implement for funding intrastate telecommunications relay services.

(4) Suspension or revocation of certification.—The Commission may suspend or revoke such certification if, after notice and opportunity for hearing, the Commission determines that such certification is no longer warranted. In a State whose program has been suspended or revoked, the Commission shall take such steps as may be necessary, consistent with this section, to ensure continuity of telecommunications relay services.

(g) Complaint.—

(1) Referral of complaint.—If a complaint to the Commission alleges a violation of this section with respect to intrastate telecommunications relay services within a State and certification of the program of such State under subsection (f) is in effect, the Commission shall refer such compliant to such State.

(2) Jurisdiction of commission.—After referring a complaint to a State under paragraph (1), the Commission shall exercise jurisdiction over such complaint only if—

(A) final action under such State program has not been taken on such complaint by such State—

(i) within 180 days after the complaint is filed with such State; or

(ii) within a shorter period as prescribed by the regulations of such State; or

(B) the Commission determines that such State program is no longer qualified for certification under subsection (f).

* * * * * * *

TITLE VII—MISCELLANEOUS PROVISIONS

* * * * * * *

TELECOMMUNICATIONS POLICY STUDY COMMISSION

[Sec. 711. (a) There is hereby established the Telecommunications Policy Study Commission (hereinafter in this section referred to as the "Commission") which shall—

[(1) compare various domestic telecommunications policies of the United States and other nations, including the impact of all such policies on the regulation of interstate and foreign commerce and

[(2) prepare and transmit a written report thereon to the Congress, the President, and the Federal Communications Commission.

[(b)(1) Such Commission shall be composed of the chairman and ranking minority members of the Committee on Commerce, Science, and Transportation and the Communications Subcommittee of the Senate and the Committee on Energy and Commerce and the Telecommunications, Consumer Protection and Finance Subcommittee of the House of Representatives (or delegates of such chairmen or members appointed by them from among members of such committees).

[(2) The chairmen of such committees (or their delegates) shall be co-chairmen of the Commission.

[(c)(1) The report under subsection (a)(2) shall be submitted not later than December 1, 1987. Such report shall contain the results of all Commission studies and investigations under this section.

[(2) The Commission shall cease to exist—

[(A) on December 1, 1987, if the report is not submitted in accordance with paragraph (1) on the date specified therein; or

[(B) on such date (but not later than May 1, 1988) as may be determined by the Commission, by order, if the report is submitted in accordance with paragraph (1) on the date specified in such paragraph.

[(d)(1) The members of the Commission who are not officers or employees of the United States, while attending conferences or meetings of the Commission or while otherwise serving at the request of the chairmen, shall be entitled to receive compensation at a rate not in excess of the maximum rate of pay for grade GS-18, as provided in the General Schedule under section 5332 of title 5 of the United States Code, including traveltime, and while away from their homes or regular places of business, they may be allowed travel expenses, including per diem in lieu of subsistence as authorized by law (5 U.S.C. 5703) for persons in the Government service employed intermittently.

[(2) The Commission may appoint and fix the pay of such staff as it deems necessary.

[(e)(1) In conducting its activities, the Commission may enter into contracts to the extent it deems necessary to carry out its responsibilities, including contracts with nongovernmental entities that are competent to perform research or investigations in areas within the Commission's responsibilities.

[(2) The Commission is authorized to hold public hearings, forums, and other meetings to enable full public participation.

[(f) The heads of the departments, agencies, and instrumentalities of the executive branch of the Federal Government shall cooperate with the Commission in carrying out this section and shall furnish to the Commission such information as the Commission deems necessary to carry out this section, in accordance with otherwise applicable law.

[(g) There are authorized to be appropriated such sums as may be appropriated to carry out this section for a period of three fiscal years.

[(h) Activities authorized by this section may be carried out only with funds and to the extent approved in appropriation Acts.

[(i) Nothing in this section shall be construed to affect any proceedings by, or activities of, the Federal Communications Commission, except that the Federal Communications Commission shall consider submissions by the Commission submitted pursuant to subsection (a)(2).]

SEC. 711. CLOSED-CAPTIONING OF PUBLIC SERVICE ANNOUNCEMENTS.

Any television public service announcement that is produced or funded in whole or in part by any agency or instrumentality of Federal government shall include closed captioning of the verbal content of such announcement. A television broadcast station licensee—

(1) shall not be required to supply closed captioning for any such announcement that fails to include it; and

(2) shall not be liable for broadcasting any such announcement without transmitting a closed caption unless the licensee intentionally fails to transmit the closed caption that was included with the announcement.

* * * * * * *

DISSENTING VIEWS ON THE AMERICANS WITH DISABILITIES ACT

In voting to report H.R. 2273, the Americans with Disabilities Act (ADA), the full Energy and Commerce Committee has endorsed a sweeping and, in many ways, unprecedented attempt to extend civil rights protection to the disabled and to those who resemble the disabled. We wholeheartedly support the goals of the legislation, *i.e.*, to incorporate the disabled into the mainstream of American life and empower them to realize the fruits of our society. But, in attempting to translate these goals into legislative language, we believe the ADA goes well beyond the parameters of what we consider to be reasonable legislation.

Unlike other committees with partial jurisdiction over the bill, the Energy and Commerce Committee quite properly opted to address only those provisions within its jurisdiction. Thus, the Committee approved provsions dealing with rail transportation and telecommunications that are considerable improvements over the original version of H.R. 2273. In fact, the Committee recognized that the ADA would potentially bankrupt multibillion dollar economic entities within its jurisdiction, including Amtrak and commuter rail lines around the country. We do not doubt this assessment, and only wonder where the same reasoning and concern would lead if it were applied to the hundreds of thousands of small businesses that will eventually have to comply with the ADA.

In addition, the Committee amended some of the sections which also fall within the jurisdiction of the other committees considering this bill. For example, the Committee added Section 508(a), which is very similar to the language adopted in the Senate version of the ADA. Section 508(a) specifically excludes "homosexuality and bisexuality" from the list of impairments. It is clear that the Committee does not want the ADA to become a homosexual rights bill. We share that concern, and applaud the Committee for its inclusion of section 508(a). Unfortunately, as we will discuss later, the bill as approved by the Committee includes other sections which transform the ADA into a de facto homosexual rights bill.

Section 508(b) reflects the Committee's concern that the ADA not trivialize the notion of disability. We endorse this section as far as it goes. Section 508(b) specifically excludes

> (1) transvestism, transsexualism, pedophilia, exhibitionism, voyeurism, gender identity disorders not resulting from physical impairments or other sexual behavior disorders;
>
> (2) compulsive gambling, kleptomania or pyromania; or
>
> (3) psychoactive substance use disorders resulting from current use of illegal drugs.

Subparagraph (1) lists six sexual behavioral disorders and ends with a generic reference to "other sexual behavior disorders." Similarly, subparagraph (3) refers generically to "psychoactive substance use disorders." Subparagraph (2), however, mentions only three behavioral disorders—compulsive gambling, kleptomania, and pyromania—and stops there. During full Committee markup, Mr. Dannemeyer offered an amendment which sought to make the scope of subparagraph (2) more consistent with the scope of subparagraphs (1) and (3), by adding a generic reference to "other behavioral disorders." His amendment would also have created a new subparagraph (4) with an exclusion for currently contagious diseases and sexually transmissible diseases or infections. The Committee rejected the amendment.

Even a cursory review of the *Diagnostic and Statistical Manual of Mental Disorders* (DSM-III-R) illustrates the need for this amendment. Dozens, and perhaps hundreds, of behavioral disorders qualify for special protection under the bill approved by the Committee. For example, obsessive compulsive disorders receive full protection as "disabilities" under the Committee bill. According to DSM-III-R:

> Obsessions are persistent ideas, thoughts, impulses, or images that are experienced, at least initially, as intrusive and senseless—for example, a parent having repeated impulses to to kill a loved child. . . . The person attempts to ignore or suppress such thoughts or impulses or to neutralize them with some other thought or action.
>
> When the person attempts to resist a compulsion, there is a sense of mounting tension that can be immediately relieved by yielding to the compulsion. *In the course of the illness, after repeated failure at resisting the compulsions, the person may give in to them and on longer experience a desire to resist them.*

Under the ADA, would an employer be able to take prudent, prophylactic steps to control an employee whose psychological profile suggests that he wants to murder his fellow workers? A tragic incident that occurred last September in Louisville, Kentucky may provide an unnerving answer to that question. In that situation, an employee who had been admitted to hospitals for mental problems and had attempted suicide three times settled a discrimination suit against his employer and returned to work. The complaint was brought under Kentucky law and coerced the employer into returning the employee to his old position, an action which satisfied the Kentucky law's requirement that employers make "reasonable accommodations" for employees with disabilities. Soon thereafter, the employee used an assault rifle to kill seven of his coworkers.

It is our sincere hope that the ADA does not become a shield for mentally unstable individuals such as the Louisville mass murderer. We should not deprive employers of the right to screen employees for character traits that may endanger others.

Two other amendments were offered in the full committee to rein in the scope of the bill. Unfortunately, these amendments were also rejected.

THE PERCEPTUALLY DISABLED AND ANTICIPATORY DISCRIMINATION

The ADA allows a person who is *not* disabled to initiate a lawsuit seeking redress for discrimination *that has not occurred.* It accomplishes this Orwellian feat in two ways. Section 3(2)(C) defines the term "disability" to include an individual "being regarded as having" a physical or mental impairment that substantially limits one or more of the individual's major life activities. Sections 105 and 306, moreover, make the remedies in the Civil Rights Act available to anyone who "believes that he or she . . . *is about to be* subjected to discrimination on the basis of disability."

The unprecedented scope of this legislation makes it impossible for employers and other entities covered under the ADA to understand the obligations and potential liability they face. How can an employer attempt to eradicate discrimination that has not occurred? How can the owner of a store "reasonably accommodate" a person who is not disabled, but may be regarded as such by some future court? The terminology is too vague and uncertain for a statute that will reach into so many corners of our society.

There may be an alternative explanation for the inclusion of "perceptual discrimination" in the ADA. The Supreme Court's decision in *School Board of Nassau County v. Arline,* found that a person with the contagious disease of tuberculosis is a handicapped individual within the meaning of Section 504 of the Rehabilitation Act of 1973. Since the *Arline* decision, the Department of Justice has extended the reasoning in *Arline* to include persons with asymptomatic HIV infection.

Sixty percent of the 119,950 adults who have been diagnosed with full blown AIDS as of February 1990 contracted the fatal virus through homosexual activity. An additional 7 percent list homosexual activity as one of their risk factors. It does not require a particularly shrewd attorney to argue that the protections available in the ADA are available to *all* male homosexuals by virtue of the perception that homosexual males "are regarded as" being infected with HIV. Indeed, a New Jersey court has interpreted a similar state law in exactly this fashion.

Such a result was clearly not intended by my colleagues, in light of the unambiguous exclusion in Section 508(a) for "homosexuality and bisexuality." Extending special rights to individuals on the basis of their sexual conduct strikes us as ill-advised. Will a future court require insurers to provide health insurance to persons who are at risk of acquiring HIV at the same rates charged to others? Will employers be precluded from testing prospective employees for HIV on the theory that such a policy would have "the effect of" discriminating against homosexuals, and risk exposing others to tuberculosis, cytomegalovirus, and other AIDS-associated illnesses? Will the politics of sexual orientation one day require similar protection for persons claiming other sexual preferences?

To reiterate, we believe that the ADA seeks to address a legitimate problem by making it easier for the disabled to participate in and reap the fruits of our prosperous and productive society. Unfortunately, the Committee has adopted a bill which is unnecessarily broad and vague. In particular, we believe that the ADA is a homosexual rights bill in disguise. These shortcomings, in our opinion, threaten to trivialize the entire notion of disability rights. Finally, this legislation may prove enormously expensive to small businesses across America. The Committee has recognized this in addressing the legitimate financial concerns of the rail industry. We suggest that similar concerns exist with respect to small businesses.

We respectfully dissent from the majority report.

Bill Dannemeyer.
Joe Barton.
Don Ritter.

SELECTED COLLOQUIES: Floor Debate on ADA

May 17, 1990, House, H2428, Bartlett/Hoyer; H2433, Bateman/Hoyer; H2434, Hoyer/Thomas A. Luken; H2439, Upton/Rostenkowski; H2442, Bartlett/Hoyer; H2464, Campbell/LaFalce; and H2470, Eckart/Hoyer. July 12, 1990, House, H4625-26, Waxman/Hoyer. July 13, 1990, Senate, S9692, Simon/Harkin; and S9692, Kennedy/Harkin.

informing those with rights and responsibilities under this legislation as to what its provisions mean.

This bill has received exhaustive consideration and scrutiny in four house committees, and has received overwhelming bipartisan support. The reason for that is very simple—it is a sound bill which fully merits the overwhelming support of the members of this body.

For people with disabilities, this bill offers opportunity to enter the mainstream of society, to compete for jobs on the basis of their ability rather than be arbitrarily kept out of the workforce by their disability, to avail themselves of the kinds of pleasures which most of us take for granted, to communicate with a friend via a telephone if they are hearing impaired, to be free from the demeaning treatment which makes it so difficult for so many of our fellow citizens to live their lives with basic dignity.

For the taxpayers of this country, this bill represents a net savings in that qualified people with disabilities who want to work, but cannot find jobs irrespective of their actual abilities, will not be able to enter the work force and become taxpayers.

And for the business community, learning how to employ and retain people with disabilities, as many businesses have already done with outstanding results, effectively opens up a source of qualified employees who have long been underemployed.

The degree of poverty and unemployment experienced by people with disabilities is staggering. According to a recent Louis Harris poll, "not working" is perhaps the truest definition of what it means to be disabled in America. Two-thirds of all disabled Americans between the age of 16 of 64 are not working at all; yet, a large majority of those not working say they want to work. In 1984, 50 percent of all adults with disabilities had household incomes of $15,000 or less. Among nondisabled persons, only 25 percent had household incomes in this wage bracket. The Harris poll also found that large majorities of top managers (72 percent), equal opportunity officers (76 percent), and department heads or line managers (80 percent) believe that individuals with disabilities often encounter job discrimination from employers and that discrimination by employers remains an inexcusable barrier to increased employment of disabled people.

Our Nation's most precious resource is our people. To the extent that the changes in practice and attitudes brought about by implementation of the act ultimately assists people with disabilities in becoming more productive and independent members of society, both they and our entire society will benefit. Discrimination negates the billions of dollars we invest each year to educate our children and youth with disabilities and train and rehabilitate adults with disabilities. This bill is the best antidote that I know of to age-old societal attitudes which cause some to see disabled people, especially those with severe or visible disabilities, as natural dependents. The Americans with Disabilities Act will serve to reduce the external barriers that rob people with disabilities of the opportunity to pursue their dreams and rob our society of the contributions to our economy and to our public life which people with disabilities know they can make and want to make.

The Greeks defined happiness as the full use of one's powers along the lines of excellence. For over 200 years, we in America have taken the ringing words of the declaration of independence as defining the inalienable rights of man; life, liberty, and the pursuit of happiness. Thousands of people with disabilities and able-bodied advocates for people with disabilities all across the land, many of whom are present in this chamber today, remind us that even as they see no more, they demand no less. Today, we, in the House, have an opportunity to uphold our Nation's highest ideals and finest traditions of protecting the freedom of all individuals from arbitrary or unjust treatment, and of extending the opportunity to participate fully in American society to the previously dispossessed. In these special times, we in the United States are witnessing a remarkable and unprecedented outpouring of sentiment for, and commitment to, freedom and democracy all over the world. A "yes" vote on the Americans With Disabilities Act of 1990 constitutes both an affirmation of our Nation's once and future commitment to full inclusion in the mainstream of our society for all of our citizens, and a testament to the vitality, vigor and capacity for renewal of our democracy.

Four House committees have done excellent work perfecting this legislation. And yet today, and next week, we will be presented with a number of weakening amendments which threaten to undo much of the good work that has been done. I urge my colleagues to firmly reject weakening amendments and pass this bill with an overwhelming "yes" vote. This legislation richly deserves your support.

□ 1320

Mr. GOODLING. Mr. Speaker, I yield 6 minutes to the gentleman from Texas [Mr. BARTLETT], who had a great deal to do with getting this bill in the order it is in. He and the staff are to be commended for their efforts.

(Mr. BARTLETT asked and was given permission to revise and extend his remarks.)

Mr. BARTLETT. Mr. Chairman, I would inquire, is the gentleman from Maryland prepared for a colloquy at this time on "direct threat"?

Mr. HOYER. Mr. Chairman, if the gentleman will yield, yes.

Mr. BARTLETT. Mr. Chairman, I would like to ask the gentleman from Maryland [Mr. HOYER] for some clarification concerning the meaning of the term qualification standards as it appears in section 103(b) of the bill. That standard, as modified by the Judiciary Committee, permits a requirement that an individual with a disability not pose a direct threat to the health or safety of other individuals in the workplace if reasonable accommodation will not eliminate the direct threat. Direct threat is defined in section 101 of the bill to mean significant risk. As I understand it, this qualification standard is intended to spell out clearly the right of an employer to take action to protect the right of its employees and other individuals in the workplace, including not assigning an individual to a job if such assignment would pose a direct threat to those individuals. Is my understanding correct?

Mr. HOYER. Mr. Chairman, if the gentleman will yield, the gentleman's understanding is correct, assuming the employer cannot eliminate the direct threat by making reasonable accommodation.

Mr. BARTLETT. If I may further inquire of the gentleman, it is also my understanding that in determining what constitutes a significant risk, the employer may take into consideration factors such as the magnitude, severity, or likelihood of the risk to other individuals in the workplace, again assuming that such factors could not be eliminated by reasonable accommodation. I yield to the gentleman.

Mr. HOYER. The gentleman's understanding is correct. Of course, the burden will be on the employer to show the relevance of such factors in relying on the qualification standard.

Mr. BARTLETT. I thank the gentleman.

Mr. Chairman, I rise in support of H.R. 2273, the Americans with Disabilities Act of 1990 [ADA]. This is an historic occasion. When the ADA is enacted, full civil rights will be extended and available to those with disabilities in every community in this country, in employment, public services and transportation, public accommodations, and telecommunications. The ADA provides many of the same rights to individuals with disabilities that have been available to others because of their race, national origin, sex, and age through earlier civil rights laws.

The ADA is based on sections 503 and 504 of the Rehabilitation Act of 1973, which require that Federal grantees or contractors not discriminate against an individual because of his or her disability. This prohibition applies in services, opportunities, and employment. Thus, there are many people out there—in State and local government, educational institutions, big and small businesses with government contracts—that have experience with designing programs and opportunities so that individuals with disabilities can participate.

tion now holds the promise of truly bringing disabled Americans into the mainstream of American life. This is a worthy objective, which the House should support.

Mr. WHITTAKER. Mr. Chairman, I yield one half minute to the gentleman from Virginia (Mr. Bateman).

Mr. BATEMAN. Mr. Chairman, I thank the gentleman for yielding time to me.

Mr. Chairman, I wonder if the gentleman from Maryland (Mr. Hoyer) will take the floor for the purpose of a colloquy.

QUESTION CONCERNING THE AMERICANS WITH DISABILITIES ACT

Mr. Chairman, I have read with interest the report of the Committee on Education and Labor. I was most pleased to see that the committee specifically recognized the unique issues involved in applying the requirements of this legislation to historic buildings and facilities. The addition of section 504(c) will provide reasonable flexibility in making historic buildings accessible to persons with disabilities when alterations are made to those buildings. The committee was obviously concerned that such alterations should not threaten or destroy the historic significance of qualified historic buildings.

My question is how the provisions in section 504(c) will affect the requirements set out in section 302(b)(2)(a)(iv) of the legislation. Section 302(b)(2)(a)(iv) requires that architectural barriers should be removed from buildings when such removal is readily achievable. Readily achievable is defined as "easily accomplishable and able to be carried out without much difficulty or expense." It is my understanding that the same historic preservation concerns the committee had with respect to alterations of qualified historic buildings and facilities also apply to the removal of architectural barriers from historic buildings and facilities. Is that correct?

Mr. HOYER. Mr. Chairman, if the gentleman will yield, he is correct.

Mr. BATEMAN. I thank the gentleman from Maryland.

Mr. THOMAS A. LUKEN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the Americans With Disabilities Act is perhaps the most important civil rights bill for the disabled that has ever been considered by the Congress. The bill seeks to end discrimination against the 43 million Americans who suffer from some disability, in such critical areas as employment, transportation, public and private accommodations, and communications.

The premise of the bill is unassailable. The results of discrimination against disabled Americans—whether they suffer from mobility or sensory impairments, mental retardation, disease, or other physican and mental impairments—are insidious and potentially devastating. Discrimination, whether produced by overt actions or thoughtless attitudes, produces segregation, exclusion, impoverishment, and denial of equal and meaningful opportunities. By denying the benefits of equal treatment and participation to millions of disabled Americans, our country suffers.

The bill before us will help to ensure equal rights and opportunities for disabled Americans. This bill will allow greater productivity and responsibility for disabled individuals. This bill will help to remove the barriers which have impeded disabled persons from being more productive members of American society. In short, this bill will help our country use an immense amount of talent, intelligence, and other human resources which heretofore have been underestimated, underdeveloped, and underutilized.

Our subcommittee's jurisdiction of this bill focused on transportation provisions primarily relating to Amtrak and commuter railroads. All of us recognize the crucial role transportation plays in our lives. It is the veritable lifeline which enables all persons to enjoy the full economic and social benefits which our country offers. To be denied effective transportation is to be denied the full benefits of employment, public and private services, and other basic opportunities.

The amendment which our committee adopted requires Amtrak and commuter railroads to be accessible to disabled persons. Under this bill, all of Amtrak's 500 stations will be fully accessible within the next 20 years. Within the next 3 years, key commuter rail stations will be made accessible. Under the bill, Amtrak and commuter railroads will be required to purchase accessible new passenger cars, to make good faith efforts to lease or purchase accessible used cars, and to ensure accessibility on rail passenger cars which are remanufactured. Under the bill, equivalent dining services will be provided to disabled riders on Amtrak. In short, the bill offers a realistic and defined set of rules for assuring disabled persons access to rail transportation services.

Testimony at our subcommittee's hearing last fall indicated that Amtrak and many commuter railroads already do a fairly good job of serving disabled persons. This is not to say that there are not some problems. But the discussions and negotiations on this bill, at a minimum, have raised the level of awareness for the legitimate concerns that exist on all sides of the fence, and have improved communication between the parties. I believe that opening up and continuing that dialog may be as important as the changes made in this bill.

I wish to commend my friend and colleague, Mr. Dingell, the distinguished chairman of the full committee; Mr. Lent, the ranking minority member of the full committee; and Mr. Whittaker, the ranking minority member of our subcommittee; for their leadership and untiring efforts on these important issues. We spent a good deal of time over the past few months negotiating with representatives of the disabled community, Amtrak, commuter railroads, and other affected parties. The bill before us represents the combined and cooperative efforts of all affected interests.

I strongly urge my colleagues to support the bill and I reserve the balance of my time.

□ 1350

Mr. WHITTAKER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this important legislation we are considering today is a key element in President Bush's efforts to assure that disabled Americans are brought into the mainstream of American economic and social life. Two parts of the Americans With Disabilities Act are within the specialized jurisdiction of the Energy and Commerce Committee: telecommunications and railroad transportation. These elements of the ADA are absolutely vital to assuring that disabled Americans have the means to utilize the sinews of communication and transport that bind our society together.

With respect to the rail transportation title, I want to especially commend our committee chairman, Mr. Dingell, for his efforts to fashion a more readily understandable version of this bill, one that gives more usable guidance to the individuals and organizations governed by the requirements of the ADA. The chairman of the Subcommittee on Transportation and Hazardous Materials, Mr. Luken, should also be commended for the hard work he did in developing this title.

The revised Amtrak provisions are a classic example of mutual gain through compromise. Under the bill, disabled passengers will be assured of a firm timetable for Amtrak to reach specified targets of accessible seating capacity. At the same time, Amtrak will be given greater flexibility in how it achieves these targets, by being able to cluster some accessible seating and thus reduce the cost of acquiring or modifying rail cars to meet the target level of seating capacity. In a similar fashion, we have been able to give more specific, and more flexible, guidance to commuter rail operations than was offerd by the original version of the bill as referred to our committee.

Negotiating revisions to the telecommunications title of the ADA was even more smooth and harmonious than revising the transportation provisions.

For that, thanks go again to the chairman of the full committee (Mr. Dingell), as well as the chairman and ranking Republican member of the Telecommunications Subcommittee, Mr. Markey and Mr. Rinaldo. Their work in the subcommittee resolved most of the contentious issues, and made it possible for Chairman Din-

BEST COPY AVAILABLE

gell and the ranking member of the full committee, Mr. Lent, to resolve the few telephone issues. We did so with the full cooperation of the deaf community and the telephone industry. I thank them for their hard work.

Our joint efforts are contained in the bill before the House today. They provide the framework for a nationwide relay network for the deaf and hearing-impaired which is essential for their full participation in society.

The FCC is directed to fill in the details and implement that relay service as quickly as possible.

With the improvements we made on the other body's work, the telecommunications title of the Disabilities Act will achieve the goal shared by every Member of the House: to make telephone services equally available to all, including our deaf and hearing-impaired citizens.

While I believe that we have made important strides toward a more workable and understandable bill in the areas of rail transportation and communications, I do not want to leave my colleagues with the impression that I am approaching the consideration of this bill on the premise that it is already perfectly drafted.

On the contrary, precisely because of the immense complexity of this legislation—and the need to merge into a single bill the product of four different committees' deliberations—I have urged that considerable latitude be given Members who feel obligated to offer clarifying and improving amendments on the floor. None of us can claim to know it all, and there are bound to be areas where the unassailable intent of this bill—to bring disabled Americans into the mainstream of American life as full and equal participants—can be carried out in a more efficient or more clearly defined way. For that reason, I look forward to hearing the proposals of my colleagues for possible improvements to the Americans With Disabilities Act.

Mr. Chairman, I reserve the balance of my time.

Mr. THOMAS A. LUKEN. Mr. Chairman, I yield 2½ minutes to the gentlewoman from Washington [Mrs. Unsoeld].

(Mrs. UNSOELD asked and was given permission to revise and extend her remarks.)

Mrs. UNSOELD. Mr. Chairman, enactment of the Americans With Disabilities Act is long overdue. For far too long, some 43 million Americans with physical or mental disabilities have been denied the protections of the civil rights that the rest of us take for granted.

Discrimination against the handicapped, be it unintentional or deliberate, has the same impact. It is cruel and serves to segregate, exclude, and deny the opportunity to fully participate in programs and activities. We should also remember that it is not just the handicapped who suffer because of such discrimination, but all of us, for those denied employment or access to marketplace are a waste of human resources—a waste of those who have something to contribute.

A number of those who have spoken in opposition to this legislation have expressed the concern that enactment of the ADA is going to create an unreasonable burden on small business, drive up the cost of operation, and ultimately threaten the very survivability of some businesses. My own State of Washington has proven the fallacy of this fear. For over 10 years Washington State has had similar statutes on the books, yet I have found no evidence of even one business being forced out of operation by having to accommodate or hire the handicapped.

Discrimination in employment was outlawed in Washington State in 1973. In 1976, legislation was enacted requiring that all new building construction or major remodeling projects make structures accessible or barrier-free for the handicapped. Then in 1979, Washington State law was amended to prohibit discrimination against the handicapped in housing and public accommodation.

While the Washington State statutes have not ended discrimination in the State, they have provided an opportunity to seek redress to those handicapped persons denied their rights. It is time for the House to follow the lead of Washington State and of our colleagues in the Senate in passing this important legislation to protect the disabled all across America.

☐ 1400

Mr. THOMAS A. LUKEN. Mr. Chairman, for the purpose of colloquy, I yield to the gentleman from Maryland [Mr. Hoyer], chairman of the subcommittee.

Mr. HOYER. Mr. Chairman, I am concerned about a provision contained in the report filed by the Committee on Energy and Commerce which states: "it is not the function of this legislation to facilitiate access to audiotext services." Is it the gentleman's understanding that this bill precludes such access?

Mr. THOMAS A. LUKEN. The gentleman raises a good question. While the legislation does not require access to audiotext services at this time, if future technology can make these services available utilizing a relay service, it is our intent to ensure such access.

Mr. HOYER. Mr. Chairman, if the gentleman will continue to yield, does the gentleman anticipate that the FCC's regulation will require common carriers to facilitate access to the telephone numbers for relay services?

Mr. THOMAS A. LUKEN. The gentleman is correct.

Mr. HOYER. Mr. Chairman, if the gentleman will continue to yield, the bill calls for relay services to be functionally equivalent to ordinary voice telephone services. How, exactly, is functionally equivalent service to be achieved?

Mr. THOMAS A. LUKEN. Title IV requires the FCC to establish certain minimum standards and criteria, which will define functional equivalence for all relay providers.

Mr. HOYER. If the gentleman will continue to yield, where can the FCC turn for guidance in developing these standards?

Mr. THOMAS A. LUKEN. The FCC already issued serveral notices during the development of several interstate relay systems. Consumers and individuals have urged the FCC to create a Federal advisory committee to assist the Commission in setting up such a system. It is our intent that the FCC turn to such a committee, which could be made up of relay consumers, telephone companies, and other interested parties, to develop standards for functionally equivalents for both an intrastate and interstate relay system.

Mr. HOYER. If the gentleman will continue to yield, the success or failure of relay services will depend to a great extent on the competence of the operators who will act as translators for those using the system. Does the gentleman anticipate that the FCC's regulations will require that the operators employed by the common carriers be trained to respond effectively to the special communication needs of hearing and speech-impaired users?

Mr. THOMAS A. LUKEN. The gentleman is correct. The committee expects the regulation will require the appropriate training for relay operators, including typing, grammar, spelling, and other training necessary to ensure that operators contribute to the success of the service.

Mr. HOYER. Chairman, I thank the gentleman for yielding, and clarifying these questions.

Mr. THOMAS A. LUKEN. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts [Mr. Markey].

Mr. MARKEY. Mr. Chairman, I congratulate the gentleman from Ohio [Mr. Thomas A. Luken] for his leadership on this issue. I would like, at this time, to publicly compliment the work of the gentleman from Maryland [Mr. Hoyer], who has personally shepherded this piece of legislation through the Congress. I very rarely have seen a commitment and dedication to a piece of legislation that I have witnessed in terms of the commitment which the gentleman has made to this bill. The contribution here is going to be enormous, and historic.

I would also like to compliment the chairman of the full committee, the gentleman from Michigan [Mr. Dingell], the gentleman from New York [Mr. Lent], the gentleman from New Jersey [Mr. Rinaldo], and all the members of the Subcommittee on Telecommunications and Finance in terms of the telecommunications piece which we are inserting here.

An employer is required to provide a reasonable accommodation to allow an employee to do the job, unless it will result in an undue hardship to the employer, that is, an action requiring significant difficulty or expense. These are the same standards used and understood since 1973 under the Rehabilitation Act.

The employment protections use the same enforcement procedures and provide the same remedies as title VII of the Civil Rights Act of 1964, which prohibits employment discrimination based on race, color, religion, sex, and national origin. Under the ADA, persons with disabilities will have the same rights and remedies as minorities and women, no more and no less.

Persons with disabilities can and will be able to do the job. Let's give them a real chance with the ADA.

PUBLIC SERVICES

The ADA extends the protections of section 504 of the Rehabilitation Act, prohibiting discrimination in federally funded programs, to all programs, activities and services of State or local governments, regardless of the receipt of Federal financial assistance.

Section 504 served as the first step toward breaking down the barriers that, for too long, kept persons with disabilities out of the American mainstream. By extending section 504 to all public entities, we benefit from the successful history and lessons of the Rehabilitation Act. By enacting title II, we cover those remaining government entities who were not covered in the past.

PUBLIC ACCOMMODATIONS

The ADA prohibits discrimination by privately operated public accommodations. Public accommodations are businesses open to the public, places persons without disabilities take for granted.

Public accommodations include hotels, restaurants, theaters, stores, service providers, and privately operated public transportation. Under the ADA, a public accommodation cannot deny participation or provide an unequal or separate benefit to a person with a disability. The service must be provided in the most integrated setting, and a person cannot be denied the opportunity to participate in a regular program.

Existing businesses must remove architectural barriers if it is readily achievable, that is, without much difficulty or expense. If it is difficult or expensive, it does not have to be done. Alterations and newly built commercial facilities must be readily accessible to and usable by persons with disabilities.

The public accommodations title uses the same enforcement and remedies scheme available to private persons under the public accommodations section of the 1964 Civil Rights Act. Remedies in a private suit are limited to equitable relief.

As with many other civil rights laws, the Attorney General may bring "pattern or practice" cases. As in the Fair Housing Act, the Attorney General may seek monetary damages for the victim and civil penalties of up to $100,000 against the violator.

Mr. Chairman, there are few of us who have not been personally touched by family or friends with a disability. We all know how persons with disabilities are rarely judged by their abilities, but instead on their disabilities.

We now have an extraordinary opportunity to bring Americans with disabilities into the mainstream of American life.

For Americans with disabilities this bill represents their best chance to join in the American dream. We should pass this bill today. Forty-three million Americans, their families and friends, deserve no less.

Mr. Chairman, I particularly want to thank the many people in the disabled community, the different organizations, Pat Wright and all of the others, for the noble assistance they have given us in the past many months, and our former colleague, Tony Coelho, that we miss so much and who was the inspriration behind this bill in the first place. The gentleman from Maryland [Mr. Hoyer] picked up the cudgel left by Mr. Coelho and has carried on magnificently.

Mr. Chairman, I want to thank the gentleman from Texas [Mr. Brooks], my chairman, and his general counsel, Bill Jones, on my staff Catherine Leroy, and Stewart Ishimaru, without whom we could not have moved ahead. As a matter of fact, all of the members on the subcommittee, the minority led by the gentleman from Wisconsin [Mr. Sensenbrenner], all deserve a great deal of credit.

□ 1450

Mr. SENSENBRENNER. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan [Mr. Upton].

Mr. UPTON. Mr. Chairman, I would like to take a moment to engage in a brief colloquy with the distinguished chairman of the Committee on Ways and Means, Mr. Rostenkowski.

For the past several months, I've headed up a bipartisan effort with Mr. Mfume to provide a tax credit mechanism to help small businesses comply with the nondiscriminatory access mandates of Americans with Disabilities Act. We now have 200 cosponsors for the proposal, H.R. 3500.

Although the rule does not provide for its consideration as part of the ADA bill itself, it is my hope that the Committee on Ways and Means will include such a provision, drafted on a revenue neutral, pay-as-you-go basis, in an appropriate legislative vehicle later this year.

I include a copy of a letter to me from the White House indicating support as well.

Mr. ROSTENKOWSKI. Mr. Chairman, if the gentleman will yield, I share the concerns of the gentleman from Michigan about the financial ability of our Nation's small employers to comply with the ADA bill's provisions, and I commend him and Mr. Mfume for his outstanding efforts to encourage strong bipartisan support for his proposal.

His revenue natural tax credit concept has a great deal of merit, and I will be glad to work with Mr. Upton, Mr. Mfume, and members of our committee to consider such a credit as we develop legislation this year.

Mr. UPTON. Mr. Chairman, I thank the gentleman from Illinois.

Mr. HOYER. Mr. Chairman, will the gentleman yield?

Mr. UPTON. I yield to the gentleman from Maryland.

Mr. HOYER. Mr. Chairman, I want to congratulate the gentleman from Michigan and my colleague, the gentleman from Maryland [Mr. Mfume], for their work on this issue, and congratulate the chairman of the Committee on Ways and Means for his response.

We believe, of course, as we have said throughout the course of this debate, and will do so in the future, that this bill requires minimal costs, readily achievable costs, a cost that does not create either an undue burden or an undue hardship on the private sector. But nevertheless, to the extent that there are costs, and to the extent that we can accommodate them, we certainly want to work with the gentleman from Michigan and the gentleman from Maryland in seeing if we can do that.

Mr. UPTON. I appreciate the gentleman's support, and I thank him for his fairness in allowing us to proceed as we have.

THE WHITE HOUSE,
Washington, DC, May 14, 1990.

Hon. FREDERICK UPTON,
House Office Building, Washington, DC.

DEAR CONGRESSMAN UPTON: Thank you very much for your inquiry regarding the Administration's position on changes in the tax treatment of business expenses incurred to provide access to the handicapped. At present, Section 190 of the Internal Revenue Code allows firms to deduct up to $35,000 of the costs of removing architectural barriers to the handicapped. Additional costs are depreciable in the same manner as other construction expenses.

Concern has been expressed that the construction costs required for businesses to comply with the Act for Disabled Americans now under consideration by the Congress will not be limited to expenses covered by Section 190. The Administration fully appreciates the argument that other business capital expenditures necessary to comply with the Act are as deserving of some form of favorable treatment as expenses which are currently covered.

Therefore, the Administration does not oppose changes in the tax treatment of business construction activities which are necessary to comply with the Act, as long as such changes are revenue neutral. There are a number of ways to achieve such revenue neutrality. For example, a plan could be structured in the following manner:

Allow deductibility of qualified expenses up to $22,500.

those in the Civil Rights Act of 1964 will unnecessarily open the door for the diversion of funds into the courtroom by padding the pockets of the lawyers rather than providing access to the disabled. This amendment is supported by the Bush administration and at the appropriate time, I will ask for the support of my colleagues as well.

Mr. HOYER. Mr. Chairman, I yield myself 2 minutes for the purpose of a colloquy with the gentleman from Texas, Mr. BARTLETT.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. HOYER. I yield to the gentleman from Texas [Mr. BARTLETT].

Mr. BARTLETT. Mr. Chairman, I thank the gentleman for yielding. Mr. Chairman, this bill requires that the rights and protections of the ADA will be applied to the legislative branch of the Federal Government. I would like to clarify that the public accommodation requirements of the bill for the Congress will be enforced with remedies of equal force and impact to those applicable to the private sector. Does the gentleman agree with my assessment?

Mr. HOYER. I agree. This bill requires the development of procedures and remedies that will result in the ability of persons to get prompt correction of any ADA violation. Although I do not expect that a problem of recalcitrant behavior regarding public accommodations in the Congress would occur, I want to assure the gentleman that any such violation will be addressed with severity.

Mr. SENSENBRENNER. Mr. Chairman, I yield 3 minutes to the gentleman from Florida [Mr. MCCOLLUM].

(Mr. McCOLLUM asked and was given permission to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Chairman, I am very pleased to be here today with this bill. It is a very important piece of legislation to provide for civil rights for the handicapped and disabled. It is something I have had a lot to do with in debating through our Committee on the Judiciary.

Based on the amendments we have had today and the couple that I know will be adopted today because of the general will and the agreements that have been made, I am going to be able to support this legislation very proudly. However, I do think there are some important considerations all of us should remember. The big debate over this bill has never been over the issue of providing civil rights and antidiscrimination laws to protect our disabled community in the workplace. The big issue is how do we minimize the costs to the employers while still doing that?

A lot of us had thought that many of the provisions, as initially written, were simply not tight enough, simply not in the strength they should be in order to reduce those costs and keep them to a minimum.

There are still a couple that really ought to be done. One of them I will describe when I get up here later on the essential functions, we have made a lot of improvements on in the definitional area. But one that I consider exceedingly important is that we later on down the road get that tax credit that I know has been discussed here on the floor a little earlier and that I believe the administration is now prepared to support. That will not be a part of this bill, but we must not forget it because the small businessman really needs that tax credit in order to make the accommodations and not have to close shop in some cases.

□ 1510

Going along with that, though, is the Olin amendment amendment to be offered later today. I know that is tougher for some of our Members, but it is, I think, essential for the small businessman, in particular, to have some kind of a cap, some kind of a ceiling on the amendment of the cost that might be incurred in order to make these accommodations. That amendment is going to propose that it be no greater than 10 percent of the cost—that is, of the annual salary of whoever the employee is who is being hired. It seems to me that is reasonable, and once that cost threshold is exceeded, they will get to the point where they have a presumption of undue hardship, providing a measure of protection to the employer.

It is that kind of modification that still remains and still needs to be done on this bill, and I encourage my colleagues as they listen to the amendments that are out there, the very few that were offered, that Members do make judicious consideration, they make these kinds of minor changes, that yet can be made to keep those costs down in this bill.

I do want to close by saying that there are a number of other amendments out here today that permit the same kinds of consideration. What we need is improvement in this bill. When we are all done with this process, we are going to have a very fine bill, I think, that all Members can be proud of. However, we must have those protections, and I remind Members when it is all over with, we still need to keep the pressure on to get the tax credit that should have been a part of this bill, but unfortunately is not. We still have a chance to get it.

Mr. EDWARDS of California. Mr. Chairman, I yield 1 minute to the gentleman from New York [Mr. WEISS].

(Mr. WEISS asked and was given permission to revise and extend his remarks.)

Mr. WEISS. Mr. Chairman, I rise today in support of the Americans With Disabilities Act and I urge my colleagues to support its passage with no weakening amendments. The ADA, supported by the President, and overwhelmingly approved by four House committees, is long overdue legislation remedying the separatism which now excludes 43 million disabled citizens from equal participation in American society. For far too long, physical and attitudinal barriers have prohibited individuals with disabilities from demonstrating their worth in the workplace, enjoying access to public accommodations and transportation, and utilizing telecommunications systems.

This legislation will provide this Nation's handicapped citizens with the same protections presently afforded to other minority groups. Under the ADA, an employer may not refuse to hire or promote a person with a disability merely because of that disability, when the individual is qualified to perform the job.

The measure also requires an employer to make reasonable accommodations for persons with disabilities, if those accommodations will allow the person to perform the essential functions of the job.

Under the bill's public accommodations provisions, it would be illegal to exclude or refuse to serve a person with a disability. The ADA also requires that new public transit vehicles are accessible to the disabled without requiring any retrofitting.

Title IV of the ADA will require, within 3 years, all common carriers to provide intrastate and interstate telecommunications relay services for telephone calls between uses of such devices for the deaf and users of telephones. These relay services will allow people with telecommunications devices for the deaf to communicate with persons who do not use such devices.

The Americans With Disabilities Act is patterned after section 504 of the Rehabilitation Act of 1973 which has been in effect and operating successfully for over a decade. It is a reasonable and prudent bill which strikes the proper balance between the civil rights of persons with disabilities and the legitimate concerns of both large and small businesses.

It is of exceptional significance that this bill will offer protection to the thousands of Americans with HIV disease—from those who are asymptomatic to those with fully developed AIDS. Persons living with HIV disease suffer from all the forms of discrimination found in our society.

Once the ADA becomes law, all persons with HIV disease will finally be protected in private employment. No longer will employers be able to lawfully discriminate against them as they hire, fire, promote, and set terms and conditions of employment. The range of protection is of critical importance for people with HIV disease. The ADA mandates that employers undertake "reasonable accommodations" in the hiring of disabled persons who are otherwise qualifed to work. This will ensure that persons with HIV have the right to flexible hours and time off that are crucial to help accommodate the disease.

BEST COPY AVAILABLE

ing but not limited to drug testing, designed to ensure that an individual described in subclause (I) or (II) is no longer engaging in the illegal use of drugs.

"(iii) Notwithstanding clause (i), for purposes of programs and activities providing health services and services provided under titles I, II and III, an individual shall not be excluded from the benefits of such programs or activities on the basis of his or her current illegal use of drugs if he or she is otherwise entitled to such services.

"(iv) For purposes of programs and activities providing educational services, local educational agencies may take disciplinary action pertaining to the use or possession of illegal drugs or alcohol against any handicapped student who currently is engaging in the illegal use of drugs or in the use of alcohol to the same extent that such disciplinary action is taken against nonhandicapped students. Furthermore, the due process procedures at 34 CFR 104.36 shall not apply to such disciplinary actions.

"(v) For purposes of sections 503 and 504 as such sections relate to employment, the term 'individual with handicaps'' does not include any individual who is an alcoholic whose current use of alcohol prevents such individual from performing the duties of the job in question or whose employment, by reason of such current alcohol abuse, would constitute a direct threat to property or the safety of others.".

(b) DEFINITION OF ILLEGAL DRUGS.—Section 7 of the Rehabilitation Act of 1973 (29 U.S.C. 706) is amended by adding at the end the following new paragraph:

"(22)(A) The term 'drug' means a controlled substance, as defined in schedules I through V of section 202 of the Controlled Substances Act (21 U.S.C. 812).

"(B) The term 'illegal use of drugs' means the use of drugs, the possession or distribution of which is unlawful under the Controlled Substances Act. Such term does not include the use of a drug taken under supervision by a licensed health care professional, or other uses authorized by the Controlled Substances Act or other provisions of Federal law.".

(c) CONFORMING AMENDMENTS.—Section 7(8)(B) of the Rehabilitation Act of 1973 (29 U.S.C. 706(8)(B)) is amended—

(1) in the first sentence, by striking "Subject to the second sentence of this subparagraph," and inserting "Subject to subparagraphs (C) and (D),"; and

(2) by striking the second sentence.

SEC. 312. ALTERNATIVE MEANS OF DISPUTE RESOLUTION.

Where appropriate and to the extent authorized by law, the use of alternative means of dispute resolution, including settlement negotiations, conciliation, facilitation, mediation, factfinding, minitrials, and arbitration, is encouraged to resolve disputes arising under this Act.

SEC. 313. SEVERABILITY.

Should any provision in this Act be found to be unconstitutional by a court of law, such provision shall be severed from the remainder of the Act, and such action shall not affect the enforceability of the remaining provisions of the Act.

The **CHAIRMAN**. No amendment to said substitute shall be in order except those amendments printed in part 2 of House Report 101-488. Said amendments shall be considered in the order and manner specified in said report, shall be considered as having been read, and shall not be subject to amendment. Debate time specified for each amendment shall be equally divided and controlled by the proponent of the amendment and a Member opposed thereto.

AMENDMENT OFFERED BY MR. LAFALCE

Mr. **LAFALCE**. Mr. Chairman, I offer an amendment.

The **CHAIRMAN**. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. LAFALCE: In section 310 (relating to effective dates), redesignate subsection (b) as subsection (c) and insert after subsection (a) the following new subsection:

(b) CIVIL ACTIONS.—Except for any civil action brought for a violation of section 303, no civil action shall be brought—

(1) during the first 6 months after the effective date, against businesses that employ 25 or fewer employees and have gross receipts of $1,000,000 or less; and

(2) during the first year after the effective date, against businesses that employ 10 or fewer employees and have gross receipts of $500,000 or less.

In subsection (a) of section 310, strike "subsection (b)" and insert "subsections (b) and (c)".

The **CHAIRMAN**. The gentleman from New York [Mr. LAFALCE] is recognized for 10 minutes.

Mr. **LAFALCE**. Mr. Chairman, I yield myself such time as I may consume.

(Mr. **LAFALCE** asked and was given permission to revise and extend his remarks.)

Mr. **LAFALCE**. Mr. Chairman, the amendment which I am sponsoring jointly with Representative TOM CAMPBELL addresses provisions of the public accommodations title of the Americans With Disabilities Act, H.R. 2273.

Our goal in offering this amendment is to ensure that the ADA is equitable and workable for all who are affected by it. As chairman of the Committee on Small Business, I held a hearing on the ADA in February during which concerns were voiced by small business owners about the potential costs and unfamiliar requirements that compliance with the ADA will entail. I do not suggest that fears of the unknown should freeze us into inaction.

Rather, we should take the time now to address legitimate concerns. Clearly, it is everyone's desire to have the rights of the disabled and the concerns of business hammered out through legislation, not litigation. It is absolutely time to integrate into the economic and social mainstream of America those among us who have felt the stigmas and discrimination a disability can mean.

On the other hand, no one wants a small business to fail because complying with or defending oneself under the ADA requires costly and time-consuming lawsuits or because regulations have not been issued informing businesses about the ADA's requirements.

Our amendment responds to these concerns without altering the scope or the substance of the ADA. Although we recognize that final regulations are often issued long after laws are in effect, we do not seek to delay the effective date of the public accommodations title or tie the effective date to the issuance of final regulations.

This means therefore that there is a strong likelihood that an element of guesswork will be involved when businesses start making the necessary accommodations and alterations in their facilities and practices.

In light of this, our amendment provides a period of protection from civil action for the smallest businesses after the title goes into effect. Small businesses deserve a period of protection—a period without fear of penalty—as they seek to come into compliance with the ADA's requirements—an entirely new aspect of doing business for many of them.

For businesses with 25 or fewer employees and gross receipts of $1 million or less, that period of protection is 6 months; for businesses with 10 or fewer employees and gross receipts of $500,000 or less, the period is 1 year. This is a moderate and fair response to legitimate concerns.

Mr. Chairman, this amendment has the support of Congressman HOYER, the principal cosponsor of the Americans With Disabilities Act; it has bipartisan support in the House; and it has the support of the business community; which wants to comply with the bill. They deserve our support in helping them comply.

I urge adoption of this amendment.

☐ 1520

Mr. **CAMPBELL** of California. Mr. Chairman, will the gentleman yield for the purpose of a very brief colloquy?

Mr. **LAFALCE**. I yield to the gentleman from California.

Mr. **CAMPBELL** of California. Mr. Chairman, as coauthor of the amendment, I wish to clarify the following: Whereas the amendment states that during the first 6 months after the effective date no civil action shall be brought against businesses that fit these specifications, and similarly during the first year, I think the question should be made very clear that for actions or failures to take action during that period a lawsuit could not be brought once the 6 months is over.

Mr. **LAFALCE**. Mr. Chairman, that is absolutely correct. No action could be brought for any action or inaction during either the 6 months or the 1 year period respectively.

Mr. **CAMPBELL** of California. Mr. Chairman, that is my understanding, and I thank the gentleman for yielding.

Mr. **LAFALCE**. Mr. Chairman, I reserve the balance of my time.

The **CHAIRMAN**. Is there any Member seeking recognition in opposition to the amendment?

Does the gentleman from New York [Mr. LAFALCE] wish to use the balance of his time?

Mr. **LAFALCE**. Yes, Mr. Chairman. There are a number of Members who as what the amendment does, and we certainly will not object to it.

Mr. McCOLLUM. Mr. Chairman, I yield to the gentleman from Ohio [Mr. Eckart] for the purpose of a colloquy with the gentleman from Maryland [Mr. Hoyer].

Mr. ECKART. Mr. Chairman, I would like to ask the distinguished gentleman from Maryland if he would comment on a particular aspect of the bill. Sections 104 and 510 of the bill specifically refer to illegal drug use and to individuals who formerly used illegal drugs. I have a few questions about these sections. It is my understanding that each of the professional sports leagues has a policy governing drug use by players. I believe that we in Congress should support and encourage efforts by professional sports leagues to deter drug use by players and others. I would like to know how this bill would affect the drug programs of professional sports leagues.

Mr. HOYER. I agree with the gentleman that the drug programs established by the NFL, NBA, NHL, and major league baseball are an important part of our national effort to combat drug use. I would like to emphasize for the gentleman that these policies have been reviewed and that they are consistent with this act.

Mr. ECKART. Mr. Chairman, it seems to me that our knowledge about drug use and how to deter and treat it is constantly changing. In endorsing the current policies of the professional leagues, does this bill intend to freeze those policies in place?

Mr. HOYER. No. As the gentleman knows, the policies of the sports leagues differ in a number of significant ways and the bill does not specifically approve those and only those programs currently in place. The bill does not prohibit leagues from modifying their programs in response to changed circumstances or developments in medicine, technology, or drug or alcohol treatment.

Mr. ECKART. I thank the gentleman from Maryland [Mr. Hoyer], my colleague, and the gentleman from Florida [Mr. McCollum].

Mr. HOYER. Mr. Chairman, will the gentleman continue to yield?

Mr. McCOLLUM. I yield to the gentleman from Maryland [Mr. Hoyer].

Mr. HOYER. I thank the gentleman for yielding further.

Mr. Chairman, I commend the gentleman on his amendment and join him in its support.

Mr. McCOLLUM. Reclaiming the balance of my time, Mr. Chairman, I just want to comment that the very essence of what we are doing here is clarifying the language so we put the responsibility clearly on the record in the statute with regard to the determination of what essential functions are.

☐ 1620

We do not change, as the gentleman has stated on the other side, the basic thrust or waste of evidence, but we do clarify that the opinion as is in the bill coming before Members today of the employers giving consideration, and where there is a job description with this amendment, it is very clear that job description is admissible in evidence, in addition to the opinion of the employer being allowed into evidence.

I thank the gentleman, and with that kind of consent we should get a favorable vote. I urge the Members to vote yes to the amendment.

The CHAIRMAN. Is there a Member seeking recognition who is opposed to the amendment?

If not, the question is on the amendment offered by the gentleman from Florida [Mr. McCollum].

The amendment was agreed to.

The CHAIRMAN. Pursuant to the rule, it is now in order to consider amendment No. 3 printed in House Report 101-488.

AMENDMENT OFFERED BY MR. OLIN

Mr. OLIN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment offered by Mr. Olin: In section 101, at the end of paragraph (10) (relating to undue hardship), insert the following: "(C) Excessive cost hardship.—For the purpose of this title, it is presumed an undue hardship if an employer incurs costs in making an accommodation which exceeds 10 percent of the salary or the annualized hourly wage of the job in question."

The CHAIRMAN. The gentleman from Virginia [Mr. Olin] will be recognized for 15 minutes, and a Member opposed will be recognized for 15 minutes.

MODIFICATION OFFERED BY MR. OLIN TO THE AMENDMENT OFFERED BY MR. OLIN

Mr. OLIN. Mr. Chairman, I ask unanimous consent to make a technical change in the amendment on line 4 to add the word "annual" before the word salary. It was a typographical error.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

The CHAIRMAN. The amendment is modified.

The text of the amendment, as modified, is as follows:

Amendment offered by Mr. Olin: In section 101, at the end of paragraph (10) (relating to undue hardship), insert the following: "(C) Excessive cost hardship.—For the purpose of this title, it is presumed an undue hardship if an employer incurs costs in making an accommodation which exceeds 10 percent of the annual salary or the annualized hourly wage of the job in question."

Mr. HOYER. Mr. Chairman, will the gentleman yield?

Mr. OLIN. I yield to the gentleman from Maryland.

Mr. HOYER. Mr. Chairman, if the gentleman has no objection, we would like to rise momentarily for the purpose of the majority leader making some announcements, and go right back into Committee.

Mr. Chairman, I move that the Committee do now rise.

The motion was agreed.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. Mfume, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2273) to establish a clear and comprehensive prohibition of discrimination on the basis of disability, had come to no resolution thereon.

PROVIDING FOR CONSIDERATION OF H.R. 3030, CLEAN AIR ACT AMENDMENTS OF 1989

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that on Monday, May 21, 1990, the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3030.

I further ask unanimous consent, Mr. Speaker, that general debate shall be confined to the bill and shall not exceed 8 hours, with 6 hours to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, and with 1 hour to be equally divided and controlled by the chairman and ranking minority member of any committee receiving sequential referral of the bill.

Further, Mr. Speaker, I ask unanimous consent that at the conclusion of general debate, the Committee of the Whole shall rise without motion and any further consideration of the bill shall be determined by a subsequent order of the House.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

HOUR OF MEETING ON TUESDAY NEXT

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that on Tuesday, May 22, 1990, that the hour of meeting of the House be 10 a.m.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

REQUEST FOR WAIVER OF POINTS OF ORDER AGAINST H.R. 3030, CLEAN AIR ACT AMENDMENTS OF 1989

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that there be a waiver of points of order against consideration of H.R. 3030.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

Mr. WAXMAN. I yield to the gentleman from Maryland.

Mr. HOYER. In response to the gentleman's question, clearly the conferees intend the language to address the real concerns of health, not the speculative, theoretical, or fearful ones. We do not expect the Secretary to prove that a disease is not transmitted by food, but, rather, to find that there is medical evidence that a disease is transmitted and put that disease on the list.

Mr. WAXMAN. If I may continue, the language also specifies that if an individual has a disease on this list that an employer may refuse assignment of that individual to a job of food handling if the disease cannot be accommodated. By that, does the gentleman mean that the disease must be actually cured or that reasonable accommodation must eliminate the risk of the disease to the public?

Mr. HOYER. If the gentleman will yield further, the accommodation, in response to the gentleman's question, should eliminate the risk of disease to the public. That is its objective. The statement of the managers is clearly on this point. Clearly we cannot insist that disabled people become undisabled, just that the risk to the public be eliminated through reasonable accommodation.

Mr. WAXMAN. Finally, let me ask about the preemption provisions of the language. This provision is crafted to allow State and local law to stand if it is about the same issues as the food-handler language. Does this mean that a local or State government can assert that any food-handling regulation is protected, or does this protection only cover those provisions that are legitimately in conformity with the Secretary's findings and list?

Mr. HOYER. If the gentleman will yield further, clearly the State and local standards, I would say to the gentleman from California, must meet the same sort of standards as the Secretary's list. It should reflect sound medical and scientific judgment, reasonable public health methods, and should protect the public from health risks. Simply asserting that a law is for public health will not be enough to protect it from preemption.

Mr. WAXMAN. I thank the gentleman, and I congratulate the conferees on sorting out this issue to make good public health policy while making good antidiscrimination policy as well. I thank the gentleman for his efforts.

Mr. Speaker, I rise in support of the conference report on the Americans With Disabilities Act. This is a historic piece of civil rights legislation for people with disabilities who have waited much too long for this type of important protection.

This legislation also comes at a critical point for people with HIV disease. I am, therefore, particularly pleased that the Chapman amendment has been deleted from the bill and that a provision which reinforces the existing requirements of the ADA—that individuals who pose a significant risk to the health or safety of others which cannot be eliminated by reasonable accommodation are not protected by the act—has been substituted in its stead. I am confident that the Secretary, through the Centers of Disease Control, will carry out well the mandated job of developing a list of diseases that are, in fact, transmitted through the food handling process.

People with HIV disease are those who have the spectrum of the disease—from asymptomatic HIV infection, to symptomatic HIV infection, to full-blown AIDS. As medical knowledge has increased, specialists in the field increasingly recognize that there exists a continuum of disease among those who are HIV infected. All such individuals are covered under the first prong of the definition of disability in the ADA.

Others have noted how important it is that the ADA maintains the same broad, flexible definition of disability that is used to define "handicap" in section 504 of the Rehabilitation Act of 1973. It was particularly important for people with HIV disease that section 504 did not list a series of diseases and conditions that were covered—because HIV disease was not even discovered in 1973. Because section 504 incorporates a description of "handicap," and not a list of diseases, people with HIV disease were covered under section 504 from the first that they have needed the protection of that act.

But section 504 does not have a sufficient reach to protect people with HIV disease in the various settings in which such individuals encounter discrimination. Now, with final passage of the ADA, such individuals will receive needed protection in private employment and in the whole range of public accommodations in which they often face discrimination.

The ADA's employment provisions offer important protection for people with HIV disease. It will protect them in the range of employment decisions—hiring, firing, promotions, and all terms and conditions of employment. The reasonable accommodation provisions of the bill will be particularly important in ensuring that people with HIV disease have the right to flexible work schedules and to time off to accommodate their treatment needs or their various disease-related conditions. In addition, the ADA precludes an employer from denying an employment opportunity to an individual with HIV disease based on paternalistic concerns that the employee might be exposed to additional health risks. That is an issue to be discussed and decided between the individual employee and his or her physician.

I am also pleased that the ADA has incorporated strong provisions with regard to preemployment and on-the-job testing. While medical examinations may be given to job applicants, they may be given only after a conditional job offer has been made, they must be given to all applicants—thus, an employer cannot require just certain applicants to take a medical test—the results of the test must be kept strictly confidential, and—of greatest importance to people with HIV disease—the results of the exam may not be used to withdraw a conditional job offer unless the results indicate that the person is not qualified for the job. Under current medical and scientific judgment, including guidelines issued by the Centers for Disease Control [CDC], people with HIV disease are qualified to remain in virtually all jobs in the work force.

In addition, the ADA clearly sets forth the requirements with regard to medical testing of current employees: such exams must be job related and consistent with business necessity. The purpose of this provision is to ensure that employees are not unnecessarily subjected to tests that would expose their disabilities. Again, under current medical and scientific judgment, including the CDC guidelines, HIV testing is not justified in virtually any job in the work force.

While the ADA explicitly does not affect the underwriting and classification of insurance, the employment title of the ADA still offers significant protection with regard to the nondiscriminatory provision of health benefits. The reports of the House Education and Labor Committee and the House Judiciary Committee spell out this protection. Essentially, the ADA does not interfere with underwriting and classification of insurance. However, employers may not refuse to hire an applicant because of a feared increase in insurance costs. In addition, an employee with a disability must receive health insurance from the employer, if the employer is offering health insurance to other employees. While limitations are allowed on procedures and treatments, a person with a disability must still be able to receive basic coverage for the person's disability. Thus, the limitation may legitimately apply to particular treatments or procedures, but may not preclude coverage for a disability completely.

Finally, the bill explicitly notes that the exception for insurance underwriting may not be used as a subterfuge to evade the purposes of the ADA. I have been informed by those Members who are closely involved in the legislation to overturn the decision of the Supreme Court in *Public Employees Retirement System of Ohio v. Betts*, 109 S.Ct. 256 (1989) that the term "subterfuge" in the ADA should not be read as the Supreme Court read that term in Betts. Thus, there is no requirement of an intent standard under the ADA or a blanket exception for insurance plans that were adopted prior to the enactment of the ADA.

The public accommodations title of the ADA will also offer necessary pro-all people with disabilities, including people with HIV disease. Another group of people with disabilities who will benefit are those who have been identified as carriers of a disease-associated gene. The advent of new genetic testing makes it critical that such individuals be protected against unjustified discrimination. Under the ADA, such individuals may not be discriminated against because of fears of increased health care costs that they or their children might incur. Moreover, such individuals may not be discriminated against based on the assumption that they will become sick in the future and will not be qualified to do their jobs. Determinations regarding whether a person is a "qualified person with a disability" must be made at the time of the employment decision, and not be based on speculations regarding the future.

Title III of the ADA will also offer important protection for people with HIV disease. This title prohibits the range of service providers and businesses from discriminating against people with HIV disease. The title also prohibits public accommodations from having eligibility criteria that screen out, or tend to screen out, people with disabilities, unless such criteria are demonstrated by the accommodation to be necessary for the provision of the goods or services. Thus, for example, a hotel or a lawyer's office or any other public accommodation could not require that a person be HIV-negative—or could not test that person for HIV—unless the accommodation showed that being HIV-negative was necessary for the provision of the goods or services. Based on the current guidelines issued by the Centers for Disease Control, I cannot think of any such circumstance.

This is a proud day for the Congress. We do not often have an opportunity to take truly historic actions, to benefit millions of Americans. By voting to adopt the conference report, the House takes its final step to send to the President an extraordinary law to bring 43 million Americans with disabilities into the mainstream of American life.

Mr. Speaker, there are few of us who have not been personally touched by family or friends with a disability. We all know how persons with disabilities are rarely judged by their abilities, but instead on their disabilities. The ADA will go a long way toward changing this situation.

For Americans with disabilities the ADA represents a pivotal opportunity to join in the American dream. We should send the ADA to the President today. Forty-three million Americans, their families and friends, deserve no less.

Mr. HOYER. Mr. Speaker, I understand the time of the gentleman on the other side has expired, and as a result I yield 1 minute to the gentleman from Texas [Mr. CHAPMAN].

(Mr. CHAPMAN asked and was given permission to revise and extend his remarks.)

Mr. CHAPMAN. Mr. Speaker, I sincerely appreciate the gentleman yielding me this time.

I want to take just this 1 minute to explain why I will be voting for the motion to recommit. Normally I would not do that, but in this case in addition to the difference being the Chapman amendment on this legislation, I think it is important that the House understand that the conference committee ignored the will of the House in the vote of the conferees from the House on the Chapman amendment, and the conferees from the Senate ignored the instruction of the Senate on the Chapman amendment.

Simply put, my colleagues, the conference committee thwarted the will of the majority of the U.S. Congress. I think for that reason it is altogether fitting and proper and appropriate that those who supported the Chapman amendment in the House can vote and should vote for the motion to recommit.

The SPEAKER pro tempore. The time of the gentleman from Texas has expired.

Mr. HOYER. Mr. Speaker, I yield 15 additional seconds to the gentleman.

Mr. BARTLETT. Mr. Speaker, will the gentleman yield?

Mr. CHAPMAN. I yield to the gentleman from Texas.

Mr. BARTLETT. Mr. Speaker, I would concur with the gentleman on the narrow issue of the motion to recommit on food handling. The gentleman from Texas [Mr. CHAPMAN] is correct. I plan to vote for the motion to recommit also. If that fails, I do plan, regardless of that, I do plan to vote for final passage.

Mr. CHAPMAN. Mr. Speaker, I appreciate the gentleman's statement.

Mr. HOYER. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. MINETA], the chairman of the Subcommittee on Surface Transportation of the Committee on Public Works and Transportation. The gentleman has been one of the major leaders on this legislation.

(Mr. MINETA asked and was given permission to revise and extend his remarks.)

Mr. MINETA. Mr. Speaker, first of all, I wish to really commend my colleague, the gentleman from Maryland, among others who have been working on this bill, but especially to the gentleman from Maryland [Mr. HOYER] for his untiring efforts, and to Melissa Schulman, Roger Slagle, from our staff, Phyllis Guss, and Suzanne Sullivan, from my staff.

Mr. Speaker, disabled Americans are ready, willing, and able, to use their talents, skills, and energy in our communities; but full access to our society, including our transportation systems, is essential if disabled Americans are to realize their potential of becoming self-reliant, productive members of our society.

Make no mistake. The Americans With Disabilities Act is a matter of civil rights.

Our Nation has a tradition of responding to the needs of those among us who have been denied equal opportunity.

This is a great principle, and I believe we must work together to ensure that this legislation retains this commitment to civil rights, and that is why I am particularly troubled by the motion to recommit with instructions by our colleague, the gentleman from California [Mr. DANNEMEYER].

Let us not allow this procedural vote which is based on fear and ignorance and which is opposed by every major public organization including the National Restaurant Association and every major public health organization keep us from granting independence to all Americans in this great country of ours including those with disabilities.

Mr. Speaker, I strongly urge a no vote on the motion to recommit and a yes vote on final passage.

Mr. HOYER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would ask the gentleman from California; a question has been raised regarding the effect of section 102(b)(2) of this conference agreement on the collective-bargaining rights of members of labor organizations.

Is it the understanding of the gentleman that this legislation would not restrict or affect these rights?

Mr. MINETA. Mr. Speaker, will the gentleman yield?

Mr. HOYER. I yield to the gentleman from California.

Mr. MINETA. Mr. Speaker, the gentleman from Maryland is correct. Let me assure the gentleman that nothing in the ADA is intended to restrict or prohibit labor organizations and employers from entering into collective-bargaining agreements or labor-protective arrangements including those required under section 13(c) of the Urban Mass Transportation Act.

Mr. HOYER. Mr. Speaker, I thank the gentleman for his comments.

Mr. Speaker, I yield such time as he may consume to the gentleman from California [Mr. WAXMAN], chairman of the Subcommittee on Health of the Committee on Energy and Commerce, one of the Members who is a giant in health care for all Americans and who has himself been a leader on this legislation.

(Mr. WAXMAN asked and was given permission to revise and extend his remarks.)

Mr. WAXMAN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in support of this historic civil rights legislation.

I would like to engage the gentleman from Maryland in a colloquy.

The conferees adopted the Hatch amendment regarding the food handlers, and it would provide a list to be published by the Secretary of diseases which are transmitted through handling the food supply. By that language, does the gentleman mean that the list should contain every disease which, in theory, might possibly be transmitted, or does it mean the list to contain the best scientific and medical judgment of what is a real risk to the public?

Mr. HOYER. Mr. Speaker, will the gentleman yield?

guarantee individuals with disabilities the right to be integrated into the economic and social mainstream of American society. These are the things TOM HARKIN stands for. These are the messages of the Americans With Disabilities Act.

Our colleague, Senator TOM HARKIN, has earned over 30 national awards for his service to people with disabilities since 1986. While these awards demonstrate the respect, affection and appreciation of the disability community for Senator HARKIN, the awards also represent TOM HARKIN's collaboration with a disability community that has become stronger and more united because of these collaborations.

Senator HARKIN has frequently pointed out that the Americans With Disabilities Act is also the product of political collaboration.

Throughout this legislative process, leaders on both sides of the aisle and President Bush have worked diligently together in the interests of people with disabilities. In this sense, the ADA represents one of our proudest moments in the U.S. Senate.

So, Mr. President, I know that all of my colleagues will join with me in congratulating Senator TOM HARKIN for his leadership in making the Americans With Disabilities Act the law of the land.

SECTION 506

Mr. SIMON. I would like to clarify with my colleagues a matter concerning the role of the National Council on Disability Policy in providing technical assistance under the ADA. In section 506(a)(1) of S. 933 the Attorney General of the United States is instructed to "develop a plan to assist entities covered under this Act, along with other executive agencies and commissions, in understanding the responsibility of such entities, agencies, and commission under this Act."

The Senate bill states that his plan shall be developed "in consultation with * * * the national Council on Disability" (among others). Section 506(b)(2) of the House bill states that the "Attorney General may obtain the assistance of * * * the National Council on Disability * * *", but his consultation is not required.

If the chairman of the Subcommittee on Disability Policy would respond on this, I believe we agree that it is of the utmost importance that the Attorney General consult the National Council on Disability in developing the technical assistance plan.

Mr. HARKIN. The Senator is correct. The National Council on Disability played a major role in crafting the original Americans With Disabilities Act. Throughout the process they have gained additional expertise that should be shared with the Attorney General and other agencies. It is critical that the newly covered entities are assisted in understanding their roles and responsibilities under this law. The National Council on Disability will work with these agencies to ensure that the civil rights envisioned in the ADA are fully protected and realized.

Mr. INOUYE. If I may join my colleagues in emphasizing this matter, the National Council on Disability has insight that will vitally enhance discussion and development of this technical assistance plan. The 15 council members are appointed by the President. The majority of them are disabled or are parents of children with disabilities. They have a unique perspective to bring to the debate, and we want to make clear that we fully intend that the Attorney General consult them in this capacity. It is clearly the sense of the Senate that this consultation occur, and the conference report confirms the intent of conferees that such consultation is necessary and important.

Mr. HATCH. Mr. President, if the Senator from Iowa will yield for a question, I inquire about the effect of the pending legislation on drug testing and deterrence programs conducted by professional sports leagues. As the principal Senate sponsor of this bill, and chairman of the subcommittee of jurisdiction, will the Senator clarify the effect of the pending legislation on those programs?

Mr. HARKIN. Mr. President, the conferees recognize that professional sports organizations have promulgated policies to deter and treat substance abuse among athletes. We believe these policies serve to maintain the integrity of sports competition and are in the public interest. The policies generally provide that, in certain circumstances, an athlete may be dismissed from competition for violating the organization's substance abuse policy following an opportunity to obtain treatment. The question of how the bill relates to those policies was initially raised during House consideration of this measure. The House Committee on Education and Labor reviewed the policies in light of this legislation and found that the policies are entirely consistent with the nondiscrimination provisions of the bill. The statement of managers which accompanies this conference report makes clear that the conferees embrace this view and this is also my own view.

Mr. HATCH. If the Senator will yield further, during House floor debate the House floor manager was asked whether the bill was intended to freeze current policies in place. He replied that this measure does not prohibit leagues from modifying their programs in response to changed circumstances or developments in medicine, technology, or drug or alcohol treatment. What is the Senator's understanding in this regard?

Mr. HARKIN. I am familiar with the colloquy to which the Senator refers and I concur with the position expressed by the House floor manager.

Mr. HATCH. I concur with the understanding expressed by the Senator on all these points, and I thank the Senator.

Mr. KENNEDY. A question has been raised as to whether section 102(b)(3) of the act limits the right of affected parties to negotiate collective bargaining agreements or labor protection agreements which address the terms and conditions under which para transit services required by the act are to be provided.

Mr. HARKIN. Let me assure the Senator that nothing in the act, including section 102(b)(3), or the regulations issued thereunder, shall interfere with the right to negotiate or otherwise prohibit labor organizations and employers from entering into collective-bargaining agreements or labor protective arrangements, including those required under section 13(c) of the Urban Mass Transportation Act, which set forth the terms and conditions under which the para and other specified transit services required by the act are to be provided and/or operated.

Mr. CHAFEE. Mr. President, I would like to express my strong support for the conference report on the American With Disabilities Act [ADA].

For too long, our Nation's citizens with disabilities have been subject to discriminatory practices in many aspects of their lives. This discrimination has led to the segregation and isolation of countless persons with mental and/or physical impairments in our country.

Many of us in the Senate have devoted considerable time or effort to reform the Medicaid Program in order to foster increased community-based services for people with mental retardation and developmental disabilities. During the course of my work on Medicaid reform, I have heard from numerous families and individuals who have recounted instances of blatant discrimination.

It is incredible to me that families with a member who is mentally retarded have been refused service in a restaurant because the owner fears that other customers might be offended or uncomfortable eating near that family. Yet, such a practice is not only common, it is perfectly legal. I have heard of similar situations in movie theaters, libraries, bowling alleys, and shopping centers. Think of how those families and individuals with disabilities must feel when they are faced with this type of discrimination. Surely, their vision of a free and just society is shattered.

In addition to the problems I have heard of regarding public accommodations, there are countless other stories of discrimination in employment and transportation. There are thousands of qualified persons with disabilities who are ready and able to work. Yet, as hard as they try to find a job, they are often unsuccessful because employers won't hire them simply because they are disabled. Of those that
